FOREIGN AND INSULAR.

BARBADOS.

Further concerning smallpox.

BARBADOS, WEST INDIES, *March 31, 1902.*

SIR: I have the honor to inform you that 10 cases of smallpox among the colored people have occurred in the last few days, but the disease has not become epidemic.

I inclose herewith copies of correspondence with the clerk of the general board of health for this colony and a copy of a circular letter just published.

All of the patients have been placed in the quarantine hospital located on Pelican Island, a small island a short distance from the mainland.

All of the ports of the adjacent islands have established quarantine against Barbados on account of smallpox, and steamers going to such ports refuse to take passengers thereto. The ports against which quarantine has been declared at this port appear in the communication to me by the clerk mentioned. Cargoes are loaded and unloaded here as heretofore.

If the disease should become epidemic I will notify the Department by cable, according to the provisions of the consular regulations.

Passengers are accepted from here on steamers bound to the United States or Great Britain, provided that there be no stoppages at adjoining ports where quarantine has been declared against this colony.

Respectfully,

S. A. MACALLISTER,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

[Inclosures.]

BARBADOS, WEST INDIES, *March 29, 1902.*

SIR: It is currently reported that cases of smallpox exist in this colony. For my guidance in making reports to my Government, and in granting bills of health, I respectfully request that during the prevalence of contagious or infectious diseases, your honorable board will furnish to me, daily, official information as to number of cases under treatment and number of deaths, if any. I shall also be obliged to receive a report showing the names of places which have been or hereafter may be declared by your board infected ports, with nature of diseases prevailing at such ports. Any other information you may deem useful to me in the proper discharge of my consular duties will be gratefully received.

Respectfully,

S. A. MACALLISTER,
United States Consul.

Mr. JAMES SANDERSON, *Clerk of Board of Health.*

BRIDGETOWN, BARBADOS, *March 31, 1902.*

SIR: In reply to your letter to me of the 30th (?) instant, I am forwarding you herewith a circular, which I am sending to-day to the quarantine boards of the several British colonies out here, and which will give you full particulars in respect to the recent cases of smallpox. This circular is also being sent by me to Surg.-Gen. Walter Wyman, in charge of the U. S. Marine-Hospital Service at Washington, to whom it has

been my practice to communicate any quarantine matters occurring here or in the West Indies. I will give you any further information which you may require.

The places now quarantined by this colony are: Colon, Panama, Para, Pernambuco, Rio de Janeiro, and St. Jean, St. Laurent and Mana in French Guiana for yellow fever and smallpox, and Bombay, Calcutta, Cape of Good Hope, Hongkong, Manila, Mauritius, Naples, Oporto, Port Said, and Rio de Janeiro for plague.

Respectfully,

JAS. SANDERSON,

Clerk General Board of Health and Quarantine Board.

GENERAL MACALLISTER, *United States Consul, Barbados.*

Circulars sent to quarantine boards and consuls in West Indies.

BARBADOS, WEST INDIES, *March 31, 1902.*

On the evening of the 21st instant 1 of the parochial medical officers for Bridgetown was called to see a woman named Florence Hope, residing in an isolated hut on Brittons Pasture, about $1\frac{1}{2}$ miles from town. He found her suffering from smallpox, and on the following morning she, and all those in the house with her, were sent to the quarantine hospital, and the hut and its contents burnt. Immediate steps were taken to ascertain who had been in contact with Hope, and as fast as those persons were discovered they were sent to the quarantine station, and no effort is being spared to ascertain if any other persons had been in contact with her, and if so to get hold of them.

Hope lived in Chelsea Lane, quite near to Millar, the man mentioned in my circular of February 25 as having been landed from Halifax by the steamship *Oruro* with smallpox, and she is believed to have been 1 of those who came in contact with him, but got away when she found all "contacts" were being sent to the quarantine station.

On the 27th instant a woman named Harewood, living next door to Millar's residence, developed smallpox, and was at once sent to the quarantine station; and on the 29th another woman, from Sobers Lane, a suburb of Bridgetown, was sent to the quarantine hospital, thought to be suffering from that disease, but it is doubtful if it is not glass pox.

The total number of persons at the quarantine station last night was 38, of whom 10 have smallpox, 1 supposed smallpox, and 27 "contacts." The 8 persons with smallpox, other than Hope and Harewood, are Hope's mother, 3 children, 3 sisters, and a connection.

Every effort has been and still is being made by my board to keep this outbreak localized, and a medical man and a sanitary inspector patrol Chelsea Lane and Brittons Hill every day.

The bills of health are being indorsed. All the royal mail and other steamers have quarantined the port.

Should your colony impose quarantine against arrivals from here will you let me know by first steamer coming this way?

1. What will be the length of the quarantine period, and will it count from the day the vessel or persons leave here?

2. In the case of persons, will they have to undergo their quarantine at a station, or on a vessel?

3. If at a station, will there be separate accommodation for men and women—first, second, and third (deckers) class?

4. What will be the charge per person, per day, for each class, and will that charge cover everything? If not, for what will extra charges be made, and what will they be?

5. Will a vessel with passengers and cargo from here be admitted to pratique, on getting rid of passengers, and (or) cargo?

6. Will a vessel loaded here in quarantine and taking a certificate to that effect be admitted to free pratique, should she have no person on board from here?

When replying please affix the number of the question to the answer.

St. Jean and St. Laurent du Maroni and Mana, in French Guiana, have been declared infected with yellow fever; Cayenne will probably be so declared at the next meeting of my board.

JAS. SANDERSON,
Clerk, Quarantine Board.

Smallpox under control.

BARBADOS, WEST INDIES, *April 3, 1902.*

SIR: I have the honor to inform you that only 1 case of smallpox occurred here since March 30.

It is generally believed that there is no further danger of the disease spreading. There are now 11 cases isolated at Pelican Island, the quarantine station.

There has been but 1 death—that of a man who contracted the disease at Halifax and introduced it here. He died about four weeks ago.

There is no danger at present that the disease will become epidemic.

Respectfully,

S. A. MACALLISTER,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

BRITISH GUIANA.

Yellow fever at Paramaribo and Cayenne.

DEMARARA, BRITISH GUIANA, *March 29, 1902.*

SIR: I have to state for the further information of the Department, concerning yellow fever at Paramaribo and Cayenne as per my cables of January 16 and March 27, that at Paramaribo, up to March 1, there were 31 cases and 21 deaths from the disease. There were no new cases between March 1 and the morning of March 24 when clean bills of health were issued.

On the afternoon of the same date the physician in charge of the hospital was taken ill with the fever.

The acting United States consular agent at Paramaribo, who is the British consul there, advised this office on the 27th that the British vice-consul at Cayenne had reported 34 cases and 23 deaths in that colony, viz, 32 cases and 21 deaths in the Maroni district at St. Laurent, 1 case and 1 death at Mana, and 1 case and 1 death at the port of Cayenne. Quarantine regulations exist at this port against shipping from both Paramaribo and Cayenne.

Respectfully,

GEO. H. MOULTON,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

CANADA.

Smallpox in New Brunswick and Quebec.

DEPARTMENT OF STATE,
Washington, D. C., April 14, 1902.

SIR: I have the honor to inclose for the information of the U. S. Marine-Hospital Service, copy of a dispatch from the commercial agent at Rimouski in regard to the prevalence of smallpox in New Brunswick and the Province and city of Quebec.

Respectfully,

DAVID J. HILL,
Acting Secretary of State.

HON. SECRETARY OF THE TREASURY.

[Inclosure.]

RIMOUSKI, QUEBEC, *April 7, 1902.*

SIR: Dr. J. A. Pineault, deputy health inspector for the counties of Gaspé and Bonaventure, informed me he had just been on an inspection through those 2 counties and found the smallpox well scattered through the small towns, especially along the shores of Baie des Chaleurs. In one small place in Gaspé County he found 61 cases, and in one place in Bonaventure County with over 100 cases.

I inclose a clipping from the Montreal Star in regard to smallpox in the city of Quebec. As this city is visited by a very large number of Americans in the summer,

and Baie des Chaleurs by salmon fishermen in the spring, they should have notice of this before exposing themselves to the danger of smallpox. * * *

Respectfully,

CHARLES A. BOARDMAN,
United States Commercial Agent.

HON. ASSISTANT SECRETARY OF STATE.

CHINA.

Cholera in Canton.

(No. 161.)

CANTON, CHINA, *February 24, 1902.*

SIR: I am sorry to have to report to you that cholera, of the true Asiatic type, has made its appearance in Canton. The following report thereon has been presented to me by Dr. John M. Swan, of the American Medical Mission:

CANTON, CHINA, *February 24, 1902.*

SIR: I have the honor to report to you that within the past few days there have come to my notice at least 3 bona fide cases of cholera. While isolated from each other and of rather sporadic form, yet the fatal termination in each case, after manifesting the ordinary symptoms of true Asiatic cholera, leads me to the opinion that we should be on the sharp lookout for any further spread of this fatal disease in Canton.

True Asiatic cholera is so rare in this vicinity that its appearance is likely to cause alarm. Hence the importance of facts rather than rumor alone, so I shall endeavor to keep you posted in regard to any further developments relating to the presence of cholera. There is much complaint by the Chinese with regard to the water they are now obliged to use, many of the wells in the city having failed. If rain comes soon and the water supply improves, I think there is little danger of a real cholera outbreak. If there is no rain within the next few weeks we may expect to see a good many cases of the disease.

Respectfully,

JOHN M. SWAN,

Surgeon in Charge of Medical Mission Society's Hospital.

HON. ROBERT M. MCWADE, *United States Consul, Canton.*

Dr. Swan is one of the most eminent physicians in China, and has had considerable experience in the treatment of the plague, cholera, smallpox, leprosy, and other diseases peculiar to the East. He is most conservative in his statements, and any official report emanating from him ought to be accepted unhesitatingly.

We have had no rain in this section for several months, and, apart from the possibility of the rice crop being ruined by the drought, and much suffering, a famine may be entailed thereby. Medical men and others who have been residents of Canton for many years fear an early outbreak of the plague if we do not soon have heavy rainfalls. The water of the Canton River and of the wells in Shameen and Canton has a decided saline taste, and all of the tributary rivers and creeks are very low. I am glad to be able to inform you, however, that there has not been a case of plague in Canton or its immediate vicinity this season. Mr. F. A. Morgan, commissioner at this port of the imperial Chinese maritime customs, reported to me this morning that a number of bodies of Chinese victims of the plague and several patients in its last stages have been quietly sent here by the authorities of Hongkong within the past few days. On arrival here the bodies are immediately buried in hermetically sealed coffins by the members of the 2 Chinese benevolent organizations, the Oi Yuk Tong and the Kwong Sai native hospital.

The latest reports from Shui Tung are that the plague is still prevalent there and that upward of 400 deaths therefrom have occurred in that locality.

I herewith confirm the following cablegram sent to-day relating to the foregoing:

SECRETARY OF STATE, *Washington, D. C.*: Several deaths Asiatic cholera, Canton. No plague.—MCWADE.

Respectfully,

ROBERT M. MCWADE,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

CANTON, CHINA, *March 3, 1902.*

SIR: In further continuation of my No. 161, regarding an outbreak of cholera, I have the honor to report as follows:

On Friday, February 28, 1902, I learned through several reliable sources that a large number of deaths had occurred through cholera in the most densely populated portion of Canton. On that date 2 deaths of Europeans occurred in Shameen, 1 young Englishman employed in the Chinese imperial maritime customs service and the other Lieut.-Commander E. A. Baird, of H. B. M. gunboat *Britomart*. On the previous afternoon Baird was playing tennis; on that night he dined with some friends in Shameen and returning to his boat before midnight was suddenly attacked with acute pain; he shortly afterward became unconscious and his death occurred ten hours later.

I cabled you on that date as follows:

SECRETARY OF STATE, *Washington, D. C.*: Asiatic cholera increasing. Captain Baird, British gunboat *Britomart*, victim.—MCWADE.

I have to-day, March 3, 1902, received the following official report from Dr. John M. Swan, which fully explains itself:

CANTON, CHINA, *March 3, 1902.*

SIR: Referring to my letter to you of February 23, in which I reported that I had up to that date seen 3 cases of true Asiatic cholera in Canton, I have now to report that during the past week I have seen 3 more cases, each of them in the algid stage when I first saw them and each proving fatal. I have also received reliable information as to the existence of 10 other cases, all of them ending fatally. The cause, in each of the cases I have seen, and in several of the other cases reported to me, was either due to drinking unboiled river water or partaking of pork that had previously been injected with river water. I have been making careful inquiry as to the prevalence of cholera in and about Canton but can get no information showing that the disease is generally prevalent or that there are more than 1 or 2 cases occurring in any one locality. There is no evidence as yet that the disease is epidemic. In fact many of the Chinese to whom I have addressed inquiry seem to have no knowledge of the prevalence of cholera. I have also not been able to hear of a single case of plague thus far this year.

Respectfully,

JOHN M. SWAN, M. D.,
Surgeon in Charge of Medical Missionary Society's Hospital.

HON. ROBERT M. MCWADE, *United States Consul.*

I have also the honor to add that Superintendent Lindberg, of the municipal police, reported to me this morning that for the past eight days upward of 30 deaths have occurred daily through cholera in that part of Canton immediately adjoining the little creek which divides Shameen from Canton.

The deaths in almost every instance are directly traceable to the river and well water which the natives use without boiling. In the case of Lieutenant Commander Baird, however, he admitted before becoming unconscious that he had drunk some milk which had not been boiled. Almost all the wells in the city are dried up and whatever water is obtained from them is foul smelling and has a stale, salty taste. Of the

water in the Canton river, same description will apply. No rain has fallen here for months; the creeks are drying up rapidly. The rice crop will likely prove a total failure unless heavy rainfalls occur within the next few days. Although this is termed the rainy season, it is the driest season experienced in south China for the last seventeen years.

Respectfully,

ROBERT M. MCWADE,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

COSTA RICA.

Yellow fever at Limon.

[Cablegram.]

LIMON, COSTA RICA, *April 17, 1902.*

Three cases yellow fever, death yesterday.—CARSON.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CUBA.

Reports from Cienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, *April 14, 1902.*

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to transmit the following weekly report of transactions in the district under my command, for the week ended April 12, 1902: Eighteen deaths have occurred in this city. Of these, 8 occurred in the civil hospital. No contagious diseases reported. Causes of death: Tuberculosis, 4; insufficiency, mitral, 3; paludism, 2; myelitis, 1; enteritis, 1; gangrene, 1; cancer, 1; congenital debility, 1; tetanus, infantile, 1; hemorrhage, cerebral, 1; pernicious fever, 1; Bright's disease, 1. Death rate per 1,000 inhabitants, 23.46. Eleven vessels inspected and passed, granted free pratique; 4 vessels admitted without inspection; 13 alien steerage passengers inspected and allowed to land, and 17 bills of health issued to vessels prior to departure.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 7 deaths in the city of Trinidad. No contagious diseases reported; 12 vessels inspected and passed, granted free pratique; 11 bills of health issued to vessels prior to departure, and no alien steerage passengers landed at that port.

Santa Cruz del Sur.—Acting Asst. Surg. Pedro M. Quevedo reports, for the week ended March 29, no deaths at that port, and 5 vessels inspected and passed, granted free pratique; 3 bills of health issued to vessels prior to departure, and no alien steerage passengers landed at that port.

Santa Cruz del Sur.—Acting Asst. Surg. Pedro M. Quevedo reports, for the week ended April 5, 1 death at that port. No contagious diseases reported in that vicinity; 5 vessels inspected and passed, granted free pratique; 6 bills of health issued to vessels prior to departure, and no alien steerage passengers landed at that port. Recapitulation of weekly reports from Santa Cruz del Sur for the month from February 23 to March 29 as follows: one death at that port; no contagious diseases

reported; 24 vessels inspected and passed, granted free pratique; 23 bills of health issued to vessels prior to departure, and no alien steerage passengers landed at that port during period.

Respectfully,

FELIX GIRALT,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Matanzas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, April 10, 1902.

SIR: I have the honor to transmit herewith the usual report of the transactions of the Service in the second quarantine division of the island of Cuba for the week ended April 5, 1902.

Thirteen deaths were reported in the city of Matanzas during the period covered by this report. The principal causes of death were as follows: Broncho-pneumonia, 3; congenital debility, 2; heart disease, 2; entero-colitis, 1; meningitis, 1; malignant pustule, 1; other causes, 3. The annual death rate per 1,000 was, therefore, 13.97. Six vessels entered the port during the week, 2 of which were inspected and passed and 4 passed without inspection. Five bills of health were issued. One case of varicella was reported by the municipal health authorities.

Cardenas.—Acting Asst. Surg. Enrique Saez reports the entry of 12 vessels during the week at the port of Cardenas, and that 13 bills of health were issued during the same period. Eleven deaths were reported by the municipal authorities, indicating a death rate of 23.10 per 1,000 per year.

Isabela de Sagua.—Acting Asst. Surg. Garcia Riera reports the entry of 18 vessels, 4 of which were inspected and passed. Thirteen bills of health were issued during the week. Seven deaths were reported, showing a mortality of 17.11 per 1,000. No case of a particularly contagious character was reported.

Caibarien.—Acting Asst. Surg. Leoncio Junco reports the arrival of 9 vessels, all of which were passed without inspection. Seven bills of health were issued. Three deaths were reported, showing a death rate of 18.10.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.,

In Command.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

Reports from Nuevitas, Puerto Padre, Gibara, Banes, and Baracoa.

NUEVITAS, CUBA, April 7, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit the following report for the quarantine district under my command, for the week ended April 5, 1902:

Six vessels arrived at this port and 7 bills of health were issued to vessels prior to departing. The mortuary report for the week is 1 death, due to pulmonary tuberculosis, and the sanitary condition is good.

Puerto Padre.—Report shows the arrival of 5 vessels, the issuance of 6 bills of health, 2 deaths—pulmonary phthisis, 1; typhoid fever, 1—and good sanitary condition.

Gibara.—Reports show 9 arrivals, 10 bills of health issued, no deaths, and good sanitary condition.

Banes.—Report shows 4 arrivals and good sanitary condition.

Baracoa.—Report delayed.

No quarantinable disease is reported at any point in the district.

Respectfully,

OWEN W. STONE,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

NUEVITAS, CUBA, April 7, 1902.

SIR: I have the honor to submit inclosed reports of transactions at some of the subports of the quarantine district under my command, as follows:

Baracoa.—Weekly report of vessels arrived, weekly abstract of bills of health issued, and weekly report of arrival of alien steerage passengers for the week ended March 29, 1902, also report of immigrants inspected in the month of March, 1902.

Gibara.—Report of immigrants inspected in the month of March, 1902.

Puerto Padre.—Report for the week ended April 5, 1902.

Respectfully,

OWEN W. STONE,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Nuevitas, Puerto Padre, Gibara, and Baracoa.

NUEVITAS, CUBA, April 14, 1902.

SIR: Through the chief quarantine officer for the island of Cuba. I have the honor to submit the following report for the quarantine district under my command, for the week ended April 12, 1902:

Eight vessels arrived at this port and 7 bills of health were given to vessels prior to departing. The mortuary report shows 1 death from enteritis. The sanitary condition is good.

Puerto Padre.—Report shows the arrival of 4 vessels, 4 bills of health issued, 2 deaths; tuberculosis, 1; inanition, 1, and good sanitary condition.

Gibara.—Report shows 15 vessels arrived, 12 bills of health issued, no deaths and good sanitary condition.

Baracoa.—Report shows 6 vessels arrived, 5 bills of health issued, 3 deaths—pulmonary tuberculosis, 1; valvular insufficiency, 1; ill-defined cause, 1—and good sanitary condition.

No quarantinable disease reported at any point in the district.

Respectfully,

OWEN W. STONE,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

NUEVITAS, CUBA, April 14, 1902.

SIR: I have the honor to submit inclosed reports of transactions at some of the subports of the quarantine district under my command, as follows:

Gibara.—Weekly report of vessels arrived, weekly abstract of bills of

health issued, and weekly report of arrival of alien steerage passengers in the week ended April 5, 1902.

Baracoa.—Reports as above for the week ended April 5, 1902.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Santiago, Manzanillo, Guantanamo, and Daiquiri.

SANTIAGO DE CUBA, *April 4, 1902.*

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit herewith the following report for the week ended March 29, 1902:

Santiago.—During this period there was a total of 14 deaths reported, making the annual rate mortality for the week 16.9 per 1,000. The causes of death were as follows: Tubercle of lungs, 2; syphilis, 2; diseases of the spinal cord, 1; endocarditis, acute, 1; organic diseases of the heart, 1; angina pectoris, 1; bronchitis, chronic, 1; asthma, 1; diarrhea and enteritis (under 2 years), 1; diarrhea and enteritis, chronic, 1; Bright's disease, 1; malformation, 1. During the week 9 vessels were inspected and passed on arrival, 6 vessels were passed without inspection, and 1 vessel was boarded and passed on master's certificate. Twelve vessels received bills of health prior to leaving port.

On March 25, 1902, the provisional flag steamship *Maria Herrera* was disinfected prior to sailing for Porto Rico. Fifteen nonimmune certificates were issued to passengers embarking for Porto Rico; 61 pieces of baggage were disinfected and 9 pieces inspected and passed.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports a total of 6 deaths due to the following causes: Tubercle of lungs, 1; cerebral congestion and hemorrhage, 1; cerebral softening, 1; tetanus, infantile, 1; diarrhea and enteritis (under 2 years), 1; diarrhea and enteritis (2 years and over), 1. Annual rate of mortality for the week, 21.57 per 1,000. During the week 6 vessels were inspected and passed on arrival, 1 vessel was passed without inspection, and 12 vessels received bills of health prior to leaving port.

Guantanamo.—Acting Asst. Surg. H. S. Caminero reports a total of 3 deaths, due to the following causes: Fever, pernicious malarial, 1; meningitis, simple, 1; affections of the stomach, 1. Annual rate of mortality for the week, 8.66 per 1,000. During the week 6 vessels entered port, of which 1 was inspected and passed and 5 passed without inspection. Three bills of health were issued to vessels leaving port.

Daiquiri.—Acting Asst. Surg. Juan J. de Jongh reports the following: Week ended March 22, 1902. One death, due to pernicious malarial fever (hemorrhagic). Three vessels were inspected and passed on arrival and 4 vessels received bills of health.

Week ended March 29, 1902. No deaths reported. Three vessels were inspected and passed and 3 bills of health issued.

Respectfully,

R. H. VON EZDORF,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital.

*Inspection of immigrants at Santiago for the week ended March 29, 1902.*SANTIAGO DE CUBA, *March 29, 1902.*

SIR: I herewith submit report of alien steerage passengers arriving at this port during the week ended March 29, 1902.

Date.	Vessel.	Where from.	No. of immigrants.
Mar. 24	Provisional flag steamship Tomas Brooks.	Port au Prince, Haiti.....	8
Mar. 29	Provisional flag steamship Julia	San Juan, P. R.....	6

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

ENGLAND.

*Report from Liverpool—Report on the vaccination act of 1898.*LIVERPOOL, ENGLAND, *March 29, 1902.*

SIR: I have the honor to state that for the week ended March 29, 1902, there were reported to the local health authorities, 4 cases small-pox, 10 enteric fever, 78 scarlet fever, 21 diphtheria, and 24 measles.

To day I visited the steamship *Quermore*, of the Johnston Line, running to Baltimore, and vaccinated those of the officers, crew, and cattle-men who had not been recently successfully vaccinated.

I inclose herewith 2 reports made by Dr. Hope, medical officer of health for Liverpool, on the present outbreak of smallpox and the vaccination act.

Respectfully,

CARROLL FOX,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]

The vaccination act, 1898.

PUBLIC HEALTH DEPARTMENT.

Liverpool, England, February 13, 1902.

Pursuant to the resolution of the health committee of January 30, 1902, requesting the medical officer to report upon the above act, the medical officer would, in the first place, observe that the vaccination acts, which are applicable to the whole country, can not be altogether gauged by their influence in Liverpool alone, and in making the recommendations which he is about to submit for the consideration of the committee, he has had some regard to the results of the operations of the acts in other places. There is good reason for this, since, as the prevalence of smallpox in other parts of the country, however remote, is liable to affect Liverpool, this city is more or less directly concerned that the population shall be efficiently vaccinated in other parts of the country as well as within the city.

1. Smallpox is not a disease which is confined to any one class, nor is it a disease which can be controlled by general sanitary measures, apart from vaccination. Hence, one of the most important requirements in an amended vaccination act is, the transference of the control of vaccination from the boards of guardians, who at present exercise it, to the sanitary authorities. At present the control of smallpox (apart from the question of vaccination) is a duty belonging to the sanitary authority; the provision of hospital accommodation, the isolation of contacts, the ambulance arrangements, disinfection of dwellings, clothing, etc., detection of infected persons, and in fact every measure to combat the disease, excepting vaccination, is already in the hands of the sanitary authority, but all these measures will be futile, however rigorously and at whatever cost they may be applied, without efficient vaccination.

(a) The sanitary authority deals with the entire population, irrespective of their social or pecuniary condition, in all matters affecting health.

The boards of guardians, on the other hand, with the exception alluded to, discharge obligations only in regard to the poor. If smallpox were a disease confined to the poor, there would be some grounds for leaving the control of vaccination in the hands of the guardians, but inasmuch as it will attack any unvaccinated person, whatever his social condition may be, it is obvious that smallpox has no exclusive relationship with poverty. It is anomalous that the only certain means of safeguarding the public from the dangers of smallpox should not be in the hands of the body which is responsible for the public health.

(b) In Liverpool, where primary vaccination of infants is as effectually if not more effectually carried out than in any other district in the country, the necessity for the transfer of the entire vaccination staff from the various boards of guardians to the sanitary authorities is less urgent than in most other places, owing to the careful manner in which the duties have been dealt with by the boards of guardians in this city, but even in Liverpool, if the proposed transference were made, revaccinations would be facilitated, and carried out in a more systematic manner. It is the health department which receives the first intimation that revaccination is necessary, owing, maybe, to an outbreak of smallpox in the house or establishment, and the inevitable delay in communicating through the proper channels with the officers of another body involves loss of valuable time.

Again, some singular instances have arisen in which persons have entertained the erroneous view that vaccination at the cost of the guardians places them in the category of recipients of relief. This sentiment, foolish as it no doubt is, has proved an obstacle in the way of getting a number of persons revaccinated.

These observations apply with greater force in other districts, where difficulties in the way of administering the act are very much greater than they are here.

2. It is necessary that additional provision should be made for facilitating revaccination. This must be made compulsory in all houses or establishments where a case of smallpox has occurred, unless the inmates are, in the opinion of a legally qualified medical practitioner, already sufficiently protected.

A requirement that all persons employed in or about smallpox hospitals, disinfecting stations, ambulances, etc., should be revaccinated before entering upon their duties is also necessary.

3. Clause 38 of the Liverpool corporation bill now before Parliament reads as follows:

"Any person who, when applied to by the medical officer of health for the city or by any officer acting on his behalf and on his instructions for information as to any dangerous or infectious disease, withholds any information in his possession or knowingly gives false information shall be liable to penalty not exceeding forty shillings."

The introduction, with the necessary modifications, of a clause such as this into a general vaccination act would be very valuable.

4. It is deserving of careful consideration whether stations for the preparation of vaccine should not be established under government supervision in some of the larger provincial centers. There are good reasons for such a course.

5. With regard to the much-discussed clause in the act of 1898 as to exemption of conscientious objectors from penalties, the medical officer would again take occasion to point out that the object which the royal commission had in view in suggesting such a clause was that vaccination would be facilitated. The carefully expressed views of the royal commission upon this subject must commend themselves, at least to the extent of insuring a fair and liberal trial to the proposal. The medical officer having carefully considered the clause and its result, doubts whether it is productive of any good which can be weighed in the balance against the risk to which the unvaccinated children are exposed. It can not be denied that conscientious objections to legal requirements are not confined to the subject of vaccination only, yet the law has not dealt with the objector so tenderly in other circumstances.

It may be urged, however, that the conscientious objectors to vaccination are numerically so insignificant as to be negligible. The obvious unsoundness of such a proposition as this needs no illustration.

The section does derive importance from the mistaken impression which it is apt to give that the legislature shares some at least of the responsibility of depriving children of the protection from smallpox which vaccination affords. Nothing is farther from the intention of the royal commission than this—as may be inferred from the following paragraph in their report:

“After careful consideration and much study of the subject, we have arrived at the conclusion that it would conduce to increased vaccination if a scheme could be devised which would preclude the attempt (so often a vain one) to compel those who are honestly opposed to the practice to submit their children to vaccination, and at the same time leave the law to operate, as at present, to prevent children remaining unvaccinated owing to the neglect or indifference of the parent.”

E. W. HOPE.

Report from Liverpool.

LIVERPOOL, ENGLAND, *April 5, 1902.*

SIR: I have the honor to state that for the week ended April 5, 1902, there were reported to the local health authorities, 4 cases of smallpox, 1 of which was imported from New York; enteric fever, 14; scarlet fever, 78; diphtheria, 15, and measles, 14.

On April 4, 1902, I visited the steamship *Sachem*, of the Warren Line, and vaccinated those of the officers, crew, and cattlemen who had not been recently successfully vaccinated.

Respectfully,

CARROLL FOX,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from London.

LONDON, ENGLAND, *April 4, 1902.*

SIR: I have the honor to report that for the week ended March 29, there were issued from this office 6 bills of health and on the boats obtaining them 168 persons were vaccinated. In one instance the crew had been vaccinated by the companies' surgeon. The smallpox situation remains about the same.

Respectfully,

A. R. THOMAS,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

*Smallpox at North Shields.*NEWCASTLE-ON-TYNE, ENGLAND, *April 1, 1902.*

SIR: I have the honor to report an outbreak of smallpox in this consular district. Within the past two months there have been 35 cases and 2 deaths at North Shields (population, 51,514) and within the past three months 15 cases at South Shields (population, 103,532) and 6 cases have also been imported into the river Tyne from incoming vessels. There have been so far no cases in this city. The disease is not considered as yet as epidemic.

Respectfully,

HORACE W. METCALF,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

GERMANY.

*Health of Berlin—Weekly death rate.*BERLIN, GERMANY, *April 7, 1902.*

SIR: I have the honor to report that the health of Berlin during the week ended March 22 remained good. The mortality rate was somewhat lower than during the foregoing week, viz, 16 per 1,000 of the inhabitants, and was, therefore, lower than in two-thirds of the other large cities in Germany, and considerably lower than in London, Paris, and Vienna. The participation of children in their first year in the mortality was almost the same as in the second March week. Acute diseases of the intestines occurred somewhat less frequently, causing 31 deaths. Acute diseases of the respiratory organs, on the other hand, increased, claiming 76 victims, as compared with 66 in the foregoing week. A considerable increase took place in the number of deaths from consumption, namely, from 81 to 100 in this week. Cases of diphtheria continued to be of rather frequent occurrence, causing 5 deaths. There was no important change in the number of cases of measles and scarlet fever, the former causing 6, the latter 4 deaths. There were registered 3 deaths from influenza, as compared with 7 in the foregoing week.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON GENERAL,
U. S. Marine-Hospital Service.

*Medical examinations in Germany.*BERLIN, GERMANY, *April 7, 1902.*

SIR: I have the honor to submit herewith a synopsis translation of the regulations in force in the German Empire, for the examinations of physicians.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

German Empire.

[Synopsised translation.—Instructions concerning the examinations of medical men.—Published Berlin, May 28, 1901.]

BERLIN, GERMANY, April 7, 1902.

A. AUTHORITIES GRANTING APPROBATIONS.

Section 1. The central authorities of the respective countries.

B. INSTRUCTIONS REGARDING THE PROOF OF QUALIFICATION AS MEDICAL MEN.

Sec. 2. Approbation is granted to those who have fully passed the medical examination and the one year of practice.

I. MEDICAL PRELIMINARY EXAMINATION.

Secs. 3-5. Same must be passed at the university where studying, exceptions only in special cases; not more than 4 candidates are examined at a time.

Sec. 6. Application for admission to the examination must be accompanied by a certificate of competency from a German gymnasium or real gymnasium. Certificates of a foreign school may only be admitted as an exception.

Sec. 2. With the application is to be sent proof that the student has studied five semesters (half years) at a German university.

In exceptional cases, the time of study may have been spent for studying a branch similar to medicine, or at a foreign university.

Secs. 8-19. Proof of having taken part in microscopic-anatomic studies and physiological and chemical practical training is to be produced.

The examination comprises I-VI anatomy, physiology, physical-chemical science, zoology, and botany. It is public and lasts four consecutive days. The subjects of examination are specified in section 12 $\frac{1}{2}$. Section 14 deals with the marks and their calculation. Anyone failing twice is not readmitted for examination. Section 18 specifies the fees, etc.

B. MEDICAL EXAMINATION.

Sec. 20-58. The examination can be made before any examining commission at any university. Applications must be accompanied by the necessary certificates as to the preliminary examinations. Exceptions granted for same hold good. At least four half years of studies must have elapsed since the preliminary examination and proof been produced that the candidate (section 25 $\frac{1}{2}$) has for two half-years practiced in the medicinal, surgical, and obstetrical clinique, has unassistedly treated 4 women at childbirth, in presence of a professor; has, for half a year, worked in an eye hospital, medical polyclinique, the infant clinique or polyclinique and special hospitals or polycliniques for throat, nose, ear, skin, and syphilitic diseases; has made studies in vaccination, and gained the required technical practice and knowledge of the lymph; and having attended at lectures on topographical anatomy, pharmacology and criminal medical science. The application for examination must be accompanied (section 26 $\frac{1}{2}$) by a *curriculum vite* giving a course of the studies and (unless coming up for examination as soon as having finished studying), a certificate of good conduct. The examination comprises (section 28 I-VIII) general and pathological anatomy, medicine, surgery, obstetrics, eyes, lunacy, hygiene, etc.

Only 4 candidates may be examined together. The course of the examinations and requirements are specified in sections 30-47. If the candidate fails in one or the other subject, he can come up for examination in that part after a period of two months to one year, according to his marks. If he does not come up for examination within three years, is considered to have failed entirely. Whoever fails twice is not admitted again. Section 58 contains specification of the fees amounting to 200 marks (about 50 dollars) altogether.

III. YEAR OF PRACTICE.

Secs. 59-62. After having passed his examination, the candidate has to practice for one year at a university clinique, etc., or special designated hospital in the German Empire, of which time at least a third is to be devoted chiefly to internal diseases. The candidate may choose the place, but without permission not change it more than twice. The time of practice may also be passed with a suitable medical man, for which the sanction of the imperial chancellor is to be obtained.

C. GRANTING APPROBATION.

Secs. 63, 64. At the end of the year of practice, the candidate applies to the respective central authority inclosing all required papers (see section 63).

D. DISPENSATION.

See section 65 containing a list of paragraphs dealing with same.

E. FINAL AND INTERMEDIATE INSTRUCTIONS.

Secs. 66-70. This decree is to come in force October, 1901. Some instructions regarding men already studying, etc., are then given, dealing with those who pass the preliminary examination before October 1, 1903. From October 1, 1903, the above instructions are in force in their entirety, throughout the Empire.

HAWAIIAN ISLANDS.

Report of transactions on outgoing vessels at Honolulu.

HONOLULU, H. I., March 31, 1902.

SIR: I have the honor to report the outgoing quarantine transactions at this station for the week ended March 29, 1902, as follows: Number of steamers inspected and passed, 2; number of sailing vessels inspected and passed, 3; number of cabin passengers inspected and passed, 86; number of steerage passengers inspected and passed, 21; number of crews inspected and passed, 34; number of pieces baggage disinfected, 52; number of sailing vessels disinfected, 3.

Respectfully,

L. E. COFER,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer, Hawaii.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

End of plague at Honolulu—Removal of restrictions on outgoing vessels.

HONOLULU, H. I., April 2, 1902.

SIR: I have the honor to inform you that on account of the fact that no new cases of plague have occurred in Honolulu during the past thirty days, I have this day removed the restrictions on outgoing traffic subject to the precautions referred to in the circular letter sent to the shipping houses here, a copy of which letter I inclose. The restrictions which have been in vogue here for the past five months will be promptly resumed when the health conditions make such action necessary.

Respectfully,

L. E. COFER,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer, Hawaii.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

HONOLULU, H. I., April 1, 1902.

SIRS: I have to inform you that until further notice all restrictions on outgoing traffic at this port are removed. While it is hoped that it will not be necessary ever to resume these restrictions, yet events in the past have proved that such measures may have to be inaugurated at any time.

It would therefore be unwise to suddenly discontinue the precautions which have been instituted at such an expenditure of money and time and which must have a bearing in protecting the health and therefore the monetary interests of Honolulu. I have therefore to ask your aid in the continuation of the wharf fumigation, the standing off

from the wharves of all vessels, the weekly cleaning and burning of rubbish collected on the wharves, and the disinfection of all vessels arriving here prior to this date.

It will be seen that such a course would not only carry on in a degree highly creditable to the town the crusade against disease as originally outlined, but in the event conditions demanded the resuming of outgoing restrictions the latter could be adopted with the least amount of confusion, annoyance, and notoriety. This office has received very valuable cooperation from the business interests in its endeavors to operate the quarantine here, and this acknowledgment is given with thanks.

Case of smallpox on transport Sheridan at Honolulu.

HONOLULU, H. I., April 9, 1902.

SIR: I have the honor to inform you that the U. S. transport *Sheridan*, from San Francisco en route to Manila, arrived here this morning with a case of smallpox on board in the person of a soldier. The case was discovered shortly after leaving San Francisco and was immediately isolated, and every one on board vaccinated. The sick man, those directly exposed, and those presumably exposed were taken to the quarantine station to be detained fourteen days. The ship was ordered into quarantine where she will remain until her coal supply can be replenished. No one will be allowed ashore except the first cabin passengers.

Respectfully,

L. E. COFER.

Passed Assistant Surgeon, U. S. M. H. S.,

Chief Quarantine Officer, Hawaii.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

ITALY.

Reports from Naples—Smallpox in Naples and Palermo—Cholera in Djiddah.

NAPLES, ITALY, March 31, 1902.

SIR: I have the honor to report that for the week ended March 29, 1902, the following ships were inspected at Naples:

March 24, the steamship *Auguste Victoria*, of the Hamburg American Line, bound with passengers and cargo for New York. There were inspected and passed 627 steerage passengers and 65 pieces of large baggage; 900 pieces of baggage were disinfected by steam. The steamship *Marco Minghetti*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 842 steerage passengers and 36 pieces of large baggage; 700 pieces of baggage were disinfected by steam.

March 26, the steamship *Citta di Milano*, of the Veloce Line, bound with passengers and cargo for New York. There were inspected and passed 1,472 steerage passengers and 120 pieces of large baggage; 1,500 pieces of baggage were disinfected by steam. The steamship *Hesperia*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 680 steerage passengers and 68 pieces of large baggage; 1,200 pieces of baggage were disinfected by steam.

March 27, the steamship *Trojan Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 983 steerage passengers and 90 pieces of large baggage; 1,100 pieces of baggage were disinfected by steam.

March 28, the steamship *Trave*, of the North German Lloyd Steam-

ship Company, bound with passengers and cargo for New York. There were inspected and passed 709 steerage passengers and 85 pieces of large baggage; 950 pieces of baggage were disinfected by steam.

Inspection at Palermo.

At Palermo for the week ended March 29, 1902, the following ship was inspected: March 28, the steamship *Trojan Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 133 steerage passengers; 242 pieces of baggage were disinfected by steam.

Smallpox at Naples.

During the week ended March 29, 1902, there were officially reported at Naples 13 cases of smallpox with no deaths.

Smallpox in Palermo.

During the past fortnight there have been 20 cases of smallpox at Palermo with 2 deaths.

Asiatic cholera in Arabia.

Reports from Constantinople dated March 26, 1902, state that during the past week there were 11 deaths from Asiatic cholera at Medina, 523 at Mecca, and 17 at Djiddah. The total number of deaths from the beginning of the epidemic is 1,129. It is reported that the flight of pilgrims to Djiddah from Mecca is very large. The pilgrims number 240,000. On one day, March 19, it is recorded that 280 deaths occurred among these devotees at Mecca. The steamships are avoiding Djiddah.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Smallpox in Naples—Cholera in Arabia—Plague in Egypt.

NAPLES, ITALY, April 7, 1902.

SIR: I have the honor to report that for the week ended April 5, 1902, the following ships were inspected at Naples:

April 3, the steamship *Lombardia*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 1,257 steerage passengers and 60 pieces of large baggage; 1,200 pieces of baggage were disinfected by steam. Steamship *Aller* of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 803 steerage passengers and 90 pieces of large baggage; 950 pieces of baggage were disinfected by steam.

April 4, the steamship *Patria*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 1,087 steerage passengers and 82 pieces of large baggage; 1,400 pieces of baggage were disinfected by steam.

Smallpox at Naples.

During the week ended April 5, 1902, there were officially reported at Naples 7 cases of smallpox with no deaths.

Asiatic cholera in Arabia.

Reports from Jedda give the information that during the week ending March 29, 1902, 928 deaths from Asiatic cholera occurred at Mecca and 61 at Djiddah. From Cairo it is reported that during the same period 1,127 deaths occurred in the Hedjaz from cholera.

Bubonic plague in Egypt.

For the week ended March 29, 1902, there were reported 9 cases of bubonic plague in the villages of Lower Egypt, with 2 deaths. There were 8 deaths from the same cause at Dechna, in Upper Egypt. Since the beginning of the epidemic a year ago, there have been in all Egypt 369 cases of bubonic plague, with 215 deaths.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

JAPAN.

Report from Yokahama.

YOKOHAMA, JAPAN, *March 25, 1902.*

SIR: I have the honor to transmit herewith an abstract of the bills of health issued at this port during the week ended March 22, 1902.

There were inspected 6 ships with 494 crew, 26 cabin and 621 steerage passengers; 443 persons were bathed and their baggage was disinfected.

During the week there occurred in this city 2 cases of typhoid fever, 2 cases of diphtheria with 1 death, and 1 case of dysentery.

Respectfully,

J. SPENCER HOUGH,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

NEW BRUNSWICK.

Inspection service at St. John.

ST. JOHN, NEW BRUNSWICK, *April 14, 1902.*

SIR: I have the honor to report that during the week ended April 12, the following vessels and their crews have been inspected by me at this port: Steamships, 5; schooners, 16; seamen, 271.

Respectfully,

T. DYSON WALKER,

United States Medical Inspector.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Inspection of immigrants at St. John and Halifax.

ST. JOHN, NEW BRUNSWICK, *April 14, 1902.*

SIR: I have the honor to report that for the week ended April 12 there were inspected 572 immigrants; passed, 560; detained, 12. * * *

During the week ended April 12 there were inspected at the port of Halifax, Nova Scotia, 100 immigrants; passed, 95; detained, 5. * * *

NORWAY.

*Quarantine against plague-infected cities.*CHRISTIANIA, NORWAY, *April 2, 1902.*

SIR: Inclosed I have the honor to send duplicate copies of a quarantine proclamation, issued by the royal Norwegian governments justice and police department on March 22, 1902. I also send translation.

Respectfully,

HENRY BORDEWICH,
United States Consul-General.

Hon. ASSISTANT SECRETARY OF STATE.

[Inclosure—Translation.]

*Proclamation from the royal Norwegian government's department of justice and police.*CHRISTIANIA, NORWAY, *March 22, 1902.*

A royal proclamation was made on the 20th instant, as follows: It is hereby ordered, in compliance with paragraph 2 in law of July 12, 1848, relating to quarantine, that Porto Alegre in Brazil shall, until further notice, be considered infected with the oriental plague, and the quarantine regulations laid down in said law and in circular of October 13, 1900, as regards plague, etc., are to take effect at once. At the same time it is hereby proclaimed that the city of Smyrna in Asia, and places located along the bay of the same name, which in proclamation of January 17, 1901, were declared infected with the plague, shall no longer be considered as so infected. With which all concerned respectfully have to comply. Which is hereby brought to public notice, while it must be remembered that according to prior proclamations of February 1, 1897, June 27 and August 22, 1899, May 23 and July 17, 1900, February 28, August 12, and September 30, 1901, the city of Constantinople in Turkey, Arabia, Persia, India, China, Manila, Formosa, the ports in Egypt, Cape Town, and Port Elizabeth in South Africa, Réunion Islands and Mauritius, also the city of Rio de Janeiro in Brazil shall, until further notice, be considered infected with the oriental plague.

A number of copies of this proclamation are inclosed.

A. QUAM,
GEORG JOHANNESSEN.

PHILIPPINE ISLANDS.

*Measures taken at Manila to prevent the invasion by cholera from Hongkong.*MANILA, P. I., *March 18, 1902.*

SIR: Confirmatory of my telegram "Cholera, Hongkong, Manila has quarantined," of the 17th instant, I have the honor to inform you that the quarantine laws and regulations of the United States are being enforced against all vessels arriving from Hongkong, and all boats from that port are held in quarantine for a period of time sufficient to make five full days from date of departure. At the completion of this period, if no sickness develops, the steerage passengers and crews, with their effects, are redisinfected and the ship given pratique.

I was informed on the 3d instant by Asst. Surg. J. W. Kerr that cholera was prevalent in Canton and knowing the free communication between that place and Hongkong I expected daily to receive reports that the disease had appeared in the latter place. Upon advice that cholera was present in Hongkong and that the prospects were not good, a telegraphic inquiry was sent to Assistant Surgeon Kerr on the 15th instant, and as his answer showed that the conditions were grave and that a further increase of the disease was expected, I immediately notified the local agents of the Hongkong boats that all vessels would be detained in quarantine.

Copies of telegrams and letter to steamship agents are respectfully inclosed for your information.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.
 The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosures.]

MANILA, P. I., March 16, 1902.

KERR, *Hongkong*: Notify agents vessels Hongkong detained in quarantine Marivales complete five days.

J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.

MANILA, P. I., March 16, 1902.

KERR, *Hongkong*: Bill of health shows cholera 8. Inquire fully about cholera Hongkong and wire me here. Manila can not take any risk. If prospects bad will quarantine.

J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.

HONGKONG, March 16, 1902.

PERRY, *Manila*: Hongkong has developed 12 cases of cholera since March 8. Prospects bad. Seven foreign deaths Canton. Expect there will be further spread.—KERR.

MANILA, P. I., March 17, 1902.

SIRS: In view of the fact that 12 cases of cholera have occurred in Hongkong since the 12th instant and a further spread of the disease is expected, I have the honor to inform you that all vessels arriving from Hongkong will be quarantined upon arrival at ports in the Philippine Islands for a sufficient period of time to complete five days from date of sailing. You will please notify your agents in Hongkong that all vessels for Manila must call at Marivales for this detention.

Vessels for Australian ports taking passengers in Hongkong, making Manila a port of call, are subject to the same regulations.

You are also informed that articles of merchandise that can not be certified to by Dr. Kerr, in Hongkong, if brought, can not be landed and will be returned to Hongkong.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.
 STEAMSHIP AGENTS, Manila, P. I.

PORTO RICO.

Reports from San Juan and subports—Transactions for March, 1902.

SAN JUAN, P. R., April 7, 1902.

SIR: I have the honor to submit herewith the following report embracing the quarantine transactions at San Juan and the 6 subports of the island, for the month of March, 1902:

San Juan.—Number of vessels inspected, 28; number of bills of health issued, 35; number of vessels held in quarantine, 3; number of vessels disinfected, none; number of persons detained at the quarantine station, none; number of pieces of baggage disinfected, 26; number of packages of mail disinfected, 2; persons vaccinated, none.

There arrived and departed upon the 1st instant French steamship *Fournel*, from Port Limon and Haitien ports. This vessel brought no cargo or passengers for Porto Rico and she was allowed to take cargo for ports in Europe under guard.

The provisional flag steamship *Julia* entered upon the 19th on her regular schedule from Cuban and Dominican ports, having undergone, as usual, disinfection at Santiago de Cuba. She brought no passengers requiring detention or baggage for disinfection, and was therefore granted free pratique.

On the 20th the Spanish steamship *Ciudad de Cadiz* arrived from Havana, Port Limon, Colon, Baranquilla, Puerto Cabello, La Guayra, and Ponce. Bills of health presented by this vessel were clean and the 10 passengers for this port were considered immune and permitted to land. The vessel was held in quarantine under guard while here to detain passengers in transit for Havana. One package of mail was removed to the station and subjected to formalin disinfection.

On the 21st the French steamship *Ferdinand de Lesseps* arrived from Port au Prince, Petit Goave, Gonaives, and Cape Haitien. All bills of health clean. She carried no passengers or mail for this port. The ship was detained in quarantine under guard while here.

On the 28th the provisional flag steamship *Maria Herrera*, from Cuban and Dominican ports (her regular monthly schedule), entered. All passengers for this port were permitted to land, being considered immune. Twenty-six pieces of baggage and 1 sack of mail embarked at Puerto Plata were taken to the island and disinfected with steam and formalin. As the vessel had been disinfected at Santiago de Cuba she was granted free pratique.

I inclose herein the vital statistics of San Juan.

The smallpox situation in San Juan gives no cause for alarm. This is also true of all other localities of this island in which the disease has made its appearance. The disease is of exceedingly mild type, no deaths being reported. Reports relative to the number of cases, the localities of same, etc., have been and will be made the subject of separate reports from time to time.

The following embraces a summary of the reports received from the several subports as to vessels inspected during March, 1902: Mayaguez, 10; Arecibo, 3; Humacao, 5; Aguadilla, 4; Fajardo, none; Arroyo, 3.

The following is a report of the mortality at the subports during March, 1902: Mayaguez, 98; Arecibo, 73; Humacao, 45; Aguadilla, 35; Fajardo, 37; Arroyo, 10.

Nothing unusual is reported from the subports.

Respectfully,

H. S. MATHEWSON,

Passed Assistant Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL, U. S. Marine-Hospital Service.

[Inclosure.]

Reports from Ponce—Transactions for March, 1902.

PONCE, P. R., April 7, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended April 5, 1902. Also the summary of transactions of this station and mortality report of the city for the month of March, 1902.

During the week 3 vessels were inspected and passed and 6 bills of health were issued to outgoing vessels.

Of the 6 cases of smallpox reported in last week's letter the local board of health states that 4 were varicella, and these have been discharged and 6 new cases entered. Of the 2 admitted cases of smallpox, 1 has been discharged. It is common talk that there is a large number of concealed cases rather generally scattered among all classes of people, but the board of health seems unable to find them. Even the cases in their hospital are not on the official report of the board. The disease is generally spoken of as "varicella," and possibly some of it is, but I think the majority is smallpox.

Respectfully,

W. W. KING,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—*Sierra Leone*.—Three weeks ended March 20, 1902. Estimated population, 40,000. Total number of deaths, 50. No contagious diseases reported.

BRAZIL—*Pernambuco*.—Two weeks ended February 28, 1902. Esti-

mated population, 200,000. Total number of deaths, 231, including smallpox, 27, and 40 from phthisis pulmonalis.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended March 29, 1902, correspond to an annual rate of 18.2 per 1,000 of the aggregate population, which is estimated at 14,862,003.

London.—One thousand six hundred and fourteen deaths were registered during the week, including measles, 54; scarlet fever, 12; diphtheria, 30; whooping cough, 53; enteric fever, 6; smallpox, 61. and diarrhea and dysentery, 11. The deaths from all causes correspond to an annual rate of 18.4 per 1,000. In Greater London 2,177 deaths were registered. In the "outer ring" the deaths included 9 from diphtheria, 6 from measles, 14 from smallpox, and 5 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended March 29, 1902, in the 21 principal town districts of Ireland was 23.7 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Newry, viz, 8.3, and the highest in Kilkenny, viz, 44.7 per 1,000. In Dublin and suburbs 211 deaths were registered, including enteric fever, 2; measles, 1; scarlet fever, 2; whooping cough, 2, and 37 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended March 29, 1902, correspond to an annual rate of 20.3 per 1,000 of the population, which is estimated at 1,629,923. The lowest mortality was recorded in Edinburgh, viz, 12.1, and the highest in Aberdeen, viz, 28.4 per 1,000. The aggregate number of deaths registered from all causes was 655, including diphtheria, 6; measles, 14; scarlet fever, 3, and 13 from whooping cough.

ITALY—*Milan.*—Month of February, 1902. Estimated population, 499,683. Total number of deaths, 879, including diphtheria, 7; enteric fever, 14; measles, 10; smallpox, 3, and 71 from tuberculosis.

JAPAN—*Nagasaki.*—Period from March 11 to March 20, 1902. Estimated population, 131,700. Total number of deaths not reported. One death from enteric fever reported.

ST. HELENA.—Two weeks ended March 8, 1902. Estimated population, 3,342. Total number of deaths, 13. No deaths from contagious diseases.

SPAIN—*Valencia.*—Two weeks ended March 31, 1902. Estimated population, 204,000. Total number of deaths, 188, including enteric fever, 2, and 3 from smallpox.

Vigo.—Month of March, 1902. Estimated population, 22,000. Total number of deaths, 45. No deaths from contagious diseases reported.

Cholera, yellow fever, plague, and smallpox, December 27, 1901, to April 25, 1902.

[Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]
