

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General United States Marine-Hospital Service.]

Smallpox in Louisville, Ky.

LOUISVILLE, KY., *April 29, 1902.*

SIR: I have the honor to report that a patient applied at out-patient office about two weeks ago who was found to be suffering with smallpox of the generally prevailing mild type. His ailment had not prevented his working. He was in the beginning of the pustular stage. He was turned over to the city authorities. A few days later another patient appeared who presented a fading eruption of a typically variolous character. He did not want treatment, but was interested, merely as a matter of curiosity, in knowing if it was not "some kind of smallpox." The eruption had been present for eight days. He had never missed a meal nor lost an hour's time from his work. There had been a few pocks on chest, abdomen, back, and thighs, and 1 or 2 on face. They had all desquamated except 1 or 2, and they about so. He was turned over to the city authorities, but, as he was practically recovered, they decided not to detain him.

Both these patients came from the line of boats plying between Louisville, Evansville, and way landings. By arrangement with the company, Assistant Surgeon Berry vaccinated the crews of 2 of these boats, but the captain of the third boat declined to have his crew vaccinated.

The city health officer, Dr. Allen, has been very actively campaigning against imported smallpox, but as long as the cases are as mild as those above described, the disease is bound to spread.

Through the courtesy of Dr. Allen I am enabled to give the following figures: Number of cases of smallpox reported during the past seven months: 1901, October, 1 case, no deaths; November, 1 case, no deaths; December, 1 case, no deaths. 1902, January, 19 cases, no deaths; February, 14 cases, no deaths; March, 21 cases, no deaths; April 1 to April 28, 31 cases, 1 death. Total, 88 cases, 1 death.

Respectfully,

G. B. YOUNG,
Passed Assistant Surgeon, U. S. M. H. S., In Command.

Inspection service at Eastport, Me.

EASTPORT, ME., May 1, 1902.

SIR: I beg to submit the following report of work done at this inspection station during the week ended Thursday, May 1, 1902:

FOREIGN AND INSULAR.

BRITISH HONDURAS.

Report from Belize—Fruit port.

BELIZE, HONDURAS, *April 19, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended April 19, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: April 17, steamship *Spero*; crew, 18; number of passengers from this port, none; number of passengers in transit, none. April 18, steamship *Anselm*; crew, 41; number of passengers from this port, 30; number of passengers in transit, 32.

Respectfully,

R. H. PETERS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

CANADA.

Inspection of immigrants at Quebec, Halifax, and St. John.

QUEBEC, CANADA, *April 26, 1902.*

SIR: I have the honor to report that for the week ended April 26, there were inspected 720 immigrants; passed, 709; detained, 11. * * *

At the port of Halifax, Nova Scotia, during the week ended April 26, there were inspected 73 immigrants; passed, 73; detained, none.

At the port of St. John, New Brunswick, during the week ended April 26, there were inspected 2 immigrants; passed, 2; detained, none.

Respectfully,

VICTOR G. HEISER,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

CHINA.

Cholera in Canton and vicinity.

[No. 175.]

CANTON, CHINA, *March 15, 1902.*

SIR: In further continuation of my No. 165, concerning the prevalence of cholera in Canton and vicinity, I have the honor to report as follows:

On March 5, 1902, I cabled you as follows :

SECRETARY OF STATE, *Washington, D. C.*: Thomas Stephenson, American citizen, senior officer customs service, died here to-day ; cholera.—MCWADE.

On March 6, 1902, I cabled to the Department as follows :

SECRETARY OF STATE, *Washington, D. C.*: Cholera increasing. Another European died to-day. Custom-house closed ; employees ordered live boats on river.—MCWADE.

The European referred to in the foregoing cablegram was David Duncan, Scotchman, an old and highly valued official of the imperial Chinese maritime customs. In consequence of the spread and virulence of the disease, Commissioner Morgan, of the imperial Chinese maritime customs, found it imperatively necessary to order the immediate transfer of all their married customs officers (outdoor staff) to a number of commodious junks at Honam Spit, opposite to Shameen. A trained nurse has been provided for them, under whose supervision all the cooking, etc., for the men is done. Meanwhile the men are kept under observation. The houses that have been occupied by these men, situated on Honam, have all been thoroughly cleaned, fumigated, and whitewashed. Large quantities of lime have also been used on the streets and alleys in the immediate vicinity of those houses. There are no sewers in Honam, which is immediately adjacent to Canton and lies on the south side of the Canton River. As there have been no rains to flush its streets and alleys, the stench under the influence of the hot sun is almost unbearable, a condition which helps the spread of cholera. Although very many deaths have occurred at Honam from cholera, I can not truthfully say that the disease has become epidemic. I noticed a marked diminution in the number of cases there within the past five days.

On March 14, 1902, I cabled to the Department as follows :

SECRETARY OF STATE, *Washington, D. C.*: Fritz Brockelman, Swedish-Norwegian merchant consul, died to-day, cholera ; also, sailor French gunboat *Avalanche*.

MCWADE.

Mr. Brockelman was for over ten years a principal partner in Reuter Brockelmann & Co., a German firm of high standing in South China. His principal customers were leading merchants of New York. He leaves a wife and 3 children. He was taken ill whilst on the *Powan*, traveling from Hongkong to Canton. His illness was caused by drinking a glass of water, and lasted only eight and a half hours, his death having occurred several hours after his arrival at his residence in Shameen. He was interred in the foreign cemetery, Macao Fort, at a very early hour this morning.

The deceased sailor on the French gunboat *Avalanche* was ill for only six hours. Since his death, the *Avalanche* has been moved by her commander from her position immediately opposite the French consulate, about 100 yards west and immediately opposite the American consulate. Strange to say, the *Avalanche* does not float the yellow flag, customary in such cases, and her crew are not in quarantine, for I have met numbers of them in Shameen.

The number of cases in Canton and its immediate vicinity is very much smaller than a week ago, and I feel satisfied that the disease is abating. It is a remarkable fact that, although several natives have recovered after a very violent attack, every foreigner afflicted with it has died, after an illness ranging from six to ten hours.

The drought still continues. The wells are all dried up, and the water in the Canton River, which we have to use for all domestic purposes, is very salty and nauseous to taste. In the interior the land is so dried up that, as reported to me by the Rev. Andrew Beattie, of the

American Presbyterian Mission, great cracks and fissures are seen everywhere. The wells are exhausted and the efforts of the natives to secure a supply of water by digging fresh wells are almost invariably fruitless. The high officials, the litterati, and the gentry repair to the temples daily to pray for rain.

H. E. Tao Mu, viceroy of the Two Kwangs, has commanded the Nam Hoi and the Pun U magistrates to issue proclamations in their respective districts embodying the following suggestions, which I have prepared at his excellency's request :

All of the streets, large and small, and all the drains should be thoroughly flushed with water from the river, and plenty of lime thereafter sprinkled on the streets, and especially where animal matter and other refuse is usually allowed to collect.

After being thoroughly flushed with water from the river the drains should also have lime profusely scattered therein.

All decayed or unripe fruit and vegetables should be immediately destroyed and the sale thereof severely punished.

All vegetables should be thoroughly well cooked before being eaten.

Under no circumstances should water be drunk or used for family purposes until it has been boiled for at least half an hour.

Cleanliness of person, of all clothing, of cooking and other utensils and of the interior of every household is essentially necessary.

An excellent precaution against cholera is for each person to take twice every day 5 drops of aromatic sulphuric acid in a glass of water which has been well boiled. A small bottle of aromatic sulphuric acid can be easily procured at the Canton hospital.

I have the honor also to report that I am keeping Dr. John W. Kerr, U. S. Marine-Hospital Service, at Hongkong, continually posted as to disease developments here. He reports to me in a communication received this morning, dated March 14, 1902 that he has found it necessary to enforce the quarantine law respecting the shipment of fresh vegetables to the Philippine Islands, as almost all such "fresh cargoes" come from Canton and its vicinity.

Respectfully,

ROBERT M. MCWADE,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

[No. 176.]

CANTON, CHINA, *March 17, 1902.*

SIR : In further continuation of my No. 175, regarding Asiatic cholera in Canton, I have the honor to report as follows :

Within the first two days the disease has spread rapidly through Wongsba, at the western end of Canton, where it has had many native victims. It is also cutting a wide swath in the southern suburb, outside of the city walls and immediately opposite to the yamen of the Tartar general. Sister Marie Immaculee, of the French convent, which is located in the heart of the city, was attacked by the disease on Saturday afternoon and died last night. The French colony are almost inconsolable over her sad and untimely death, for she was the youngest sister in the community, and exceedingly popular with the natives as well as the foreigners of all nationalities.

Honam is still suffering, but I believe that there is a considerable abatement in the number of deaths.

As the native authorities keep no record of the mortality, it is almost impossible to give anything like a correct estimate of the effects of the disease in this locality. I can, however, say that it has not yet assumed epidemic form.

Respectfully,

ROBERT M. MCWADE,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

*Report from Hongkong.*HONGKONG, CHINA, *March 26, 1902.*

SIR: I have the honor to transmit herewith the abstract of bills of health issued at this station during the week ended March 22, 1902.

Seven steamers were inspected, 672 individuals were bathed at the disinfecting station, and 909 bundles of clothing and bedding were disinfected by steam. Owing to pressure of other work, it was impossible for me to personally superintend all of the disinfection work, but I believe it was carefully done by the attendants. There were 5 rejections during the week because of fever.

Among the bills of health issued during the week was 1 to the Japanese steamship *Riojun Maru*. As previously reported, this vessel was held in quarantine because of 6 cases of cholera which developed aboard. At the hour of inspection a case of fever was found and the vessel was held by me for eighteen hours until satisfied that it was not of a quarantinable nature.

Careful precautions having been taken by the port physician while the vessel was in quarantine, it was not considered necessary to repeat the disinfection. However, the crew were bathed and all their personal effects disinfected just prior to sailing. The return of communicable diseases show that during the week 11 cases of Asiatic cholera and 10 deaths and 3 cases of smallpox and 3 deaths occurred in this city. One of the cholera cases was a French sailor aboard the French gunboat *Decidee* while that vessel was at the Kowloon drydock. It was at this dock that the cases appeared aboard the Japanese steamship *Riojun Maru*. This has been the only European case in this city thus far, with the exception of 1 case removed from a Canton River steamer March 24.

From reports in the local papers the disease continues very severe in parts of Canton. Information received from the Hon. R. M. McWade, United States consul at Canton, states that the disease appears to be abating somewhat on the Honam (south) side of the river, but that it has broken out and is severe in Fatshaw, outside the walled city. Two more Europeans died there, making a total of 11 deaths since the beginning of the epidemic.

The local papers also report the appearance of the disease in Macao, stating that 7 suspicious cases had developed during the week. The conditions seem favorable for the spread of the disease to other coast cities, because of the failing water supply due to long continued drought and the filthy condition of the cities.

The public water supply of Hongkong is collected in reservoirs located high up in the hills, and in case of rain would furnish an abundant supply of good water for all, thus greatly lessening the chances of a further spread of the disease here.

Respectfully,

JOHN W. KERR,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

*Plague epidemic at Pakhoi.*WASHINGTON, D. C., *April 26, 1902.*

SIR: For the information of the U. S. Marine-Hospital Service I have the honor to advise you that the Department is in receipt of a telegram

dated April 25, 1902, from the consul of the United States at Canton, China, which reads as follows: "Plague epidemic Pakhoi."

Respectfully,

JOHN HAY,
Secretary of State.

HON. SECRETARY OF THE TREASURY.

COLOMBIA.

Report from Bocas del Toro—Fruit port.

BOCAS DEL TORO, COLOMBIA, *April 22, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ending April 21, 1902:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. Prevailing diseases, malarial. Deaths from casualties of war, on April 17, 1902, estimated at 40. General sanitary condition of this port and the surrounding country during the week, good. Owing to the disturbed condition of the country due to the revolution, it is impossible to get any reliable information. However, it can be positively stated that no infectious or contagious diseases exist at this port; the health of the place has been remarkably good for several months.

Bills of health were issued to the following vessels: April 16, steamship *Hispania*, crew, 22; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none; steamship *Mount Vernon*, crew, 20; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none. April 20, steamship *Alabama*, crew, 20; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

PAUL OSTERHOUT,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

COSTA RICA.

Report from Port Limon—Fruit port.

PORT LIMON, COSTA RICA, *April 24, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended April 23, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 3. Prevailing diseases, malarial fever and pulmonary consumption. General sanitary condition of this port and

the surrounding country during the week was fairly good. There remain in the United Fruit Company's hospital here 3 cases convalescing from yellow fever. The 3 deaths noted above are officially recorded here as due to pernicious fever, hemorrhage of lungs, and pernicious malarial fever, the last in the charity hospital.

Bills of health were issued to the following vessels: April 17, steamship *Beverly*, number crew, 40; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none. April 18, steamship *Taunton*, number crew, 22; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none. April 19, steamship *Algiers*, number crew, 31; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none. April 21, steamship *Alleghany*; number crew, 44; number of passengers from this port, 5; number of passengers in transit, 7; pieces of baggage disinfected, none. April 23, steamship *Foxhall*, number crew, 26; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

WM. H. CARSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Report from Port Limon—Yellow fever.

PORT LIMON, COSTA RICA, *April 23, 1902.*

SIR: I have the honor to submit this special report, that very soon after my arrival here, the morning of April 17, 1902, I was credibly informed by some of the local physicians, as well as by Resident Medical Inspector Jumel, in the service of the Louisiana State board of health, that this port was already infected with yellow fever and had been since April 1 instant, if not indeed before that date, it being openly asserted that there had been cases of yellow fever since March last.

On April 14 instant one Frederico Mora, a native laborer, aged about 25 years, who had been sick two days here without medical attention, was admitted to the United Fruit Company's hospital, where the nature of his illness was at once recognized as yellow fever by Dr. Steggall, the house physician and a practitioner of many years' experience with tropical fevers. From these physicians named I learned that all the characteristic phenomena of yellow fever were present in this case, namely, a fever of one paroxysm, disturbed correlation of pulse and temperature, albuminous urine with eventual suppression, marked congestion or blood stasis of capillaries of the surface, conjunctiva, and gums, also black vomit. The patient died at 6 p. m., April 16 instant.

There are at this date 3 cases of yellow fever now convalescing in the same hospital here, and I have no information or suspicion as to any other cases of yellow fever now existing at this port than those heretofore mentioned herein.

I have to confirm the following cablegram that I deposited here, reading as follows:

PORT LIMON, COSTA RICA, *April 17, 1902—11.40 a. m.*

WYMAN, *Washington, D. C.*: Three cases yellow. Death yesterday.—CARSON.

Complying with Bureau instructions, dated Washington, D. C., April 4, 1902 (C. H. W.), I cabled a corresponding message to Henry Gold-

thwaite, M. D., health and executive officer, quarantine board of Mobile Bay, Mobile, Ala.

I have also to inform you that passenger traffic has been discontinued from here for New Orleans, La., and Mobile, Ala., and it is not likely to be resumed during the present quarantine season.

I have also to state that the Hamburg-American Line (Atlas Line service) between New York and Jamaica, Hayti, Colombia, Nicaragua, and Costa Rica is the only service now available to passengers for the United States.

Respectfully,

WM. H. CARSON,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CUBA.

Reports from Cienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, *April 23, 1902.*

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to transmit the following report for the district under my command for the period ended April 26, 1902: Twelve deaths have occurred in this city. Of these, 2 occurred in the civil hospital. No contagious diseases reported. Causes of death as follows: Tuberculosis, 2; enteritis, 2; paludism, 1; athrepsia, 1; nephritis, 1; sclerosis, 1; hemorrhage, cerebral, 1; bronchitis, 1; meningitis, 1; hypertrophy of the heart, 1. Annual death rate per 1,000 inhabitants, 15.64. Eight vessels inspected and passed, granted pratique; 4 vessels admitted without inspection; no alien steerage passengers landed at this port; 26 bills of health issued vessels prior to departure.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 6 deaths in the city of Trinidad. No contagious diseases reported. Twelve vessels inspected and passed, granted pratique; no alien steerage passengers landed at that port; 12 bills of health issued vessels prior to departure.

Santa Cruz del Sur.—Acting Asst. Surg. Pedro M. Quevedo reports 1 death at that port during the week ended April 19. No contagious diseases reported in that vicinity. Five vessels inspected and passed, granted pratique; no alien steerage passengers landed at that port; 4 bills of health issued vessels prior to departure.

Respectfully,

FELIX GIRALT,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Havana and Batabano.

HAVANA, CUBA, *April 30, 1902.*

SIR: I have the honor to submit herewith report of transactions at this station together with mortuary data of this city of Havana, for the week ended April 26, 1902.

Batabano.—Acting Asst. Surg. Jose M. Campos reports having inspected 5 vessels on arrival and issued 6 bills of health during the week.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Island of Cuba.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Matanzas, Cardenas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, April 23, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit herewith the following sanitary report of the quarantine district under my command for the week ended April 19, 1902:

Matanzas.—Eleven deaths occurred in the city of Matanzas during the period covered by this report, showing a mortality of 12.67 per

1,000. The principal causes of death were as follows: Tuberculosis, 3; hepatitis, 1; carcinoma, 1; eclampsia, 1; gastro-enteritis, 1; enteritis, 1; other causes, 3. No case of infectious or contagious character was reported. Two pieces of baggage were inspected and passed. Six vessels arrived during the week; 4 of these were inspected and passed and two passed without inspection. Eight bills of health were issued to vessels leaving this port.

Cardenas.—Acting Asst. Surg. Enrique Saez reports that 19 deaths occurred in Cardenas during the week of the following causes: Tuberculosis, 3; syphilis, 2; cancer, 2; typhoid fever, 1; enteritis, chronic, 1; cerebral congestion, 1; pernicious fever, 1; malarial fever, 1; alcoholism, 1; cerebral apoplexy, 1; other causes, 5. No case of infectious or contagious character was reported. The death rate during the week was 37.81 per 1,000. Fourteen vessels arrived during the week; 2 of these were inspected and passed and 12 passed without inspection. Fifteen bills of health were issued to vessels leaving the port.

Isabela de Sagua.—Acting Asst. Surg. Pedro Garcia Riera reports that 6 deaths occurred in the municipal district of Sagua la Grande of the following causes: Tuberculosis, 1; meningitis, 1; malarial fever, 1; general debility in children, 1; other causes, 2. No case of infectious or contagious character was reported. The death rate during the week was 14.76 per 1,000. Thirteen vessels arrived during the week; 1 of these was inspected and passed and 12 passed without inspection; 9 bills of health were issued to vessels leaving the port.

Caibarien.—Acting Asst. Surg. Leoncio Junco reports that 1 death occurred in the municipal district of Caibarien of general debility in children. No case of infectious or contagious character was reported. The death rate during the week was 6.03 per 1,000. Twelve vessels arrived and were passed without inspection; 10 bills of health were issued to vessels leaving the port.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

Reports from Santiago, Manzanillo, Guantánamo, and Daiquiri.

SANTIAGO DE CUBA, *April 19, 1902.*

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit herewith the following report for the week ended April 12, 1902:

Santiago.—During this period there was a total of 24 deaths reported, making the annual rate mortality for the week, 28.02 per 1,000. The causes of death were the following: Fever, intermittent malarial, 3; tubercle of lungs, 5; cancer of the stomach, 1; organic diseases of the heart, 2; pneumonia, 1; diarrhea and enteritis (under 2 years), 4; diarrhea and enteritis, chronic, 1; peritonitis, 1; Bright's disease, 2; septicæmia, puerperal, 1; congenital debility, 2; unspecified causes of death, 1. During the week 12 vessels were inspected and passed on arrival, 5 vessels were passed without inspection, and 9 bills of health were issued to vessels prior to leaving port.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports 1 death, due to accidental traumatism (homicide), making the annual rate mortality for the week 3.59 per 1,000. During the week 5 vessels were inspected and passed on arrival, 6 vessels were passed without inspection, and 8 vessels received bills of health prior to departure.

Guantanamo.—Acting Asst. Surg. H. S. Caminero reports a total of 5 deaths for this period, the causes being as follows: Fever, intermittent malarial, 2; tubercle of lungs, 1; septicæmia, puerperal, 1; rachitis, 1. Annual rate mortality for the week, 14.44 per 1,000. During the week 3 vessels were inspected and passed on arrival, 3 vessels were passed without inspection, and 5 bills of health were issued to vessels leaving port.

Daiquiri.—Acting Asst. Surg. Juan J. de Jongh reports 1 death, due to wounds by firearms. During the week 2 vessels were inspected on arrival and 1 vessel received bill of health prior to sailing.

Respectfully,

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Respectfully,

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

ENGLAND.

Reports from Liverpool.

LIVERPOOL, ENGLAND, *April 19, 1902.*

SIR: I have the honor to state that for the week ended April 19, 1902, there were reported to the local health authorities 3 cases of smallpox, typhus fever, 1 case; enteric fever, 15 cases; scarlet fever, 101; diphtheria, 21; measles, 25.

On April 15, 1902, I vaccinated those of the officers, crew, and cattlemen of the steamship *Michigan*, belonging to the Warren Line, who could not show satisfactory vaccination scars, or who had not had smallpox. To-day I did the same to the officers, crew, and cattlemen of the steamship *Vedamore*, belonging to the Johnston Line.

Respectfully,

CARROLL FOX,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

LIVERPOOL, ENGLAND, *April 22, 1902.*

SIR: I have the honor to state that during the week ended April 19, 1902, there were reported to the medical officer of health for Birkenhead 1 case of smallpox; scarlet fever, 6 cases; diphtheria, 2; enteric fever, 4; erysipelas, 1 case, and measles 19 cases.

Respectfully,

CARROLL FOX,

Assistant Surgeon, U. S. M. H. S.

THE SURGEON-GENERAL,

U. S. Marine-Hospital Service.

*Report from London.*LONDON, ENGLAND, *April 24, 1902.*

SIR: I have the honor to make the following report for the week ended April 19, 1902: Five vessels were inspected and received bills of health, and on these vessels 124 members of the crew or cattlemen were vaccinated. On 1 vessel of the Atlantic Transport Line, the vaccination was performed by the ship's surgeon.

The smallpox situation remains about as last week. In the 76 great towns of England and Wales, there was a total of 72 deaths from this disease and of this number 42 occurred in London, and 21 in West Ham, a suburb of London, and rather close to the river. There was also 1 death in Glasgow.

During the week ended April 6 there were 13 cases and 9 deaths from plague in Egypt. In Mauritius, for the week ended April 10, there were 3 cases and 3 deaths.

Respectfully,

A. R. THOMAS,

Passed Assistant Surgeon, U. S. M. H. S.

THE SURGEON-GENERAL,

U. S. Marine-Hospital Service.

GERMANY.

*Plague and cholera in various countries.*BERLIN, GERMANY, *April 21, 1902.*

SIR: I have the honor to transmit the following information obtained from the imperial health office at Berlin:

Plague.

EGYPT.—From March 28 to April 3, inclusive, 12 new cases and 9 deaths were registered, namely 5 (2) in Kom-el-Nour, 3 (3) in Benha, 3 (4) in Decheneh, 1 in Sheblanga in the province of Charkieh.

BRITISH INDIA.—In the Bombay Presidency, between March 8 and March 14, there were recorded 7,610 plague cases and 5,796 deaths. In the city of Bombay, during the week ended March 18 there occurred 974 new plague cases and 743 deaths. In addition to which, 254 deaths were registered as suspected plague. The total number of deaths 1,579, was less by 211 than during the foregoing week.

On March 15, a case of plague was recorded in Bassein in Burma.

CAPE COLONY.—On March 31, 2 plague cases occurred in Port Elizabeth.

BRITISH EAST AFRICA.—In accordance with a telegraphic report dated March 30, it appears that the total number of plague cases which have occurred up to the present, in the protectorate, amount to 43 and 17 deaths.

NEW SOUTH WALES.—In Sydney, according to official bulletins; there were registered during the three weeks ended on February 8, February 15, February 22, 4, 5, 9 plague cases and altogether 6 deaths.

QUEENSLAND.—During the week ended March 1, there occurred 3 plague cases in Brisbane, with 1 death.

Plague and cholera.

BRITISH INDIA.—In Calcutta during the week ended March 8, there were registered 519 plague cases and 462 deaths. In the same week there occurred 462 deaths from cholera.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Health of Berlin.

BERLIN, GERMANY, *April 14, 1902.*

SIR: I have the honor to report that the health of Berlin remained favorable during the week from March 23 to March 29. The mortality rate was again lower than that of the foregoing week, amounting (calculated on the year) to 15.5 against 16.0 per 1,000 of the population, and was therefore lower than two-thirds of the other German large towns, and considerably lower than in London, Paris, and Vienna. The death rate, however, was lower still in Charlottenburg with 13.8 and Schöneberg with 8.8 per 1,000 of the inhabitants. The number of acute diseases of the intestines remained unchanged and caused 33 deaths. The number of cases of acute disease of the respiratory organs decreased, having caused 60 deaths as against 76 in the foregoing week. The number of deaths from consumption was 82, being somewhat less than during the previous week. Measles claimed 13 and scarlet fever 9 victims. Cases of diphtheria were of less frequent occurrence and caused 3 deaths. Two persons succumbed to influenza. The number of deaths by violence amounted to 21.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

HAWAIIAN ISLANDS.

A death from plague at Honolulu.

[Telegram.]

HONOLULU, H. I., *April 24, 1902,*
via San Francisco, Cal., May 1, 1902.

WYMAN, *Washington, D. C.:* There was a death from plague at Honolulu, April 19. COFER.

HONDURAS.

Report from La Ceiba—Fruit port.

LA CEIBA, HONDURAS, *April 26, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended April 26, 1902: Population according to census—no official census. Present esti-

mated population, about 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 2. Prevailing diseases, malarial. General sanitary condition of the port and surrounding country during the week, good.

Bills of health were issued to the following vessels: April 24, steamship *Condor*, number of crew, 16; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none. April 26, schooner *Peerless*, number of crew, 7; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected none.

Respectfully,

W. B. ROBERTSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

ITALY.

Report from Naples—Smallpox in Naples—Plague and cholera in Egypt.

NAPLES, ITALY, April 14, 1902.

SIR: I have the honor to report that for the week ended April 12, 1902, the following ships were inspected at Naples:

April 9, the steamship *California*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 1,096 steerage passengers and 90 pieces of large baggage; 1,600 pieces of baggage were disinfected by steam.

April 9, the steamship *Archimede*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 821 steerage passengers and 31 pieces of large baggage; 1,300 pieces of baggage were disinfected by steam.

April 10, the steamship *Vancouver*, of the Dominion Line, bound with passengers and cargo for Boston. There were inspected and passed 1,210 steerage passengers and 270 pieces of large baggage; 1,700 pieces of baggage were disinfected by steam.

April 10, the steamship *Hohenzollern*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 505 steerage passengers and 50 pieces of large baggage; 950 pieces of baggage were disinfected by steam.

April 11, the steamship *Attivita*, of the Zino Line, bound with passengers and cargo for New York. There were inspected and passed 812 steerage passengers and 63 pieces of large baggage; 1,068 pieces of baggage were disinfected by steam.

April 12, the steamship *Citta di Torino*, of the Veloce line, bound with passengers and cargo for New York. There were inspected and passed 1,471 steerage passengers and 90 pieces of large baggage; 1,600 pieces of baggage were disinfected by steam.

Smallpox at Naples.

During the week ended April 12, 1902, there were officially reported at Naples 10 cases of smallpox, with no deaths.

Smallpox in Italy.

In the district of Bovino, province of Foggia, there is an extensive epidemic of smallpox prevailing.

Bubonic plague in Egypt.

On April 7 it was a year since the first case of bubonic plague was reported in Egypt. During the year 382 cases have appeared. Of these 228 ended in death, and 17 were still under treatment at end of the first year of the epidemic. Of the deaths, 206 occurred in the Delta, the remainder in upper Egypt. Cairo has remained free from plague.

Asiatic cholera in Egypt.

Reports from Alexandria state that there have been 5 deaths from Asiatic cholera among the pilgrims from the Hedjaz under treatment at the lazaretto.

At Ettor, 19 cases with 14 deaths are reported.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

MEXICO.

Report from Vera Cruz.

VERA CRUZ, MEXICO, *April 27, 1902.*

SIR: I have the honor to make the following report for the week ended April 26, 1902:

From all causes there were reported 45 deaths. Nine cases and 6 deaths were reported from yellow fever and 4 cases and 1 death from smallpox. Eleven vessels and 218 passengers were inspected.

I was informed by the consul, who received a communication through the Treasury and State Departments, that 3 members of the yellow-fever institute would come to this port for the investigation of yellow fever. I have been assured by the physicians here that every possible facility would be given the commission to conduct any line of experiments that they might desire. The local officials have assured the consul of their hearty cooperation in furthering any experiments or studies. Since the consul's letter nothing further has been heard of the commission.

Respectfully,

S. H. HODGSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

NEW BRUNSWICK.

Inspection service at St. John.

ST. JOHN, NEW BRUNSWICK, *April 29, 1902.*

SIR: I have the honor to report that during the week ended April 26, 1902, the following vessels and their crews were inspected by me at this port: Steamers, 4; schooners, 9; seamen, 267.

Respectfully,

T. DYSON WALKER,

United States Medical Inspector.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

NICARAGUA.

*Report from Bluefields—Fruit port.*BLUEFIELDS, NICARAGUA, *April 27, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended April 26, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing diseases, none. The 1 death above noted was from old age. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following vessels: April 23, steamship *Utstein*, crew, 15; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none. April 26, steamship *Nicaragua*, crew, 18; number of passengers from this port, none; number of passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

D. W. GOODMAN,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PHILIPPINE ISLANDS.

*Reports from Manila.*MANILA, P. I., *March 20, 1902.*

SIR: I have the honor to report that 1 case of plague was reported in Manila, P. I., for the two weeks ended March 15, 1902, occurring in a Chinese with fatal results.

No smallpox was reported for this period.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

*Cholera in Manila—Its introduction—Cases and deaths.*MANILA, P. I., *March 30, 1902.*

SIR: Confirmatory of my telegram, "Cholera is now present Manila, 18. Think the disease was introduced by vegetables, Canton. The local board of health is taking all necessary steps to control. Quarantine rigid," of the 23d instant, I have the honor to report as follows relative to the occurrence of cholera in Manila, the progress of the disease to date, and the rules and regulations enforced to prevent its spread:

I think cholera had existed in Canton, China, for some time before its presence was reported, and during this period the Canton vegetables were permitted to be landed in Manila. This city is the greatest vegetable market in the Orient, as nothing of that character is produced here, all such supplies have to be imported, and all green vegetables

such as cabbage, celery, lettuce, and cauliflower have come from the Canton districts.

Assistant Surgeon Kerr, on duty in Hongkong, cabled March 3, that cholera was present in Canton and immediately stopped the shipment of all articles prohibited by the regulations from cholera-infected ports, but evidently vegetables admitted prior to knowledge of the disease in Canton introduced the infection. If information had been received one month sooner no doubt the introduction of the disease could have been prevented. It is both my opinion and that of the board of health that cholera gained entrance into Manila from this cause.

As soon as cholera appeared in Hongkong, I considered the situation of sufficient gravity to impose quarantine on all vessels arriving from that port and Amoy, as the former city is only forty eight hours distant. This was at first counted from date of departure, but upon the appearance of the disease in Manila and in order to be absolutely certain, I imposed a quarantine of five days after the disinfection at Mariveles, also disinfecting at the same time the water tanks and removing all suspected Chinese food products.

No cases have developed on ships arriving from Hongkong, and comparatively few Chinese have been affected. The disease has been among the natives almost exclusively.

The first cases occurred on March 20, 1 of which can be traced to what is known as the Farola district, a small peninsula bounded by the Pasig River and Manila Bay. This small section contained about 400 nipa shacks, filthy in the extreme, and was the worst center of infection. More than one-half of the cases have occurred in this section and the immediate surroundings.

Upon the confirmation of the diagnosis of cholera by careful bacteriological tests and examinations, the board of health immediately instituted energetic measures to combat the disease.

The city was already divided into sanitary districts and inspection work was daily carried on in order to detect any plague cases that might occur, and a detention camp large enough to accommodate 2,000 people had recently been completed. In addition to the above, new stations were established in all sections of the city, the number of inspectors and physicians increased many times, and the inspection work carried on with vigor night and day. Every case of illness was examined and all that were suspicious were immediately sent to hospital. Cholera cases were sent to cholera hospital, and all contacts and suspects immediately sent to the detention camp, the infected house being at once disinfected, closed, and placed under guard. In this way the cases were secured early and the contacts caught before they had time to escape. In a few days, the number of cases continuing to increase in the Farola district, the property was appraised and burned, thereby destroying the worst foci. Immediately after this the daily number of cases commenced to diminish.

A cordon was immediately thrown around the city, ferry boats and passenger trains were stopped, and all passengers going to the neighboring provinces either by rail or small boat required to secure a permit from the board of health. All old wells and cisterns in the city were closed, and a guard was placed on the river supplying the city with water in order to prevent pollution and infection. All green vegetables in the city and markets that were considered as liable to convey the disease were bought and destroyed. People were advised by circular of the precautions to be taken, and distilled water was furnished free at different stations throughout the city.

The quarantining of the city against the provinces was immediately put into effect in order to prevent an exodus of people, and to prevent, if possible, the spread of the disease to other places in the islands. I immediately declared a five days' quarantine for all vessels leaving Manila for the United States ports or other places in the Philippine Islands and copies of circular letters sent to agents of vessels are inclosed for your information. Of course, everything was at a standstill for a few days, but trains are now running, and the island boats are now leaving after their five days' detention. I have instructed the officers at Iloilo and Cebu, and made pertinent suggestions to the acting health officers at the other ports of entry in the islands.

The daily number of cases and deaths from the disease, as well as the nationalities affected, is shown by the table below :

Date.	Number of cases.			Total—	
	Filipinos.	Chinese.	Europeans.	Cases.	Deaths.
March 20	4			4	3
March 21	4	1		5	5
March 22	4			4	4
March 23	7	1		8	4
March 24	13		1	14	12
March 25	14			14	12
March 26	11	1		12	8
March 27	11	1		12	9
March 28	5	1		6	4
March 29	4	1		5	4
Total	77	6	1	84	65

The situation at date of writing is encouraging. The board of health is using every measure to eradicate the disease, and I think their efforts will be crowned with success.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,

U. S. Marine Hospital Service.

Circulars to steamship agents.

MANILA, P. I., March 22, 1902.

SIR: In view of the fact that 6 suspected cases of cholera have occurred in Manila during the past two days, and in order to prevent the disease being carried to other ports in the Philippine Islands, I have to inform you that all vessels sailing from Manila for other island ports must comply with the following regulations before a bill of health will be granted :

1. The vessel must be thoroughly cleaned; cabins and forecables must be repainted, if necessary, and all cockroaches and vermin killed.
2. All water taken on board for the use of crew and passengers must be boiled.
3. All passengers and crew must have a certificate from the board of health.
4. All food products, vegetables especially, taken as cargo or for consumption on board, must be accompanied with a certificate from the board of health.
5. All passengers or crew taken sick during voyage with cramps or diarrhea must be separated from other persons and not allowed to use the water-closet. All matter passed by such sick persons must be kept in urinal and 5 per cent solution of carbolic acid added in quantity equal to the discharge and kept three hours before throwing overboard. All clothing and bedding soiled by those sick must be immediately boiled.
6. All vessels will anchor in the bay and wait for inspection before bill of health is granted.

7. Captains of ships must keep vessels clean during voyage, and any boat arriving in dirty condition will be sent to Mariveles for disinfection.

This order will go into effect immediately and continue in force until further notice.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.

The STEAMSHIP AGENTS, *Manila, P. I.*

MANILA, P. I., *March 23, 1902.*

SIR: You are hereby informed that all vessels leaving Manila for other ports in the Philippine Islands will be quarantined for five days before being allowed to sail, and the following rules, in addition to those already promulgated, will be enforced:

All the provisions of previous order of the 22d instant will be rigidly enforced except clause No. 3, and the following regulations must be obeyed:

1. All vessels after loading cargo and with passengers and crew on board must proceed into the bay and anchor far over to the right of the usual anchorage for incoming ships.

2. Must keep ladders raised and fly yellow flag continuously.

3. No one can leave or visit the ship except the quarantine officer.

4. Any violation of the regulations will meet with summary prosecution of the guilty parties and the penalty of fine and imprisonment will be inflicted.

5. In case of emergency and the necessity of supplying additional water and provisions, permission will be granted for communication under the direction of the quarantine officer.

6. No communication between the different ships will be allowed under any circumstances, and violations of this regulation will make it necessary to detain the vessels an additional five days in addition to inflicting the penalties on the guilty parties.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.

The STEAMSHIP AGENTS, *Manila, P. I.*

PORTO RICO.

Reports from Ponce.

PONCE, P. R., *April 21, 1902.*

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended April 19, 1902.

Of 6 vessels which entered during the week, 3 were inspected and passed and 3 were held in quarantine, as follows: French steamship *St. Domingue* on the 17th, from Port au Prince, Jeremie, Les Cayes, Jacmel, Santo Domingo, and Mayaguez; 30 pieces of baggage and 2 sacks of mail from Hayti and Santo Domingo were disinfected, and 24 pieces were inspected and passed. The provisional flag steamship *Julia* on the 18th, from Havana, Nuevitas, Gibara, Sagua la Grande, Santiago, Santo Domingo, and Macoris; 84 pieces of baggage and 1 sack of mail from Santo Domingo were disinfected, and 66 pieces, principally from Cuba, were inspected and passed. The Spanish steamship *Montevideo* on the 18th, from Havana, Port Limon, Colon, Sabanilla, Puerto Cabello, and La Guayra. Five passengers from La Guayra were permitted to disembark. Seven bills of health were issued during the week.

The local board of health admitted 15 new cases to the smallpox hospital and have 7 cases in quarantine in private houses during the past week, making in all 31 cases under treatment, as none of the 9 previously reported were discharged.

Respectfully,

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

Cholera in the Hedjaz.

ADEN, ARABIA, *April 9, 1902.*

SIR: I have the honor to forward herewith a copy of a letter addressed to me by consular agent at Hodeidah, regarding the outbreak of cholera in the province of Djiddah, for your information.

No further information on the subject has been received since.

Respectfully,

W. H. LOCKERMAN,
United States Vice-Consul.

HON. ASSISTANT SECRETARY OF STATE.

HODEIDAH, *March 28, 1902.*

SIR: I have the honor to inform you that by a telegram from Djiddah the local health office was informed that the cholera in the province of Hedjaz is strongly increasing. Since February 19 up to the 26th instant there have been 1,300 deaths, what leads to calculate about 3,000 cases.

Respectfully,

V. CREMASCHI,
United States Consular Agent.

WM. HOWELL LOCKERMAN, *United States Vice-Consul.*

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—Lourenço Marques.—Month of February, 1902. Estimated population, 7,000. Total number of deaths, 21, including 3 from tuberculosis.

FRANCE—Rouen.—Month of March, 1902. Estimated population, 116,316. Total number of deaths, 287, including diphtheria, 4; enteric fever, 1; measles, 2; whooping cough, 1; smallpox, 1, and 60 from tuberculosis.

GERMANY—Hanover.—Month of February, 1902. Estimated population, 241,849. Total number of deaths, 279, including 22 from infectious diseases.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended April 12, 1902, correspond to an annual rate of 17.4 per 1,000 of the aggregate population, which is estimated at 14,862,909.

London.—One thousand five hundred and twenty-three deaths were registered during the week, including measles, 64; scarlet fever, 10; diphtheria, 23; whooping cough, 41; enteric fever, 1; smallpox, 73, and diarrhea and dysentery, 12. The deaths from all causes correspond to an annual rate of 17.3 per 1,000. In Greater London 2,099 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 5 from measles, 1 from scarlet fever, 18 from smallpox, and 4 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended April 12, 1902, in the 21 principal town districts of Ireland was 24.2 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Queenstown, viz, 0.0, and the highest in Portadown, viz, 46.7 per 1,000. In Dublin and suburbs 206 deaths were registered, including diphtheria, 1; enteric fever, 2; measles, 3; whooping cough, 2, and 41 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended April 12, 1902, correspond to an annual rate of 22.1 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Leith, viz, 13.9, and the highest in Greenock, viz, 26.5 per 1,000. The aggregate number of deaths registered from all causes was 715, including diphtheria, 2; measles, 10; scarlet fever, 8, smallpox, 2, and 21 from whooping cough.

GIBRALTAR.—Two weeks ended April 6, 1902. Estimated population, 27,460. Total number of deaths, 27, including 7 from measles.

JAMAICA—Port Antonio.—Two weeks ended April 19, 1902. Estimated population not reported. One death reported. No contagious diseases.

JAPAN—Nagasaki.—Ten days ended March 31, 1902. Estimated population, 131,700. Total number of deaths not reported. One death from enteric fever reported.

MALTA.—Four weeks ended April 12, 1902. Estimated population, 183,679. Total number of deaths, 302, including diphtheria, 4, and 6 from enteric fever.

ST. HELENA.—Two weeks ended March 22, 1902. Estimated population, 3,342. Total number of deaths, 10. No contagious diseases.

SPAIN—Cadiz.—Month of March, 1902. Estimated population, 70,177. Total number of deaths, 254, including diphtheria, 1; enteric fever, 5; measles, 16, and 28 from tuberculosis.

Valencia.—Two weeks ended April 15, 1902. Estimated population, 204,000. Total number of deaths, 177, including enteric fever, 3, and 6 from smallpox.

SWITZERLAND.—Reports for the two weeks ended April 5, 1902, from 18 cities and towns having an aggregate estimated population of 770,000, show a total of 587 deaths, including diphtheria, 7; enteric fever, 2; measles, 9; scarlet fever, 1; whooping cough, 17, and 77 from phthisis pulmonalis.

WEST INDIES—St Thomas.—Six weeks ended April 11, 1902. Estimated population, 11,012. Total number of deaths, 43. No deaths from contagious diseases.

Cholera, yellow fever, plague, and smallpox, December 27, 1901, to May 9, 1902.

[Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]

[For reports received from June 29, 1901, to December 27, 1901, see PUBLIC HEALTH REPORTS for December 27, 1901.]
