

PUBLIC HEALTH REPORTS.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

Arrival at Reedy Island Quarantine of vessels from West Indian ports.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., September 7, 1902.

SIR: Through the medical officer in command of national quarantine service on Delaware Bay and River, I have the honor to report the arrival at this station of the following vessels:

August 31, steamship *Themisto*, from Matanzas, with sugar; no passengers; bill of health signed by Assistant Surgeon Von Ezdorf; steamship *Barcelona*, from Havana, with sugar; no passengers; bill of health signed by Surgeon Glennan. September 4, steamship *Sidra*, from Sagua la Grande, with sugar; no passengers; Cuban bill of health signed by Pedro Garcia Riera.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon, In Command.

Arrival at Baltimore of vessels from South American ports.

BALTIMORE, MD., *September 6, 1902.*

SIR: I have the honor to report the arrival of the following vessels at this port for the week ended this day: American barkentine *Josephine*, from Rio de Janeiro, with coffee; British steamship *Corinthia*, from Iquique, with nitrate of soda; British steamship *Tolosa*, from Rio de Janeiro, with ore.

Respectfully,

N. A. RYON,
Collector.

REPORTS FROM THE MEXICAN BORDER.

FOREIGN AND INSULAR.

BARBADOS.

Smallpox situation.

BARBADOS, WEST INDIES, *August 25, 1902.*

SIR: I have to report that there have been 129 cases of smallpox here since July 13 last. A majority of the cases have been isolated at the quarantine station on Pelican Island, separate from the mainland; the others have been quarantined at their homes. The total number of deaths is 8. The disease, while not of a malignant type, is taxing the efforts of the authorities. While vaccination is not compulsory, it is being freely resorted to; the medical staff are kept busy, and little objection is offered by the people. Bills of health issued at this consulate contain full particulars. I have not deemed the disease so malignant or widespread as to warrant notifying the Department by telegraph. Barbados has been quarantined by near-by ports, seriously affecting commerce and business generally.

Respectfully,

S. A. MACALLISTER,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

BRITISH HONDURAS.

Mosquitoes of Belize.

BELIZE, BRITISH HONDURAS, *September 4, 1902.*

SIR: In accordance with request in Bureau letter of April 4, 1902 (C. H. W., R. M. W.), regarding the presence aboard vessels of mosquitoes, as suggested by Surgeon Carter, I have the honor to report that I have made careful observations and examined the mosquitoes of Belize, and of their possible conveyance aboard ship.

Since my arrival here in April I do not think that there have been more than three or four days on which there was much danger of mosquitoes flying or being carried by the wind out to the steamers. I have also made careful inquiries of the officers of the vessels and find that they are very rarely troubled by either the sand fly or mosquitoes while in Belize harbor.

The steamers, while here, anchor about 1½ or 2 miles offshore, and during the greater part of the year there is a strong sea breeze (trade wind), which would tend to prevent their flight from shore. The only time when there is danger is when the wind is from the land, as it is under this condition that the officers report having seen sand flies and mosquitoes here. I have also studied the different kinds of mosquitoes found in Belize, and find the *seigomyia fasciata* and *culex pipiens* the most common, with several species of *culex*. So far have not found the anopheles in Belize proper, and find that malarial fever very sel-

dom originates in Belize, but that the patient has usually been exposed at some other place or on the river back of the town proper. * * *

Respectfully,

R. H. PETERS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Weekly report of conditions and transactions at Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *August 30, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 30, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 6. Causes of deaths: Cerebral hemorrhage, 1; enteritis, chronic, 1; chronic ileo-colitis, 1; acute gastro intestinal catarrh, 1; natural causes, 2. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: August 28, steamship *Managua*; crew, 17; passengers from this port, 1; passengers in transit, none; baggage disinfected, 2 pieces. August 29, steamship *Breakwater*; crew, 34; passengers from this port, 4; passengers in transit, 20; baggage disinfected, 9 pieces.

Respectfully,

R. H. PETERS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CANADA.

Inspection of immigrants at Quebec for the week ended September 6, 1902.

QUEBEC, CANADA, *September 7, 1902.*

SIR: I have the honor to report that at this port, for the week ended Saturday, September 6, 401 immigrants were inspected; passed, 397; detained, 4.

Respectfully,

W. C. BILLINGS,
Assistant Surgeon.

The SURGEON-GENERAL.

COLOMBIA.

Weekly report of conditions and transactions at Bocas del Toro—Fruit port.

BOCAS DEL TORO, COLOMBIA, *September 2, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended September 1, 1902:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from

other causes during the week, 3. Prevailing disease, malarial. The 3 deaths noted above were: Adult male, strangulated hernia, 1; adult female, tuberculosis, 1; child, female, convulsions, 1. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: August 28, steamship *John Wilson*; crew, 18; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Brighton*; crew, 22; passengers from this port, 2; passengers in transit, 6; baggage disinfected, none. August 30, steamship *Mount Vernon*; crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Taunton*; crew, 23; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

PAUL OSTERHOUT,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

COSTA RICA.

Weekly report of conditions and transactions at Port Limon—Fruit port.

PORT LIMON, COSTA RICA, September 4, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended September 4, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 8. Prevailing diseases were mild type of malarial fever and gastro-intestinal disorders. General sanitary condition of this port and the surrounding country during the week has been fairly good. Eight deaths occurred in this port—1 white, adult, male, due to acute dysentery, and 7 colored, males (2 were infants), due to the following causes: Pulmonary tuberculosis, 2; chronic hepatitis, 1; Bright's disease, 1; gunshot wound, 1; remittent fever, 1, and gastro-enteritis, 1.

Bills of health were issued to the following vessels: August 28, steamship *S. Oteri*; crew, 30; passengers from this port, none; passengers in transit, none; baggage disinfected, none. August 29, steamship *Holstein*; crew, 23; passengers from this port, none; passengers in transit, none; baggage disinfected, none. August 30, steamship *Brighton*; crew, 23; passengers from this port, 2; passengers in transit, none; baggage disinfected, none. August 31, steamship *Alabama*; crew, 19; passengers from this port, none; passengers in transit, none; baggage disinfected, none. September 1, steamship *Athos*; crew, 42; passengers from this port, 7; passengers in transit, 2; baggage disinfected, none. September 3, steamship *Beverly*; crew, 36; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

WM. H. CARSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CUBA.

*Reports from Cienfuegos.*CIENFUEGOS, CUBA, *September 1, 1902.*

SIR: Through Surg. A. H. Glennan, I have the honor to report the transactions and conditions at this station for the week ended August 30, 1902. Two bills of health were issued to vessels going to ports in the United States; 9 deaths were reported in the city during this period—1 due to malaria and 2 to tuberculosis; others from ordinary causes. Sanitary condition of the city is good.

Respectfully,

R. L. McMAHAN,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CIENFUEGOS, CUBA, *September 8, 1902.*

SIR: Through Surg. A. H. Glennan, I have the honor to transmit the following report of transactions at this station for the week ended September 6, 1902: Three bills of health were issued to vessels going to the United States. Two vessels, steamship *Ida* and steamship *Sanlanderina*, bound for Pensacola, were disinfected prior to departure. The mortuary report for this week shows there were 21 deaths—2 from malaria and 3 from tuberculosis; others from ordinary causes. The sanitary condition of the city is good.

Respectfully,

R. L. McMAHAN,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

DENMARK.

Danish West Indies quarantines against Barbados.

DEPARTMENT OF STATE,

Washington, D. C., September 12, 1902.

SIR: I have the honor to inform you that the minister of the United States at Copenhagen reports that on July 28 a quarantine of fifteen days had been declared by the government of the Danish West Indies against all products coming from Barbados on account of the appearance of the smallpox at that place.

Respectfully,

ALVEY A. ADEE,
Acting Secretary of State.

The SECRETARY OF THE TREASURY.

ECUADOR.

Quarantine against Panama and Punta Arenas on account of yellow fever.

GUAYAQUIL, ECUADOR, *August 20, 1902.*

SIR: I have the honor to report to you that the authorities here have imposed a quarantine of ten days on all vessels arriving from Panama,

or from Punta Arenas, Costa Rica, on the alleged existence of yellow fever at those ports.

The Chilian mail steamer *Limari*, which arrived at Puna, quarantine station situated at the mouth of the river, from Panama on the 16th instant, was placed in quarantine, but she left yesterday morning for the south, taking cargo destined to this port with her. The mails and passengers were transferred to a small river steamer at Puna, which boat will be given pratique on the 23d instant.

This port issues foul bills of health now, as there have occurred 5 cases of yellow fever, as reported by me in my sanitary report of the 16th instant, of which cases 3 have died and the others are convalescent. This fever is said to have been imported from Panama.

Respectfully,

THOMAS NAST,
United States Consul-General.

The ASSISTANT SECRETARY OF STATE.

EGYPT.

Progress of cholera.

DEPARTMENT OF STATE,
Washington, D. C., September 9, 1902.

SIR: I have the honor to inform you that a telegram dated September 7, 1902, has been received from the vice-consul general in charge at Cairo, Egypt, in the following words: "Since September 1, 6,000 new cases; 5,099 deaths, all Egypt; 28 new cases, Cairo; 125 deaths for week. Alexandria, 49 cases, 71 deaths; 1 imported case Port Said.

Respectfully,

ALVEY A. ADEE,
Acting Secretary of State.

The SECRETARY OF THE TREASURY.

[Inclosure.]

CAIRO, EGYPT, *August 19, 1902.*

SIR: I have the honor to confirm the following cablegram received from the Department under date of the 17th instant:

"*American consul, Cairo, Egypt:*

"Mail full specific reports cholera epidemic; cable information outbreak new points; repeat instruction Alexandria, Suez, Port Said.

"ADEE, *Acting.*"

Also my reply thereto of the 18th instant:

"*Secretary of State, Washington, D. C.:*

"Sanitary department reports cholera spreading throughout country. Disease in Cairo and other large cities well in hand. Yesterday's bulletin shows 34 cases existing in Cairo, 23 deaths, 1 European. Guizeh, Minieh, and Charkieh provinces most seriously affected.

"SMITH."

Upon receipt of the Department's instructions I telegraphed our consular agents at Alexandria, Suez, and Port Said to mail the desired reports direct to Washington, sending copies to this office for its information and files, and to advise me by telegraph of any new outbreaks in their respective districts. The agents at Port Said and Suez reported yesterday that there were no cases of cholera at either point.

I called Sunday afternoon on Pinching Pacha, the director-general of the sanitary department, and arranged to have this office furnished with a copy of the daily bulletin showing the progress of the epidemic. According to the bulletin issued yesterday at noon, the total number of cases occurring since July 15, 1902, the date of the first cases, is 2,238; number of deaths, 1,696; number cured, 130. Up to the 16th instant the total cases in this city numbered 623; deaths, 538; recoveries, 40. The bulletin

of yesterday (18th instant), shows the following for Cairo: Existing cases, 32; fresh cases, 3; deaths in hospital, 5; deaths out of hospital, 22; cured, none; remaining under treatment, 30.

The same bulletin shows but 2 cases existing at Alexandria. The provinces of Guizeh, Minieh, Charkieh, and Assiout are most seriously affected. The bulletin of the 18th shows the following:

	Guizeh.	Minieh.	Charkieh.	Assiout.
Existing cases.....	101	66	42	73
Fresh cases.....	8	43	19	27
Deaths in hospital.....	17	23	8	19
Deaths out of hospital.....	16	23	5	8
Cured.....	3	0	0	0
Remaining under treatment.....	89	84	57	81

Deyrout, in the Assiout Province, is still badly afflicted, the bulletin of the 18th showing 42 existing cases, 21 new, 12 deaths in hospital, 6 out of hospital, and 51 remaining under treatment.

The town of Minieh is a prosperous commercial town of upper Egypt, the sugar and cotton industries being very important there. The bulletin of the 18th shows for that town alone 45 existing cases (2 Europeans), 25 new cases, 10 deaths in hospital, 20 out of hospital, and 60 cases remaining under treatment.

I will keep the Department fully advised by dispatch and cable of the progress of the epidemic throughout the country.

Respectfully,

HUBBARD T. SMITH,
Vice Consul-General in charge.

The ASSISTANT SECRETARY OF STATE.

CAIRO, EGYPT, *September 13, 1902.*

Secretary of State, Washington, D. C.:

Since 7th instant 7,106 cases cholera, 6,112 deaths all Egypt. Total cases since outbreak, 23,017 cases, 18,500 deaths, 1,051 cured. Situation Cairo improving; growing worse Alexandria, Port Said, Suez, and Luxor affected.

SMITH.

ENGLAND.

Report from Liverpool.

LIVERPOOL, ENGLAND, *September 2, 1902.*

SIR: I have the honor to state that for the week ended August 30, 1902, there were reported to the local authorities the following cases: Smallpox, 14; typhus fever, 7; enteric fever, 13; scarlet fever, 130; diphtheria, 14; measles, 54, and whooping cough, 19. There were the same number of cases of smallpox last week as there were the preceding week, and they are traced to the same cause, namely, a case from Spain that had been wandering around with the condition unrecognized. As I said in my previous report, I believe nothing serious will arise.

For the same period in Birkenhead there were reported the following cases: Scarlet fever, 6; membranous croup, 2; enteric fever, 28, and measles, 13.

Respectfully,

CARROLL FOX,
Assistant Surgeon.

The SURGEON-GENERAL.

Reports from London.

LONDON, ENGLAND, *August 28, 1902.*

SIR: I have the honor to submit the following report for the week ended August 23, 1902: Seven vessels were inspected and given bills of health at this port, and 53 members of the crew and cattlemen were vaccinated. On 2 vessels the vaccination was performed by the ship's

surgeon. There were 7 deaths in England from smallpox, 3 in London, 2 in Liverpool, 1 in Leicester, and 1 in Swansea. There were 128 cases of smallpox under treatment at the close of the week, 42 less than the previous week, and 2,623 of scarlet fever, 1,048 of diphtheria, and 265 of enteric fever. Eighteen fresh cases of smallpox were reported during the week.

Cholera in Egypt.

Recent press reports state that the total number of cases of cholera at present existing in Egypt is 388. The total number of cases since July 15 is 4,278, of which 3,246 have ended fatally and 322 have been cured.

Respectfully,

JOHN McMULLEN,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

LONDON, ENGLAND, *September 4, 1902.*

SIR: I have the honor to report that for the week ended August 30, 1902, there were inspected and given bills of health at this port 12 vessels and 188 members of the crew and cattlemen were vaccinated. Vaccination was performed by the ship's surgeon on 3 of the vessels. Only 2 fatal cases of smallpox occurred in England and both belonged to London. According to the returns from the hospitals for infectious diseases there were 109 cases of smallpox, 2,651 of scarlet fever, 1,017 of diphtheria, and 281 of enteric fever under treatment at the close of the week, August 30. The admissions were as follows: Smallpox, 11; scarlet fever, 295; diphtheria, 133, and enteric fever, 60 cases.

Respectfully,

JOHN McMULLEN,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

BERLIN, GERMANY, *August 30, 1902.*

SIR: I have the honor to transmit herewith the latest information regarding plague, obtained from the imperial health office (Kaiserlichen Gesundheitsamt) at Berlin:

EGYPT.—Seven fresh cases of plague were registered during the week ended August 8, viz, 6 in Alexandria and 1 in Tuhk. Between August 8 and August 15, 4 plague cases and 1 death were recorded in Alexandria.

BRITISH INDIA.—In the Bombay Presidency during the week ended July 25, there were registered 1,581 new plague cases and 1,040 deaths.

BRAZIL.—In the middle of August, 5 deaths from plague were registered in Rio de Janeiro.

QUEENSLAND.—According to an official report dated August 19, another fatal case of plague has occurred at Townsville.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL.

BERLIN, GERMANY, *September 1, 1902.*

SIR: I have the honor to transmit herewith the latest information concerning cholera, obtained from the imperial health office at Berlin (Kaiserlichen Gesundheitsamt).

RUSSIA.—According to the official report published in the Government Gazette of August 15, cholera continues to rage with unabated violence in the more important towns in Manchuria, along the Chinese Eastern Railroad. Only in Inkou has a slight decrease in the number of cases been noted. In the Siberian districts, for the most part, only a few sporadic cases are reported. For instance, there were registered in Chabarowsk, between July 28 and August 7, 11 cases and 8 deaths. At the station Olowjannaja, on the Transbaikal Railway, there were recorded up to August 8, 8 cases and 5 deaths. Relatively numerous were the cases still in Blagoweschtschensk, Port Arthur, and Dalnij. In Blagoweschtschensk, since the beginning of the epidemic to July 28, 29 cases had been registered with 18 deaths. From July 29 to August 4 there occurred 123 cases and 93 deaths; from August 5 to August 11, 122 cases and 80 deaths. In Port Arthur, from the beginning of the disease to August 5, there had occurred 445 cases and 285 deaths.

EGYPT.—From July 29 to August 4 there were registered in the whole of Egypt 185 new cholera cases and 278 deaths, namely, in Cairo 73 cases and 163 deaths; in Gizeh, 3 cases and 1 death; in Assiout, 100 cases and 103 deaths, and in the province of Assiout, 8 new cases and 11 deaths. According to the official bulletin of August 14, there were recorded between August 5 and August 13 in Alexandria, 8 new cholera cases and 6 deaths. In Cairo, between August 7 and August 13, there were registered 92 fresh cholera cases and 86 deaths.

CHINA.—During the three weeks from June 16 to July 6, 366 deaths from cholera were registered among the Chinese population of Shanghai.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL.

GUATEMALA.

Weekly report of conditions and transactions at Livingston—Fruit port.

LIVINGSTON, GUATEMALA, September 2, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended September 2, 1902:

Present officially estimated population, 3,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 2. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: September 2, steamship *Condor*; crew, 16; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

GUY A. DARCANTEL,
For A. J. SMITH,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

HAWAIIAN ISLANDS.

*Report of outgoing quarantine at Honolulu.*HONOLULU, H. I., *September 1, 1902.*

SIR: I have the honor to make the following report in regard to the transactions of outgoing quarantine at this port for the week ended August 30, 1902: Number of steamers inspected and passed, 2; number of sailing vessels inspected and passed, 2; number of cabin passengers inspected and passed, 4; number of steerage passengers inspected and passed, none; number of crew inspected and passed, 70; number of pieces of baggage disinfected, 34; number of sailing vessels disinfected, 4; number of steamers uncertified, 1.

Respectfully,

L. E. COFER,
*Passed Assistant Surgeon,
Chief Quarantine Officer, Hawaiian Islands.*

The SURGEON-GENERAL.

HONDURAS.

*Weekly report of conditions and transactions at La Ceiba—Fruit port.*LA CEIBA, HONDURAS, *August 30, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 30, 1902:

Present officially estimated population, about 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing disease, malaria, mostly mild types, and 1 or two cases of dysenteric form in children. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: August 26, British steamship *Usk*; crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none. August 28, Norwegian steamship *Spero*; crew, 18; passengers from this port, none.

Respectfully,

W. B. ROBERTSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

*Weekly report of conditions and transactions at Puerto Cortez—Fruit port.*PUERTO CORTEZ, HONDURAS, *September 4, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended September 4, 1902:

Population according to census of 1896, 1,856. Present officially estimated population, 2,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. Prevailing disease, malarial fever. General sanitary

condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: August 28, steamship *Breakwater*; crew, 34; passengers from this port, 7; passengers in transit, 12; baggage disinfected, 12 pieces. August 29, steamship *España*; crew, 15; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

S. H. BACKUS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

JAPAN.

Reports from Yokohama—Prevalence of cholera in the islands.

YOKOHAMA, JAPAN, August 12, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health for the week ended August 9, 1902. Bills of health were issued to 5 vessels having a total personnel of 342 crew and 617 passengers; 75 steerage passengers were bathed and 80 pieces of baggage were disinfected by formaldehyd.

The following data, while possibly incomplete and not altogether accurate, give a fair idea of the cholera situation in Japan during the past week: Ehime Ken, a few cases at Matsuyama; Fukuoka Ken, to August 11, 532 cases, 278 deaths; Hyogo Ken, a few cases at Kobe; Kagawa Ken, a considerable number of cases at Taka, Matsu, and elsewhere—disease spreading; Nagasaki Ken, a considerable number of cases; Okayama Ken, July 19 to August 8, 484 cases and 227 deaths; Osaka Fu, to August 10, 24 cases and 17 suspicious cases; Saga Ken, cholera present; Yamaguchi Ken, cholera present.

No official report of infectious diseases in Yokohama during the week ended August 9 has been received, but it is believed that this city is free from quarantinable disease. The present outbreak of cholera has been confined, with the exception of a few cases in Tokyo and elsewhere, to the southern portion of the empire. The island of Kyushu has suffered rather severely, and its chief ports, Nagasaki and Moji, are at present infected. Recently, a considerable number of cases have been reported from Kagawa Ken on the island of Shikaku. The only extensive outbreak on the main island has occurred at Okayama, a city not far distant from Kobe. The disease has not invaded the northern portion of the main island, and the Hokkaido is also free from suspicion.

Respectfully,

DUNLOP MOORE,
Assistant Surgeon.

The SURGEON-GENERAL.

YOKOHAMA, JAPAN, August 19, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health for the week ended August 16, 1902. Three vessels having a total personnel of 336 crew and 413 passengers were inspected, 171 steerage passengers were bathed, and 301 pieces of baggage were disinfected by formaldehyd.

The official report of infectious diseases in Yokohama for the two weeks ended August 16, 1902, mentions 1 nonfatal case of cholera, being the first case which has been officially recognized in this city during the present outbreak. A few cases of cholera and "pseudo-cholera" have recently occurred in Tokyo. Nevertheless at present,

as regards cholera, the conditions in Yokohama and vicinity seem much more favorable than those obtaining in the chief southern ports of Japan, viz, Moji, Nagasaki, and Kobe. The Japanese ports to the north of Tokyo appear at present free from infection.

The prevalence of cholera in the favorite coaling port of Moji, where, to August 18, 329 cases, with 191 deaths, are reported, deserves special mention. Many ships bound for American ports touch there, but owing to the fact that no consular officer of the United States is stationed at Moji, a United States bill of health is not obtainable.

Recent reports from Formosa show as occurring in that island from the beginning of the year to August 18, 2,116 cases of pest with 1,658 deaths.

Respectfully,

DUNLOP MOORE,
Assistant Surgeon.

The SURGEON-GENERAL.

Cases and deaths from cholera in Japan to August 18, 1902.

YOKOHAMA, JAPAN, *August 22, 1902.*

SIR: I have the honor to transmit herewith a statement of the number of cases of cholera reported in Japan (including Formosa) during the present outbreak. These data have been translated for me from the vernacular journals of this date, and are published as emanating from the Japanese home department. Merely suspicious cases seem to have been excluded from this table, and, generally speaking, the period covered is from the beginning of the present outbreak to August 18, 1902. See cholera table.

1

Respectfully,

DUNLOP MOORE,
Assistant Surgeon.

The SURGEON-GENERAL.

MEXICO.

Reports from Progreso.

PROGRESO, MEXICO, *September 6, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port for the week ended September 5, 1902:

Present officially estimated population, 5,000. There have been no deaths from yellow fever or other quarantinable diseases, and the sanitary condition of the port is fairly good.

The following deaths were reported at the office of the juez civil for the week: Dysentery, 1; general debility, 1; malarial fever, 2; intestinal tumor, 1, and enteritis, 1. Total, 6.

Eight health certificates were issued to passengers for Cuba and the United States. Seven vessels, 213 officers and crew, and 63 passengers with their effects were inspected.

There are reported several cases and 2 deaths from yellow fever in Merida during the past week.

Respectfully,

EDWARD T. HARGRAVE,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Acting Assistant Surgeon Hargrave ill with yellow fever.

[Telegram.]

PROGRESO, MEXICO, September 13, 1902.

Department of State, Washington, D. C.:

Acting Assistant Surgeon Hargrave down with yellow fever. Pending instructions am acting for him. Details by next mail.

THOMPSON,
United States Consul.

Report from Tampico.

TAMPICO, MEXICO, September 8, 1902.

SIR: I have the honor to transmit herewith an abstract of the bills of health issued at this office for the week ended September 6, 1902. During this period there was recorded in the office of the juez civil a total of 20 deaths, due to the following causes: Malaria, 6; tuberculosis, 2; gastro-intestinal affections, 2; miscellaneous, 10. In a population of 17,279 this makes an annual mortality rate for the week of about 60 per 1,000. This unusually high rate is in large measure accounted for by an exceptional number, 4, of deaths by violence, such as suicide, homicide, and railroad accidents, recorded above in the miscellaneous class.

The sanitary condition of the port remains unchanged.

Respectfully,

JOS. GOLDBERGER,
Assistant Surgeon.

The SURGEON-GENERAL.

Reports from Vera Cruz.

VERA CRUZ, MEXICO, September 1, 1902.

SIR: I have the honor to report that during the week ended August 30, there were reported 35 cases and 5 deaths from yellow fever, and 29 deaths from all causes. There has been no sickness in the harbor nor any suspects found among the passengers leaving the port. With the exception of the increase in the number of cases of yellow fever, the general health conditions of the city were better than they had been for several years. It is exceptional that the general mortality falls below 30 for the week.

Respectfully,

S. H. HODGSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Yellow fever in Orizaba.

VERA CRUZ, MEXICO, September 7, 1902.

SIR: I have the honor to make the following report for the week ended September 6: There were reported during the week 45 deaths from all causes, 7 from yellow fever, 9 from pernicioso, 7 from remittent fever, and 5 from tuberculosis. Twenty-four new cases of yellow fever were reported during the period.

Yellow fever is now epidemic in Orizaba, a city on the line of the Mexican railroad, between Vera Cruz and City of Mexico. This is a city of over 30,000 inhabitants, nonimmunes, and is situated on a plateau about 4,000 feet above sea level. During the summer of 1899 there were

many cases of yellow fever in Orizaba, but the present epidemic appears to be the largest that has yet occurred in that town. It is probable that the disease was brought from Vera Cruz, or infected stegomyia carried up in the trains. If the stegomyia can live and increase at the altitude of 4,000 feet, it is not unreasonable to suppose that they will thrive in the altitude of the City of Mexico.

Respectfully,

S. H. HODGSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

PHILIPPINE ISLANDS.

Manila free from smallpox and plague.

MANILA, P. I., July 24, 1902.

SIR: I have the honor to state that Manila remains free from smallpox and plague, no cases having occurred since my report of June 24, 1902.

Respectfully,

J. C. PERRY,
*Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL.

PORTO RICO.

Reports from Ponce.

PONCE, P. R., August 30, 1902.

SIR: Through the chief quarantine officer of Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended August 30, 1902. Also, the report of the inspection of immigrants for the month of August, 1902. No vessel was inspected during the week; three bills of health were issued. No quarantinable disease has been reported present in this city or district.

Respectfully,

W. W. KING,
Assistant Surgeon.

Inspection of immigrants at San Juan for the week ended August 30, 1902.

SAN JUAN, P. R., August 30, 1902.

SIR: I submit herewith report of alien steerage passengers arriving at this port during the week ended August 30, 1902.

Date.	Vessel.	Where from.	No. of immigrants
Aug. 27	Steamship Philadelphia	La Guaira and Curaçao.....	7
Aug. 28	Steamship Maria Herrera.....	Havana, Santiago de Cuba, and Puerto Plata.	44
Do....	Steamship Buenos Aires.....	Cadiz, Malaga, Barcelona, Santa Cruz, and Las Palmas.	32
Aug. 29	Steamship Buenos Aires.....	Barcelona and Cadiz.....	5
	Total	88

Respectfully,

FRED V. MARTIN,
Commissioner.

The SURGEON-GENERAL.

Report of immigrants inspected at the port of Ponce, P. R., during the month of August, 1902.

Total number of immigrants inspected, 46 ; number passed, 46.

W. W. KING,
Assistant Surgeon.

The SURGEON-GENERAL.

RUSSIA.

Anthrax in Odessa, and Aksai, Astrakhan.

ODESSA, RUSSIA, *August 14, 1902.*

SIR: I have the honor herewith to transmit 2 translations relating to the existence of anthrax at Astrakhan and Odessa. Said translations are from official documents or sources. Cases of anthrax in human beings are not very numerous, as far as I have followed the disease. That 16 deaths should have taken place at the village of Aksai, in the province of Astrakhan, is a serious matter, and I have felt it my duty to send the information to the Department for the reason, among others, that the province of Astrakhan is the source of supply of much that is shipped to the United States via Baltic ports. Hides of all kinds, hair, wool, and skins are sent to the United States from all of the Russian provinces bordering on the Volga. Wool in the grease is also sent to Rostoff, on the Don, to be washed, and this is also forwarded to the United States. Since the recent order of the Treasury Department relating to the disinfection of hides, unless these hides are either dry salted or arsenic cured, no shipments of hides have taken place from this port for the United States. I notice by the declared exports, however, that hides, calfskins, etc., are being shipped in large quantities from Moscow, St. Petersburg, Riga, and Libau. Shippers inform me that calfskins which are shipped in large quantities from the Baltic ports to Russia are never either dry salted or arsenic cured. From the same source I am still further informed that calfskins are always air dried in Russia, and that to attempt to comply with the Treasury requirements for disinfection would render these calfskins worthless for the trade. I have learned recently that calfskins destined for the United States have been shipped via Hamburg and disinfected at that place. The method of disinfection should be the same at all places, and yet the shippers here absolutely refuse to comply with the Treasury regulations as I understand them. It is pretty openly hinted that no consul in Russia requires the same method that I do. I have given shippers translations in 3 languages of the methods required and copies of the letters from the Secretary of Agriculture relating to calfskins. It is admitted that these instructions require all that I ask to be done, and yet the shippers decline to comply, and without doubt manage to send their goods into the United States. I may add that the same parties ship from Black Sea and Baltic ports. Would I be asking too much from the Department if I suggested the propriety of an investigation to ascertain whether or by what means our customs officials are able to find out how these hides are disinfected, or whether they are disinfected at all? * * * The various methods of disinfection required by our regulations have for their object, as I understand the matter, the destruction of dangerous germs; if the object of disinfection is the preservation of the hides, etc., then the Russian method of treating calfskins answers the purpose, because they are quite

dry and arrive at their destination in the United States in excellent condition after from thirty to forty days travel by water.

Respectfully,

THOS. E. HEENAN,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

Anthrax in Aksai.

[Translation.—From Odessa Listock, No. 188 of July 22 and August 4, 1902.]

In the official gazette (Pravitelstvenni Vestnik) of St. Petersburg, was printed the following:

"In the village of Aksai, district of Chernoyar, province of Astrakhan, at the end of last June, there were discovered in 1 family several cases of acute infectious disease, declared by the local surgeons to be anthrax. When similar cases of sickness appeared in other houses of the village and at the same time the aspect of the disease began to inspire suspicion with regard to the plague, a bacteriological specialist was sent to make clear the real nature of the disease. The governor of Astrakhan, who had arrived at the village Aksai, accompanied by a medical staff, took all the measures required for the stamping out of the epidemic. The patients were isolated, the houses where the cases of illness had occurred were surrounded and a careful disinfection of the same effected; those healthy persons who had come into contact with the patients were brought out into specially constructed camps, where they remain under a constant medical supervision. A medical supervision has been likewise instituted over all of the inhabitants of the village Aksai. The total number of cases of sickness from the commencement of the epidemic at Aksai from June 20 last up to the present time is 26, of which 16 have ended fatally."

Case of anthrax in Odessa.

[Translation.—From the official paper of the Odessa Prefect, No. 163, of July 27 and of August 9, 1902.]

A patient was received yesterday at the town hospital and placed in the isolation barrack (for suspected cases) whose name was Abraham Vaikus, the son of a Volhynia burgher, aged 19 years, a brush maker by trade, residing at Strednaya street, house No. 2 (Petrovavlovsk district), on whom was found a small suspicious ulcer on the forehead and a swelling near the oral gland and of the lymphatic glands of the neck. His temperature was 39.2° C. in the evening and in the morning 38.5° C. His general condition of health is satisfactory. However, from the results of the examination of the contents of the pustule upon the patient's forehead, it was ascertained that he is suffering from anthrax.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

BAHAMAS—Dunmore Town.—Two weeks ended August 29, 1902. Estimated population, 1,232. One death. No contagious diseases.

Governors Harbor.—Two weeks ended August 30, 1902. Estimated population, 1,500. No deaths and no contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended August 27, 1902. Estimated population, 3,314. No deaths and no contagious diseases.

Nassau.—Two weeks ended September 1, 1902. Estimated population, 12,535. Number of deaths not reported. No contagious diseases reported.

BRAZIL—Pernambuco.—Four weeks ended August 31, 1902. Estimated population, 200,000. Total number of deaths, 639, including enteric fever, 4; smallpox, 31, and 4 from bubonic plague.

EAST AFRICA—Lourenço Marquez.—Month of June, 1902. Estimated population, 7,000. Total number of deaths, 41, including beriberi, 6, and 2 from tuberculosis.

FRANCE—Rouen.—Month of July, 1902. Estimated population, 116,316. Total number of deaths, 185, including diphtheria, 1; enteric fever, 3; smallpox, 1, and 42 from tuberculosis.

St. Etienne.—Two weeks ended August 17, 1902. Estimated population, 146,559. Total number of deaths, 140. No deaths from contagious diseases reported.

GIBRALTAR.—Two weeks ended August 24, 1902. Estimated population, 27,460. Total number of deaths, 17. No deaths from contagious diseases.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended August 23, 1902, correspond to an annual rate of 14.4 per 1,000 of the aggregate population, which is estimated at 14,862,456.

London.—One thousand two hundred and sixty-nine deaths were registered during the week, including measles, 31; scarlet fever, 14; diphtheria, 15; whooping cough, 27; enteric fever, 12; smallpox, 3, and diarrhea, 116. The deaths from all causes correspond to an annual rate of 13.4 per 1,000. In Greater London 1,719 deaths were registered. In the "outer ring" the deaths included 5 from diphtheria, 3 from measles, 2 from smallpox, 2 from scarlet fever, and 4 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended August 23, 1902, in the 21 principal town districts of Ireland was 15.6 per 1,000 of the population, which is estimated at 1,092,401. The lowest rate was recorded in Newry, viz, 0.0, and the highest in Clonmel, viz, 20.5 per 1,000. In Dublin and suburbs 146 deaths were registered, including enteric fever, 2; measles, 16; typhus fever, 1; whooping cough, 2, and 31 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended August 23, 1902, correspond to an annual rate of 14.4 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Leith, viz, 4.6, and the highest in Paisley, viz, 17.3, per 1,000. The aggregate number of deaths registered from all causes was 464, including diphtheria, 2; measles, 5; scarlet fever, 7, and 14 from whooping cough.

JAPAN—Nagasaki.—Ten days ended August 20, 1902. Estimated population, 131,700. Total number of deaths not reported. Eighteen deaths from cholera reported.

MALTA.—Three weeks ended August 16, 1902. Estimated population, 189,749. Total number of deaths, 321, including diphtheria, 2, and 5 from enteric fever.

SPAIN—Corunna.—Month of August, 1902. Census population, 44,000. Total number of deaths, 105, including enteric fever, 1; smallpox, 2, and 27 from tuberculosis.

WEST INDIES—St. Thomas.—Two weeks ended August 22, 1902. Estimated population, 11,012. Total number of deaths, 9. No deaths from contagious diseases.

Cholera, yellow fever, plague, and smallpox, June 28, 1902, to September 19, 1902.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and other sources.]

[For reports received from December 28, 1901, to June 27, 1902, see PUBLIC HEALTH REPORTS for June 27, 1902.]
