PUBLIC HEALTH REPORTS.

UNITED STATES.

Statistical reports of States and cities of the United States—Yearly and monthly.

COLORADO—Denver.—Month of September, 1902. Estimated population, 150,000. Total number of deaths, 135, including diphtheria, 2; enteric fever, 13; scarlet fever, 2, and 48 from tuberculosis.

CONNECTICUT—Bridgeport.—Month of September, 1902. Estimated population, 72,000. Total number of deaths, 89, including diphtheria, 3; enteric fever, 3, and 11 from tuberculosis.

INDIANA.—The usual monthly reports to the Indiana State board of health show the total number of deaths for September was 2,312. is a death rate of 13.6, and is exactly the same rate as appeared in the statistics for the corresponding month last year. The number of deaths under 1 year of age was 536, or 20 per cent of the total number; between 1 and 5 years of age the number of deaths was 288, or 10.7 per cent of the total number; between 5 and 10 years of age the number was 71, or 2.6 per cent of the total number; between 10 and 15 the total number of deaths was 62, or 2.3 per cent of the total; 65 and over, the number of deaths was 613, or 22.9 per cent of the total number. From important causes of death, the number of deaths and rates per 100,000 were as follows: Pulmonary tuberculosis, 282 deaths, rate, 136.7; other forms of tuberculosis, 51 deaths, rate, 24.7; typhoid fever, 232 deaths, rate, 112.7; diphtheria, 34 deaths, rate, 16.4; scarlet fever, 7 deaths, rate 3.3; whooping cough, 16 deaths, rate 7.7; pneumonia, 112 deaths, rate, 54.2; diarrheal diseases, under 5 years of age, 322 deaths, rate, 156.1; cerebrospinal meningitis, 24 deaths, rate, 11.6; influenza, 6 deaths, rate, 2.9; puerperal septicæmia, 17 deaths, rate, 8.2; cancer, 114 deaths, rate, 55.2; violence, 105 deaths, rate, 50.9; smallpox, 3 deaths, rate, 1.4. In comparing these figures with those of the same month last year, we find there is an increase in the rate for consumption of, 8.8, for typhoid fever there is an increase of 21.6, and for pneumonia the increase is 18.9. Smallpox for the twentieth consecutive month was the most prevalent There were 219 cases reported from 39 counties with 3 deaths. In the corresponding month last year there were 80 cases reported with The following counties were invaded with the disease: no deaths. Adams, 1; Benton, 1; Blackford, 1; Boone, 5; Brown, 2; Cass, 1; Clark, 2; Clinton, 10; Daviess, 14; Dearborn, 3; Dekalb, 2; Delaware, 5; Dubois, 11; Elkhart, 1; Fountain, 3; Franklin, 1; Fulton, 10; Gibson, 5; Grant, 5; Howard, 19; Jay, 4; Jefferson, 2; Knox, 20; Kosciusko, 13; Lagrange, 2; Lake, 4; Laporte, 1; Marion, 13; Martin, 2; Miami, 2; Monroe, 5; Noble, 5; Randolph, 2; Spencer, 10; Starke, 4; St. Joseph, 35; Vanderburg, 1; Vermillion, 18; Vigo, 3. The 3 deaths from smallpox occurred in cities as follows: Indianapolis, 1; Mishawaka, 1; Warsaw, 1. Next to smallpox, typhoid fever was the most prevalent disease during the month, and the same order prevailed in the preceding month. All diseases of the respiratory tract increased in area of prevalence, while the diseases of the intestinal tract decreased in area of prevalence.

Kansas—Wichita.—Two weeks ended October 18, 1902. Estimated population, 28,163. Total number of deaths, 17, including enteric fever, 1, and 2 from tuberculosis.

LOUISIANA—New Orleans.—Month of September, 1902. Estimated population, 305,000—white, 223,500; colored, 81,500. Total number of deaths, 457—white, 270; colored, 187—including diphtheria, 2; enteric fever, 11; measles, 1; whooping cough, 1, and 87 from tuber-culosis.

MARYLAND—Biltimore.—Month of September, 1902. Estimated population, 525,000—white, 445,000; colored, 80,000. Total number of deaths, 812—white, 603; colored, 209—including diphtheria, 10, enterie fever, 43; scarlet fever, 2; smallpox, 1; whooping cough, 4, and 114 from tuberculosis.

MICHIGAN —Reports to the State board of health, Lansing, for the week ended October 18, 1902, from 76 observers, indicate that influenza was more prevalent, and phthisis pulmonalis, cholera morbus, dysentery, whooping cough, smallpox, and measles were less prevalent than in the preceding week. Meningitis was reported present at 3, whooping cough at 13, smallpox at 15, measles at 18, diphtheria at 32, scarlet fever at 72, enteric fever at 80, and phthisis pulmonalis at 223 places.

The Monthly Bulletin of Vital Statistics says:

There were 2,548 deaths returned to the department of state for the month of September, corresponding to a death rate of 12.6 per 1,000 population. This rate is slightly higher than the rate for the preceding month, 11.8, but is lower than the rate for September, 1901, which was 14.1. By ages there were 607 deaths of infants under 1 year, 219 deaths of children aged from 1 to 4 years, inclusive, and 662 deaths of elderly persons over 65 years of age. Important causes of death were as follows: Tuberculosis of lungs, 162; other forms of tuberculosis, 26; typhoid fever, 80; diphtheria and croup, 48; scarlet fever, 17; measles, 4; whooping cough, 24; pneumonia, 119; diarrheal diseases, under 2 years, 329; cancer, 114; accidents and violence, 152. Typhoid fever nearly doubled in mortality as compared with the preceding month, and diphtheria and pneumonia showed considerable amounts of increase. No deaths were reported from smallpox, the first month in which this has been true since April, 1901.

MINNESOTA—Minneapolis.—Month of September, 1902. Census population, 202,718. Total number of deaths, 166, including diphtheria, 7; enteric fever, 9, and 16 from phthisis pulmonalis.

MISSOURI—St. Louis.—Month of September, 1902. Estimated population, 621,000—white, 582,000; colored, 39,000. Total number of deaths, 730—white, 645; colored, 85—including diphtheria, 12; enteric fever, 21; scarlet rever, 6; whooping cough, 3, and 163 from tuberculosis.

NEW JERSEY—Passaic.—Five weeks ended October 18, 1902. Census population, 27,777. Total number of deaths, 26, including 2 from diphtheria.

NEW YORK—Buffalo.—Month of September, 1902. Estimated population, 370,000. Total number of deaths, 410, including diphtheria, 9; enteric fever, 17; whooping cough, 1, and 29 from phthisis pulmonalis.

OHIO—Zanesville.—Month of September, 1902. Estimated population, 28,000. Total number of deaths, 33, including diphtheria, 3, and 2 from tuberculosis.

Washington—Tacoma.—Month of September, 1902. Estimated population, 55,000. Total number of deaths, 51, including 7 from tuberculosis.

WISCONSIN—*Milwaukee*.—Month of September, 1902. Estimated population, 300,000. Total number of deaths, 330, including diphtheria, 6; enteric fever, 5; whooping cough, 8, and 22 from tuberculosis.

FOREIGN AND INSULAR.

AFRICA.

State of plague in Cape Colony.

CAPE OF GOOD HOPE, AFRICA, September 8, 1902.

The following report by the medical officer of health for the colony on the state of the outbreak of bubonic plague in the Cape Colony for the week ended September 6, 1902, is published for general information.

NOEL JANISCH, Under Colonial Secretary.

Report of the medical officer of health on the state of plague in Cape Colony during week ended September 6, 1902.

There has been no case of plague in human beings at any place in the colony during the week ended September 6, 1902. Rats, dead of plague, were discovered at Port Elizabeth on September 4, 1902.

A. JOHN GREGORY, Medical Officer of Health for the Colony.

Precautions advised with regard to vessels from Lourenço, Marquez—Suspected cases of plague in Magude.

LOURENÇO MARQUEZ, AFRICA, September 13, 1902.

SIR: Referring to my dispatches numbered 256, 258, and 260, wherein I have reported that several vessels have departed from this port without first having obtained bills of health from this consulate, and that I have had well-founded reasons for presuming that the said vessels were bound for American ports, I have to report that although during the past week no vessels have cleared from this port for American ports, it will be well to take the most extraordinary precautions in regard to the vessels mentioned in my above referred to dispatches, for the reason that the plague has again appeared in Magude.

The secretary-general of the province of Mozambique, in a letter dated yesterday, has informed me that there are 2 cases of sickness in Magude that are suspected by the board of health to be cases of plague.

Respectfully,

W. STANLEY HOLLIS, United States Consul.

The Assistant Secretary of State.

ARABIA.

Cholera at Hodeidah—Other localities suspect—Quarantine restrictions.

ADEN, ARABIA, September 24, 1902.

SIR: In continuation of my letter dated the 17th instant, I have the honor to inclose herewith extract of the letter dated September 21 from the consular agency at Hodeidah, about the quarantine there.

Respectfully,

W. H. LOCKERMAN, United States Vice-Consul.

The Assistant Secretary of State.

2536

[Extract of letter dated September 21, 1902, from the consular agency at Hodeidah.]

With regard to the state of the epidemic here, I beg to-day to state more precisely that there were altogether 8 cases of cholera, 6 of which ended fatally and 2 of which recovered. Sanitary measures have at once been applied to the infectious house for preventing the spreading of the disease, and there were no further casualties since eight days. Fresh cases, however, are said to have breken out in the interior, confirmation of which can not be had, the Turkish military doctors declining to declare the disease to be cholera. Marawa, Chalifa, and Lohiyah have been mentioned as suspect in the report of our sanitary office to Constantinople, and the international sanitary board there has decided as follows:

"According to telegram reaching us yesterday, quarantine of ten days in force against littoral is extended north to Besth and south to Mocha, these 2 ports excluded."

As to the shipping from here to Aden, I beg to transmit you the telegram of the president of Aden, which has just been published here by the British vice-consul, and which reads as follows:

"Venice rules withdrawn against arrival from Hodeidah; medical inspection, observation, and detention for seven days substituted."

PAUL ROST, United States Acting Consular Agent.

BARBADOS.

Smallpox situation.

BARBADOS, WEST INDIES, October 13, 1902.

SIR: I have to report that since the 28th ultimo 290 cases of small-pox have been reported, of which 95 have been sent to the quarantine station and 195 have been isolated on shore. Seven patients have died at the station and 4 on shore, while 105 have been discharged as cured.

From July 13 to last night 1,090 cases have been reported, of which 41 have died, 212 have been discharged as cured, and 837 remain under treatment.

There has been during the fortnight a very marked decrease in the number of cases in St. Michaels, there having been only 93 cases against 144 in the previous fortnight.

Free public vaccination is still being carried out, but not as vigorously as in the last fortnight, as the people object to being vaccinated unless some provision is made for their relief if they should be incapacitated from work. About 50,000 persons have been vaccinated up to the present time.

Respectfully, Jas. Sanderson.

Clerk, General Board of Health and Quarantine Board.

The Surgeon-General.

BRAZIL.

Mortality statistics of Bahia.

Bahia, Brazil, September 29, 1902.

Week ended September 20, 1902.—For the week ended September 20, 1902, there were reported in Bahia 99 deaths—none from quarantinable diseases.

Week ended September 27, 1902.—For the week ended September 27, 1902, there were reported in Bahia 88 deaths—none from quarantinable diseases.

H. W. FURNISS, United States Consul.

The SECRETARY OF THE TREASURY.

CANADA.

Inspection of immigrants.

QUEBEC, CANADA, October 20, 1902.

Week ended October 18, 1902.—Number inspected, 363; number passed, 358; number detained, 5.

W. C. BILLINGS,
Assistant Surgeon.

The SURGEON-GENERAL.

CHINA.

Inspection of vessels at Shanghai—Shipments via Canadian ports—Mortality statistics.

SHANGHAI, CHINA, September 20, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health issued at this port for the week ended September 20, 1902. There were inspected during the week 3 vessels, 282 crew, 55 cabin and 96 steerage passengers; also 31 pieces of baggage and 48 pieces of freight. Shipping orders were viséed for 43,802 pieces of freight; 2 pieces were disinfected and 585 rejected. Of this latter it is claimed that a part is sent to the United States via Canadian ports, and is permitted to cross the border and to be delivered at destination, most frequently New York, unmolested. As I do not see the British consular invoices, I can not say how much of this is true.

Following is a statement of the quarantinable diseases reported in the municipality for the week ended September 21: Among non-Chinese population, cholera, 1 case; among Chinese population, cholera, 25 deaths.

Respectfully,

S. H. RANSOM,
Acting Assistant Surgeon.

The Surgeon-General.

Statement of sanitary conditions and cholera situation.

SHANGHAI, CHINA, September 15, 1902.

SIR: Up to this time there have been reported since June 1, 1902, 1,175 deaths from cholera, of which 40 were among the European population. The greatest number of deaths from this disease in any one week was 181 and the smallest 23. I am told that the largest number of cases of cholera among Europeans during any previous epidemic in this city was 37, while this year there have been over 70. This information is, I think, thoroughly reliable. The cholera death rate at this place is estimated at about 65 per cent of the cases.

The population of Shanghai—that is, the territory within the boundaries of the foreign concession—is estimated at 350,000 Chinese and 7,000 foreigners. The latter live within a somewhat circumscribed area which is apparently in a very good sanitary condition; so much

of the native quarter as I have seen is fairly clean.

Tuberculosis is responsible for a considerable proportion of the total number of deaths occurring here, claiming 1,097 victims out of a total of

5,292 among the Chinese and 17 out of 128 among the foreigners.

The water supply is taken from the river, the intake being below the city, and the tide is depended upon largely to diminish the amount of noxious material pumped on to the filter beds, as they are filled only when the tide is flood. Filth of all descriptions is thrown into the river and into the creeks or canals emptying into it, and this foul water is used by many of the Chinese for almost all domestic purposes, and

especially is this true of those living on the hundreds of sampans and junks. It is not an uncommon thing to see some one depositing fæcal matter in the stream at one end of a junk and a woman washing rice or vegetables in the same water at the other end. Of course, most of the native population in the city proper use filtered water, and the major part of the foreigners take the additional precaution of refiltering and

then boiling all drinking water.

There is no sewer system here, all excrement being collected and utilized as a fertilizer for the rice fields and vegetable gardens. This and the fact that the native dead, irrespective of the cause of death, are disposed of by being deposited on top of the ground, frequently without any covering other than the coffin, at such place as may be selected in each individual case, and the habit of flooding the fields in cool weather and the collecting and storing for domestic use by the Chinese of such ice as may form, would lead one to expect such diseases as typhoid fever and cholera, when once introduced, to become very prevalent. It is said, however, that even the unfiltered water is comparatively free from the organisms of these diseases, although they are at times found.

Ice is manufactured from the filtered Whangpoo water. The average for the year of this water after filteration appears to be 366 colonies per cubic centermeter, which is but 2 per cent of the organisms in the unfiltered water, the remaining 98 per cent being removed by the filtering process, which is through the ordinary sand and gravel beds about 6 feet in thickness. The ships are supplied with this filtered water by

means of an iron water boat.

All that has been said refers exclusively to the so-called municipality. The Bureau is probably aware of the fact that there exist in Shanghai, three distinct forms of government each absolutely independent of the other. The municipal council governs all the territory within the several foreign concessions except the French, who have a city government of their own. The native city is governed by the Chinese, and no one has anything approaching a correct idea of the population or the conditions existing there. The population is variously estimated at from 350,000 to 700,000. So far as the health conditions there are concerned, I have been unable to find out anything about them, and no one will venture an opinion as to the number of cases of cholera or other contagious diseases which probably exist.

I have also called upon the quarantine officer of the port, but have not so far had an opportunity to visit his station. Quarantine as conducted here seems to be directed especially against the introduction of plague, it being held that so long as cholera, smallpox, etc., prevail to such a large extent in the interior, and no quarantine measures against bringing it into the city from that direction are practicable, it would avail little to enforce quarantine against ports infected with the diseases mentioned. Of course, cases of infectious disease developing on vessels before reaching quarantine are removed at the station and some dis-

infection is attempted.

Respectfully,

S. H. RANSOM,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

COLOMBIA.

Yellow fever on British ship Comliebank for Port Townsend, Wash.

Panama, Colombia, October 6, 1902.

SIR: I have the honor to say that the British sailing ship Comliebank which has been in this port for about two months, cleared and was

ready to sail for Port Townsend, United States of America, on September 29. Bill of health was issued to her from this consulate-general, giving her sanitary conditions, etc., as being good. About four days after clearing yellow fever developed among the crew, and since that date 12 men have been placed in the hospital of this city. So far no deaths have been reported.

Around the city there are a few cases of yellow fever, but this is only

among Colombian soldiers.

Respectfully,

FELIX EHRMAN,

United States Vice Consul-General.
The Assistant Secretary of State.

The Assistant Secretary of State

EGYPT.

Cholera reports.

DEPARTMENT OF STATE, Washington, D. C., October 21, 1902.

SIR: I have the honor to inform you that a telegram dated October 18, 1902, has been received from the vice consul-general in charge at Cairo, relative to the epidemic of cholera in Egypt, in the following words:

Since 12th instant, 705 cases cholera 636 deaths; all Egypt.

I have the honor to be, sir, your obedient servant,

JOHN HAY, Secretary of State.

The SECRETARY OF THE TREASURY.

CAIRO, EGYPT, September 29, 1902.

SIR: I have the honor to confirm the following cablegram to the Department regarding the progress of the cholera epidemic in Egypt:

CAIRO, EGYPT, September 27, 1902.

SECRETARY OF STATE, Washington:

Since 20th instant 4,647 cases, 4,032 deaths. Conditions continue improve rapidly.

I have to report a continued marked decrease in the number of new cases and deaths, and that there is every reason to hope that the epidemic will have run its course by the middle of the coming month.

The following will show the number of new cases, deaths, and cures for the week ended September 27:

Egypt.	New cases.	Deaths.	Cures.	Egypt.	New cases.	Deaths.	Cures.
Cities: Cairo	24 64 5 40 21 1 38 428 316 283	91 177 9 162 31 2 25 449 581 525	8 25 1 13 8 8 5 109 190 114	Provinces—Cont d. Galioubleh	64	207 209 330 242 70 130 292 119 272 76	59 144 88 79 21 31 16 27 117

Respectfully,

H. T. SMITH,

United States Vice Consul-General, In Charge.

The Assistant Secretary of State.

Cholera decreasing in Egypt.

CAIRO, EGYPT, October 1, 1902.

SIR: I have the honor to inclose herewith copy of a report received from the United States consular agent at Suez, regarding the cholera epidemic in his district.

Each succeeding daily bulletin received from the sanitary department continues to show a highly satisfactory decrease in the number of cases and deaths from cholera in Egypt.

Respectfully,

H. T. SMITH,

United States Vice Consul-General, In Charge.

The Assistant Secretary of State.

SUEZ, EGYPT, September 29, 1902.

SIR: I have the honor to inform you that the cholera in this consular district appears to be steadily decreasing, the new cases reported during the last seven days being only

18, as compared with 40 cases the previous seven days.

The epidemic is still confined principally to the outlying quarters of the town and along the fresh-water canal, which is so low that it is almost a stagnant ditch. It is a constant source of danger to the town and to steamships requiring water for drinking purposes. Moreover, it is principally due to the present state of the fresh-water canal that the present epidemic has been so virulent in Suez, the victims during the outbreaks of 1885 and 1893 numbering less than one-quarter of those during the existing scourge.

Respectfully,

ALFRED W. HAYDEN, United States Consular Agent.

Mr. Hubbard T. Smith, United States Vice Consul-General.

GERMANY.

Report from Berlin-Plague and cholera in various countries.

BERLIN, GERMANY, October 11, 1902.

SIR: I have the honor to transmit herewith the latest information regarding plague and cholera, obtained from the imperial health office (Kaiserlichen-Gesundheitsamt) at Berlin:

Plague.

British India.—In the Bombay Presidency during the weeks ended September 6 and September 13, there were registered 5,479 and 7,492 plague cases, with 3,932 and 5,409 deaths, respectively.

Hongkong.—During the period from August 10 to August 30, there

occurred 31 fatal plague cases among the Chinese population.

Brazil.—In Rio de Janeiro, 1 death from plague was registered on

each of the following days, viz, September 2, 3, 4, 5, and 7.

QUEENSLAND.—One case of plague was reported during the month of August, the patient being a dock laborer in Townsville.

Plague and cholera.

British India.—In Calcutta during the week ended August 30, 24 persons died of plague and 11 of cholera.

DUTCH INDIA.—During the period from August 10 to August 23, there occurred in Soerabaya 247 cholera cases and 162 deaths (13 cases and 6 deaths among Europeans).

PHILIPPINES.—Between August 1 and August 15, there were registered in Manila 361 cholera cases and 285 deaths, and in the provinces 5,950

cases, with 4,370 deaths.

CHINA—Hongkong.—During the period between August 10 and August 30, there occurred 46 cases of cholera, 43 of the patients being Chinese, 2 Europeans, and 1 Australian. Forty cases ended in death.

CHINA.—During the two weeks from August 4 to August 17, there were recorded in Shanghai 93 deaths from cholera among the Chinese

population.

JAPAN.—During the period from August 7 to August 27, there occurred in Nagasaki 300 cases of cholera and 128 deaths. In Moji, up to August 24, there had been recorded 404 cholera cases, with 222 deaths.

Respectfully,

FRANK H. MASON, United States Consul-General.

The Surgeon-General.

HAWAII.

Outgoing quarantine transactions.

Honolulu, H. I., September 6, 1902.

SIR: The following is the report of outgoing quarantine transactions at this port for the week ended September 20, 1902: Number of sailing vessels inspected and passed, 2; number of steamships inspected and passed, 3; number of cabin passengers inspected and passed, 43; number of crew inspected and passed, 543; number of pieces of baggage disinfected, 12; number of sailing vessels disinfected, 1.

Respectfully,

W. C. Hobdy,

Assistant Surgeon, In Temporary Charge.

The SURGEON GENERAL.

[Telegram.]

HONOLULU, H. I., October 21, via San Francisco, Cal., October 28, 1902.

WYMAN, Washington, D. C.:

There was a death from plague at Honolulu on October 16.

HOBDY.

ITALY.

Report from Naples—Inspection of vessels—Plague in Odessa.

NAPLES, ITALY, October 13, 1902.

Week ended October 11, 1902.—Steamship Lombardia for New York. Nine hundred and forty-five steerage passengers and 150 pieces of large baggage inspected and passed; 1,250 pieces of baggage were disinfected by steam. The rejection of 75 steerage passengers was advised.

Smallpox at Naples.

During the week ended October 11, 1902, there were officially reported at Naples 4 cases of smallpox with no deaths.

Bubonic plague in Russia.

Under date of October 5, 1902, it was reported that during the past seven days, 8 cases of plague had appeared in Odessa outside the area previously pronounced by the Odessa sanitary committee to be infected. Five of the cases occurred in the quarters of the better class. The total

number of cases from the beginning of the epidemic to October 5, was 43, with 15 deaths.

J. M. EAGER,
Passed Assistant Surgeon.

The Surgeon-General.

JAPAN.

Report from Yokohama—Evasion of quarantine restrictions in regard to passengers und freight for United States ports.

YOKOHAMA, JAPAN, September 27, 1902.

SIR: Referring to inclosed supplementary statement of the transactions at this station during the period from July 1 to September 15, 1902, I have the honor to state that there have been no noteworthy changes in the personnel, equipment, or methods described in a previous report. Unforeseen delays in the erection of an improved disinfecting plant have taken place, but it is hoped that this needed improvement will soon be accomplished.

I respectfully invite the attention of the Bureau to the difficulty of enforcing restrictive measures as to passengers and freight bound for the United States (apart from Hawaii and the Philippines), much more exacting than those required by the Canadian authorities. This office is informed that passengers evade these restrictions by taking passage to Canadian ports whence they can readily pass into the United States.

Respectfully,

DUNLOP MOORE,
Assistant Surgeon.

The Surgeon-General.

[Inclosure.]

Report of transactions at Yokohama for the period from July 1, 1902, to September 15, 1902.

Number of bills of health issued	49
Number of vessels inspected	46
Number of bills of health issued without inspection	3
Number of crew inspected	3, 846
Number of passengers in spected	4, 695
Number of passengers bathed and body clothing disinfected	1,939
Number of crew bathed and body clothing disinfected	23
Number of pieces of baggage disinfected and labeled	2, 531
Number of pieces of baggage inspected and labeled	17
Number of packages of freight disinfected and labeled	23

MEXICO.

Reports from Progreso—Yellow fever in Merida.

PROGRESO, MEXICO, September 25, 1902.

Week ended September 12, 1902.—Present officially estimated population, 5,000. Number of cases and deaths from yellow fever, 3 cases, no deaths. No deaths or cases of other quarantinable diseases. Total deaths, 4. No deaths from communicable diseases. Eight cases and 2 deaths from yellow fever in Merida were reported during the week.

Week ended September 19, 1902.—Number of cases and deaths from yellow fever, 3 cases, 2 deaths. No deaths or cases of other quarantinable diseases. Total deaths from all causes, 7. Several cases of yellow

fever and 3 deaths are reported in Merida during the week.

Week ended September 26, 1902.—Number of cases and deaths from yellow fever, 1 case, no deaths. There are no cases or deaths from other quarantinable diseases. The sanitary condition of the port remains

unchanged. Total number of deaths, 8. Twenty health certificates were issued to passengers for United States and Cuba, and 4 vessels, 150 officers and crew, and 40 passengers with their effects were inspected.

EDWARD T. HARGRAVE,

Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report from Tampico for the week ended October 18, 1902-Yellow fever.

TAMPICO, MEXICO, October 20, 1902.

Total number of deaths 10, of which 4 were due to yellow fever. The cases of yellow fever have come from various sections of the city, so that the infection is probably scattered. Since the appearance of this disease in the city there have been in all 6 deaths caused by it.

Jos. Goldberger,
Assistant Surgeon.

The SURGEON-GENERAL.

Fireign and insular statistical reports of countries and cities—Yearly and monthly.

BAHAMAS—Dunmore Town.—Two weeks ended October 10, 1902. Estimated population, 1,232. One death. No contagious diseases.

Governors Harbor.—Week ended October 11, 1902. Estimated population, 1,500. No deaths and no contagious diseases.

Green Turtle Cay—Abaco —Four weeks ended October 8, 1902. Estimated population, 3,314. No deaths and no contagious diseases.

Inagua.—Three weeks ended September 15, 1902. Estimated population, 1,800. Total number of deaths not reported. No contagious diseases.

Nassau.—Two weeks ended October 11, 1902. Estimated population, 8,000. Number of deaths not reported. No contagious diseases reported.

DUTCH GUIANA—Paramaribo.—Month of August, 1902. Estimated population, 31,626. Total number of deaths, 92. No contagions diseases reported.

EAST AFRICA—Lourenço Marquez.—Month of August, 1902. Estimated population, 7,000. Total number of deaths, 28, including 2 from phthisis pulmonalis.

FRANCE—Marseille.—Month of September, 1902. Estimated population, 491,161. Total number of deaths, 739, including diphtheria, 1; enteric fever, 19; measles, 2; scarlet fever, 2; typhus, 1; whooping cough, 2. and 18 from smallpox.

Roubaix.—Month of September, 1902. Estimated population, 124,660. Total number of deaths, 181, including diphtheria, 2; enteric fever, 1; measles, 4; scarlet fever, 3, and 1 from whooping cough.

St. Etienne.—Two weeks ended September 30, 1902. Estimated population, 146,559. Total number of deaths, 124, including enteric fever, 2; whooping cough, 2, and 21 from tuberculosis.

GERMANY-Dresden.-Month of August, 1902. Estimated popula-

tion, 404,800. Total number of deaths, 561, including diphtheria, 2; enteric fever, 1; measles, 4; whooping cough, 9, and 61 from tuberculosis.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended October 4, 1902, correspond to an annual rate of 17.0 per 1,000 of the aggregate population, which is estimated at 14,862,084.

Bradford.—Two weeks ended October 4, 1902. Estimated population, 281,770. Total number of deaths, 134, including diphtheria, 1; enteric fever, 1; measles, 1; whooping cough, 1, and 11 from tuberculosis.

London.—One thousand three hundred and eighty-one deaths were registered during the week, including measles, 17; scarlet fever, 9; diphtheria, 27; whooping cough, 26; enteric fever, 29, and diarrhea, 126. The deaths from all causes correspond to an annual rate of 16.7 per 1,000. In Greater London 1,885 deaths were registered. In the "outer ring" the deaths included 4 from diphtheria, 3 from measles, and 5 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended October 4, 1902, in the 21 principal town districts of Ireland was 20.2 per 1,000 of the population, which is estimated at 1,092,401. The lowest rate was recorded in Clonmel, Portadown, and Queenstown, viz, 0.0, and the highest in Galway, viz, 46.6 per 1,000. In Dublin and suburbs 169 deaths were registered, including diphtheria, 5; enteric fever, 6; measles, 8; whooping cough, 1, and 26 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended October 4, 1902, correspond to an annual rate of 16.6 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Leith, viz, 11.2, and the highest in Glasgow, viz, 11.5, per 1,000. The aggregate number of deaths registered from all causes was 536, including diphtheria, 4; measles, 1; scarlet fever, 6, and 8 from whooping cough.

JAPAN—Nagasaki.—Period from September 11 to September 20, 1902. Estimated population, 131,700. Total number of deaths not reported. Thirty-four deaths from cholera reported.

MALTA.—Two weeks ended September 27, 1902. Estimated population, 189,749. Total number of deaths, 181, including 2 from enteric fever.

RUSSIA—Riga.—Month of April, 1902. Estimated population, 282,000. Total number of deaths, 532, including diphtheria, 2; enteric fever, 5; measles, 6; scarlet fever, 19; whooping cough, 6; smallpox, 11, and 67 from phthisis pulmonalis.

Month of May, 1902. Total number of deaths, 518, including diphtheria, 1; enteric fever, 10; measles, 7; scarlet fever, 17; whooping cough, 7; smallpox, 14, and 62 from phthisis pulmonalis.

Month of June, 1902. Total number of deaths, 516, including diphtheria, 6; enteric fever, 5; measles, 13; scarlet fever, 22; whooping cough, 5; smallpox, 7, and 52 from phthisis pulmonalis.

Month of July, 1902. Total number of deaths, 522, including diphtheria, 5; enteric fever, 4; measles, 3; scarlet fever, 29; whooping cough, 6; smallpox, 12, and 40 from phthisis pulmonalis.

St. Helena.—Three weeks ended September 20, 1902. Estimated population, including Boer prisoners and guards, 6,000. Total number of deaths, 16, including enteric fever, 3, and 2 from tuberculosis.

SPAIN—Barcelona.—Two weeks ended September 30, 1902. Estimated population, 600,000. Total number of deaths not reported. Fourteen deaths from enteric fever and 2 from smallpox reported.

Cadiz.—Month of September, 1902. Estimated population, 70,177. Total number of deaths, 156, including diphtheria, 3; euteric fever, 8; whooping cough, 2, and 20 from tuberculosis.

STRAITS SETTLEMENTS—Singapore.—Month of July, 1902. Estimated population, 97,111. Total number of deaths, 1,138, including cholera, 116; smallpox, 4, and 187 from phthisis pulmonalis.

Cholera, yellow fever, plague, and smallpox, June 28, 1902, to October 31, 1902.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and other sources.]

[For reports received from December 28, 1901, to June 27, 1902, see Public Health Reports for June 27, 1902.]
