

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

Summary of work in Chinatown, San Francisco, for week ended March 21, 1903.

Following received from Surgeon Glennan at San Francisco, under date of March 23, being record of work in Chinatown for week ended March 21:

Houses inspected.....	57
Houses reinspected	23
Persons inspected	346
Rooms inspected	416
Sick inspected.....	37
Dead inspected.....	18
Necropsies	6
Death from plague (Japanese) (provisional diagnosis)	1
Places disinfected	372
Rats from Chinatown, city wharves, Japanese and Latin quarters bacteriologically examined.....	60
Rats infected	0

Our inspectors, with Japanese physician, have covered Japanese district.

Disinfection of vessel at Honolulu on account of tuberculosis.

Passed Assistant Surgeon Cofer at Honolulu reports, February 24, the disinfection of American schooner *Carrier Dove* on account of tuberculosis, in accordance with Department circular No. 15, 1902, relative to prevention of tuberculosis among merchant seamen.

Yellow fever on vessel from Tampico, Mexico, at Mississippi River quarantine station.

A case of yellow fever was found January 3 on steamship *Westhall* from Tampico at the Mississippi River quarantine station.

Measures for checking smallpox in northern Maine.

Passed Assistant Surgeon Kalloch at Portland, Me., reports, March 23, that the work at Glasier Lake detention camp is progressing. The isolation building was completed March 10. Fifty-two men and their effects have been disinfected to March 15. Most of the men refuse vaccination. They live for the most part in remote places where there is no board of health. Dr. Nichols, of the State board of health, reports 23 cases of smallpox in vicinity of Fort Kent.

Statistical reports of States and cities of the United States—Yearly and monthly.

CALIFORNIA—*Los Angeles*.—Month of February, 1903. Estimated population, 135,000. Total number of deaths, 217, including diphtheria 2, enteric fever 5, scarlet fever 6, whooping cough 1, and 26 from tuberculosis.

• *Oakland*.—Month of February, 1903. Estimated population, 83,000. Total number of deaths, 92, including diphtheria 2, and 13 from tuberculosis.

San Diego.—Month of February, 1903. Estimated population, 20,000. Total number of deaths, 18, including 3 from phthisis pulmonalis.

CONNECTICUT.—Reports to the State board of health for the month of February, 1903, from 165 towns, having an aggregate census population of 903,987, show a total of 1,294 deaths, including diphtheria 24, enteric fever 6, measles 19, scarlet fever 14, whooping cough 33, and 101 from phthisis pulmonalis.

INDIANA—*Evansville*.—Month of February, 1903. Estimated population, 65,000. Total number of deaths, 55, including 13 from phthisis pulmonalis.

MARYLAND—*Baltimore*.—Month of February, 1903. Estimated population, 533,000; white, 451,000; colored, 82,000. Total number of deaths, 862; white, 681; colored, 181, including diphtheria 14, enteric fever 7, measles 21, scarlet fever 1, whooping cough 2, and 106 from tuberculosis.

Cumberland.—Month of February, 1903. Estimated population, 17,128. Total number of deaths, 36, including enteric fever 5, and 5 from tuberculosis.

MASSACHUSETTS—*Brockton*.—Month of February, 1903. Estimated population, 44,873. Total number of deaths, 51, including whooping cough 1, and 4 from phthisis pulmonalis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended March 14, 1903, from 68 observers, indicate that inflammation of kidney and whooping cough were more prevalent and

diarrhea and intermittent fever were less prevalent than in the preceding week.

Meningitis was reported present at 3, whooping cough at 25, diphtheria at 27, enteric fever at 36, measles at 53, scarlet fever at 85, smallpox at 105, and phthisis pulmonalis at 168 places.

Mortality during February, 1903: The total number of deaths returned to the Department of State for the month of February was 2,756, or exactly 100 fewer than the number of deaths in the preceding month. The death rate was 14.4 per 1,000 population, as compared with 13.5 in January. The mortality was also slightly higher than that for February of the preceding year. By ages, there were 559 deaths of infants under 1 year, 175 deaths of children aged 1 to 4 years, and 874 deaths of persons aged 65 years and over.

Important causes of death were as follows: Tuberculosis of the lungs, 182; other forms of tuberculosis, 35; typhoid fever, 34; diphtheria and croup, 52; scarlet fever, 16; measles, 17; whooping cough, 31; pneumonia, 372; influenza, 73; cancer, 126; accidents and violence, 134. There was a decrease in the number of deaths from typhoid fever and scarlet fever, while the number reported from influenza was nearly double the number in January. The death rate from this cause, however, was not as high as during the same time last year. Pneumonia showed a very slight decrease in the number of deaths reported. There were 5 deaths from smallpox, situated as follows: Torch Lake Township, Houghton County; Grand Haven city, Ottawa County; Brownstown Township, Wayne County; Detroit city, and Wyandotte city.

NEW YORK—*Auburn*.—Month of February, 1903. Census population, 30,345. Total number of deaths, 31, including enteric fever 1, and 5 from tuberculosis.

Buffalo.—Month of February, 1903. Estimated population, 380,000. Total number of deaths 474, including diphtheria 8, enteric fever 14, measles 3, scarlet fever 2, whooping cough 6, and 46 from phthisis pulmonalis.

TENNESSEE—*Knoxville*.—Month of February, 1903. Estimated population, 35,000; white, 26,000; colored, 9,000. Total number of deaths, 30; white, 17; colored, 13; including enteric fever 1, smallpox, 1, and 8 from tuberculosis.

WASHINGTON—*Tacoma*.—Month of February, 1903. Estimated population, 55,000. Total number of deaths, 35, including 9 from phthisis pulmonalis.

Plague in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, from December 27, 1902, to March 27, 1903.

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually, or at the close of the calendar year, and new tables begun. For record of plague in San Francisco for calendar year 1902, see PUBLIC HEALTH REPORTS No. 52, December 26, 1902. A summary of cases since March, 1900, when the first case was officially reported, is as follows: Calendar year 1900, cases, 22; deaths, 22. Calendar year 1901, cases, 29; deaths, 25. Calendar year 1902, cases, 41; deaths, 41.]

“Total number of deaths for week ended February 14 should be 3 instead of 31, as published in Public Health Reports for February 27. The error occurred in original report and is corrected at request of Health Inspector at Plainfield.

FOREIGN AND INSULAR.

AFRICA.

Report from Lourenço Marquez—Suspect plague at Inhambane.

Consul Hollis reports, January 29, as follows: I have the honor to advise the Department that the acting secretary-general of the province of Mozambique has just informed me in writing that at Inhambane there is a case of sickness that is suspected to be plague, and that the sick person is a native who came from Durban on the steamship *Matabele*.

The *Matabele* and her sister ship, the *Induna*, are small coasters. They carry large numbers of Kaffirs as deck passengers, and it is highly probable that rats at Durban carried plague germs on board of the *Matabele*.

A Durban dispatch of January 23, 1903, to the Johannesburg Star reads as follows:

The last plague returns show that there are in the hospital 3 Europeans, 9 natives, and 3 Indians (coolies from India). During the past twenty-four hours there have been 1 fresh case and 1 death.

Durban, it will be noted, is only 300 miles away from this port.

THE ASSISTANT SECRETARY OF STATE.

BRAZIL.

Report from Bahia.

During the week ended February 21, 1903, there were interred in the Bahia cemeteries 82 bodies.

The causes given for interment were the following: Bronchitis 3, cancer 1, enteritis 1, malarial fevers 5, gastritis 4, meningitis 2, Bright's disease 3, nephritis 5, pneumonia 2, syphilis 2, tetanus 3, tuberculosis 12, diseases of circulatory system 6, and other causes 33.

Week ended February 28, 1903, 70 bodies.

The causes given for interment were the following: Aneurism 1, arterio-sclerosis 5, beriberi 2, bronchitis 1, enteritis 2, gastritis 11, hepatitis 2, senile debility 1, Bright's disease 3, nephritis 1, stillborn 4, tetanus 1, tuberculosis 7, diseases of circulatory system 2, and from other causes 26.

THE SECRETARY OF THE TREASURY.

CANADA.

Inspection of immigrants at St. John, New Brunswick.

Assistant Surgeon Billings reports, March 17, as follows: Week ended Saturday, March 14, 1903: Number inspected, 907; number passed, 896; number detained, 11; total, 907.

The steamship agents predict the largest immigration this spring that they have ever had, and the local newspapers report that on both the Allan and Beaver lines the bookings for the next two months are practically full.

The SURGEON-GENERAL.

CHINA.

Report from Hongkong—Plague and smallpox—Plague-infected rats.

Passed Assistant Surgeon McMullen reports, February 11, as follows: During the week ended February 7, 1903, 10 vessels were inspected, 697 crew and 12 steerage passengers were bathed at the disinfecting station, and 775 pieces of baggage were disinfected. The communicable diseases reported in the colony for this week were: Plague, 12 cases and 12 deaths (Chinese); smallpox, 3 cases and 2 deaths (Chinese); enteric fever, 1 case, and scarlet fever, 1 case. From January 5 to February 2, 1903, 15,207 rats were caught in Victoria and Kowloon, and 120 of this number were found to be infected with plague. The number of plague cases suddenly increased during the past week, and the number of infected rats caught also showed an increase.

The SURGEON-GENERAL.

Plague at Phauthai.

CABLEGRAM.

CANTON, CHINA, *March 21, 1903.*

STATE DEPARTMENT, *Washington.*

About 100 deaths bubonic plague at Phauthai near Kityang. Canton clean.

McWADE, *Consul.*

CUBA.

Report from Cienfuegos.

Acting Assistant Surgeon McMahon reports, March 12, as follows: There were reported 14 deaths in the city during week ended March 7, 1903. Causes: Enteritis, 1; tetanus, 2; meningitis, 2; tuberculosis, 2; malaria, 2; other causes, 5.

The SURGEON-GENERAL.

Report from Habana.

Assistant Surgeon Trotter forwards the following under date of March 12:

Mortuary report of Habana for the week ended March 7, 1903.

Disease.	Number of deaths.
Tuberculosis	20
Pneumonia	4
Bronchitis	5
Enteric fever	2
Enteritis	4
Malaria	1
Meningitis	5
Cachexia	1
Gangrene	1
Cancer	2

Total deaths from all causes, 91.

Report from Santiago—Vaccination.

Acting Assistant Surgeon Wilson reports, March 7, as follows:

Week ended March 7, 1903.

Causes of death.	Number.
Malarial fever.....	3
Erysipelas.....	1
Tubercle of lungs.....	1
Meningitis.....	1
Cerebral hemorrhage.....	1
Angina pectoris.....	1
Capillary bronchitis.....	1
Pneumonia.....	1
Diarrhea and enteritis (under 2 years).....	3
Diarrhea and enteritis, chronic.....	1
Chronic nephritis.....	1
General debility.....	1
Ill-defined or unspecified causes of death.....	3
Total.....	19

Annual rate of mortality for the week, 22.97 per 1,000. Estimated population, 43,000.

There is no smallpox reported in or near the city, but the people in great numbers are obeying the decree of the mayor dated February 19, 1903, in regard to vaccination.

GERMANY.

Plague and cholera in various countries.

Consul-General Mason reports, March 7, as follows:

Plague.

British India.—During the first February week there were registered in the Bombay Presidency 15,273 cases of plague (and 12,071 deaths), of which 29 cases (33 deaths) occurred in the town and port of Karachi.

Japan.—Up to the 11th of January there had been registered in Tokio since the 17th of December 11 plague cases (with 8 deaths).

British South Africa.—In Port Elizabeth during the week ended January 31, 2 fresh cases of plague, with fatal termination, were registered.

In Natal during the week ended January 17, 12 cases of plague were registered. The total number of cases up to January 17 amounted to 34 (with 17 deaths).

Cholera.

Turkey.—According to the seventeenth official bulletin regarding cholera in Palestine and Syria, 29 deaths from cholera were registered in Damascus between the 9th and 15th of February.

Japan.—During the second half of the year 1902, according to official statistics, there occurred in the district of Nagasaki-Ken 704 cases of cholera (486 deaths).

The SURGEON-GENERAL.

Death rate of Berlin.

I have to report that the death rate of Berlin for the week ended February 21 was somewhat lower than in the two foregoing weeks, and amounted, calculated upon the year, to 15.9 per thousand of the population, this being lower than for the corresponding week of last year, in which it amounted to 16.6. Of the large German cities, during this week, Carlsruhe, Kiel, Essen, Barmen, Crefeld, Braunschweig, Charlottenburg (with 11.2), and Schöneberg (with 8.7 per thousand) showed more favorable conditions than Berlin. But the mortality rate was considerably higher than that of Berlin in Leipzig, Dresden, Munich, Nürnberg, Cologne, Stettin, Königsberg, and Breslau, as well as in London, Paris, and Vienna. There was in this week a considerable increase in the number of deaths among children in their first year. The death rate among infants rose, since the second February week, from 3.1 to 4.1 per mille. Thirty-six deaths resulted from acute diseases of the intestines. Acute diseases of the respiratory organs claimed 63 victims (as compared with 83 in the foregoing week). There were also registered 83 deaths from consumption and 18 deaths from influenza. Forty persons died of cancer. An increase was noted in the number of cases of scarlet fever, which caused 8 deaths. Further, there occurred 8 deaths from measles and 9 deaths from diphtheria. Twelve persons died by violence.

The SURGEON-GENERAL.

HAWAII.

Quarantine transactions, month of February, 1903.

Passed Assistant Surgeon Cofer, chief quarantine officer, Hawaii, reports March 2 and 9 as follows:

PORT OF HONOLULU.

[Incoming quarantine.]

Vessels inspected from foreign ports.....	24
Vessels inspected from domestic ports.....	18
Crew inspected	2,993
Cabin passengers inspected	841
Steerage passengers and stowaways inspected.....	1,484
Sick in detention from last month.....	0
Detention from last month	0
Sick in detention for this month.....	0
Detention for this month	0
Pieces of baggage disinfected.....	0
Packages of freight disinfected	0

PORT OF HILO.

Passengers inspected	2
Vessels remanded	0

PORT OF KOLOA.

Vessels inspected	0
Crew inspected	0
Passengers inspected	0
Vessels remanded	0

Report of outgoing quarantine transactions at Honolulu, weeks ended February 28 and March 7.

Week ended February 28, 1903: Number of vessels inspected and passed, 14; number of cabin passengers inspected and passed, 149; number of steerage passengers inspected and passed, 152; number of crew inspected and passed, 219; number of pieces baggage disinfected, 290; number of sailing vessels disinfected, 5; number of hides and skins disinfected, 1,319.

Week ended March 7, 1903: Number of vessels inspected and passed, 4; number of cabin passengers inspected and passed, 11; number of steerage passengers inspected and passed, 0; number of crew inspected and passed, 43; number of pieces of baggage disinfected, 25; number of sailing vessels disinfected, 6; number of wharves fumigated with sulphur, 5.

The SURGEON-GENERAL.

Plague at Hilo.

[Cablegram.]

HONOLULU, *March 22, 1903.*

WYMAN, *Washington:*

Two plague, Hilo, 17th. President board wishes me accompany him Hilo, Tuesday. Advise taking autoclave disinfectants.

COFER.

ITALY.

Report from Naples—Inspection of vessels—Bubonic plague in Natal, Mauritius, and India—Increase of emigration from Naples.

Passed Assistant Surgeon Eager reports, March 2, as follows:

Inspection service at Naples and Palermo, week ended February 28, 1903.

NAPLES.

Date.	Name of vessel.	Destination.	Steerage passengers inspected and passed.	Pieces of baggage disinfected.	Number of steerage passengers recommended for rejection.
February 25	Sicilia	New York	1,059	1,136	40
25	Cambroman	Boston	1,109	1,515	69
27	Weimar	New York	1,542	2,220	53
27	Phoenicia	do	1,621	2,115	43
27	Patria	do	1,104	1,530	50
28	Calabria	do	1,212	1,410	38
28	Citta di Torino	do	852	912	44
28	Attivita	do	836	1,004	23

Emigration from Naples.

The emigration from Naples is increasing greatly as the season advances. During the past week 9,314 emigrants were inspected. It is anticipated that the movement during March, April, and May will exceed all previous records.

Bubonic plague in Natal.

Reports from Durban, dated February 23, 1903, state that the epidemic of bubonic plague is abating. There were then 18 cases under treatment. Since the beginning of the prevalence there have been 83 cases and 50 deaths. February 25 a case was reported at Pietermaritzburg.

Bubonic plague in Mauritius.

A report from the governor of Mauritius states that during the week ended February 19, 1903, there were 4 fresh cases of bubonic plague, with 1 death.

Bubonic plague in India.

Reports from Bombay, dated February 26, 1903, indicate an alarming increase of bubonic plague. On the date of the report there were in the province of Bombay 195 cases and 180 deaths. On the same day last year there were 147 cases and 113 deaths.

The SURGEON-GENERAL.

JAPAN.

Reports from Yokohama.

Assistant Surgeon Moore reports, February 19 and 26, as follows: During the week ended February 14, 5 vessels, having an aggregate personnel of 593 crew and 455 passengers, were inspected; also 222 steerage passengers were bathed and 390 pieces of baggage were disinfected.

No official report of the health of Yokohama for the above period has been received by me. It seems that no new case of plague has occurred in Tokyo for more than a month, so that the disease in that city may be regarded as suppressed. Plague still exists in Formosa.

During the week ended February 21, 1903, three steamships, having an aggregate personnel of 285 crew and 474 passengers, were inspected; 216 steerage passengers were bathed and 420 pieces of baggage were disinfected.

The report of communicable diseases in Yokohama for the same period notes 2 cases of enteric fever with 1 death and 3 cases of diphtheria with no deaths. No cases of grave quarantinable diseases have been notified in this city during the year 1903.

The SURGEON-GENERAL.

MEXICO.

Plague report from Mazatlan week ended March 20, 1903.

Consul Kaiser reports, March 21, as follows:

MAZATLAN, MEXICO, *March 21, 1903.*

DEPARTMENT OF STATE, *Washington:*

Deaths, 2; new cases, 2. Plague almost extirpated. Confidence restored.

KAISER, *Consul.*

Quarantine against San Francisco raised.

[Telegram.]

CITY OF MEXICO, MEXICO, *March 21, 1903.*

WYMAN, *Washington, D. C.:*

I hereby notify you that quarantine against San Francisco has been raised and that the steamers will only be inspected for the purpose of killing rats and mice found thereon.

LICEAGA.

PHILIPPINE ISLANDS.

Outgoing quarantine at Iloilo discontinued.

Passed Assistant Surgeon Perry, chief quarantine officer for the Philippine Islands, reports, February 12, as follows: In view of the fact that no cases of cholera had occurred in Iloilo since December 21, 1902, the outgoing quarantine enforced at that port was discontinued on January 19, 1903.

The SURGEON-GENERAL.

Weekly report of the outgoing quarantine at Manila, P. I., instituted for the protection of other Philippine ports on account of the prevalence of cholera in Manila, week ended February 7, 1903.

Vessels remaining in quarantine from last week ^a	1
Vessels entering quarantine during the week	0
Vessels discharged from quarantine	1
Vessels sailing for infected ports without quarantine inspected and passed	50
Crew entering quarantine during week	0
Cabin passengers entering quarantine during week	0
Steerage passengers entering quarantine during week	0
Crew inspected during week	1,498
Passengers inspected during week	1,953
Vessels disinfected during week	0
Vessels remanded to Mariveles Quarantine Station	0
Cases of quarantinable diseases occurring among persons in detention, cholera	0
Pieces of baggage disinfected	2,174
Pieces of baggage inspected and passed	2,118
Vessels remaining in quarantine February 7	0

^a Vessels for clean ports are held in quarantine before being allowed to sail and inspected daily: vessels for infected ports are inspected and cleared without quarantine. Outgoing quarantine discontinued February 4, 1903.

PORTO RICO.

Report from San Juan.

Assistant Surgeon King reports, March 9, as follows:

Vital statistics, city of San Juan, Porto Rico.

FEBRUARY, 1903.			
Grippe	2	Enteritis	5
Malarial fever	5	Gastro-enteritis	3
Pernicious malaria	1	Cholera infantum	3
Tetanus	3	Athepsia	1
Tetanus, infantile	2	Cerebral hemorrhage	2
Tubercle of lungs	5	Encephalitis	1
Tubercle of larynx	1	Nephritis, acute	1
Tuberculosis, general	2	Nephritis, chronic	1
Rickets	2	Cirrhosis of liver	3
Anæmia	1	Luekemia	1
Endocarditis	2	Total	63
Aortic insufficiency	1		
Myocarditis	1	FEBRUARY, 1902.	
Angina pectoris	1	Births	91
Heart failure	1	Deaths	78
Spasm glottis	1	FEBRUARY, 1903.	
Bronchitis	2	Births	76
Pneumonia	3	Deaths	63
Gastric fever	5		
Entero-colitis	1		

The few cases of varioloid previously reported as existent in the island have, as far as is known, recovered, and the outbreak has entirely died out.

Report from Ponce.

Assistant Surgeon Goldberger transmits the following, March 6, 1903:

Vital statistics of Ponce, P. R.

FEBRUARY, 1903.			
Diseases of—		Rheumatism	3
Digestive system	24	Uræmia	1
Respiratory system	12	Poisoning	1
Circulatory system	6	Total	99
Nervous system	9		
Anæmia, malnutrition, inanition	11	FEBRUARY, 1902.	
Malaria	3	Births	176
Tuberculosis	8	Deaths	89
Nephritis	1	FEBRUARY, 1903.	
Rachitis	2	Births	140
Cancer	3	Deaths	99
Hepatitis	2		
Wounds	3		
Syphilis	2		

Inspection of immigrants at Ponce.

Report of alien steerage passengers arriving at Ponce during the week ended February 28, 1903.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Feb. 25	Spanish steamship Buenos Aires.	Habana, Port Limon, Colon, Savanilla, Curaçao, Puerto Cabello, La Guaira, and Carupano.	2

Report of alien steerage passengers arriving at Ponce during the week ended March 7, 1903.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Mar. 7	French steamship St. Domingue.	Fort de France and St. Thomas.	14

Report of alien steerage passengers arriving at San Juan during the week ended March 14, 1903.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Mar. 11	American steamship Philadelphia.	La Guayra, Puerto Cabello, Curaçao, Ponce.....	10

Inspection of immigrants at San Juan.

Report of alien steerage passengers arriving at San Juan during the week ended March 7, 1903.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Mar. 6	French steamship Olinde Rodriguez.	Havre, Bordeaux, St. Thomas	14

Report of alien steerage passengers arriving during the week ended March 14, 1903, at the six subports of Porto Rico.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Mar. 8	MAYAGUEZ. French steamship Saint Domingue.	Fort de France, Point a Pitre, Basse Terre, St. Thomas, Ponce.	5

Arecibo, Humacao, Aguadilla, Arroyo, Fajardo, no transactions.

W. W. KING,

Assistant Surgeon, Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL.

Foreign and insular statistical reports of countries and cities—yearly and monthly.

BRAZIL—Pernambuco.—Two weeks ended January 31, 1903. Estimated population, 200,000. Total number of deaths, 196, including enteric fever 1, smallpox 10, and 25 from phthisis pulmonalis.

CANADA—British Columbia—Victoria.—Month of February, 1903. Estimated population, 21,000. Total number of deaths, 24, including diphtheria 1, and 1 from tuberculosis.

CHILE—Antofagasta.—Month of January, 1903. Estimated population, 8,000. Total number of deaths, 62, including enteric fever 1, smallpox 13, and 7 from tuberculosis.

DUTCH GUIANA—Paramaribo.—Month of January, 1903. Estimated population, 32,263. Total number of deaths, 82. No contagious diseases reported.

FRANCE—St. Etienne.—Two weeks ended February 15, 1903. Estimated population, 146,559. Total number of deaths, 168, including diphtheria 1, enteric fever 1, and 16 from tuberculosis.

GIBRALTAR.—Two weeks ended February 22, 1903. Estimated population, 27,460. Total number of deaths, 19. No deaths from contagious diseases.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended February 28, 1903, correspond to an annual rate of 16.6 per 1,000 of the aggregate population, which is estimated at 15,075,011.

London.—One thousand four hundred and forty-four deaths were registered during the week, including measles 57, scarlet fever 6, diphtheria 15, whooping cough 43, enteric fever 11, and diarrhea 15. The deaths from all causes correspond to an annual rate of 16.3 per 1,000. In Greater London 1,965 deaths were registered. In the "outer ring" the deaths included 6 from diphtheria, 3 from measles, 1 from scarlet fever, 14 from whooping cough, and 1 from smallpox.

Ireland.—The average annual death rate represented by the deaths registered during the week ended February 28, 1903, in the 21 principal town districts of Ireland was 21.7 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Queenstown, viz, 0.0, and the highest in Newry, viz, 42.0 per 1,000. In Dublin and suburbs 195 deaths were registered, including diphtheria 1, measles 1, scarlet fever 3, whooping cough 5, and 36 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended February 28, 1903, correspond to an annual rate of 17.7 per 1,000 of the population, which is estimated at 1,702,912. The lowest mortality was recorded in Perth, viz, 9.3, and the highest in Aberdeen, viz, 22.0 per 1,000. The aggregate number of deaths registered from all causes was 581, including diphtheria 6, measles 9, scarlet fever 5, and 23 from whooping cough.

HAWAII—*Honolulu.*—Month of February, 1903. Population, 39,306. Total number of deaths, 81, including enteric fever 2, plague 2, and 15 from tuberculosis.

JAVA—*Batavia.*—Three weeks ended February 7, 1903. Estimated population, 150,000. Total number of deaths not reported. No contagious diseases.

ST. HELENA.—Four weeks ended February 7, 1903. Estimated population, 3,750. Total number of deaths, 7. No deaths from contagious diseases.

SPAIN—*Barcelona.*—Two weeks ended February 28, 1903. Estimated population, 600,000. Total number of deaths not reported. Nine deaths from enteric fever and 2 from smallpox reported.

Malaga.—Month of January, 1903. Estimated population, 131,063. Total number of deaths, 336, including enteric fever 5 and 3 from smallpox.

Valencia.—Two weeks ended February 28, 1903. Estimated population, 244,000. Total number of deaths, 252, including 1 from enteric fever.

Cholera, yellow fever, plague, and smallpox, December 27, 1902, to March 27, 1903.

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from June 28, 1902, to December 26, 1902, see PUBLIC HEALTH REPORTS for December 26, 1902.]
