## UNITED STATES.

### QUARANTINE PROCLAMATIONS.

[For maritime quarantine regulations with regard to yellow fever, adopted at a conference of the Louisiana, Texas, and Mobile quarantine authorities, held at Galveston, Tex., January 6, 1903, see Public Health Reports, April 3, 1903.]

#### *Proclamation of the quarantine board of Mobile Bay.*

OFFICE OF QUARANTINE BOARD OF MOBILE BAY,  
*Mobile, Ala., April 1, 1903.*

In accordance with law, and by virtue of authority vested in me by the quarantine board of Mobile Bay, I, Rhett Goode, president of said board, do hereby declare that from and after sunrise on the 15th day of April, 1903, and until the 1st day of December, 1903, unless sooner revoked, quarantine shall be enforced against all vessels entering Lower Mobile Bay as follows, according to following schedule:

*First class.*—Vessels and their crews, cargoes, and passengers, which are not included in the classes named below, shall be subject to necessary sanitation and then be given free pratique.

*Second class.*—Against vessels arriving from suspected ports which, in the judgment of this board, are considered suspicious; such vessels shall be subject to such sanitation, together with their crews, cargoes, and passengers, and shall be detained for such period as this board may from time to time determine.

*Third class.*—Vessels arriving from ports known to be infected shall be disinfected and detained, together with their crews, cargoes, and passengers, for a period of not less than five days after disinfection.

*Fourth class.*—Against all vessels and their contents that are infected, or with a history of infection during the present season, and that have not subsequently been subjected to improved modern sanitation; such vessels will be spoken off Mobile bar and ordered by the pilots to Ship Island Quarantine Station.

*Fifth class.*—Against all vessels and their contents that during the quarantine season have visited ports declared by this board infected, and subsequently arrive in Mobile Bay from foreign or domestic

ports, where no disinfection by the improved process is practiced. Such vessels not having been disinfected, or certificate to that effect not being produced, shall be subjected to complete sanitation, and held for such period as this board may determine.

All vessels arriving from ports known or suspected to be infected with cholera or bubonic plague shall be disinfected and detained for such period as this board may determine.

Vessels engaged in the tropical-fruit trade, where sanitary conditions and health record are satisfactory, may be permitted to pass the quarantine station after inspection under such regulations as this board may from time to time determine, and will be required each trip to present at the quarantine station in Lower Mobile Bay, certificates from sanitary inspectors of the United States Marine-Hospital Service, stationed at said ports, showing satisfactory sanitary condition of ports and contiguous vicinities, as well as similar condition of vessels, cargoes, and crews.

Healthy vessels, not otherwise subject to quarantine, which have touched for coal orders at intertropical islands reported free of infectious diseases, without taking on board at such islands either passengers or freight, may at the discretion of the board be allowed to pass without disinfection or detention, provided they have been more than five days in transit from port of call and left said port between sunrise and sunset of day of arrival thereat.

All vessels, however, entering the bay, except those holding release certificates, must be inspected by the quarantine physician and procure pratique before coming to the city or communicating with other vessels or persons.

Full quarantine restrictions will be imposed on all vessels whose officers attempt deception in regard to any case of sickness, or material capable of carrying infection, or disregard the rules and regulations of the quarantine board of Mobile Bay, and such restrictions will be imposed thereafter on every vessel on which any officer who has previously attempted to practice deception is found in any official capacity.

Any injury to furnishings or effects due to disinfection will not be paid for by the board.

All rules and regulations applying to unloading cargo at this port to be carried out under police supervision and the expense of the same to be paid for by the vessels.

The restrictions herein proclaimed are subject to change, at the option of the quarantine board, to meet particular cases.

Except those required by law to enter the quarantine anchorage, no other person will be allowed within said anchorage or to visit the station unless by special permission of the quarantine physician. Violations of these provisions will be prosecuted in courts of competent jurisdiction.

The following-named persons are the duly authorized officers of the Board:

Dr. Henry Goldthwaite, health and executive officer.

Dr. W. W. Scales, quarantine physician.

Mr. R. B. Owen, secretary and treasurer.

The rules and regulations in force in 1892, except when in conflict with the provisions of this proclamation, remain in full force and effect during 1903.

By order of the quarantine board of Mobile Bay:

RHETT GOODE, M. D., *President.*

*Quarantine proclamation for the year 1903, published by the Louisiana State board of health.*

STATE OF LOUISIANA,  
*Executive Department.*

At the request of the board of health of the State of Louisiana, embodied in a resolution adopted by that body at a regular meeting held February 17, 1903, and by virtue of the authority vested in me by law, I, William Wright Heard, governor of the State of Louisiana, do hereby issue this, my proclamation, to take effect on and after the 1st day of April, 1903 (all vessels arriving at the mouth of the Mississippi River after 6 o'clock p. m., March 31, to be included).

That all vessels arriving at the several quarantine stations of Louisiana, together with their cargoes, crews, passengers, and baggage, shall be subjected to inspection and sanitation according to the following schedule:

*First class.*—Vessels which are not included in the following classes shall be subjected to necessary maritime sanitation without detention of either vessels or persons longer than may be necessary to place such vessels in good sanitary condition.

*Second class.*—Vessels arriving from suspected ports (intertropical, American, and West Indian and Brazilian ports) which, in the absence of satisfactory information to the contrary, are considered suspicious, and other ports which may be decided suspicious by the board of health, shall be subjected to full sanitation at the Mississippi River Quarantine Station, together with detention of the vessel and persons for such length of time as the board of health may determine.

*Third class.*—Vessels arriving from ports known to be infected shall be subjected to full sanitation at the Mississippi River Quarantine Station and shall be detained for observation, together with their crews, cargoes, and passengers, for such length of time after completion of disinfection as the board of health may determine.

*Fourth class.*—Vessels, which without regard to ports of departure are infected, that is to say, vessels which have yellow fever, cholera, or other contagious or infectious diseases on board at the time of arri-

val, or have had same on voyage, shall proceed at once to the lazaretto to land their sick, and they shall proceed to the Mississippi River Quarantine Station, there to undergo thorough disinfection and be detained, together with passengers, crews, and cargoes, for such length of time as the board of health may determine.

All vessels arriving from ports known or suspected to be infected with cholera or bubonic plague shall be subjected to maritime sanitation and such detention as the board of health may determine.

Vessels arriving from ports and places belonging to the second, third, and fourth classes, as set forth in the above schedules, shall not be allowed to pass the Rigolets, Lake Borgne Canal, Atchafalaya, or Calcasieu quarantine stations, or other quarantine stations which may be hereafter established, without having undergone proper maritime sanitation at the Mississippi River Quarantine Station.

Vessels engaged in the tropical fruit trade, whose sanitary condition and health record are satisfactory, may be allowed to pass the Mississippi River Quarantine Station after inspection, under such regulations and sanitary treatment as the board of health may prescribe.

Quarantine officers at the several stations of this State are especially charged and required to strictly enforce the articles of this proclamation.

The State board of health is requested to prosecute vigorously all violators of the same, as well as of the quarantine laws and regulations of this State.

Given under my hand and the great seal of the State of Louisiana at the capitol in the city of Baton Rouge, on this the 9th day of March, A. D. 1903.

[SEAL.]

W. W. HEARD,  
*Governor of Louisiana.*

By the governor:

EUGENE J. MCGIVNEY,  
*Assistant Secretary of State.*

*Resolution adopted April 24, 1895, and still in force.*

Hereafter full quarantine restrictions will be imposed on all vessels whose officers wilfully attempt deception in regard to any case of sickness, or material capable of carrying infection, or wilfully disregard the rules and regulations of the board of health; and such detention will be imposed thereafter on every vessel on which any officer who has previously attempted to practice deception is found in any official capacity.

SPECIAL INSTRUCTIONS TO OWNERS, AGENTS, MASTERS OF VESSELS, AND PASSENGERS.

The Louisiana State board of health recommends the following suggestions to agents, owners, masters of vessels, and passengers, for

the purpose of facilitating the work of quarantine officers and reducing the period of detention to a minimum.

1. That vessels should be stripped during the quarantine seasons of all woolen hangings, carpets, curtains, and such like materials, and upholstered furniture as far as practicable. Hair or moss mattresses to be replaced by wire or wicker beds.

2. That, as far as possible, vessels trading with tropical ports should be manned with acclimated crews.

3. Drinking water for use on vessels should not be taken from rivers or streams in intertropical countries.

4. Masters of vessels, ship and consular agents are earnestly requested to instruct passengers from quarantinable ports to dispense, as far as possible, with baggage which may be injured by wetting or heat (230° F.) while undergoing disinfection. Such passengers are specially warned against bringing furs, silks, skins, laces, velvets, and other fabrics of delicate texture, as they will be compelled to assume all risks of injury.

5. While in ports infected with yellow fever, vessels should be anchored out in the harbor, when this is possible, and the crew prohibited from going ashore, especially at night.

6. When practicable, cargoes should be loaded in such a manner as to allow access to the pumps, and also to enable the quarantine officers to pump out and wash the bilge.

7. For the purpose of avoiding delay and expense at quarantine, owing to the necessity of shifting of cargo for the object of disinfection, it is recommended that there be constructed in all vessels from quarantined ports an open framework shaft, 15 inches in diameter, from the center of each hatch, through which the fumigating pipe may be introduced down to the dunnage of the vessel.

8. Special attention should be given to cleanliness of vessels and persons, and provisions should be made for all possible ventilation of the entire vessel. The best disinfectants, and instructions for using same, can be obtained by application to the board of health or any of its officers.

9. Masters should, before arrival, see that the bilge is thoroughly pumped out and cleansed, and that the entire vessel be put in such good sanitary condition as to permit of the least possible detention. Fruit vessels particularly should be kept thoroughly cleansed for the purpose of avoiding delay at the quarantine station.

10. Vessels observing the above recommendations will receive special consideration at the quarantine station, detention and cost of cleansing, disinfecting, etc., being materially lessened thereby.

EDMOND SOUCHON, M. D., *President.*

G. FARRAR PATTON, M. D., *Secretary.*

*Proclamation by the Governor of the State of Texas.*

Be it known, that I, S. W. T. Lanham, governor of the State of Texas, by authority vested in me by the laws of this State, do hereby declare that quarantine shall be established on the Gulf coast and Rio Grande border on and after April 1, 1903, and it shall continue until closed by proclamation.

1. Said quarantine shall apply to all vessels, persons, or things coming from places infected by yellow fever, smallpox, bubonic plague, or cholera, and all places south of 25° north latitude shall be considered infected unless proof to the contrary be submitted to the State health officer, and special exemption be granted to said places, and persons from such places are prohibited from entering this State within a period of ten days.

2. I further declare quarantine against any person or persons infected or liable to be infected with yellow fever, smallpox, bubonic plague, or cholera, either within or without the State, and direct the quarantine officers of the State and health officers of the counties and towns to establish local quarantine around any and all such persons whenever discovered.

3. The coast quarantine stations shall be governed by the following rules:

(a) Ten days must have elapsed, from the day of sailing from an infected point, before vessel will be allowed to enter the ports of Texas, except fruit vessels and such vessels as have been given written permits to do so.

b. Vessels arriving outside the bar of Texas ports, with sickness on board at the time of arrival, of either yellow fever, smallpox, bubonic plague, or cholera, must not be brought inside of the bar by the pilots, but must be at once reported to the local quarantine officer, who will at once report same to the State health officer, and he will endeavor to have such vessel ordered to the nearest United States Marine-Hospital station for treatment.

c. Vessels from an infected place, having had sickness or deaths en route, but having no sickness at the time of arrival, will be disinfected and held five full days after disinfection, under observation, before being released, and a longer time if considered necessary by the State health officer.

(d) Vessels from places actually infected, and having been at sea longer than ten days, will be disinfected and held under observation five full days, unless special permission is given by the State health officer to enter sooner.

(e) Vessels with cargo or passengers from places south of 25° north latitude, with clean bills of health, and having had no sickness on board will be disinfected and held three days after disinfection, unless special permission is given by the State health officer to enter sooner.

(f) Vessels arriving from noninfected ports south of 25° north latitude, with no cargo or passengers, with clean bills of health from last clearance and the clearance preceding the last, and in good sanitary condition at the time of arrival, may be permitted to enter after being disinfected, without further detention, if, in the judgment of the local quarantine officers, it is safe to do so.

(g) Vessels wishing to engage in the fruit, cattle, or crude-petroleum trade will be allowed to do so under special restrictions and regulations governing the same.

All officials, military authorities, and citizens of Texas are solicited to assist the quarantine officers in the execution of the above rules, and are earnestly requested to notify the governor of any dereliction of duty by officers or employees, or any other facts that will give greater efficiency to the quarantine service.

In testimony whereof, I have hereunto signed my name and have caused the seal of the State to be affixed at the city of Austin, this the 25th day of March, A. D. 1903.

[SEAL.]

S. W. T. LANHAM, *Governor.*

By the governor:

J. R. CURL,  
*Secretary of State.*

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

*Inspection work in Chinatown, San Francisco, endorsed by new State board of health of California.*

[Telegram.]

SAN FRANCISCO, CAL., *April 4, 1903.*

WYMAN, *Washington:*

New State board of health organized at Sacramento April 1 elected M. Gardner president and M. K. Foster secretary. Adjourned to meet at San Francisco April 2. Visited service laboratory on Merchant street in a body. Inspected Chinatown and passed vigorous resolutions endorsing the present joint work of Federal, State, and municipal authorities under direction of the Service.

GLENNAN.

*Summary of work in Chinatown, San Francisco, for week ended April 4, 1903.*

Following received from Surgeon Glennan, at San Francisco, under date of April 6, being record of work in Chinatown for week ended April 4:

Buildings reinspected .....	184
Rooms reinspected .....	1,368
Persons inspected .....	917
Sick inspected .....	43
Dead inspected .....	9

Necropsies.....	3
Places disinfected.....	320
Rats examined.....	24
Rats infected.....	None.
Sewers flushed.....	7 times.
Nuisances abated.....	29
Places under correction.....	34
Notices served to abate defective plumbing.....	163

*Measures for checking smallpox in northern Maine (Canadian border)—  
Operations at Camp Glazier.*

Surgeon Kalloch reports, April 3, the disinfection of thirty men and their clothing during the week ended March 30. The inspector of the Maine State board of health advises that Camp Glazier be kept open during April and May, as many of the lumbermen have remained in the woods and will come out for the first time with the drive. An inspector will be stationed at Sandy Bay, on the west coast of Maine.

*Statistical report of States and cities of the United States—Yearly and  
monthly.*

CONNECTICUT—*Stamford*.—Month of March, 1903, estimated population, 17,000. Total number of deaths not reported. No deaths from contagious diseases reported.

GEORGIA—*Augusta*.—Month of March, 1903. Estimated population, 42,441. Total number of deaths, 52, including diphtheria 1, and 9 from tuberculosis.

ILLINOIS—*Evanston*.—Month of February, 1903. Census population, 19,259. Total number of deaths not reported. Two deaths from scarlet fever and 2 from tuberculosis reported.

*Kankakee*.—Three weeks ended March 23, 1903. Estimated population, 13,500. Total number of deaths, 24, including 2 from tuberculosis.

*Peoria*.—Month of March, 1903. Census population, 56,100. Total number of deaths, 75, including diphtheria 1, and 6 from tuberculosis.

MASSACHUSETTS—*Worcester*.—Month of February, 1903. Estimated population, 124,331. Total number of deaths, 192, including diphtheria 5, enteric fever 1, measles 13, scarlet fever 1, whooping cough 4, and 18 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended March 28, 1903, from 73 observers, indicate that phthisis pulmonalis and enteric fever were more prevalent, and erysipelas, whooping cough, remittent fever, diphtheria, and inflammation of bowels were less prevalent than in the preceding week.

Meningitis was reported present at 4, diphtheria at 25, whooping

cough at 26, enteric fever at 34, scarlet fever at 65, measles at 76, smallpox at 109, and phthisis pulmonalis at 170 places.

MINNESOTA—*Mankato*.—Month of March, 1903. Estimated population, 12,000. Total number of deaths, 25, including 5 from tuberculosis.

MISSOURI—*St. Louis*.—Month of February, 1903. Estimated population, 645,000; white, 605,000; colored, 40,000. Total number of deaths, 864; white, 764; colored, 100; including diphtheria 22, enteric fever 15, measles 5, scarlet fever 4, whooping cough 4, smallpox 1, and 121 from tuberculosis.

MONTANA—*Helena*.—Month of March, 1903. Estimated population, 13,000. Total number of deaths not reported. One death from tuberculosis reported.

NEBRASKA—*Omaha*.—Month of January, 1903. Census population, 102,555. Total number of deaths, 80, including diphtheria 1, enteric fever 1, whooping cough 1, and 8 from tuberculosis.

Month of February, 1903. Total number of deaths, 83, including diphtheria 1, whooping cough 1, and 11 from tuberculosis.

NEW HAMPSHIRE—*Franklin*.—Month of March, 1903. Estimated population, 6,000. Total number of deaths, 5. No deaths from contagious diseases.

NEW YORK.—Reports to the State board of health, Auburn, for the month of February, 1903, from 156 cities, towns, and villages having an aggregate population of 7,910,000, show a total of 10,826 deaths, including diphtheria 240, enteric fever 151, measles 55, scarlet fever 114, whooping cough 74, smallpox 3, and 1,160 deaths from tuberculosis.

*Saratoga*.—Month of March, 1903. Estimated population, 12,119. Total number of deaths, 19, including diphtheria 1, and 2 from tuberculosis.

NORTH CAROLINA—*Charlotte*.—Month of March, 1903. Census population, 18,091. Total number of deaths, 29, including whooping cough 2, and 6 from tuberculosis.

OHIO—*East Liverpool*.—Month of March, 1903. Estimated population, 20,000. Total number of deaths, 31, including enteric fever, 2, and 2 from phthisis pulmonalis.

PENNSYLVANIA—*Dunmore Town*.—Month of March, 1903. Estimated population, 15,000. Total number of deaths, 12, including 2 from tuberculosis.

*Pottsville*.—Month of March, 1903. Estimated population, 15,710. Total number of deaths, 23, including 1 from enteric fever.

VIRGINIA—*Lynchburg*.—Month of March, 1903. Estimated population, 30,000. Total number of deaths, 53, including enteric fever 3, and 4 from phthisis pulmonalis.

α 1 death from plague, March 17.

## FOREIGN AND INSULAR.

### BRAZIL.

#### *Reports from Bahia—Mortality statistics.*

Consul Furniss reports March 9 and 16, as follows: For the week ended March 7, 1903, 86 deaths were reported. Causes: Aneurism 1, arterio-sclerosis 4, asthma 2, bronchitis 5, cancer 1, diarrhea 5, enteritis 2, malarial fever 1, gastritis 9, meningitis 1, senile debility 2, Bright's disease 1, nephritis 3, stillborn 5, tetanus infantile 2, tuberculosis 5, diseases of circulatory system 2, and from other causes 35.

For the week ended March 14, 1903, 82 deaths: Apoplexy 1, arterio-sclerosis 5, beriberi 1, bronchitis 9, diarrhea 1, enteritis 3, malarial fevers 6, gastritis 5, meningitis 1, Bright's disease 2, nephritis 1, syphilis 1, tetanus 5, tuberculosis 9, and from other causes 32.

The SECRETARY OF THE TREASURY.

### CANADA.

#### *Inspection of immigrants at St. John, New Brunswick.*

Assistant Surgeon Billings reports, March 31, as follows: Week ended Saturday, March 28, 1903, number inspected, 574; number passed, 554; number detained, 20.

#### *Supplemental report, month of March, 1903.*

During the month of March 56 alien immigrants were examined from time to time on a "mixed manifest." Number inspected, 56; number passed, 50; number detained, 6.

The SURGEON-GENERAL.

### CUBA.

#### *Report from Habana—Mortality statistics.*

Assistant Surgeon Trotter reports, April 1, as follows:

#### *Mortuary report of Habana for the week ended March 28, 1903.*

Disease.	Number of deaths.	Disease.	Number of deaths.
Tuberculosis .....	14	Pernicious fever .....	1
Pneumonia .....	7	Gangrene .....	1
Bronchitis .....	4	Cancer .....	3
Enteric fever .....	2	Cachexia .....	2
Enteritis .....	3	Total deaths from all causes .....	93
Meningitis .....	1		

*Report from Matanzas—Mortality statistics.*

Passed Assistant Surgeon von Ezdorf reports, March 31, as follows: Eighteen deaths were reported in this city during the week ended March 28, 1903. The chief causes of death reported were as follows: Broncho-pneumonia 1, tuberculosis 3, arterio-sclerosis 1, meningitis 1, malarial cachexia 1, enteritis 1, heart disease 2, other causes 8. Annual rate of mortality for the week, 19.50 per 1,000. No quarantinable disease was reported in this district.

The SURGEON-GENERAL.

*Report from Santiago.*

Acting Assistant Surgeon Wilson reports, March 21, as follows:

*Mortality statistics for the week ended March 21, 1903.*

Causes of death.	Number.
Intermittent fever and malarial cachexia.....	4
Tubercle of lungs.....	4
Osteo sarcoma of mouth.....	1
Chronic alcoholism.....	1
Cerebral softening.....	1
Organic heart disease.....	1
Diarrhea and enteritis (under 2 years).....	2
Icterus neonatorum.....	1
Burns.....	1
Ill-defined or unspecified causes of death.....	2
Total.....	18

Annual rate of mortality for the week, 21.76 per 1,000. Estimated population, 43,000.

GERMANY.

*Report from Berlin—Plague and cholera in various countries.*

Consul-General Mason reports, March 20, as follows:

*Plague.*

*British India.*—During the week ended February 21 there were registered in the Bombay Presidency 15,461 plague cases (10,840 deaths), among which 1,118 cases (1,047 deaths) occurred in the city of Bombay and 28 cases (23 deaths) in the town and port of Karachi.

*British South Africa.*—In Port Elizabeth during the period from the 1st to the 14th of February 7 plague cases were registered. In Natal during the week ended February 7 there were 9 plague patients under treatment. The total number of plague cases recorded up to the 7th of February amounted to 63 (including 6 Europeans), with 34 deaths. Up to the 14th of February 20 further cases of plague were registered.

*West Australia.*—During the week ended January 30, according to the official bulletin, 3 new cases of plague were registered in Freemantle.

*Plague and cholera.*

*British India.*—In Calcutta during the week ended February 14 171 persons died of plague and 37 persons died of cholera.

*Cholera.*

*Turkey.*—In Damascus on the 16th and 17th of February, respectively, 1 new case of cholera and 2 deaths were registered.

*Death rate of Berlin.*

The death rate for the week ended March 14 was somewhat higher than that of the two foregoing weeks, and amounted (calculated on the year) to 15.7 per thousand of the population, being thus lower than for the corresponding week of last year, in which it amounted to 16.8. In spite of this rise, however, two-thirds of the large German cities showed less favorable health conditions than Berlin, the rate of mortality of the following towns, among others, being considerably higher than that of Berlin, viz: Schöneberg (with 17), Hanover, Frankfurt-am-Main, Düsseldorf, Altona, Königsberg, Breslau, Cologne, Munich; also London, Paris, and Vienna. The following cities had a lower death rate than Berlin: Hamburg, Leipzig, Dresden, Charlottenburg (with 14.9 per thousand).

*Causes of death.*—Eighty-four deaths from consumption were registered during the week in question. Acute diseases of the respiratory organs showed an increase as compared with the foregoing week, claiming 55 victims. Acute diseases of the intestines were of less frequent occurrence, causing 37 deaths. There were 10 deaths from influenza. Further, there were registered 3 deaths from diphtheria, 4 deaths from scarlet fever, and 4 deaths from measles. Twenty-five persons died by violence.

*Temporary measures against plague adopted in New South Wales.*

(1) In the case of vessels arriving at this port after having berthed alongside a wharf at any port or place within His Majesty's dominions at which plague is, or is believed to be, prevalent, if they present a certificate from the duly constituted port health authorities that during such berthing the vessel has been fended off and otherwise adequately protected against access of shore rats, the board will accept such certificate and treat the vessel as though she had not so berthed alongside such wharf.

(2) In the case of vessels arriving from ports not within His Majesty's dominions no certificate whatsoever will be accepted as exempting from special treatment unless the precautionary measures taken to prevent access of shore rats to the vessel are described and attested by His Majesty's consular representative at the port or ports concerned.

(3) Vessels which have taken on board fodder or grain of any kind at, or forwarded from, any port infected or suspected of being infected with plague, are required to discharge in the stream with such precautions to avoid landing of rats as in each case may be deemed necessary by the board, and afterwards to be fumigated for destruction of rats before going alongside.

(4) Vessels which arrive under the conditions contemplated in the preceding regulation are subject to its provisions whether they arrive direct or not, and whether they present a certificate of fumigation at some port touched in the voyage or not.

The SURGEON-GENERAL.

## ITALY.

*Report from Naples—Inspection of vessels.*

Passed Assistant Surgeon Eager reports, March 17, as follows:

*Inspection service at Naples and Palermo, week ended March 14, 1903.*

The SURGEON-GENERAL.

## MEXICO.

*Sanitary conditions at Ensenada.*

Acting Assistant Surgeon Alexander reports, March 31, as follows: The sanitary condition at Ensenada remains good, with no severe acute disease prevalent. No travel from lower coast as yet, but steamer *Curaçao* leaves San Francisco on April 9 for Ensenada and Gulf ports, returning here on the 25th.

The SURGEON-GENERAL.

*Sanitary conditions at Guaymas.*

Passed Assistant Surgeon Grubbs reports, March 30, as follows: The sanitary condition of this port remains good. In spite of the favorable reports from Mazatlan, I hear no talk of resuming shipping with that place. A certain amount of freight from Mazatlan and vicinity is going overland to Altata and thence by water here. I am told by the quarantine authorities that such freight is accompanied by certificates of disinfection, and in any case the nature of the articles shipped and time elapsed makes any danger there might be small.

*Report from Mazatlan. No new plague cases during week ended April 3.*

Consul Kaiser reports, April 3, as follows: No changes. Will discontinue wiring unless we have new cases.

The SECRETARY OF THE TREASURY.

## PHILIPPINE ISLANDS.

*Report from Manila—Plague and smallpox—Cholera in the provinces.*

Passed Assistant Surgeon Perry, chief quarantine officer for the Philippine Islands, reports, February 20, as follows: Two fatal cases of plague, both Filipinos, occurred in Manila during the week ended February 14, 1903. During the same period there was one case of smallpox.

*Report of cholera occurring in provincial towns in the Philippine Islands for the week ended February 14, 1903.*

*No cholera in Manila.*

No cholera cases were reported in Manila during the week ended February 14, 1903. Three weeks have elapsed since date of last case.

## PORTO RICO.

*Smallpox on U. S. S. Alliance at San Juan—Schooner Guillermito disinfected for rubella.*

Assistant Surgeon King, chief quarantine officer for Porto Rico, reports, March 24 and 25, as follows:

I have the honor to confirm the following cable:

U. S. training ship *Alliance* arrived to-day from Port of Spain with three cases of smallpox. Cases removed to isolation hospital. Vessel will be disinfected and held. Will report further next mail.

This vessel arrived at Port of Spain, Trinidad, on February 17, after twenty-seven days out from Hampton Roads. The surgeon of the ship, on investigating rumors of smallpox in the city, saw a number of cases in the hospital most of which were diagnosed chicken pox. On learning that the disease was widespread in the city, shore liberty was stopped on the 25th, the ship sailing on the 28th.

On March 6 a case appeared which proved to be rather severe discrete smallpox. Two other cases of mild varioloid appeared, the last being on the 11th instant. It is interesting to note that the severest case had been vaccinated, apparently with good result, only a month previous to contracting the disease. The others had been vaccinated on enlistment.

These cases with all their effects were so promptly isolated in a boat on the stern davits that there was little chance of infecting the ship, but their presence showed that there had been infectible material on board, although all had been vaccinated on enlistment, hence it was deemed advisable by the quarantine officer and the ship's surgeon to hold the ship fourteen days from the isolation of the last case, i. e., March 11, for observation of the crew.

After arrival the sick were transferred to the isolation hospital at the quarantine station, and the vessel was disinfected with sulphur and bichloride solution, the cabins with formalin, clothing and dunnage with sulphur and formalin. All on board were given a bichloride bath. There have been no more cases to date, and the ship will be released to-day from quarantine. The varioloid cases have recovered and returned on board. The other case is convalescent and will probably be discharged in another week.

The disease was evidently contracted in Port of Spain, where there have been some 350 cases. There exists a great difference of opinion as to whether it is smallpox or chicken pox, but the cases on the *Alliance* were undoubtedly smallpox. A cable published in the New York Herald of March 12 states that Dr. Bridger, health officer of Barbados, has investigated the disease in Trinidad and pronounced it smallpox.

The schooner *Guillemito* was partially disinfected on account of a case diagnosed as rubella.

*Inspection of immigrants.*

*Report of alien steerage passengers arriving at Ponce during the week ended March 21, 1903.*

*Report of alien steerage passengers arriving at the six subports of Porto Rico during the week ended March 28, 1903.*

Mayaguez, Arecibo, Humacao, Fajardo, Arroyo, and Aguadilla, no transactions.

The SURGEON-GENERAL.

· WEST INDIES.

*Report from Trinidad—An epidemic eruptive disease present.*

Consul Smith reports, March 18, as follows:

There is at present existing in this island an epidemic fever defined here as a febrile disease, infectious in nature, and characterized by a cutaneous eruption. Physicians here are divided in opinion whether it is in the form of chicken pox or smallpox. The disease is rapidly spreading, and approximately there are about 1,000 cases, and up to date 3 deaths are recorded.

ASSISTANT SECRETARY OF STATE.

*Foreign and insular statistical reports of countries and cities—Yearly and monthly.*

BAHAMAS—*Dunmore Town.*—Two weeks ended March 27, 1903. Estimated population, 1,232. Three deaths. No contagious diseases.

*Governors Harbor.*—One week ended March 28, 1903. Estimated population, 1,500. No deaths and no contagious diseases.

*Green Turtle Cay, Abaco.*—Two weeks ended March 25, 1903. Estimated population, 3,314. No deaths and no contagious diseases.

*Nassau.*—Two weeks ended March 30, 1903. Estimated population, 12,535. Number of deaths not reported. No contagious diseases reported.

FRANCE—*Marseille.*—Month of February, 1903. Estimated population, 491,161. Total number of deaths, 1,185, including diphtheria 5, enteric fever 3, measles 4, scarlet fever 1, whooping cough 2, smallpox 39, and 113 from tuberculosis.

*St. Etienne.*—Two weeks ended February 28, 1903. Estimated population, 146,671. Total number of deaths, 141, including diphtheria 1, and 15 from tuberculosis.

GIBRALTAR.—Three weeks ended March 15, 1903. Estimated population, 27,460. Total number of deaths, 26, including 1 from smallpox.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended March 14, 1903, correspond to an annual rate of 17.2 per 1,000 of the aggregate population, which is estimated at 15,075,011.

*London.*—One thousand four hundred and forty-three deaths were registered during the week, including measles 63, scarlet fever 7, diphtheria 15, whooping cough 55, enteric fever 5, and diarrhea 14. The deaths from all causes correspond to an annual rate of 16.3 per 1,000. In Greater London 1,966 deaths were registered. In the "outer ring" the deaths included 4 from diphtheria, 5 from measles, and 8 from whooping cough.

*Ireland.*—The average annual death rate represented by the deaths registered during the week ended March 14, 1903, in the 21 principal town districts of Ireland was 22.9 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Portadown, viz, 0.0, and the highest in Galway, viz, 35.0 per 1,000. In Dublin and suburbs 200 deaths were registered, including diphtheria 2, enteric fever 3, measles 1, scarlet fever 1, smallpox 1, whooping cough 2, and 48 from tuberculosis.

*Scotland.*—The deaths registered in 8 principal towns during the week ended March 14, 1903, correspond to an annual rate of 19.7 per 1,000 of the population, which is estimated at 1,702,912. The lowest mortality was recorded in Greenock, viz, 18.0, and the highest in Perth, viz, 27.9 per 1,000. The aggregate number of deaths registered from all causes was 645, including diphtheria 5, measles 15, scarlet fever 4, and 28 from whooping cough.

ITALY—*Milan.*—Month of January, 1903. Estimated population, 507,245. Total number of deaths, 1,106, including diphtheria 17, enteric fever 10, measles 3, and 99 from tuberculosis.

**JAPAN—Nagasaki.**—Ten days ended February 28, 1903. Estimated population, 131,700. Total number of deaths not reported. Two deaths from diphtheria reported.

**JAVA—Batavia.**—Two weeks ended February 21, 1903. Estimated population, 150,000. Number of deaths not reported. No contagious diseases.

**MALTA.**—Two weeks ended February 28, 1903. Estimated population, 189,749. Total number of deaths, 233, including diphtheria 1, enteric fever 2, and 10 from measles.

**PHILIPPINE ISLANDS—Manila.**—Month of December, 1902. Population, 302,154. Total number of deaths, 753, including enteric fever 10, cholera 23, plague 2, and 77 from tuberculosis.

**SPAIN—Barcelona.**—Two weeks ended March 15, 1903. Estimated population, 600,000. Total number of deaths not reported. Eight deaths from enteric fever and 5 from smallpox reported.

**Malaga.**—Month of February, 1903. Estimated population, 131,063. Total number of deaths, 319, including enteric fever 4, and 5 from smallpox.

**Valencia.**—Two weeks ended March 15, 1903. Estimated population, 204,000. Total number of deaths, 302, including enteric fever 2, and 2 from smallpox.

**URUGUAY—Montevideo.**—Month of January, 1903. Estimated population, 265,000. Total number of deaths, 405, including diphtheria 1, enteric fever 8, measles 1, whooping cough 1, smallpox 2; and 52 from tuberculosis.

**VENEZUELA—Puerto Cabello.**—Month of October, 1902. Estimated population, 17,000. Total number of deaths, 76, including 11 from phthisis pulmonalis.

Month of November, 1902. Total number of deaths, 70, including 10 from phthisis pulmonalis.

Month of December, 1902. Total number of deaths, 68, including 12 from phthisis pulmonalis.

Month of January, 1903. Total number of deaths, 104, including 16 from phthisis pulmonalis.

Month of February, 1903. Total number of deaths, 61, including 10 from phthisis pulmonalis.

**WEST INDIES—St. Thomas.**—Three months ended December 31, 1902. Estimated population, 11,012. Total number of deaths, 216, including diphtheria 1, enteric fever 1, and 3 from tuberculosis.

Six weeks ended March 6, 1903. Estimated population, 11,012. Total number of deaths, 43. No contagious diseases.

*Cholera, yellow fever, plague, and smallpox, December 27, 1902, to April 10, 1903.*

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from June 28, 1902, to December 26, 1902, see PUBLIC HEALTH REPORTS for December 26, 1902.]
