

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

Summary of work in Chinatown, San Francisco, for week ended May 3, 1903.

The following is received from Surgeon Glennan, at San Francisco, under date of May 4, being record of work in Chinatown for week ended May 3, 1903:

Number of buildings reinspected	214
Rooms reinspected	1, 551
Persons inspected	1, 649
Sick inspected.....	49
Number of sick seen and prescribed for at Oriental Dispensary	8
Number of dead examined.....	11
Number of necropsies	2
Number of rats examined bacteriologically.....	75
Number of rats found with pest infection	0
Number of places disinfected.....	864
Number of times streets swept and sprinkled with bichloride solution.....	3
Number of sewers flushed.....	5
Number of notices served to abate plumbing nuisances.....	35
Number of plumbing nuisances abated	5
Number of plumbing nuisances undergoing correction.....	43
Total number of inspections of plumbing	158

Examination of vessels for stegomyia.

The following is received, under date of April 29, 1903, from Surg. H. R. Carter, at Baltimore, Md.:

The purpose in this examination is to discover:

(1) What vessels from tropical ports bring stegomyia to the United States.

(2) Which of these bring stegomyia coming aboard at the tropical port with immigrants.

(3) Which take stegomyia aboard at a United States port and return with them; the active stegomyia making a round trip, as it were.

(4) To find at what anchorages in tropical ports vessels are liable to receive stegomyia from shore, i. e., what anchorages are safe or unsafe for vessels in the event of yellow fever prevailing in said port.

For this there should be undertaken a systematic examination of vessels for stegomyia at the tropical port and the United States port of arrival and (if a regular liner) of departure. This is best done by exposing bowls of water in various places, especially dark places, and hatching the eggs; i. e., bowls should be placed aboard at the United States port, to be renewed on arrival at the tropical port and examined there; fresh bowls to be placed aboard on arrival, to be removed either when she leaves or when she reaches her United States destination.

Adult stegomyia should also be looked for, but failure to find them is far from conclusive evidence of their absence unless they be sought for, and carefully sought for, several days at the proper time of day, late afternoon.

Obviously, a vessel which has stegomyia aboard on arrival at a tropical port need not be investigated there to see if other stegomyia go aboard her from that port. If, however, a vessel is free from stegomyia on arrival at a tropical port, the presence of such insects aboard while in port, en route, or on arrival at a United States port is evidence (proof if larvæ on arrival be excluded) that such stegomyia were received aboard in the tropical port.

It is obvious, then, that the vessels the examination of which will yield the most information are those between ports, in both of which observation can be made. It is also important that most of these vessels should come to the tropical port free from stegomyia.

For the solution of the fourth question vessels arriving free from stegomyia, lying at moorings at different places in the harbor, should be examined. Not much would be learned by examining any vessel lying at wharves like those in Habana; she would almost certainly acquire stegomyia. Similarly the examination of vessels arriving with stegomyia aboard—no matter where they lay—would give, I think, no useful data. I think that in this latter category would fall the regular liners from the Gulf and South Atlantic ports.

Statistical report of States and cities of the United States—Yearly and monthly.

CONNECTICUT—*Stamford*.—Month of April, 1903. Estimated population, 20,000. Total number of deaths not reported. No deaths from contagious diseases reported.

ILLINOIS—*Joliet*.—Period from December 29, 1902, to March 2, 1903. Census population, 29,353. Number of deaths not reported. Two deaths from smallpox reported.

MARYLAND—*Baltimore*.—Month of March, 1903. Estimated population, 533,000; white, 451,000; colored, 82,000. Total number of deaths, 902; white, 670; colored, 232; including diphtheria 8, enteric fever 8, measles 14, scarlet fever 4, whooping cough 4, and 127 from tuberculosis.

MASSACHUSETTS—*Worcester*.—Month of March, 1903. Estimated population, 124,331. Total number of deaths, 187, including measles 7, scarlet fever 1, and 29 from tuberculosis.

OHIO—*East Liverpool*.—Month of April, 1903. Estimated population, 20,000. Total number of deaths, 28, including enteric fever 2, and 1 from phthisis pulmonalis.

PENNSYLVANIA—*Columbia*.—Month of April, 1903. Estimated population, 13,000. Total number of deaths, 13, including enteric fever 2, and 1 from tuberculosis.

York.—Month of April, 1903. Estimated population, 37,000. Total number of deaths, 30. No deaths from contagious diseases.

Warren.—Three months ended March 31, 1903. Census population, 8,529. Total number of deaths, 31, including diphtheria 1, and 1 from tuberculosis.

VIRGINIA—*Pocahontas*.—Month of April, 1903. Estimated population, 5,000. Total number of deaths not reported. One death from enteric fever reported.

WISCONSIN—*Milwaukee*.—Month of March, 1903. Estimated population, 315,000. Total number of deaths, 450, including diphtheria 3, enteric fever 2, whooping cough 5, and 51 from tuberculosis.

Report of immigration at Baltimore for the week ended May 2, 1903.

OFFICE OF U. S. COMMISSIONER OF IMMIGRATION,

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually, or at the close of the calendar year, and new tables begun. For record of plague in San Francisco for calendar year 1902, see PUBLIC HEALTH REPORTS No. 52, December 26, 1902. A summary of cases since March, 1900, when the first case was officially reported, is as follows: Calendar year 1900, cases 22; deaths, 22. Calendar year 1901, cases, 29; deaths, 25. Calendar year 1902, cases, 41; deaths, 41.]

FOREIGN AND INSULAR.

BARBADOS.

Smallpox situation improved—Quarantine against Barbados modified.

Consul Macallister reports, April 13, as follows:

The steamers of the Royal Mail Steam Packet Company have again made Barbados their port for the transfer of passengers and freight. Smallpox has nearly disappeared, there being only 7 cases on the island, all of which are strictly isolated. It is now believed that there is no further danger. The nearby ports have greatly modified their quarantine regulations against Barbados, and it is expected that all restrictions will be taken off in a few days.

Modified quarantine regulations have been imposed by this colony against British Guiana, Trinidad, Tobago, and Grenada, at which places a contagious eruptive disease believed to be smallpox has broken out.

Commencing with this date clean bills of health will be issued by the British authorities here.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended April 19, 1903. Present officially estimated population, 8,500; number of deaths 3, including 1 from phthisis pulmonalis; prevailing disease, mild type of malarial fever; no quarantinable disease; general sanitary condition of this port and the surrounding country during the week very good.

Bills of health were issued to the following vessels.

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 16	Hispania (Swedish)	21	0	0	0
17	Beverly (British)	43	1	8	1

CANADA.

Smallpox at Owen Sound, Ontario.

The consul at Collingwood, Ontario, reports, April 29, that the consular agent at Owen Sound, on Lake Huron, reports the presence of several severe cases of smallpox and advises that all vessels leaving Owen Sound for American ports be required to obtain bills of health.

CHINA.

Report from Hongkong—Plague and smallpox.

Passed Assistant Surgeon McMullen reports, March 23, as follows: During the week ended March 21, 1903, 7 vessels, 638 crew, 144 cabin passengers, and 205 steerage passengers were inspected; 512 crew and 196 steerage passengers were bathed at the disinfecting station, and 777 pieces baggage were disinfected.

The following communicable diseases were reported in the colony for the week just ended: Bubonic plague, 28 cases and all fatal (1 Indian, 27 Chinese); smallpox, 1 case and 1 death (Chinese); 1 case each enteric fever and scarlet fever, and 2 cases diphtheria, with no deaths (all Europeans). Since January 1 to date there have been 110 cases of plague reported in the colony, all fatal, and all Chinese with 1 exception, an Indian.

Plague at Phauthai—Canton clean.

Consul McWade, at Canton, reports, March 21, as follows:

Bubonic plague has caused 100 deaths at Phauthai, 13 miles south-east of Kit Yang, in the province of Kwangtung. Efforts are being made to induce the elders and gentry of that city to have it thoroughly cleaned and the bodies of the victims promptly buried.

To this date no cases of plague or cholera have occurred in Canton or its immediate vicinity. Canton is the cleanest city in south China.

A sanitary board composed of five mandarins has been organized by H. E. Tak Sou, viceroy of the Two Kwangs, and the streets are swept daily and flushed several times each week.

COLOMBIA.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows: Week ended April 21, 1903. Present officially estimated population not obtainable; number of deaths, 2; prevailing diseases, malarial fevers; no quarantinable diseases; general sanitary condition of this port and the surrounding country during the week, good. I hear of very little sickness from malarial causes. No cases of smallpox reported for the past week.

Bills of health were issued to the following vessels.

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 15	Fulton	14	0	0	0
17	David	21	0	0	0

CUBA.

Report from Cienfuegos—Inspection of vessels—Mortality statistics.

Acting Assistant Surgeon McMahon reports, April 22, as follows: Six bills of health were issued to vessels going to ports in the United States, all in good sanitary condition and no sickness on board.

Mortuary report for the week ended April 18, 1903: Arterio-sclerosis 3, infantile tetanus 2, malaria (remittent) 1, tetanus (traumatic) 1, pernicious fever 1, other causes 5; total 12.

Mortuary report for the week ended April 4, 1903 (received out of date): Infantile cholera 1, tuberculosis 3, infantile tetanus 1, meningitis 2, other causes 7; total 14.

No quarantinable disease has been reported in this district, and the reports obtainable from the surrounding country are good.

Report from Habana.

Assistant Surgeon Trotter reports, April 23 and 29, as follows:

Report from Matanzas—Inspection of vessels—Mortality statistics.

Passed Assistant Surgeon Von Ezdorf reports, April 25, as follows: Eleven vessels bound for ports in the United States received bills of health during the week ended April 25, 1903.

On the British schooner *Helen E. Kenney* mosquito larvæ were found in one water barrel. This barrel was emptied and refilled. Partial disinfection of the British steamship *Irisbrook* was recommended on account of the presence of a case of tuberculosis. The captain of the vessel stated that the recommendations would be followed. Seven deaths were reported during the week, making an annual rate of mortality of 7.58 per 1,000. Causes of death: Tuberculosis, 3; broncho-pneumonia, 3; heart disease, 1.

Report from Santiago.

Acting Assistant Surgeon Wilson reports, April 21, as follows:

Mortality statistics for the week ended April 18, 1903.

Causes of death.	Number.
Pernicious fever.....	1
Remittent malarial fever	1
Tubercle of lungs	3
Scrofula	1
Cancer of the womb.....	1
Alcoholism	1
Acute myelitis	1
Cerebral hemorrhage.....	2
Tetanus (infantile)	1
Organic heart disease	1
Pneumonia, hypostatic.....	1
Chronic splenitis	1
Ill-defined or unspecified causes of death.....	2
Total	17

Annual rate of mortality for the week, 20.5 per 1,000. Estimated population, 43,000.

Sanitary condition of Santiago to be improved—No contagious diseases present.

The following is received, under date of May 4, from Minister Squires, at Habana.

The following telegram is just received from United States consul at Santiago: "I have had further conference with Drs. Finlay and Lopez and civil governor in regard to the sanitary condition of city. Am assured that steps have been taken to improve same. No contagious or infectious diseases exist now, and authorities say every effort will be put forth to prevent occurrence of any." The Cuban Government seems fully alive to situation.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

Consul-General Mason reports, April 19, as follows:

Plague.

British East India.—During the week ended March 21 there were registered in the Bombay presidency 11,100 plague cases and 8,243 deaths, among which 1,282 cases (1,110 deaths) occurred in the city of Bombay and 129 cases (105 deaths) in the town and port of Karachi.

British South Africa.—During the week ended March 14, 3 cases of plague were registered in Port Elizabeth, 1 plague patient died in the hospital, and on the 14th of March there remained 22 patients under treatment. In King Williams Town 1 death from plague occurred on March 10.

In Natal, according to the official bulletins for the period from the 1st to the 7th of March, 3 cases of plague were registered. Since the outbreak of the disease 94 cases of plague have been recorded with 59 deaths.

West Australia.—During the last February week 2 cases of plague occurred in Freemantle (2 deaths).

Plague and cholera.

British India.—In Calcutta during the week ended March 14, 895 persons died of plague and 91 persons died of cholera.

Cholera.

Turkey.—According to official bulletins there were registered in Syria during the week ended March 29, 19 cases of cholera and 21 deaths, as compared with 28 cases (28 deaths) during the foregoing week.

Death rate of Berlin.

The death rate of Berlin for the week ended April 4 was lower than it has been since the middle of November last year, amounting, calculated upon the year, to 13.8 per 1,000 of the population, as compared with 16.2 for the foregoing week, being also lower than for the corresponding week of last year, in which it amounted to 15 per 1,000. Of the various large German towns during this week only 4 showed more favorable figures than Berlin, viz, Barmen, Bremen, Charlottenburg (with 12.9), and Schöneberg (with 8.7 per 1,000). The death rate was considerably higher than that of Berlin in Hamburg, Dresden, Frankfurt-on-the-Main, Nuremberg, as well as London, while the figures were higher still for Königsberg, Breslau, Cologne, Stuttgart, and Munich, as well as Paris and Vienna. During this week there were fewer deaths among children in their first year than during the foregoing week. The mortality rate among infants fell from 4.2 to 3.4 per year and mille, this being less than half that of Munich, Breslau, and Dortmund. There were registered during this week 72 deaths from phthisis pulmonalis. Acute intestinal diseases caused 28 deaths, and acute diseases of the respiratory organs claimed 53 victims, among these being reckoned 6 persons who succumbed to influenza. There were also registered 10 deaths from scarlet fever and 6 deaths from diphtheria. There occurred 11 deaths from measles, and during this week 8 persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended April 20, 1903. Present officially estimated population, 3,500; no deaths and no prevailing diseases during the week; general sanitary condition of this port and the surrounding country during the week, good; no quarantinable disease.

Bills of health were issued to the following vessels.

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 14	Hispania	21
14	Beverly	43	5

The steamer *Beverly* cleared from Puerto Barrios.

HAWAIIAN ISLANDS.

Report of outgoing quarantine transactions at Honolulu, week ended April 18.

Passed Assistant Surgeon Cofer, chief quarantine officer for the Hawaiian Islands, reports, April 20, as follows: Week ended April 18, 1903, number of vessels inspected and passed, 8; vessels disinfected, 9; cabin passengers inspected and passed, 69; steerage passengers inspected and passed, 190; crew inspected and passed, 119; pieces of baggage disinfected, 228; pieces of freight disinfected, 0; bags of bones disinfected, 79.

HONDURAS.

Report from Ceiba, fruit port.

Acting Assistant Surgeon Robertson reports as follows: Week ended April 18, 1903. Present officially estimated population, about 4,000; one death; prevailing diseases, malarial; no quarantinable disease; general sanitary condition of this port and the surrounding country during the week good.

Bills of health were issued to the following vessels.

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 16	Gyller	14	0	0	0
16	Harald	19	0	0	0
16	Lauenberg	36	0	0	0
18	Santo Oteri	8	0	0	0

Report from Puerto Cortes, fruit port.

Acting Assistant Surgeon Carter reports as follows: Week ended April 21, 1903. Present officially estimated population, 3,327; one death; prevailing diseases, malarial fever of mild form and intestinal troubles; no quarantinable disease; general sanitary condition of this port and the surrounding country during the week good.

Bills of health were issued to the following vessels.

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.

JAPAN.

Report from Yokohama.

Assistant Surgeon Moore reports, April 9, as follows:

During the week ended April 4, 1903, three vessels, having a total personnel of 257 crew and 517 passengers, were inspected; 170 steerage passengers were bathed, and 198 pieces of baggage were disinfected. One vessel was granted a bill of health without inspection. The official report of contagious diseases in Yokohama for the same period notes the following: Diphtheria, 1 case, 1 death.

MEXICO.

Sanitary condition of Ensenada.

Acting Assistant Surgeon Alexander reports, April 28, as follows:

Good sanitary conditions prevail in Ensenada and vicinity. No sickness on board steamer *Curaçao* from Gulf ports, and no suspicious cases heard of in such ports.

Plague situation.

[Telegram.]

MEXICO, May 4, 1903.

WYMAN, Washington:

I inform you, as president of the International Committee of the American Republics, that no case of plague has occurred in Mazatlan since March 16. In the town of Siqueros there are 5 sick in the lazaretto, and in Villa Union 10.

LICEAGA,

President Superior Council of Health of Mexico.

PHILIPPINE ISLANDS.

Cholera in Manila and the provinces.

Assistant Surgeon Heiser, chief quarantine officer for the Philippine Islands, reports, April 2, as follows:

Report from Ponce.

Assistant Surgeon Goldberger reports, April 20, through the chief quarantine officer for Porto Rico, as follows:

During the two weeks ended April 19, 1903, there was recorded by the local board of health a total of 33 deaths. Sanitary conditions unchanged.

Inspection of immigrants at Ponce.

Report of alien steerage passengers arriving at this port during the week ended April 18, 1903.

Date of arrival.	Name of vessel.	Where from.	Number of immigrants.
Apr. 18	Julia (Cuban)	Habana, Nuevitas, Puerto Padre, Santiago de Cuba, Santo Domingo, and Macoris.	2

TURKEY.

Shipment of wool from Damascus to United States.

Consul Rayndal, at Beirut, reports, April 11, the shipment, via Beirut, of 66 bales of half-washed Syrian wool from Damascus on the steamship *Ocean Prince*, bound for Philadelphia, and draws attention to the fact that cholera is at present epidemic in Damascus. The shipment was covered by consular certificate showing that no epizootic disease existed in the region, and the shippers declare that the wool was brought from Damascus before the outbreak of cholera there. In view of the fact that quarantine restrictions are not always strictly enforced, and that some years ago cholera was brought to Homs from Tripoli by a flock of sheep, the consul considers it proper to note the circumstances of this shipment.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

ARGENTINA—*Buenos Aires*.—Month of February, 1903. Estimated population, 875,000. Total number of deaths, 922, including diphtheria 11, enteric fever 17, measles 2, scarlet fever 6, smallpox 1, and 151 from tuberculosis.

AUSTRIA—*Brunn*.—Month of February, 1903. Estimated population, 95,342. Total number of deaths, 243, including diphtheria 1, measles 2, scarlet fever 5, whooping cough 3, and 38 from tuberculosis.

FRANCE—*Nantes*.—Month of March, 1903. Estimated population, 129,000. Total number of deaths, 271, including enteric fever 2, measles 20, and 66 from tuberculosis.

St. Etienne.—Two weeks ended March 31, 1903. Estimated population, 146,671. Total number of deaths, 170, including diphtheria 5, and 30 from tuberculosis.

GERMANY—*Hanover*.—Month of January, 1903. Estimated population, 246,278. Total number of deaths, 341, including 27 from contagious diseases.

Month of February, 1903. Total number of deaths, 307, including 16 from contagious diseases.

Weimar.—Month of March, 1903. Estimated population, 30,042. Total number of deaths, 37. No contagious diseases reported.

GIBRALTAR.—Two weeks ended April 22, 1903. Estimated population, 27,460. Total number of deaths, 25. No deaths from contagious diseases.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended April 11, 1903, correspond to an annual rate of 15.6 per 1,000 of the aggregate population, which is estimated at 15,075,011.

London.—One thousand three hundred and forty-five deaths were registered during the week, including measles 48, scarlet fever 3, diphtheria 11, whooping cough 47, enteric fever 6, and diarrhea 19. The deaths from all causes correspond to an annual rate of 15.2 per 1,000. In Greater London 1,830 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 4 from measles, and 7 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended April 11, 1903, in the 21 principal town districts of Ireland was 20.6 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Portadown, viz, 5.2, and the highest in Wexford, viz, 42.0 per 1,000. In Dublin and suburbs 174 deaths were registered, including diphtheria 2, enteric fever 4, measles 3, scarlet fever 1, whooping cough 2, smallpox 1, and 29 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended April 11, 1903, correspond to an annual rate of 17.6 per 1,000 of the population, which is estimated at 1,702,912. The lowest mortality was recorded in Aberdeen, viz, 14.9, and the highest in Perth, viz, 27.9 per 1,000. The aggregate number of deaths registered from all causes was 578, including diphtheria 3, measles 14, scarlet fever 3, and 25 from whooping cough.

JAPAN—*Nagasaki*.—Ten days ended March 31, 1903. Estimated population, 131,700. Total number of deaths not reported. One death from enteric fever reported.

JAVA—*Batavia*.—Two weeks ended March 21, 1903. Estimated population, 150,000. Number of deaths not reported. No contagious diseases.

PORTO RICO.—Month of March, 1903. Census population, 953,947. Total number of deaths, 1,950, including diphtheria 4, enteric fever 5, and 132 from tuberculosis.

ST. HELENA.—Three weeks ended April 4, 1903. Estimated population, 4,000. Total number of deaths, 6, including 1 from tuberculosis.

SPAIN—*Corunna*.—Month of March, 1903. Estimated population, 50,000. Total number of deaths, 89, including diphtheria 1, enteric fever 1, measles 1, scarlet fever 1, whooping cough 1, and 22 from tuberculosis.

SWITZERLAND.—Reports for the two weeks ended April 4, 1903, from eighteen cities and towns having an aggregate population of 790,000, show a total of 505 deaths, including diphtheria 3, enteric fever 3, measles 18, scarlet fever 1, whooping cough 7, and 96 from phthisis pulmonalis.

Cholera, yellow fever, plague, and smallpox, December 27, 1902, to May 8, 1903.

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from June 28, 1902, to December 26, 1902, see PUBLIC HEALTH REPORTS for December 26, 1902.]
