

# PUBLIC HEALTH REPORTS.

## UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

### *Smallpox on British sealing schooner Triumph at Sitka, Alaska.*

Acting Assistant Surgeon Koosher reports, April 19, as follows: The British sealing schooner *Triumph* came into this port with a crew of 24 men. On my inspection of the vessel I found 1 man suffering from variola in the pustular stage. I immediately isolated the patient and vaccinated the remaining 23 men, ordered the schooner to an anchorage near an island 3 miles distant from the town, and placed the men as suspects for fourteen days. To-day I started to strip and remove all effects from the vessel to the shore, and to-morrow I shall begin to fumigate and disinfect the schooner according to regulation.

### *Summary of work in Chinatown, San Francisco, for week ended May 16, 1903.*

The following is received from Surgeon Glennan, at San Francisco, under date of May 18, being record of work in Chinatown for week ended May 16, 1903:

Buildings reinspected.....	222
Rooms reinspected .....	1,843
Persons inspected .....	1,541
Sick inspected.....	42
Sick seen and prescribed for at Oriental Dispensary.....	10
Dead examined .....	6
Necropsies .....	1
Rats bacteriologically examined.....	61
Places disinfected and limed .....	941
Times streets swept and sprinkled with bichloride solution.....	3
Sewers flushed .....	6
Notices served to abate plumbing nuisances .....	70
Plumbing nuisances abated .....	30
Plumbing nuisances undergoing abatement .....	49
Plumbing complaints filed .....	70

*Monthly statement of inspection of the Chinese and Japanese district of San Francisco, Cal., April, 1903.*

[Summary of reports to the Surgeon-General.]

Population of Chinatown, 13,000<sup>a</sup> (estimated at this season). Chinese leaths during the month, 48—2 by violence; for the same month of 1902, 44—1 by violence. Annual death rate for the month, 42.46, as compared to 39.69 for the month of April, 1902.

*Causes of death.*

Pulmonary tuberculosis.....	22	Opium poisoning.....	1
Carbuncle on nucha.....	1	Aortic insufficiency.....	2
Mitral insufficiency.....	1	Articular rheumatism.....	1
General tuberculosis.....	3	Chronic nephritis.....	1
Pneumonia, delayed resolution.....	1	Edema of lungs.....	1
Epithelioma of neck.....	1	Beriberi.....	1
Diphtheria.....	1	Acute nephritis.....	1
Tubercular peritonitis.....	2	Abscess of liver.....	1
Chronic interstitial nephritis.....	2	Aneurism of arch of aorta, with rupture into pericardial sac.....	1
Cardiac dilatation.....	1	Carcinoma of neck.....	1
Aneurism of aorta.....	1		
Gunshot wound of back.....	1		

*Statement of the inspection of buildings.*

Buildings reinspected.....	1, 126
Rooms reinspected.....	8, 050
Persons inspected.....	8, 115

*Morbidity report.*

Sick inspected.....	222
Cases seen and prescribed for at the Oriental Dispensary.....	40
Cases of clinical plague.....	0

*Necropsy report.*

Bodies necropsied.....	17
Bodies showing plague infection.....	0
Number passed, not requiring necropsy.....	31

<sup>a</sup>The population of Chinatown does not remain the same throughout the year. In April and May, when large numbers of Chinese laborers depart for the fish canneries in Alaska and the ranches in the State, the population dwindles appreciably and should be estimated at about 13,000 for April. These people return in October and November. Many of them, particularly those from Alaska, show evidences of deprivation of food and of hard work under unhygienic conditions. Among the returning cannery men beri-beri of a fatal type is frequently recognized. Fortunately, this is not a beri-beri country, and this infection has never been known to gain lodgment in the Chinese quarter.

The number of Chinese in this city at this season has been rightly estimated at 13,000, but San Francisco draws upon a much larger population for its sick, many cases from the country being sent in for treatment. It would therefore seem unjust to reckon the death rate upon any basis of less than 20,000 population.

*Disinfection.*

Places disinfected with carbolic acid and chloride of lime ..... 3, 034

*Report of the bacteriological examination of rats.*

Rats caught alive and delivered at laboratory .....	209
Rats found dead and delivered at laboratory .....	60
Rats showing lesions of phosphorus poisoning .....	25
Rats showing plague infection .....	0
Total number examined .....	269

*Inspection.*

The second systematic inspection of the Chinese and Japanese quarters was completed early in the month. Some of the places in which plague cases have occurred in the past, however, have been inspected as many as six times since the beginning of the work on February 10, 1903. Of late it has been thought best to divide Chinatown into five districts and to assign a medical inspector to each district, the plan being for each inspector by daily rounds to familiarize himself with the needs of his district and by kind treatment to come in closer touch with the people.

As usual, the greatest mortality during the month resulted from pulmonary tuberculosis, there having occurred 22 deaths from this disease alone. This is what one would expect, considering the conditions which obtain in the Chinese quarter. Nearly all the lodging houses are poorly constructed, being without provision for sunlight or ventilation. The rooms are small and overcrowded, some of them being underground. Windows are the exceptions, and the doors are kept constantly closed. Added to this, the sedentary life, the eating of poor and improperly prepared food, the habit of expectorating on the floors, render their habitations a hotbed for all manner of infections, especially the infection of tuberculosis.

*Precautions against rats.*

It is believed that the Chinatown rats have either been destroyed in large numbers by the prepared hane or have been driven to other fields by the strong chloride of lime and carbolic acid used in disinfecting the place. But few have been seen recently, and only a small number have been trapped in the limits of this district. The field of operations—that is, the area in which poisons are placed—has been widened and made to include the sewers for several blocks on the outskirts of the district.

*Repairs and improvements.*

In addition to the work of the medical and sanitary inspectors, there are on duty in Chinatown two or three experienced plumbing inspectors employed by the board of health, who make a thorough investiga-

tion of the plumbing in the district. They serve notices to abate nuisance on the owners and tenants and report the number of corrections made each week. During the month there were 63 plumbing nuisances abated, and 171 more were reported as undergoing correction. The work of tearing down unsanitary frame structures and other additions to buildings continues with a much larger force of laborers employed. At a meeting early in the month the board decided upon the condemnation of the frame additions to 26 buildings and determined to close others to human habitation until thoroughly repaired or remodeled by the owners. Thus the campaign for cleanliness has progressed satisfactorily.

Respectfully,

RUPERT BLUE,  
*Past Assistant Surgeon.*

Respectfully forwarded:

A. H. GLENNAN, *Surgeon.*

*Measures for checking smallpox in northern Maine (Canadian border).*

Surgeon Kalloch at Portland reports, May 16, as follows: Acting Assistant Surgeon Nichols reports under date of May 10 a second case of smallpox discovered by him at his point of inspection and sent to the pesthouse at Jackman, Me.

Acting Asst. Surg. J. M. Boothby reports from Lowelltown, Me., the inspection of 54 persons and 15 vaccinations since the last report.

*Statistical report of States and cities of the United States—Yearly and monthly.*

CALIFORNIA—*Fresno.*—Month of April, 1903. Estimated population, 15,000. Total number of deaths, 24, including enteric fever 1, and 3 from tuberculosis.

*Oakland.*—Month of April, 1903. Estimated population, 83,000. Total number of deaths, 86, including diphtheria 4, enteric fever 1, and 11 from phthisis pulmonalis.

*Sacramento.*—Month of April, 1903. Estimated population, 30,000. Total number of deaths, 38, including diphtheria 1, enteric fever 1, and 8 from phthisis pulmonalis.

FLORIDA—*Tampa.*—Month of April, 1903. Estimated population, 20,000. Total number of deaths, 25, including enteric fever 2, and 4 from phthisis pulmonalis.

GEORGIA—*Augusta.*—Month of April, 1903. Estimated population, 42,441. Total number of deaths, 53, including diphtheria 1, and 3 from tuberculosis.

INDIANA.—The monthly statistics of the State board of health show there were 2,737 deaths in the State in April. This is 322 fewer than occurred in the preceding month and 79 fewer than occurred in the

corresponding month a year ago. Important causes of death were: Phthisis pulmonalis 387, typhoid fever 44, diphtheria 18, scarlet fever 8, measles 13, whooping cough 23, pneumonia 317, influenza 65, cancer 94, violence 130, smallpox 21. Fourteen and seven-tenths per cent of all the deaths, or 365, were under 1 year of age and 30.9 per cent, or 761, were 65 or over. The great captives of death, tuberculosis and pneumonia, caused 904 deaths, or 34.2 per cent of the total number.

*Disease prevalence.*

Influenza was the most prevalent disease in March, but it drops to third place in April, while rheumatism leads. Pneumonia, too, takes a drop. It falls from third place in March to fifth in April. Troubles of the digestive tract show an increase in April over March, so also do measles, typhoid fever, cerebro spinal meningitis, and smallpox.

*Smallpox.*—590 cases, with 21 deaths, were reported in 56 counties in April. This is an improvement over the preceding month, when there were 873 cases and 26 deaths in 54 counties. In April last year there were 878 cases and 6 deaths in 55 counties. By this, the normal comparison, there is a decrease in cases in April, 1903, of 14.8 per cent, an increase in deaths of 250 per cent, and an increase in area of 1.88 per cent. The cases and deaths occurred in the following counties: Allen, 4; Bartholomew, 4; Boone, 2; Brown, 1; Carroll, 1; Cass, 69; Clark, 8; Clay, 12; Daviess, 27—5 deaths; Decatur, 13; Dekalb, 10; Delaware, 3; Dubois, 4; Elkhart, 1; Fayette, 12; Floyd, 2; Franklin, 33—4 deaths; Fulton, 11; Gibson, 1; Grant, 12; Greene, 3; Hamilton, 4; Harrison, 3; Howard, 2; Huntington, 1; Jackson, 3; Jefferson, 1; Jennings, 4; Johnson, 1; Knox, 10; Lake, 5; Laporte, 16; Lawrence, 15; Madison, 39; Marion, 17—7 deaths; Martin, 20; Miami, 13; Monroe, 39; Montgomery, 9; Newton, 35; Owen, 6; Parke, 5; Perry, 4; Pike, 5; Posey, 1; Spencer, 3; Sullivan, 6; Tippecanoe, 4; Tipton, 1; Vanderburg, 5; Vermilion, 20—1 death; Vigo, 30; Warrick, 4; Wayne, 1; Whitley, 14.

*Tuberculosis.*—The total number of deaths from tuberculosis was 389, and of these 174 were males and 215 were females. Forty of the males were married and between the ages of 18 and 40, and 81 of the females were married and between the same ages.

*Typhoid fever.*—103 cases were reported in 27 counties, with 44 deaths. The death rate was 21.3 in each 100,000, which is 1.5 higher than in the corresponding month last year.

*Summary.*—Compared with the corresponding month last year, there were fewer deaths, except by smallpox, and there was less sickness also.

**IOWA.**—Outbreaks of the following infectious diseases have been reported at the following places during the month of March, 1903.

*Diphtheria.*—Burlington; Logan Township, Ida County; Benton; Lake Township, Muscatine County; Ottumwa; Clinton Township, Pocahontas County; Colfax Township, Webster County; Boone; Walnut Township, Jefferson County; Dodge Township, Boone County; Afton Township, Union County; Des Moines; Fraser.

*Measles.*—Marion Township, Linn County; Des Moines; Highland Township, Washington County; Jackson Township, Benton County; Ottumwa; Prescott; Bingham Township, Hancock County; St. Ansgar; Marion; Pulaski; Sac City.

*Scarlet fever.*—Grand Mound; Burlington; Lafayette Township, Bremer County; Colfax Township, Pocahontas County; Lake Township, Muscatine County; Highland Township, Washington County; Webster City; Iowa City; Highland Township, Palo

Alto County; Ottumwa; Walnut Township, Jefferson County; Searsboro; Corinth Township, Humboldt County; Fairview Township, Jasper County; Boone; Des Moines; Correctionville; Rawles Township, Mills County; Humboldt; Blockton; Minburn; Lincoln Township, Scott County.

*Smallpox*.—Burlington, 4 cases; Des Moines, 4; Boone, 14; Patterson, 11; Marshalltown, 1; Laurel; Penn, Clear Lake and Graham Townships, Johnson County, 1, 5, and 1, respectively; Randolph, 1; Bloomville; Davenport Township, Scott County, 1; Blockton, 33; Center Grove Township, Dickinson County; Iowa City, 14; Bennezette Township, Butler County, 2; Larchwood, 7; Walnut Township, Jefferson County, 7; Leighton, 1; Waveland Township, Pottawattamie County, 1; Whittemore, 10; Wayne Township, Mitchell County, 3; Hanover Township, Crawford County, 5; Prairie City; Sioux Township, Monona County, 2; West Liberty, 1; Crocker Township, Polk County, 1; Newark Township, Webster County, 5; Sac City, 2; Grant Township, Lyon County, 1; Jackson Township, Warren County; Rockwell City.

*Typhoid fever*.—Burlington; Ottumwa; Des Moines; Marshalltown.

*Des Moines*.—Month of April, 1903. Estimated population, 80,000. Total number of deaths, 76. No deaths from contagious diseases reported.

LOUISIANA—*New Orleans*.—Month of April, 1903. Estimated population, 310,000; white, 227,000; colored, 83,000. Total number of deaths, 506; white 317, colored 189, including enteric fever 6, whooping cough 2, smallpox 2, and 105 from tuberculosis.

MASSACHUSETTS—*Brockton*.—Month of April, 1903. Estimated population, 44,873. Total number of deaths 41, including scarlet fever 1, whooping cough 2, and 7 from phthisis pulmonalis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended May 9, 1903, from 50 observers, indicate that diarrhea, measles, scarlet fever, inflammation of kidney, erysipelas, intermittent fever, enteric fever, diphtheria, cholera morbus, and meningitis were more prevalent, and pneumonia and whooping cough were less prevalent than in the preceding week.

Meningitis was reported present at 4, whooping cough at 23, diphtheria at 32, enteric fever at 34, smallpox at 66, measles at 72, scarlet fever at 76, and phthisis pulmonalis at 181 places.

NEBRASKA—*South Omaha*.—Month of April, 1903. Estimated population, 30,000. Total number of deaths, 21. No deaths from contagious diseases reported.

NEW HAMPSHIRE—*Concord*.—Month of May, 1903. Estimated population, 20,000. Total number of deaths, 42, including measles, 2, and 4 from tuberculosis.

NEW JERSEY—*Passaic*.—Three weeks ended May 9, 1903. Census population, 27,777. Total number of deaths, 31. No deaths from contagious diseases reported.

NEW YORK—*Peekskill*.—Month of April, 1903. Estimated population, 12,448. Total number of deaths, 29, including enteric fever, 1, and 3 from tuberculosis.

*Saratoga*.—Month of April, 1903. Estimated population, 15,000. Total number of deaths, 26, including 3 from tuberculosis.

**PENNSYLVANIA—Dunmore.**—Month of April, 1903. Estimated population, 15,000. Total number of deaths, 9, including 1 from tuberculosis.

**Pottsville.**—Month of April, 1903. Estimated population, 15,710. Total number of deaths, 20, including 1 from diphtheria.

**TENNESSEE—Nashville.**—Month of April, 1903. Estimated population, 81,803, white 51,387, colored 30,416. Total number of deaths, 142, white 71, colored 62, including enteric fever 2, measles 2, whooping cough 3, and 23 from tuberculosis.

**UTAH—Salt Lake City.**—Month of April, 1903. Census population, 53,531. Total number of deaths, 67, including diphtheria 2, and 1 from tuberculosis.

## FOREIGN AND INSULAR.

### ARGENTINA.

#### *An outbreak of aphthous fever.*

The following telegram, dated the 11th instant, is received from the United States chargé d'affaires ad interim at Buenos Ayres:

Aphthous fever, not the cattle plague, has broken out.

### BRAZIL.

#### *Report from Rio de Janeiro—Mortality for the month of March, 1903.*

Deputy Consul-General Greene transmits the following under date of April 20: During the month of March the sanitary conditions of Rio de Janeiro were somewhat improved. Compared with the month of February the daily average of deaths was reduced from 46.82 to 45.35. Contrary to the experience of previous years, the daily average of deaths from yellow fever was less in March than in February. In regard to infectious diseases the death report for March shows very slight changes when compared with that for February. The deaths from yellow fever during March were 151 as against 142 in February; bubonic plague, 6 as against 7; smallpox, 26 as against 26; measles, 3 as against 5; scarlet fever, 1 as against 1; grippe, 17 as against 10; diphtheria, 4 as against 0; typhoid fever, 12 as against 14; dysentery, 12 as against 2; beriberi, 12 as against 20; malarial fevers, 95 as against 81; tuberculosis, 230 as against 204. The population is estimated at 800,000.

### BRITISH GUIANA.

#### *Smallpox at Demerara.*

Consul Moulton reports, April 25, as follows: During the last week several new cases of an epidemic eruptive fever reported by me April 3 have been officially declared smallpox, and bills of health from the custom-house have since been issued in accordance with the facts. The disease is spreading rapidly.

### BRITISH HONDURAS.

#### *Report from Belize, fruit port.*

Acting Assistant Surgeon Carson reports as follows: Week ended May 3, 1903. Present officially estimated population, 8,500; number of deaths, 5; prevailing disease, malarial fever; no quarantinable diseases; general sanitary condition of this port and the surrounding country during the week, good.

## Bills of health were issued to the following vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 1	Beverly.....	43	8	5	10
2	David.....	20	0	0	0

## BRITISH WEST INDIES.

*Report from Barbados—Smallpox extinct.*

Consul McAllister reports, April 25, as follows: There are no cases of smallpox or other contagious disease in Barbados. The last case of smallpox was discharged cured on the 20th instant.

## CANADA.

*Inspection of immigrants at St. John, New Brunswick.*

Assistant Surgeon Billings reports, May 13, as follows: Week ended May 9, 1903: Number of immigrants inspected 610, passed 599, detained 11.

## CHINA.

*Report from Hongkong—Plague and smallpox—Manila declared infected.*

Passed Assistant Surgeon McMullen reports, April 3, as follows: During the week ended March 28, 1903, 13 vessels, 1,083 crew, and 899 passengers—324 cabin and 575 steerage—were inspected; 1,260 individuals were bathed at the disinfecting station—783 crew and 477 steerage passengers—and 1,433 pieces of baggage were disinfected. Twenty-eight cases of plague, with 24 deaths (Chinese); 4 cases of smallpox and 1 death and 1 case of enteric fever (European) were reported as having occurred in the colony. Up to date 164 cases of plague have been reported since January 1. The first and only European case this year was reported a few days ago, when an Englishman, on board a vessel in the harbor, was instantly killed by falling and fracturing his skull, and the city bacteriologist reported the man to have had plague. The consul-general at Canton reports that plague is raging in the neighborhood of Swatow, and that over 100 deaths have occurred.

The local sanitary board have declared Manila to be an infected port.

## COLOMBIA.

*Report from Bocas del Toro, fruit port—Smallpox.*

Acting Assistant Surgeon Osterhout reports as follows: Week ended May 5, 1903. Present officially estimated population, not obtainable; number of deaths, 3, including 1 from smallpox; prevailing diseases,

smallpox and malarial fever. General sanitary condition of this port and the surrounding country during the week, infected with smallpox. Twenty-three cases are reported. No attempt is now made to isolate those attacked or disinfect the houses. A movement is, however, on foot to eradicate the disease.

Bills of health were issued to the following vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 29	Hispania .....	22	0	0	0
May 2	Fort Morgan .....	22	0	0	0

4	Fulton .....	15	0	0	0

CUBA.

*Infectious disease commissions established at Santiago and Cienfuegos.*

The following is received from Minister Squiers, under date of May 9: In view of Presidential decree 51 of May 2, 1903, requirements of sanitary service, in conformity with report of superior board of sanitation and on recommendation of secretary of government, an infectious disease commission is established at Santiago de Cuba and Cienfuegos, each composed of five members. Commission will be governed by order No. 15 of the governor of Habana of August 17, 1899. Members of said commissions will be appointed by secretary of government on proposal of superior board of sanitation.

*Report from Cienfuegos—Inspection of vessels—Mortality statistics.*

Acting Assistant Surgeon McMahon reports, May 6, as follows:

During the week ended May 2, 1903, seven bills of health were issued to vessels bound to ports in the United States. All the vessels were in good sanitary condition; no sickness.

The mortuary report for the city for this week is as follows: Enteritis 1, arterio-sclerosis 2, meningitis 1, capillary bronchitis 1, tuberculosis 2, other causes 4; total 11.

*Report from Habana—Inspection of vessels—Mortuary statistics.*

Assistant Surgeon Trotter reports, May 7, as follows:

*Week ended May 2, 1902.*

Number of health certificates issued .....	129
Vessels inspected and issued bills of health .....	19
Passengers of outgoing vessels inspected .....	356
Crew of outgoing vessels inspected .....	709
Pieces of baggage inspected .....	165
Pieces of baggage disinfected .....	1
Pieces of freight inspected .....	1, 694
Pieces of express matter inspected .....	16

Total deaths from all causes, 120.

*Smallpox at Habana among detained passengers of Spanish steamship Montserrat.*

[Telegram.]

HABANA, May 15, 1903.

WYMAN, Washington:

Since reporting smallpox on Spanish steamer *Montserrat*, in my letter of May 4, two additional cases have developed in family of first case under observation at Las Animas hospital and eight cases among steerage passengers at Mariel. Vessel sailed on 4th instant for Ponce via Central-American ports.

TROTTER.

*Report from Santiago—Inspection of vessels—Mortality statistics.*

Acting Assistant Surgeon Wilson reports, May 5, as follows: During week ended May 2, 1903, bills of health were issued to 4 vessels bound for the United States. No quarantinable disease has been reported.

*Mortality statistics for the week ended May 2, 1903.*

Causes of death.	Number.
Pernicious fever .....	3
Erysipelas .....	1

Still-births.....	14	12	15	10
Official totals reported.....	92	83	95	69

*Sanitary conditions—Water supply and proposed improvements at Santiago.*

The last monthly report gives the total deaths during April as 59. This is the smallest number of deaths since May, 1902, except in September, 1902, when there were only 48 deaths.

It is remarkable that the mortality of the city decreases as the quality of the water deteriorates and the quantity diminishes. With the existing conditions an increase of gastro-intestinal diseases might be expected, but instead there has been a decrease in the number of deaths from this group, as from every other group of the Bertillon system, except general diseases. I inclose a summary of the mortality statistics for the four months just ended.

In spite of the scarcity of water the city is quite clean and healthy. Even in out-of-the-way places and unpaved streets the street sweepers are at work. There are places where dirty water collects, and there are bad odors; but these places are not numerous, especially when it is considered that the largest part of the city has dirt streets. The garbage is generally removed.

The water supply still continues very small and of bad quality. We have again been nine days without water in the spigot. The supply in private cisterns is very small and much of it bad, the water having decomposed.

Drs. Finlay and Lopez, of Habana, were in Santiago last week. They stated that \$200,000 had been appropriated to improve the water supply of this city and that work would be begun at once.

Dr. Finlay spoke of some reforms that were to be introduced at once into the city. One was to be the establishment of a "mosquito brigade" composed of a dozen men, who will be given an allowance of

10 barrels of crude petroleum a month. Also an advisory board of physicians is to be formed, whose duty will be to investigate (as soon as possible after notification) every case reported as contagious or suspicious, so as to confirm or correct the diagnosis before the disease is officially declared contagious. Physicians not reporting their contagious-disease cases will be fined. During the American intervention there existed such a board.

There has been no contagious disease in the city for more than two months. The city physicians continue to vaccinate great numbers of persons, principally school children. No smallpox or chicken pox is reported.

Dr. Finlay also announced that a new vessel had been purchased to replace the disinfecting barge *Rough Rider*.

#### GERMANY.

##### *Report from Berlin—Plague and cholera in various countries.*

Consul-General Mason reports, May 4, as follows:

##### *Plague.*

*British South Africa.*—In Cape Colony between the 22d and 28th of March the following cases of plague were registered, namely: In Port Elizabeth, 7, and 1 each in East London and Grahamstown. And during the same period the following deaths were recorded: One in Grahamstown, 2 in East London, and 2 at the plague hospital in Port Elizabeth. On the 28th of March there were still under treatment 23 plague patients in Port Elizabeth, 1 in East London, and 3 in King Williams Town; also, the 3 plague patients from the steamer *Nevassa* under treatment in the hospital at the quarantine station, Saldanha Bay. Plague-infected rats continued to be found up to the end of March in Graaf Reinet and in King Williams Town.

*Natal.*—In Durban and Maritzburg during the period from the 8th to the 21st of March 12 plague patients were admitted to the hospital for treatment and there occurred 7 deaths from plague outside of the hospitals. The total number of cases of plague recorded up to the 21st of March amounted to 113 in Durban and Maritzburg, in other parts of Natal 23, the total number of deaths from plague registered up to that date being 71.

*Brazil.*—During the period from the 21st of February to the 29th of March 2 deaths from plague were registered in Rio de Janeiro.

*Queensland.*—During the week ended March 13, 3 cases of plague were reported, bringing the total number of cases since the fresh outbreak of the disease up to 13. Of these, 8 occurred in Brisbane, 3 in Townsville, and 2 in Rockhampton.

*West Australia.*—According to the official bulletins, no fresh cases of plague occurred in Fremantle during the second and third weeks of March, but of the 98 rats examined at that place during the period in question 33 were found to be infected with plague.

##### *Death rate of Berlin.*

The death rate of Berlin for the week ended April 18 was higher than it has been during any week in the present year. It amounted, calculated upon the year, to 16.8 per thousand (as compared with 15.2 for the foregoing week), being also considerably higher than for the

corresponding week of last year, in which it amounted to 15.3. In spite of the increase in the number of deaths in Berlin, almost two-thirds of the large German cities showed less favorable health conditions than this city, the death rate of the following places being considerably higher than that of Berlin, namely: Hamburg, Leipzig, Frankfurt on the Main, Cologne, Munich, Strassburg, Königsberg, Danzig, Breslau, also Paris and Vienna. The following cities had a lower death rate than that of Berlin, viz: Dresden, Hanover, Charlottenburg (with 13.8), Schöneberg (with only 6.4 per thousand), and London (with 16.1). The rate of mortality among children in their first year was a little lower than in the previous week, namely, 3.6 per year and mille, the increase in the number of deaths being confined therefore exclusively to the higher-age classes. Phthisis pulmonalis claimed the largest number of victims, namely, 98. There was no increase in the number of deaths from acute intestinal diseases or from acute diseases of the respiratory organs, the former causing 34, the latter 57 deaths. There were further registered 7 deaths from scarlet fever, 11 deaths from measles, and 4 deaths from diphtheria, and 12 persons died by violence.

GUATEMALA.

*Report from Livingston, fruit port.*

Acting Assistant Surgeon Peters reports as follows: Week ended May 4, 1903. Present officially estimated population, 3,500; number of deaths, 2; no prevailing diseases reported; no quarantinable diseases; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 28	Beverly .....	43	1	.....	.....
30	David .....	20	.....	.....	.....

The steamship *Beverly* cleared from Puerto Barrios.

HONDURAS.

*Report from Puerto Cortez, fruit port.*

Acting Assistant Surgeon Carter reports as follows: Week ended May 5, 1903. Present officially estimated population, 3,327; no deaths; prevailing diseases, malarial fever; no quarantinable diseases; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 30	Beverly .....	43	5	1	9
May 2	Alabama .....	19	0	0	0
4	Hiram .....	15	0	0	0
5	Iberia .....	14	0	3	0

## JAPAN.

*Report from Yokohama.*

Assistant Surgeon Moore reports, April 17, as follows: During the week ended April 11, 1903, bills of health were issued to 7 vessels, having an aggregate personnel of 646 crew and 1,065 passengers; 381 steerage passengers were bathed and 480 pieces of baggage were disinfected.

Cases of infectious disease were reported in this city as follows: Enteric fever, 2 cases, 2 deaths; diphtheria, 3 cases, no deaths; dysentery, 1 case, no deaths.

## MEXICO.

*A case of plague near Mazatlan.*

Dr. Liceaga, secretary of the superior council of health of the City of Mexico, reports, May 19, the occurrence of a case of plague on May 14 in the person of a boy living in the country in the vicinity of Mazatlan. The infection was communicated from Siqueros where there are still some plague cases.

*Report from Tampico—Inspection of vessels—Mortality statistics—yellow fever.*

Acting Assistant Surgeon Frick reports, May 11, as follows:

*Week ended May 9, 1903—Inspection of vessels.*

Name of vessel.	Destination.	Number of passengers.	Number of crew.
Pensacola .....	Pensacola .....	.....	21
Seneca .....	New York .....	17	52
Mexicano .....	Philadelphia, via Vera Cruz.....	.....	22

*Mortality statistics.*

There were 19 deaths, or about 49.53 in the thousand. The deaths were from the following-named causes:

Yellow fever, 2; intermittent fever, 4; grippe, 3; pneumonia, 2; anæmia, pernicious, 1; cirrhosis of the liver, 1; diarrhea, infantile, 1; tuberculosis, pulmonary, 2; traumatism, accidental, 1; tetanus, 1; cachexia, 1; total, 19.

*Report of investigation of suspicious cases of sickness on the Isthmus of Tehuantepec.*

Consul Canada at Vera Cruz forwards the following, under date of April 20:

Dr. Narciso del Rio, delegate to the superior board of health of the City of Mexico, was ordered to visit the town of Chinameca for the purpose of studying a disease reported to have appeared at that place December, 1902, and March, 1903. Chinameca is a point near the line of the National Railroad of Tehuantepec, some 35 miles from Coatzacoalcos.

The governor of the State of Vera Cruz had already ordered Dr. Martinez, county physician of Minatitlan, to Chinameca for the pur-

pose of cooperating with Dr. Del Rio, and Dr. Martinez having been enabled to study the matter several days previous to the arrival of Dr. Del Rio, states as his opinion that no reason existed for supposing the reported suspicious disease to have been other than that of a clearly defined malarial nature, resulting fatally only because of lack of proper medical treatment.

The cases referred to were those of two women of the same family, attacked December 24, 1902, with symptoms of a fever, intermittent in its character until the following January. From that time on the fever was continuous until February 4, when one of the women died, the other dying also the day following. The symptoms in both cases were strikingly similar, in the opinion of the local authorities, to the disease as described in the circular of instructions issued by the board of health on account of the plague at Mazatlan, which circulars had only just reached Chinameca.

Another case under the observation of Dr. Martinez was that of a man 53 years of age. The person was taken sick at almost the same time as the cases previously referred to, being attended by Dr. Montalvo, of Coatzacoalcos, from the onset; and as, in the opinion of Dr. Montalvo, there was nothing at all suspicious about the case, he did not inform the board, although he was a delegate to that body. The case was diagnosed by Dr. Martinez as common malaria. He prescribed the necessary treatment, resulting in convalescence of the patient four days afterwards.

Drs. del Rio and Martinez, in company with the mayor, alderman, and judge of the town of Chinameca, visited every house that was said to contain a sick person, the visits resulting in the finding of a girl of 12 with remittent fever of five days' duration and 2 other cases, one of them already mentioned, the other one of enteritis, but improving. Altogether there were 3 persons sick in the town. The records at the office of the civil registry, which has jurisdiction over several other small places in the vicinity, show only 4 deaths for the month during which the first-mentioned cases died. One was a year-old infant, having died of asthma or bronchitis, and another that of a woman 96 years of age, said to have died of fever, but in all probability of general debility; only 4 deaths in a population of 3,000—a very low death rate, considering that the vicinity of the Isthmus is the hotbed of malarial fevers.

The fact of finding members of the same family fatally attacked with the same disease, however, strengthens the opinion heretofore held of the transmission of disease by infected mosquitoes. Chinameca is an unfrequented spot, having very little contact with outsiders and none at all with Mazatlan, a point far removed from here; and as the plague does not spring up spontaneously in a place hitherto free from it, the whole country would have to become infected first before it could reach Chinameca. This ought to dispose of the plague theory. The disease in question was only ordinary tropical fever, so common in this region.

#### PHILIPPINE ISLANDS.

#### *Reports from Manila—Plague and smallpox—Cholera—Quarantine transactions.*

During the week ended March 28, 1903, 6 cases of plague, all fatal, occurred in Manila. During the same period 4 new cases of smallpox with 1 death, were reported.

Assistant Surgeon Heiser, chief quarantine officer for the Philippine Islands, reports, April 13 and 14, as follows: During the week ended April 4, 1903, 6 cases of plague, with 6 deaths, occurred in Manila. During the same period there were reported 7 new cases of smallpox, with 1 death.

Cholera report, Manila: Week ended March 28, 1903. One case, 1 death. Nationality, Filipino.

## PORTO RICO.

*Report from San Juan—Vital statistics—Varioloid.*

Assistant Surgeon King, chief quarantine officer for Porto Rico, reports, May 6, as follows:

*Vital statistics, city of San Juan, P. R., for April, 1903.*

Whooping cough.....	1	Emphysema.....	1
Malarial fever.....	1	Gastro-enteritis.....	8
Septicæmia.....	1	Entero-colitis.....	8
Tetanus.....	4	Ulceration of stomach.....	1
Tubercle of lungs.....	11	Cirrhosis of liver.....	1
Tubercle of intestines.....	1	Jaundice.....	1
Burned.....	1	Nephritis, acute.....	3
Cancer.....	2	Bright's disease.....	3
Rickets.....	6	Fracture of base of skull.....	1
Anæmia.....	4	Death by accident (cause not given).....	1
Meningitis.....	4	Total.....	81
Inflammation of brain.....	3		
Paralysis, progressive.....	1	APRIL, 1903.	
Laryngismus stridulus.....	1	Births.....	75
Heart disease.....	2	Deaths.....	81
Bronchitis:		APRIL, 1902.	
Chronic.....	1	Births.....	81
Capillary.....	4	Deaths.....	81
Pneumonia.....	3		
Broncho-pneumonia.....	2		

A few sporadic cases of varioloid are reported in San Juan, but the disease is of such an exceedingly mild type, and the cases so few in number, that the outbreak is not to be considered of importance from a quarantine standpoint.

The mortality reports from the subports are as follows: Mayaguez, 83; Arecibo, 86; Humacao, 33; Aguadilla, 40; Fajardo, 28; Arroyo, 7.

*Report from Ponce.*

Assistant Surgeon Goldberger reports, April 27, through the chief quarantine officer, as follows: For the week ended April 17, 26 deaths and 48 births were recorded by the board of health. Sanitary conditions unchanged.

*Inspection of immigrants at San Juan, Ponce, and subports.**Report of alien steerage passengers arriving at San Juan during the week ended May 2, 1903.*

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Apr. 27	Martin Saenz (Spanish) .....	Genoa, Barcelona, Palma de Mallorca, Valencia, Alicante, Malaga, Cadiz, Tenerife, and Las Palmas.	2
27	Montserrat (Spanish) .....	Genoa, Barcelona, Malaga, Cadiz, Las Palmas, Tenerife, Santa Cruz de la Palma.	55
28	Maria Herrera (Cuban) .....	Habana, Nuevitas, Porto Padre, Gibara, Porto Plata.	6
	Total .....		63

*Report of alien steerage passengers arriving at Ponce during the week ended April 25, 1903.*

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Apr 20	Montevideo, Spanish.....	Habana, Port Limon, Colon, Sabanilla, Curacao, Porto Cabello, La Guayra.	5

*Report of alien steerage passengers arriving at Ponce during the week ended May 2, 1903.*

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Apr. 30	Martin Saenz, Spanish.....	Spain ports, Canary Islands, San Juan, and Mayaguez.	1

*Report of alien steerage passengers arriving at the six subports of Porto Rico during the week ended May 2, 1903.*

MAYAGUEZ.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
Apr. 29	Martin Saenz (Spanish).....	Genoa, Barcelona, Palma de Malloca, Valencia, Alicante, Malaga, Cadiz, Tenerife, and Las Palmas.	3

Arecibo, Humacao, Aguadilla, Arroyo, and Fajardo, no transactions.

RUSSIA.

*Anthrax among skin handlers at Libau—No new cases.*

Consul Bornholdt at Riga reports, April 21, that no new cases of anthrax had been reported from Libau, and that the cases reported April 11 were recovering. Of the 15 workmen employed in the warehouse in which the outbreak occurred 3 were attacked by the disease. The remaining 12 have been thoroughly disinfected and are now isolated in the town hospital under strict observation.

VENEZUELA.

*Report from La Guaira—Danger of transmission of smallpox from Trinidad to Porto Rico.*

Consul Goldschmidt reports, April 24, as follows: There are reported to be 1,200 cases of smallpox at Trinidad, which are mostly not isolated. The port authorities here do not quarantine vessels or passengers arriving from there. That there is danger of the disease being brought here is evident, and further danger of its introduction into Porto Rico by passengers who may arrive from Trinidad and sail under short stay to Porto Rican ports.

The danger to American ports is less owing to the distance and time required for trips, when the disease would probably show itself.

*Foreign and insular statistical reports of countries and cities—Yearly and monthly.*

**AUSTRALIA—Queensland—Brisbane.**—Month of January, 1903. Estimated population, 119,428. Total number of deaths, 111, including diphtheria 1, enteric fever 2, and 1 from whooping cough.

*Province of New South Wales.*—Year 1902. Estimated population, 1,134,207. Total number of deaths, 16,661, including diphtheria 74, enteric fever 276, measles 107, scarlet fever 61, whooping cough, 261, smallpox 1, plague 40, and 1,329 from tuberculosis.

**BRITISH GUIANA—Demerara—Georgetown.**—Month of March, 1903. Estimated population, 36,567. Total number of deaths 213, including 31 from tuberculosis.

**CHILE—Antofagasta.**—Month of March, 1903. Estimated population, 8,000. Total number of deaths 41, including smallpox 2, and 2 from tuberculosis.

**GERMANY—Strassburg.**—Month of February, 1903. Estimated population, 4,818. Total number of deaths, 284, including diphtheria 1, enteric fever 1, measles 3, whooping cough 12, and 46 from phthisis pulmonalis.

**FRANCE—St. Etienne.**—Two weeks ended April 15, 1903. Estimated population, 146,671. Total number of deaths, 109, including diphtheria 1, enteric fever 3, and 13 from tuberculosis.

**JAPAN—Nagasaki.**—Ten days ended April 10, 1903. Estimated population, 131,700. Total number of deaths not reported. Two deaths from enteric fever reported.

**JAVA—Batavia.**—Two weeks ended April 4, 1903. Estimated population, 150,000. Number of deaths not reported. No contagious diseases.

**SPAIN—Corunna.**—Month of April, 1903. Estimated population, 50,000. Total number of deaths, 109; including diphtheria 1, enteric fever 1, measles 4, and 23 from tuberculosis.

**SWITZERLAND.**—Reports for the two weeks ended April 18, 1903, from 18 cities and towns show a total of 593 deaths, including diphtheria 4, enteric fever 1, measles 14, scarlet fever 1, smallpox 1, and 95 from phthisis pulmonalis.

**WEST INDIES—St. Thomas.**—Month of April, 1903. Estimated population, 11,012. Total number of deaths 26. No contagious diseases. Three months ended March 31, 1903. Total number of deaths 277, including measles 1, and 9 from tuberculosis.

*Cholera, yellow fever, plague, and smallpox, December 27, 1902, to May 22, 1903.*

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from June 28, 1902, to December 26, 1902, see PUBLIC HEALTH REPORTS for December 26, 1902.]
