Vessels from Mexican ports to be fumigated and held at Pensacola and Carrabelle, Fla.

[Telegrams.]

KEY WEST, FLA., July 7, 1903.

WYMAN, Washington:

In view of marked increase yellow fever Tampico and Merida, 100 cases with 61 deaths, have instructed White, at Pensacola, and Stewart, at Carrabelle, to fumigate all vessels from Mexican ports and hold five days from completion of fumigation. Request your approval of these instructions.

PORTER.

WASHINGTON, July 8, 1903.

Dr. J. Y. PORTER, Tampa, Fla.:

* * * Your instructions to White, at Pensacola, and Stewart, at Carrabelle, mentioned in telegram July 7, approved. * * *

WYMAN.

Inspection service, Mexican border.

El Paso, Tex.—Acting Assistant Surgeon Alexander reports, July 4, 1903, as follows:

Week ended July 4, 1903.

Inspection Mexican Central passengers	150
Rio Grande and Pacific passengers	17
Mexican immigrants	64
(special) of certificate of death of body transported into the United States	—
Disinfection soiled linen imported for laundry	414

Laredo, Tex.—Acting Assistant Surgeon Hamilton reports, July 6, as follows:

Week ended July 6: Number of passenger trains entering from Mexico inspected, 14; persons on trains entering from Mexico inspected, 553; immigrants inspected, 23; immigrants vaccinated upon entry, 5; 1 person (male), two days out from Tampico, detained; 4 trunks disinfected.

Statistical reports of States and cities of the United States—Yearly and monthly.

FLORIDA—*Tampa*.—Month of June, 1903. Estimated population, 20,000. Total number of deaths, 20, including enteric fever 2, and 4 from tuberculosis.

GEORGIA—*Augusta*.—Month of June, 1903. Estimated population, 42,441. Total number of deaths, 68, including enteric fever 2, and 6 from tuberculosis.

Columbus.—Month of June, 1903. Estimated population, 19,303—white, 10,276; colored, 9,027. Total number of deaths, 38—white, 17; colored, 21—including enteric fever 1, whooping cough 5, and 7 from phthisis pulmonalis.

ILLINOIS—*Springfield*.—Month of June, 1903. Estimated population, 40,000. Total number of deaths, 25, including diphtheria 1, enteric fever 1, scarlet fever 1, whooping cough 1, and 6 from phthisis pulmonalis.

IOWA—*Ottumwa*.—Month of June, 1903. Estimated population, 22,000. Total number of deaths, 17, including 4 from tuberculosis.

KANSAS—*Wichita*.—Two weeks ended May 31, 1903. Estimated population, 31,549. Total number of deaths, 23, including 1 from measles.

Month of June, 1903. Total number of deaths, 47, including measles 1, and 4 from tuberculosis.

MASSACHUSETTS—*Newton*.—Month of June, 1903. Estimated population, 37,794. Total number of deaths, 30, including 1 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended July 4, 1903, from 72 observers, indicate that intermittent fever, pleuritis, remittent fever, and cholera morbus were more prevalent, and scarlet fever, pneumonia, enteric fever, inflammation of bowels, and cholera infantum were less prevalent than in the preceding week. Meningitis was reported present at 2, whooping cough at 23, enteric fever at 26, diphtheria at 29, measles at 42, smallpox at 44, scarlet fever at 55, and phthisis pulmonalis at 200 places.

MISSOURI—St. Louis.—Month of May, 1903. Estimated population, 645,000; white, 605,000, colored, 40,000. Total number of deaths—1,010; white, 885; colored, 125, including diphtheria 16, enteric fever 15, measles 49, scarlet fever 9, whooping cough 6, and 128 from tuberculosis.

NEW HAMPSHIRE—Concord.—Month of June, 1903. Estimated population, 20,000. Total number of deaths, 23, including measles 1 and 3 from tuberculosis.

Franklin.—Month of June, 1903. Estimated population, 6,000. Total number of deaths, 9. No deaths from contagious diseases.

NEW YORK.—Reports to the State board of health, Albany, for the month of May, 1903, from 156 cities, towns, and villages having an aggregate population of 7,910,000, show a total of 10,770 deaths, including diphtheria 275, enteric fever 99, measles 108, scarlet fever 127, whooping cough 85, smallpox 3, and 1,139 from tuberculosis.

The Monthly Bulletin says:

The May mortality has decreased from April to a death rate of 16.1 from 16.8, with a daily average saving of 18 deaths. The saving has been in all diseases of the respiratory organs, including consumption, in deaths reported from old age and enfeebled conditions. Pneumonia caused 1,084 deaths, a daily average of 35 deaths against 40 in the first three months of the year. Consumption is a little below the average for the month. Bright's disease caused 509 deaths, and the mortality from diseases of the urinary organs is rather excessive. Grippe probably caused 1,000 deaths, or 200 less than in April. Smallpox caused 3 deaths, all occurring in Rochester, but no new cases have been reported from there since May 25. Recently reported cases have been from towns in Delaware and Chautauqua counties; from St. Regis Falls and Malone, Franklin County; 1 in Freeport, Long Island; 1 at Cohoes and at Mechanicsville; at Friendship, Allegany County, 1, who escaped from quarantine in Pennsylvania; at Windsor, Broome County, 1; and at Elmira and Dansville cases originating from a recently detected outbreak in towns in Livingston County which has secured considerable headway.

Saratoga.—Month of June, 1903. Estimated population, 12,119. Total number of deaths, 21, including 4 from tuberculosis.

NORTH CAROLINA.—Reports to the State board of health for the month of May, 1903, from 22 towns having an aggregate population of 122,650—white 71,650, colored 51,000—show a total of 239 deaths—white 108, colored 131—including enteric fever 5, measles 1, whooping cough 7, and 32 from phthisis pulmonalis.

Charlotte.—Month of June, 1903. Estimated population, 30,000. Total number of deaths, 30, including 3 from tuberculosis.

PENNSYLVANIA—*Columbia*.—Month of June, 1903. Estimated population, 13,500. Total number of deaths, 16. No deaths from contagious diseases.

VIRGINIA—*Richmond*.—Month of June, 1903. Estimated population, 100,000; white, 62,250, colored, 37,750. Total number of deaths, 186—white 83, colored 103—including diphtheria 7, enteric fever 3, measles 3, whooping cough 12, and 20 from tuberculosis.

FOREIGN AND INSULAR.

AUSTRALIA.

Plague in Queensland.

Consul-General Barton, at Melbourne, forwards the following under date of June 10 and 11, 1903:

BUBONIC PLAGUE.

Bulletin for the week ended 12 o'clock noon, Saturday, May 16, 1903.

One case occurred in Brisbane during the above-mentioned period, namely, to-day a schoolgirl 12 years of age, attending a school in the city.

BRISBANE.

Admitted to hospital during the week	1
Died during the week	0
Discharged	1
Remaining under treatment.....	7
Total cases to date.....	18
Total deaths	8

Contacts have been kept under supervision, and no case has arisen among them.

RATS.

Number of rats examined at the bacteriological institute during the week	202
Number found to be infected.....	4

Twenty-one mice were also examined and were found to be free from plague infection.

Bulletin for the week ended 12 o'clock noon, Saturday, May 23, 1903.

No case occurred in Brisbane during the above-mentioned period, but the death from plague of a man—a carter—was reported from Bundaberg on the 20th instant. This case only came under the notice of the health officer on the 18th idem.

The contacts are being kept under observation. There are no further developments.

BRISBANE.

Admitted to hospital during the week	Nil
Died during week	Nil
Discharged	1
Remaining under treatment.....	6
Total cases to date.....	18
Total deaths	8

Contacts have been kept under supervision, and no case has arisen among them.

RATS.

Number of rats examined at the bacteriological institute during the week 289
 Number found to be infected..... Nil

Thirty-one mice were also examined and were found to be free from plague infection.

Bulletin for the week ended 12 o'clock noon, Saturday, May 30, 1903.

On the 23d instant a Chinaman, a fruiterer in the city, died at the Brisbane General Hospital shortly after admission into that institution. This case was regarded as suspicious of plague, which was confirmed by post-mortem examination.

The three contacts are being kept under supervision. There are no further developments.

BRISBANE.

Admitted to general hospital during the week.....	1
Died during week	1
Discharged during week from plague hospital	1
Remaining under treatment, plague hospital	5
Total deaths	9
Total cases to date:	
Brisbane.....	19
Bundaberg.....	1
Townsville.....	3
Rockhampton.....	2

Date of last case at Bundaberg (died), May 20, 1903; at Rockhampton (died), February 21, 1903; at Townsville (discharged), December 24, 1902.

Contacts have been kept under supervision, and no case has arisen among them.

RATS.

Number of rats examined at the bacteriological institute during the week 150
 Number found to be infected..... 4

Eighteen mice were also examined and were found to be free from infection.

B. BURNETT HAM, M. D.,
Commissioner of Public Health.

Interim report of the president of the central board of health on further case of plague at Freemantle.

A further case of plague has occurred in Essex street, Freemantle, next door to flour mill, on opposite side of which a case occurred exactly twelve months ago. The mill has not been used for some time, and there are no visible signs of rats. The vicinity is fairly clean and is not in exactly what was recently recognized as the infected area.

All the dwellings (4) opening into the common yard at the back have been closed and will be cleansed and disinfected.

All contacts were removed to Woodmans Point. The patient is progressing satisfactorily. The last case of plague occurred on the 26th of February last.

Plague-infected rats in Sydney.

In accordance with a communication from the honorable the federal premier, dated October 29, 1902, I have the honor by direction to request that the commonwealth government may be informed that during the past week plague-infected rats have been discovered on three different premises in this city, and to suggest that the signatories to the Venice Convention may be notified to that effect. Telegraphic communications on the subject have been addressed to the State boards of health and to New Zealand.

C. H. KING,
Secretary, Department of Public Health.

BRAZIL.

Report from Rio de Janeiro—Monthly bulletin of sanitary statistics, May, 1903.

The following is received from the consulate at Rio de Janeiro: In May health conditions in Rio de Janeiro were normal. Compared with the previous month the total of deaths fell from 1,222 to 1,203. The same is true with regard to yellow fever, the mortality from which showed a considerable reduction, so that it may be considered that the last epidemic paroxysm, which began last November, is now almost extinct. As to the other contagious diseases, the changes in the sanitary situation were less satisfactory, as will be seen from the following comparison: Yellow fever, 24 in May as against 99 in April; bubonic plague, 5 as against 3; smallpox, 14 as against 6; measles, 3 as against 2; whooping cough, 1 as against 2; diphtheria, 2 as against 5; grippe, 44 as against 15; enteric fever, 7 as against 12; dysentery, 4 and 4; beriberi, 13 as against 12; leprosy, 1 as against 2; malarial fevers, 53 as against 57; tuberculosis, 212 as against 203.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended June 28, 1903. Present officially estimated population, 8,500; 6 deaths; prevailing diseases, mild type of malarial fever and intestinal diseases; general sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
June 25	Ss. David	19	0	0	0
26	Ss. Breakwater	34	1	15	1
27	Ss. Musician	68	0	0	0

CANADA.

Inspection of immigrants at Quebec.

Assistant Surgeon Billings reports, July 3 and 7, as follows:

Week ended June 27, 1903. Number of immigrants inspected, 462; passed, 451; detained, 11.

Week ended July 4, 1903. Number of immigrants inspected, 310; passed, 297; detained, 13.

CHILE.

Spread of plague.

The following was received from the Department of State July 13: A serious state of affairs in Chile, in consequence of the rapid progress of bubonic plague in nearly all the seaport towns, is reported to the State Department in a cablegram received this morning from United States Minister Wilson at Santiago de Chile. Mr. Wilson says that the plague, which it was at first thought was confined merely to a few places, is now spreading to nearly all ports. The alarm in Chile is so great that the postal service is disorganized and Mr. Wilson adds that only one American mail has been received in Santiago in nine weeks.

COLOMBIA.

Report from Bocas del Toro, fruit port—Smallpox—Vaccination.

Acting Assistant Surgeon Osterhout reports as follows: Week ended June 30, 1903. Present officially estimated population not obtainable; number of cases of smallpox during the week, 8; 1 death; number of deaths from other causes, 2; prevailing diseases, malarial affections and smallpox. The latter is epidemic, and a few cases exist at the various subports in the lagoons. Vigorous and systematic work is being done to stamp out the disease. General sanitary condition of this port and the surrounding country during the week, not good.

Bills of health were issued to the following-named vessels:

Yellow fever on steamship Vigilancia at Habana from Progreso.

[Telegrams.]

HABANA, July 13, 1903.

WYMAN, Washington:

Passenger who landed here from Ward Line steamer *Vigilancia*, from Progreso on July 7, developed fever on following day in his home; was transferred to hospital and case declared officially yellow fever by commission. To-day patient was passed at quarantine here, he having a certificate as immune issued by medical officer of Cuba at Progreso. Vessel will arrive at New York on morning of 14th. Please notify Doty.

EICHEMENDIA.

WASHINGTON, July 13, 1903.

Quarantine Officer DOTY,
Quarantine, Staten Island, N. Y.:

Steamer *Vigilancia*, now en route to New York, landed a passenger at Habana from Progreso who has since developed yellow fever.

By direction Surgeon-General:

GLENNAN, *Assistant Surgeon-General.*

Report from Matanzas—Mortality statistics.

Passed Assistant Surgeon von Ezdorf reports, July 6, as follows: During the week ended July 4, 1903, 8 vessels bound for ports in the United States received bills of health. Eighteen deaths were reported in this city.

The chief causes of death reported were as follows: Malarial fever, 1; tuberculosis, 2; cancer, 2; meningitis, 1; myelitis, 1; heart disease, 2; broncho-pneumonia, 2; enteritis, 2; other causes, 5. Annual rate of mortality for the week, 19.50 per 1,000. Estimated population, 48,000.

No quarantinable disease was reported in this district.

Report from Santiago—Mortality statistics.

Acting Assistant Surgeon Wilson reports, June 30, as follows: Week ended June 27, 1903. Bills of health issued to five vessels bound for the United States and Porto Rico.

Mortality statistics for the week ended June 27, 1903.

Cause of death.	Number.
Pernicious fever	4
Remittent fever	3
Tubercle of lungs	3
Cancer of the mouth	1
Cancer of the rectum and of the vagina	1
Cancer of the pancreas	1
Alcoholism, acute	1
Meningitis	1
Cerebral hemorrhage	1
Organic heart disease	4
Atheroma	1
Diarrhea and enteritis (under 2 years)	8
Diarrhea and enteritis (chronic)	3
Chronic nephritis	1
Ill-defined or unspecified	2
Total	35

Annual rate of mortality for the week, 42.62 per 1,000; estimated population, 43,000.

No quarantinable disease has been reported.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

Consul-General Mason reports, June 27, as follows:

Plague.

Egypt.—Between the 6th and 13th of June there were registered in the whole of Egypt 17 cases of plague (with 7 deaths), namely: In Alexandria 4 cases (2 deaths); in Port Said 1 case (1 death); in the district of Tuhk (Province Galioubieh) 8 cases (2 deaths); in the district of Samaluti (Province Minieh) 2 cases (2 deaths), and in Beni Mazar 2 cases.

British India.—During the week ended May 23 there were registered in the Bombay Presidency 1,155 cases of plague (and 930 deaths), of which 307 cases (280 deaths) occurred in the city of Bombay, 136 cases (124 deaths) in the town and port of Karachi, and 164 cases (95 deaths) in the port of Veraval.

Japan.—On the 14th of May 2 deaths from plague were registered in Yokohama.

Mauritius.—During the period from the 3d of April to the 7th of May there were registered on the island 4 cases of plague (with 3 deaths).

Queensland.—During the week ended May 9 two fresh cases of plague occurred in Brisbane.

Plague and cholera.

British India.—In Calcutta during the week ended May 16 there were registered 74 deaths from cholera and 74 deaths from plague.

Death rate of Berlin.

The death rate of Berlin for the week ended June 13 was lower than it has been since the beginning of August, last year, amounting, calculated on the year, to 12.8 per thousand of the population (against 16.6 in the foregoing week), and being considerably lower than for the corresponding week of last year, in which it amounted to 14.5. Of the German large towns only the following showed more favorable figures than Berlin, namely: Dortmund, Charlottenburg (with 10.2), and Schöneberg (with 9.7 per thousand). The death rate of the following towns was considerably higher than that of Berlin, viz, Dresden, Leipzig, Hanover, Hamburg, Frankfort-on-the-Main, Munich, Braunschweig, Carlsruhe, Stuttgart, Nuremberg, Cologne, Breslau, Danzig, as well as Paris and Vienna, while the death rate of London was a little lower than that of Berlin. The decrease in the number of deaths was distributed fairly equally among children in the first year of life and the higher age classes. The infant mortality rate fell from 5.0 to 3.1 per thousand per year since the first week of June, being less than one-third of that of Stettin, Danzig, and Kiel and about half that of Munich. There was a slight decrease with acute intestinal diseases, which caused 52 deaths. Acute diseases of the respiratory organs claimed 33 victims. Furthermore, there were registered 89 deaths from phthisis pulmonalis, 29 deaths from cancer, 10 deaths from scarlet fever, 5 deaths from measles, and 6 deaths from typhoid, while 13 persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended June 29, 1903. Present officially estimated population, 3,500; five deaths; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
June 23	David.....	20
23	Breakwater.....	34	2	3

Steamship *Breakwater* cleared from Puerto Barrios.

HAWAII.

Quarantine transactions at Honolulu and Hilo.

Passed Assistant Surgeon Cofer, chief quarantine officer for Hawaii, reports, June 30, as follows:

Honolulu.—Week ended June 20, 1903. Number of vessels inspected, 10; crew inspected, 133; cabin passengers inspected, 38; pieces crews' baggage disinfected, 92; vessels disinfected, 3.

Week ended June 27, 1903. Number of vessels inspected, 5; disinfected, 2; number of crew inspected, 107; cabin passengers inspected,

80; steerage passengers inspected, 130; pieces crews' baggage disinfected, 32; pieces steerage passengers' baggage inspected, 146; hides disinfected, 179; pelts disinfected, 7.

Hilo.—Week ended June 13, 1903. No transactions.

Week ended June 20. Number of vessels disinfected, 2; cabin passengers inspected and passed, 13; crew inspected and passed, 26; pieces of baggage disinfected, 47.

A death from plague at Honolulu.

[Cablegram.]

HONOLULU, HAWAII (via San Francisco, Cal.),
July 13, 1903.

WYMAN, Washington.

There was a death from plague July 3.

COFER.

HONDURAS.

Reports from Ceiba, fruit port.

Acting Assistant Surgeon Robertson reports as follows: Week ended June 27, 1903. Present officially estimated population, about 4,000; no deaths. Prevailing diseases, malarial; few cases, of mild type. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
June 23	Habil.....	15	0	0	0
23	Origen	24	0	0	0
26	Geo. Dumois.....	18	0	0	0

Week ended July 6, 1903. No deaths. Prevailing diseases, malarial fever, few cases and of mild type. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 1	Fulton.....	15	0	0	0
1	Lauenburg	35	0	0	0

ITALY.

Report from Naples—Inspection of vessels—Plague in Mauritius.

Passed Assistant Surgeon Eager reports, June 22, as follows:

Inspection service at Naples and Palermo, week ended June 20, 1903.

NAPLES.

Date.	Name of vessel.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage passed.	Pieces of baggage disinfected.	Number of steerage passengers recommended for rejection.
June 17	Sardegna	New York	857	100	1,175	31
17	Germania	do	500	110	785	11

Plague in Mauritius.

A telegram from the governor of Mauritius states that for the week ended June 11, 1903, there were two fatal cases of bubonic plague on the island.

JAMAICA.

Port Antonio quarantines against Philadelphia on account of smallpox.

The commercial agent at Port Antonio reports, July 6, as follows: Ships arriving from Philadelphia are now detained by quarantine on account of smallpox.

Quarantine discontinued.

[Telegram.]

PORT ANTONIO, *July 13, 1903.*

SECRETARY OF STATE, *Washington:*

Quarantine discontinued; clean bill of health from Philadelphia.

AMERICAN CONSUL.

JAPAN.

Report from Yokohama—Plague in Formosa, Nagasaki, and Yokohama—Plague case on steamship Kaga Maru.

Assistant Surgeon Moore reports, June 19, as follows: During the week ended June 13, 1903, 3 vessels, having a total personnel of 333 crew and 642 passengers, were inspected; 179 steerage passengers were bathed, and 310 pieces of baggage were disinfected.

The official report of contagious diseases in Yokohama for the above period includes 1 case of plague and 1 death from the same disease.

Reliable information, not official, indicates that since June 13 there have occurred 3 new cases of plague in Yokohama, 2 of which terminated fatally. The latter 2 cases were of persons residing in a section of the city quite remote from the other infected districts.

The Japanese steamship *Kaga Maru* arrived at this port on June 15 from Seattle with a suspicious case of illness on board, in the person of a Japanese boy, a member of the crew. A diagnosis of real plague has since been made by the authorities, the vessel has been remanded to Nagahama quarantine station, and it is understood that the personnel will be detained ten days after disinfection.

The Deutsche Japan-Post (Yokohama newspaper) states, in its issue of June 13, that there were 449 plague cases, with 349 deaths, in Formosa during the first four months of the present year, as against 846 cases and 622 deaths in corresponding period of 1902, and 1,205 cases and 864 deaths in same months of 1901. A plague death occurred in Nagasaki May 27.

MEXICO.

Report from Progreso—Inspection of vessels—Mortality—Yellow fever.

Acting Assistant Surgeon Harrison reports, July 5:

During the week ended July 5, 1903, bills of health were issued to the following-named vessels:

Norwegian steamship *Tjomo*, to New York: Passengers, 3 (good); crew, 18 (good). Wharf.

American steamship *Esperanza*, to New York via Habana: Crew, 93. Passengers, to Progreso, 58; from Progreso to New York, first class, 10; second class, 4; intermediate, 2; total, 16. From Progreso to Habana, first class, 7; second class, 5; intermediate, 20; total, 32; in transit from Vera Cruz, 22. All well.

British steamship *Barrister*: Crew, 40 (one man with malarial fever). Tampico to New York. Water.

American schooner *Magnolia*, to Ship Island: Crew, 6 (good). Wharf.

Norwegian steamship *Alm*, to Mobile: Crew, 22. Doctor, 1. Family, 1. Wharf. Passengers, first class, 3; second class, 6. All well, except cabin boy (American) with malarial fever.

Second sanitary report, two weeks ended July 5, 1903.

Week ended June 28, 1903: Tuberculosis, 1; puerperal eclampsia, 1; pneumonia, 1; gastro-enteritis, 3; dysentery, 1; malarial disease, 1; rheumatism, 1; total, 9.

Week ended July 5, 1903: Debility, 1; enteritis, 3; anæmia, 2; malarial disease, 1; meningitis, 1; pernicious fever, 2; enteritis (malarial), 1; athrepsia, 1; dentition, 1; total, 13.

One yellow fever, already reported, within last two weeks; another case last week. Population, 5,000.

Report from Tampico—Inspection of vessels—Yellow fever.

Temporary Acting Assistant Surgeon Lippincott reports, July 6, as follows:

Week ended July 4, 1903.

Inspected and passed: Steamships, 6; schooners, 1; personnel of crews, 279; passengers, 7. Disinfected and passed: Steamships, 3.

During the week there were 28 new cases of yellow fever, making, with 40 from the previous week, a total of 68 cases.

There were from all causes 48 deaths, of which 31 were from yellow fever, 3 from whooping cough, 1 from pernicious fever, 3 from tuberculosis, and 10 from noncontagious causes.

The situation is apparently unchanged. The authorities are taking measures to suppress the advance of the infection by isolating all cases and excluding mosquitoes by means of wire screens. All cisterns have been ordered closed and crude oil is freely used on water remaining in streets. The surrounding country is at present free from the infection.

Report from Vera Cruz—Mortality statistics—Yellow fever in Vera Cruz and Orizaba.

Assistant Surgeon Goldberger reports, July 6, as follows:

During the week ended July 4, 1903, there was recorded in this city a total of 56 deaths (91 per 1,000), of which 10 were due to yellow fever, 12 to tuberculosis, 4 to pernicious fever, and 1 to remittent fever.

There were officially reported during the thirty days of June 110 cases of yellow fever, with 36 deaths. For the corresponding month of last year there were reported 112 cases and 39 deaths.

I learn that during the last three weeks there were some 12 cases of yellow fever in Orizaba, of which only one is believed to have originated there, the others being importations from this city.

Orizaba is about 130 kilometers west of Vera Cruz and about 1,200 meters above sea level. At the last census (1900) it was credited with a population of 32,866. It is in daily railroad communication with Vera Cruz and is a favorite stopping place for tourists. Because of its elevation it has a very agreeable climate and has until recently been considered as noninfectible territory. It has been visited, however, by at least two epidemics, the first in 1900 and the second in 1902, for which it is quite likely railroad traffic must be held responsible.

NICARAGUA.

Report from Bluefields, fruit port.

Acting Assistant Surgeon Goodman reports as follows: Week ended June 27, 1903. Present officially estimated population, 4,000; number of deaths, 2; prevailing disease, malarial fever; general sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
June 24	Nicaragua	17	0	0	0
26	Geo. W. Kelley	18	0	0	0

PORTO RICO.

Report from San Juan—Inspection of immigrants.

Passed Assistant Surgeon Lumsden, acting chief quarantine officer for Porto Rico, reports July 6 as follows:

Report of alien passengers arriving at San Juan during the week ended July 4, 1903.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
June 28	Cuban steamship Maria Herrera	Habana, Nuevitas, Puerto Padre, Gibara, Santiago, and Puerto Plata.	7
28	Spanish steamship Buenos Aires	Genoa, Barcelona, Malaga, Cadiz, Las Palmas, Tenerife, Santa Cruz de la Palma.	43
July 1	American steamship Philadelphia.....	La Guayra, Puerto Cabello, Curaçao.	1
4	French steamship Olinde Rodriguez ...	Havre, Bordeaux, St. Thomas.....	2
	Total	53

Inspection of immigrants at Ponce.

Acting Assistant Surgeon Torres reports, July 5, 1903, through the acting chief quarantine officer for Porto Rico, as follows:

Report of alien passengers arriving at Ponce during the week ended July 4, 1903.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
July 4	St. Domingue	Fort de France, Pointe à Pitre, Basse Terre, St. Thomas.	5

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—*Sierra Leone*.—Three weeks ended June 5, 1903. Estimated population, 40,000. Total number of deaths 53. No contagious diseases reported.

ARGENTINA—*Buenos Ayres*.—Month of April, 1903. Estimated population, 880,000. Total number of deaths 962, including diphtheria 14, enteric fever 20, measles 2, scarlet fever 5, smallpox 5, and 152 from tuberculosis.

BRAZIL—*Pernambuco*.—Two weeks ended May 15, 1903. Estimated population, 200,000. Total number of deaths, 218, including smallpox 6, and 28 from phthisis pulmonalis.

Two weeks ended May 31, 1903. Total number of deaths, 213, including smallpox 5, and 35 from phthisis pulmonalis.

CANADA—*Hamilton*.—Month of June, 1903. Estimated population, 54,500. Total number of deaths, 54, including diphtheria 2, scarlet fever 1, and 5 from tuberculosis.

Winnipeg.—Month of June, 1903. Estimated population, 60,000. Total number of deaths not reported. Nine deaths from diphtheria, 10 from scarlet fever, and 1 death from tuberculosis reported.

CHILE—Antofagasta.—Month of May, 1903. Estimated population, 8,000. Total number of deaths, 37, including smallpox 3 and 3 from tuberculosis.

FRANCE—Rouen.—Month of May, 1903. Estimated population, 116,316. Total number of deaths, 285, including diphtheria 4, enteric fever 2, measles 27, scarlet fever 4, whooping cough 1, smallpox 3, and 50 from tuberculosis.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended June 13, 1903, correspond to an annual rate of 13.9 per 1,000 of the aggregate population, which is estimated at 15,075,011.

London.—One thousand and ninety-five deaths were registered during the week, including measles 38, scarlet fever 11, diphtheria 12, whooping cough 23, diarrhea 25, and enteric fever 1. The deaths from all causes correspond to an annual rate of 13.8 per 1,000. In Greater London 1,503 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 2 from measles, 1 from scarlet fever, 9 from whooping cough, and 1 from smallpox.

Ireland.—The average annual death rate represented by the deaths registered during the week ended June 13, 1903, in the 21 principal town districts of Ireland was 20.1 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Newry, viz, 0.0, and the highest in Kilkenny, viz, 44.2 per 1,000. In Dublin and suburbs 172 deaths were registered, including enteric fever 2, scarlet fever 1, whooping cough 5, smallpox 1, and 33 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended June 13, 1903, correspond to an annual rate of 17.5 per 1,000 of the population, which is estimated at 1,702,912. The lowest mortality was recorded in Dundee, viz, 13.7, and the highest in Greenock, viz, 26.3 per 1,000. The aggregate number of deaths registered from all causes was 574, including diphtheria 1, measles 3, scarlet fever 3, and 20 from whooping cough.

JAPAN—Nagasaki.—Ten days ended June 10, 1903. Estimated population, 131,700. Number of deaths not reported. Three deaths from enteric fever reported.

JAVA—Batavia.—Weeks ended May 9 and 23, respectively. Estimated population, 150,000. Total number of deaths not reported. No contagious diseases.

PORTO RICO.—Month of April, 1903. Estimated population, 953,243. Total number of deaths, 1,984, including diphtheria 2, enteric fever 11, and 136 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, June 27, 1902, to July 17, 1903.

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from December 27, 1902, to June 26, 1903, see PUBLIC HEALTH REPORTS for June 26, 1903.]
