PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

Correction.

In the article by Dr. Juan Guiteras entitled "Prophyloxis against yellow fever," published in Public Health Reports No. 31, July 31, 1903, on page 1211, fifth line from the bottom, "important" should read "imported."

Summary of work in Chinatown, San Francisco, for week ended August 15, 1903.

The following is received from Passed Assistant Surgeon Blue, at San Francisco, under date of August 17, being record of work in Chinatown for week ended August 15, 1903:

Buildings reinspected, Chinatown	186
Rooms inspected	1, 475
Buildings inspected, Latin Quarter	152
Persons inspected (Chinese, 1,649; white, 997)	2,646
Sick inspected (Chinese, 24; white, 5)	29
Sick seen and prescribed for at Oriental Dispensary	. 10
Dead examined	5
Provisional diagnosis of plague	1
Necropsy	1
Rats examined bacteriologically	43
Number showing pest infection	1
Places limed and disinfected	683
Times streets swept	3
Sewers flushed	23
Notices to abate plumbing nuisances	8
Plumbing nuisances abated	10
Total number plumbing inspections	40

Trypanosomes found in the blood of rats examined for plague at San Francisco, Cal.

The following is received from Assistant Surgeon Lloyd, under date of August 8, through Passed Assistant Surgeon Blue: I have the honor to report the presence of trypanosomes in the blood of 5 rats examined in this laboratory during the past week.

1371

August 21, 1908 1372

Report on rats from city wharf and Chinese, Japanese, and Latin quarters examined during the week ended August 8, 1903.

The following is received, under date of August 10, from Assistant Surgeon Currie, through Passed Assistant Surgeon Blue: Number of rats caught alive, 138; number found dead, 4; number showing lesions of phosphorus poisoning, 0; number showing pest infection, 0.

Disinfection on training ship Alert at Angel Island, Cal., on account of measles at station.

Passed Assistant Surgeon Cummings reports, August 6, as follows: At the request of the commanding officer U. S. training ship Alert, 124 apprentices detailed for that ship were bathed and their effects disinfected. This was requested because cases of measles had appeared at the training station from which the boys were received and the vessel was about to proceed to sea.

Conditions at Del Rio, Tex.—Laborers imported from Mexico.

The following is received from Acting Assistant Surgeon Hume at Eagle Pass, under date of August 5: On the 31st ultimo I went to Spofford, Tex. (about 35 miles from here), in order to see what class of people were being taken to Del Rio, Tex. At Del Rio a large corporation is putting in an irrigation plant and converting that whole country (some 90,000 acres of land) into a farming district. Laborers are being imported from all over this country and Mexico. I understand that some two hundred Mexicans have been brought in from Mexico, besides numerous negroes and "Cagians" from Louisiana. I know nothing of how the large camps of laborers are run; whether they are kept in a sanitary condition. Should smallpox be introduced into Del Rio now its ravages would be terrible. There is at present no immigrant inspector or medical examiner at Del Rio, and Mexicans can enter there at will, with practically no fear of molestation.

Inspection service, Mexican border.

El Paso, Tex.—Acting Assistant Surgeon Alexander reports, August 8, 1903, as follows:

Week ended August 8, 1903. Inspection Mexican Central passengers, 242; inspection Rio Grande and Pacific passengers, 22; inspection Mexican immigrants, 83; inspection (special) 4 passengers three days out from San Luis Potosi, Mexico; inspection (special) 2 passengers seven days out from Tampico, Mexico; disinfection soiled linen imported for laundry, 516 pieces; disinfection of baggage of 4

1373 August 21, 1908

passengers from San Luis Potosi, Mexico; disinfection of baggage of 2 passengers from Tampico, Mexico.

Laredo, Tex.—Acting Assistant Surgeon Hamilton reports, August 10, 1903, as follows:

Week ended August 8, 1903. Number of trains entering from Mexico inspected, 13; persons on trains from Mexico inspected, 542; immigrants inspected, 116; immigrants certified for deportation, 6; immigrants vaccinated upon entry, 12; persons from San Luis Potosi detained until completed necessary time from infected port, 37; persons from Cordoba detained necessary period, 3; from Orizaba, 1; from Tampico, 1; trunks disinfected, 14.

Statistical reports of States and cities of the United States—Yearly and monthly.

California—Los Angeles.—Month of July, 1903. Estimated population, 135,000. Total number of deaths, 203, including diphtheria 5, enteric fever 1, measles 2, whooping cough 2, and 41 from tuberculosis.

Sacramento.—Month of July, 1903. Estimated population, 30,000. Total number of deaths, 25, including diphtheria 1, whooping cough 2, and 2 from phthisis pulmonalis.

Stockton.—Month of July, 1903. Census population, 17,506. Total number of deaths, 13, including enteric fever 1, whooping cough 1, and 4 from tuberculosis.

FLORIDA—Tampa.—Month of July, 1903. Estimated population, 20,000. Total number of deaths, 15, including enteric fever 2, and 2 from tuberculosis.

Indiana.—The regular monthly bulletin of the State board of health says the health for July throughout the State is shown by the reports to be slightly better than in the preceding month. It was also better as compared with the corresponding month last year. As was to be expected, diseases of the digestive tract appeared at the head of the column as most prevalent. There was a very great decrease in smallpox as compared with the preceding month and with the corresponding month last year. The order of prevalence of diseases was as follows: Diarrhea, cholera morbus, rheumatism, cholera infantum, enteric fever, dysentery, tonsilitis, intermittent fever, bronchitis, scarlet fever, inflammation of bowels, measles, whooping cough, pleuritis, pneumonia, diphtheria and croup, erysipelas, influenza, puerperal fever, cerebro-spinal meningitis.

There were 104 cases of smallpox, with 4 deaths, reported in 21 counties. In the corresponding month last year there were 502 cases reported, with 15 deaths, in 46 counties. The deaths from tuberculosis numbered 360, 147 males and 213 females. The total number of

August 21, 1903 1374

deaths from all causes for the month was 2,765, an annual rate of 12.0. The rate in the corresponding month last year was 13.6. By certain ages the deaths were: Under 1, 541 or 20.7 per cent of the total; from 1 to 5, 214; 5 to 10, 55; 10 to 15, 75; 65 and over, 679—a rate of 26 per cent of the total. By comparison with the same month last year we find the destruction of children under 1 year of age was greater. The percentage for June, 1902, was 19.6 per cent of the total deaths. Some important causes of deaths were as follows: Pulmonary tuberculosis, 315; other forms of tuberculosis, 47; enteric fever, 63; diphtheria, 13; scarlet fever, 12; measles, 6; whooping cough, 14; pneumonia, 77; diarrheal diseases, 313; influenza, 11; cancer, 108; violence. 102; smallpox, 4. The city death rate was 16.7 and the country death rate 10.9. Indianapolis had a death rate of 21, and Evansville, the second largest city, 18.5; Fort Wayne, 15.4; South Bend, 18; Terre Haute, 17. The last three cities have a population ranging from 25,000 to 50,000.

Iowa—Davenport.—Month of June, 1903. Estimated population, 40,000. Total number of deaths, 39, including measles 2, scarlet fever 1, and 6 from tuberculosis.

Month of July, 1903. Total number of deaths, 40, including enteric fever 1, and 4 from tuberculosis.

Louisiana—New Orleans.—Month of July, 1903. Estimated population, 310,000—white, 227,000; colored, 83,000. Total number of deaths, 539—white, 348; colored, 191—including diphtheria 1, enteric fever 16, scarlet fever 1, whooping cough 4, and 82 from tuberculosis.

MASSACHUSETTS—Brockton.—Month of July, 1903. Estimated population, 44,873. Total number of deaths, 48, including whooping cough 1, and 5 from phthisis pulmonalis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended August 8, 1903, from 85 observers, indicate that influenza. cholera infantum, inflammation of bowels, pleuritis, smallpox, diphtheria, and meningitis were more prevalent, and phthisis pulmonalis, intermittent fever, remittent fever, and pneumonia were less prevalent than in the preceding week.

Meningitis was reported present at 2, whooping cough at 22, diphtheria at 23, measles at 26, smallpox at 38, scarlet fever at 47, enteric fever at 56, and phthisis pulmonalis at 211 places.

NEW YORK—Buffalo.—Month of July, 1903. Estimated population, 380,000. Total number of deaths, 513, including diphtheria 7, enteric fever 10, measles 6, scarlet fever 4, whooping cough 7, and 36 from tuberculosis.

Oнio—Cincinnati.—Month of June, 1903. Estimated population, 336,000. Total number of deaths, 478, including diphtheria 7, enteric fever 6, scarlet fever 7, smallpox 4, and 66 from tuberculosis.

1375 August 21, 1908

Columbus.—Month of March, 1903. Estimated population, 150,000. Total number of deaths, 162, including enteric fever 3, measles 2, scarlet fever 8, whooping cough 1, and 24 from tuberculosis.

Month of April, 1903. Total number of deaths, 133, including enteric fever 2, measles 1, scarlet fever 1, smallpox 8, and 15 from tuberculosis.

East Liverpool.—Month of July, 1903. Estimated population, 20,000. Total number of deaths, 11, including enteric fever 1 and 2 from tuberculosis.

PENNSYLVANIA—Altoona.—Month of July, 1903. Census population, 38,973. Total number of deaths, 69, including enteric fever 1, whooping cough 1, and 1 from tuberculosis.

Pottsville.—Month of July, 1903. Estimated population, 15,710. Total number of deaths, 29. No deaths from contagious diseases reported.

Tennessee—Knoxville.—Month of July, 1903. Estimated population, 40,000—white, 30,000; colored, 10,000. Total number of deaths, 38—white, 26; colored, 12—including enteric fever 3, whooping cough 1, and 6 from tuberculosis.

U_{TAH}—Ogden.—Month of July, 1903. Estimated population, 25,000. Total number of deaths, 16. No deaths from contagious diseases reported.

VIRGINIA—*Richmond.*—Month of July, 1903. Estimated population, 100,000—white, 62,250; colored, 37,750. Total number of deaths, 178—white, 71; colored, 107—including diphtheria 10, enteric fever 6, whooping cough 8, and 14 from phthisis pulmonalis.

Washington—Seattle.—Month of July, 1903. Estimated population, 125,000. Total number of deaths, 86, including diphtheria 1, enteric fever 2, scarlet fever 4, smallpox 1, and 10 from tuberculosis.

Tacoma.—Month of July, 1903. Estimated population, 55,000. Total number of deaths, 34, including 5 from phthisis pulmonalis.

West Virginia— Wheeling.—Three months ended March 31, 1903. Estimated population, 41,437. Total number of deaths, 219, including diphtheria 3, enteric fever 24, measles 1, and 24 from tuberculosis.

Three months ended June 30, 1903. Total number of deaths, 176, including diphtheria 4, enteric fever 17, smallpox 7, and 13 from tuberculosis.

FOREIGN AND INSULAR.

BRAZIL.

Report from Bahia—Mortuary statistics.

Consul Furniss reports, July 20, as follows: During the week ended

July 18, 1903, 84 bodies were interred in the Bahia cemeteries.

The causes given for interment were as follows: Alcoholism 1. arterio sclerosis 5, asphyxia 1, beriberi 5, bronchitis 1, cancer 1, cerebral congestion 1, cirrhosis of liver 2, aortic dilatation 2, erysipelas 1, organic diseases of heart 4, Bright's disease 2, stillborn 6, nephritis 3, pneumonia 1, syncope 1, tetanus neonatorum 2, pulmonary tuberculosis 7, diarrhea and enteritis 12, senile debility 4, malarial fevers 9, other causes 13.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended August 2, 1903. Present officially estimated population, 8,500; number of deaths, 6; prevailing disease, mild type of malarial fever; general sanitary condition of this port and the surrounding country during the week, fairly good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	1 737320
July 30 30 31	Richard A. Bingham Banan Anselm	18	0 0 9	0 0 18	. 0 0 18

CANADA.

Inspection of immigrants at Quebec.

Assistant Surgeon Billings reports, August 12, as follows: Week ended August 8, 1903. Number of immigrants inspected, 234; passed, 226; detained, 8.

CHINA.

$Reports\ from\ Hongkong-Plague\ and\ smallpox.$

Passed Assistant Surgeon McMullen reports, July 3, as follows: During the week ended June 27, 1903, 11 vessels, 766 crew and 356 passengers—151 cabin and 205 steerage—were inspected; 569 crew

1393 August 21, 1908

and 198 steerage passengers were bathed and 749 pieces of baggage disinfected. Fifty-four cases of plague (3 Europeans, 2 Indians, 12 Portuguese, 1 Japanese, 1 Parsee, and 35 Chinese), with 35 deaths, were reported during the week. No other communicable diseases were reported. From January 1 to June 27, inclusive, 1,276 cases of plague

have been reported.

During the week ended July 4, 1903, 12 vessels, 1,095 crew and 648 passengers (203 cabin and 445 steerage) were inspected; 810 crew and 437 steerage passengers were bathed and 1,221 pieces baggage disinfected. There were 44 rejections from all causes. Only 25 cases of plague (Chinese), with 18 deaths, were reported and no other communicable disease was reported. Up to date (from January 1) 1,316 cases of plague have been reported, with 1,154 deaths.

Report from Shanghai-Smallpox.

Acting Assistant Surgeon Ransom reports, July 14, as follows: During the week ended July 11, 1903, there were inspected 2 vessels, 82 crew and 37 cabin passengers.

The communicable diseases reported during the week were: Smallpox, 1 case, 1 death; diphtheria, 3 deaths. The total mortality was 2 foreigners and 150 natives.

COLOMBIA.

Report from Bocas del Toro, fruit port—Smallpox epidemic decreasing—Vaccination.

Acting Assistant Surgeon Osterhout reports as follows: Week ended August 4, 1903. Present officially estimated population not obtainable. One death from smallpox; number of deaths from other causes, 3; prevailing diseases, smallpox and malarial affections. General sanitary condition of this port and the surrounding country during the week, not good. Smallpox has materially decreased; no new cases during past week. The disease still exists at several of the subports in the lagoons. Vaccination is still being carried out. Three cases under treatment in the isolation hospital.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disin- fected.
July 29 29 29 Aug. 1	Bodo Fort Gaines. Beverly Harald	18 23 39 19	. 0	0 0 0 0	0 0 0

COSTA RICA.

Report from Limon, fruit port—Yellow fever.

Acting Assistant Surgeon Gruver reports as follows: Week ended August 6, 1903. Census population, 4,000; number of cases of yellow fever, 3—deaths, 2; number of deaths from other causes, 4; prevailing diseases, yellow fever and bilious remittent fever. The latter dis-

ease seems very rapidly fatal. I have not seen a case here and the only knowledge I have of its existence is the official mortality report in which I recognize the names of some who were seen on the streets a few days before. General sanitary condition of this port and the surrounding country during the week, very poor.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disin- fected.

Malarial fever and probable convalescent yellow fever on steamship Nord, from Tampico.

[Cablegram.]

HABANA, August 15, 1903.

WYMAN, Washington:

Steamer Nord arrived July 30 from Tampico and sailed same day for Galveston. Returned August 13. Two crew discharged and sent to hospital. One has malarial fever and commission considers other probably convalescent yellow fever. The plasmodium malariæ not found. Albumen present. Vessel disinfected and sailed Galveston yesterday.

TROTTER.

Note.—This information was repeated to the State health officer of Texas.

Report from Matanzas.

Passed Assistant Surgeon von Ezdorf reports, August 11, as follows: During the week ended August 8, 1903, six bills of health were issued to vessels prior to sailing for ports in the United States. No quarantinable disease was reported.

GERMANY.

Report from Berlin-Plague and cholera in various countries.

Consul-General Mason reports, August 1, as follows:

Plague.

Egypt.—During the period from the 11th to the 18th of July there were registered in the whole of Egypt 27 cases of plague, with 9 deaths.

British India.—In the Bombay Presidency there were registered during the week ended July 4 1,773 cases of plague and 1,179 deaths.

Hongkong.—During the week ended June 13 there were registered

120 cases of plague, with 78 deaths.

South Africa.—In Cape Colony there were registered during the week ended June 27 5 cases of plague.

Plague and cholera.

British India.—In Calcutta during the period from the 14th to the 20th of June 31 persons died of plague and 34 persons died of cholera.

Cholera.

Turkey.—According to Bulletin No. 18, of the 20th of July, regarding cholera in Syria, there have occurred 234 new cases of cholera, with 121 deaths.

Death rate of Berlin.

The death rate of Berlin for the week ended July 18 was higher than it has been since the end of May. It amounted, calculated on the year, to 15.7 per thousand, as compared with 14.5 in the foregoing week, and was considerably higher than the rate for the corresponding week of last year, in which it was only 12.8 per thousand. In spite of this rise, however, two-thirds of the large German cities had more unfavorable figures than Berlin, the rate recorded in the following towns being considerably higher than that of this city, namely, Stuttgart, Munich, Nurnberg, Dusseldorf, Hamburg, Hanover, Cassel, Leipzig, Halle, Breslau, Brunswick, Cologne, Dortmund, Stettin, as well as Paris and Vienna. The following towns, on the other hand, showed a more favorable rate than Berlin, viz, Kiel, Bremen, Charlottenburg (with 15), and Schöneberg with the minimum rate of all the large cities, viz, The increase in the number of deaths was principally among 10.1. children in the first year of life. The mortality rate among infants was 5.3 per year and mille, only one-fifth of that of Stettin and considerably lower than the rate of Munich, Hamburg, and Leipzig. There was no important change in the number of deaths from acute

August 21, 1908 1396

diseases of the respiratory organs, which claimed, during this week, 34 victims. Acute intestinal diseases caused 112 deaths, a considerable increase as compared with the foregoing week. There were further registered 4 deaths from scarlet fever, 4 deaths from diphtheria, and 9 deaths from measles. Nineteen persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended August 3, 1903. Present officially estimated population, 3,500; number of deaths, 2; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good. Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.		Number of passengers in transit.	naggage

JAPAN.

Report from Yokohama—No new cases of plague in Yokohama— Plague death in Shidzuoka Ken.

Assistant Surgeon Moore reports, July 17, as follows: During the week ended July 11, 1903, five vessels, having a total personnel of 327 crew and 404 passengers, were inspected.

Official returns show that no new case of plague was reported in Yokohama during the two weeks ended July 11. What seemed to be a very threatening outbreak of plague has, thanks to the stringent and wise measures enforced, been suppressed for the time.

A death from plague occurred in Shidzuoka Ken on the 11th instant.

The patient had recently resided in Yokohama.

MEXICO.

No yellow fever in Monterey.

[Telegram.]

Monterey, Mexico, August 13, 1903.

SECRETARY OF STATE, Washington:

* There are no symptoms of yellow fever in Monterey. No quarantine against this city.

HANNA, Consul-General.

Report from Progreso-Inspection of vessels-Mortality and sanitary conditions in Progress and Merida.

Acting Assistant Surgeon Harrison reports, August 8, as follows: During the week ended August 9, 1903, bills of health were issued as follows:

August 2: Steamship Vigilancia, American, Vera Cruz to New York, via Habana; water, well out. Passengers, to Progreso, 64; Progreso to New York, 11; Progreso to Habana, 35; transit, 35; crew, all told, 76. All well except the third officer, suffering some intestinal trouble; slight; at his work; no fever.

August 4: Steamship Tjomo, Norwegian, to New York; water and

wharf; crew, 18; passengers, 2; good. August 5: Steamship *Telefon*, Norwegian, to Mobile; wharf; crew, 24; good.

August 7: Steamship Chancellor, British, to New Orleans; water;

crew, 68; good.

August 8: Steamship Alm, Norwegian, to Mobile; water; crew, all, 24; passenger, 1; good.

Sanitary conditions.

Merida.—July 30, August 1, 2, 3, 4, included: Deaths, 33. Causes, mitral insufficiency, cerebral congestion, tobacco poisoning, enterocolitis, stillborn, bronchitis capillary, tuberculosis, alcoholic, malaria, double pneumonia, meningitis, croup, enteric fever (2), pelagra (2). Population, 50,000 to $60,0\overline{0}0$.

Progreso.—About 8,000 population. Yellow fever (official record): No case reported within ten days, and no case of the disease in Pro-

greso the past week. Total mortality not reported.

1399 August 21, 1903

Report from Tampico-Inspection of vessels-Yellow fever.

Temporary Acting Assistant Surgeon Lippincott reports, August 4, as follows:

Week ended August 1, 1903.

Bills of health issued	3
Vessels inspected and passed	3
Personnel of crew	116
Passengers	ī

There were 41 deaths from all causes, of which 20 were from yellow fever, 2 from tuberculosis, and 19 from noncontagious causes; 57 new cases of yellow fever officially reported and 25 left over from last week, making a total of 82 cases.

The conditions are evidently unchanged, although there has been a noted change in mortality. For the previous week in 74 cases there was a mortality of 40 or 54 per cent, while for this week, of 82 cases there were 20 deaths or a mortality of 24.3 per cent.

The shipping has remained free from infection.

Yellow fever imported to San Luis Potosi—Danger of importation from Tampico to Texas frontier.

Week ended August 8, 1903.

Bills of health issued	4
Vessels inspected and passed	3
Vessels inspected and disinfected	1
Personnel of crew	
Passengers	
Baggage (pieces)	9

During the week there were 39 cases of yellow fever officially reported which, with 34 remaining from the previous week, make a total of 73 cases for the week ended August 8, 1903.

There were 38 deaths from all causes, of which 14 were from yellow fever, 2 from smallpox, 1 from cachexia palustre, 3 from tuberculo-

sis, and 18 from noncontagious causes.

I have been informed that 3 deaths from yellow fever have occurred at San Luis Potosi. Of these, 2 were from Tampico, the other was of a physician who was commissioned to investigate the yellow fever at Ciudad Valles. San Luis Potosi being a city situated about 230 miles from Tampico, at an altitude of 6,000 feet above the sea level, a dry climate with few, if any, mosquitoes, a spread of the infection is not to be anticipated there.

The danger at Eagle Pass and Laredo is from persons leaving Tampico for San Luis Potosi or Monterey, securing tickets there with the idea of deceiving the quarantine authorities. The railroads via San Luis Potosi require about 50 hours to these points, and via Monterey about 36 hours. It will be seen that a person infected on leaving Tampico could arrive at either point before the development of the fever.

The shipping has been free from infection to the present time.

Reports from Vera Cruz-Mortality statistics—Yellow fever—Yellow fever in July, 1902 and 1903.

Assistant Surgeon Goldberger reports, August 3, as follows:

During the week ended August 1, 1903, there was recorded in this city a total of 42 deaths, of which 3 were from yellow fever, 9 from malarial fevers, and 6 from tuberculosis.

During the month of July there were recorded 154 cases and 49 deaths from yellow fever, while for the corresponding month of last year

there were only 62 cases and 38 deaths recorded.

Nothing of special sanitary interest has occurred since the date of

my last report.

During the week ended August 8 there was recorded in this city a total of 62 deaths, of which 26 were due to vellow fever, 3 to malarial fevers, and 6 to tuberculosis.

The sanitary condition of the city and vicinity has not improved.

Plague at Bagio.

[Telegrams.]

Mexico, August 17, 1903.

WYMAN, President International Commission

of American Republics, Washington:

I have to inform you that in Bagio, 40 kilometers from Mazatlan, three cases bubonic plague have appeared. Have taken measures to prevent propagation.

LICEAGA.

Plague at Sequeros.

NOGALES, ARIZ., August 18, 1903.

WYMAN, Washington:

Governor of Sonora, Mexico, received official telegram announcing 3 new cases plague at Sequeros, near Mazatlan.

1401 August 21, 1903

PHILIPPINE ISLANDS.

Reports from Manila—Plague and smallpox.

Assistant Surgeon Heiser, chief quarantine officer for the Philippine Islands, reports, June 25 and July 11, as follows:

During the week ended June 20, 1903, 7 cases of plague, with 6 deaths, were reported in Manila, and 4 new cases of smallpox, none resulting fatally.

Week ended June 27, 1903, 1 case of smallpox, not resulting fatally;

6 cases of plague, with 6 deaths.

Week ended July 4, 1903, 1 new case of smallpox, not fatal; 6 fatal cases of plague.

Week ended July 11, 1903, 3 new cases of smallpox, none resulting fatally; 1 fatal case of plague. .

Cholera situation in Manila steadily improving—Danger of contamination of water supply.

The cholera situation in Manila continues to show a steady improve-During the week covered by the report, there were 8 cases and With one exception, the recent outbreak has been confined entirely to natives and Chinese. It can generally be shown that the persons affected have either directly or indirectly come in contact with the Pasig River. Much anxiety is felt about the cholera, which is still present on the watershed that supplies Manila with its drinking water. There has been an alarming increase in the number of cases. During the week ended July 4, 1903, there were 57 cases and 35 deaths, which is an increase of 48 cases and 28 deaths over the period covered by my last report. It is generally felt that the delay in the onset of the rainy season has been of great assistance in preventing the stream which drains the watershed from becoming infected. It is thought that the drinking water supplied by the city mains was not infected during the epidemic in Manila last year, therefore should this supply now become infected, the widespread dissemination of the disease can be well imagined.

During the week a case of cholera occurred on the U.S. Army

transport Dix, and she is now undergoing disinfection.

Cholera at Cebu increasing—Apparently extinct at Iloilo.

The cholera continues to grow worse at Cebu. During the week ended June 27, 1903, there were 78 cases and 47 deaths. Assistant Surgeon Fox had four infected vessels to deal with during the same period.

At Iloilo the disease seems to have been stamped out, no cases having been reported during the past few weeks.

Cholera report at Manila.

Week ended June 27, 1903, 5 cases, 4 deaths. Nationality, Filipino. Week ended July 4, 1903, 8 cases, 7 deaths. Nationality, Filipino.

Report of cholera occurring in provincial towns in the Philippine Islands for the weeks ended June 27 and July 4, 1903.

Weekly report of the outgoing quarantine at Manila, P. I., on account of the prevalence of cholera and plague in Manila, weeks ended June 27 and July 4, 1903.

	Week ended—	
	June 27.	July 4.
Vessels remaining in quarantine from last week Vessels entering quarantine during the week Vessels discharged from quarantine Vessels sailing without quarantine inspected and passed Crew entering quarantine during the week Cabin passengers entering quarantine during the week Steerage passengers entering quarantine during the week Crew inspected during the week Passengers inspected during the week Persons bathed and effects disinfected Vessels disinfected during the week Vessels remanded to Mariveles quarantine station	0 3 0 0 0 259 364	0 2 2 20 102 0 190 822 383 682 21

Cholera in Cebu-Circular relative to quarantine restrictions.

Assistant Surgeon Fox reports, June 24, through the chief quarantine officer, as follows:

During the seven days past there have been 86 cases of cholera, occurring as follows:

June 18	20	June 21	10
June 19	8.	June 22	9
June 20	16	June 23	16

It is probable that there are more cases than this in the town which are never reported to the proper authorities. The cases have occurred in different parts of the city, showing that there are a number of centers of infection.

This number of cases would certainly justify some action on the part of the quarantine officer, and yet I do not believe it would be justifiable at present to impose an outgoing quarantine on steamers. Such a quarantine would work great hardship on the shipping; and, besides that, in a number of ports in the islands cholera exists, perhaps in some places only in a sporadic form, but even this proves that the port is infected.

Many of the coastwise vessels coming in to Cebu lie here only 24 hours, coming in one day and going out the next. The crews of these vessels have little time ashore, and while on board eat better food and drink the water furnished by the pilots, which is good.

On the other hand, the bancas, which are by far the most liable to carry infection, lie on the beach from one to two weeks, and the crew drink the water from the wells and eat improper food.

I have not learned that any case of cholera has developed on a steamer after leaving this port, but we have had this month 5 bancas infected with cholera, which have been on the beach here for varying lengths of time. The cholera in each case has undoubtedly had its origin in food or well water gotten in this city. I think it very likely that the disease has been taken here in this way, the cholera developing after the banca has put to sea.

The method we will pursue, keeping crews aboard vessels and detaining steerage passengers before embarkation, if done properly, will be entirely satisfactory. I inclose a circular letter sent to the different steamship companies and others interested.

Circular.

OFFICE U. S. QUARANTINE OFFICER, PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE, Cebu, P. I., June 26, 1903.

To Steamship Companies, Owners and Agents of Vessels, and Others:

On account of the prevalence of cholera in this port it has become necessary to impose certain restrictions on outgoing vessels, so that the exportation of cholera will be prevented.

In order that the shipping will be interfered with as little as possi-

ble, the following regulations have been promulgated:

- 1. Crews of vessels while in this port must remain aboard and will not be allowed to have any communication with the shore. The captain only will be permitted to leave the vessel to attend to necessary business.
- 2. Steerage passengers must remain in quarantine a sufficient length of time to make five days upon arriving at destination. If detention is not possible, they will not be allowed to embark.

3. The above paragraph also applies to members of the crew shipped

at this port.

4. Bills of health will be issued in the bay just before the departure of the vessel.

These regulations will go into effect on and after July 1, 1903, by direction of the chief quarantine officer of the Philippines.

Respectfully,

[SEAL.] CARROLL Fox,
Assistant Surgeon, Public Health and Marine-Hospital Service,
Quarantine Officer.

PORTO RICO.

Passed Assistant Surgeon Lumsden, acting chief quarantine officer for Porto Rico, reports, August 2, as follows:

Report of alien passengers arriving at San Juan during the week ended August 1, 1903.

Date of arrival.	Vessel.	Where from.	Number of immi- grants.
July 27	Spanish steamship Conde Wifredo	Barcelona, Palma, Mallorca, Valen- cia, Torrevieja, Malaga, Cadiz, Las Palmas.	6
28	Cuban steamship Maria Herrera	Habana, Nuevitas, Puerto Padre, Gibara, Baracoa, Santiago, Puerto Plata	4
28	Spanish steamship Manuel Calvo	Genoa, Marseille, Barcelona, Malaga, Cadiz, Palma, Las Palmas, Teneriffe.	31
30	American steamship Philadelphia	La Guaira, Puerto Cabello, Curação	2
	Total		43

Report of alien passengers arriving at Ponce and subports during the week ended Augus 1, 1903.

Date of arrival.	Vessel.	Where from.	Number of immi- grants.
July 30	Spanish steamship Conde Wifredo	Barcelona, Palma, Torrevieja, Valencia, Malaga, Cadiz, Las Palmas, San Juan, Mayaguez.	3

The French schooner Laura Belle, from Fort de France, arrived at Humacao July 31, with 2 immigrants.

Aguadilla, Arecibo, Arroyo, Fajardo, and Mayaguez, no transactions.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AUSTRALIA—New South Wales—Newcastle.—Month of June, 1903. Estimated population, 48,930. Total number of deaths, 42, including diphtheria 1, and 7 from tuberculosis.

Sydney.—Month of June, 1903. Estimated population, 508,510. Total number of deaths, 1,432, including diphtheria 7, enteric fever 3, scarlet fever 5, whooping cough 1, and 54 from tuberculosis.

Bahamas—Dunmore Town.—Two weeks ended July 31, 1903. Estimated population, 1,232. One death. No contagious diseases.

Governors Harbor.—Week ended August 1, 1903. Estimated population, 1,500. No deaths and no contagious diseases.

Nassau.—Two weeks ended August 3, 1903. Estimated population, 12,390. Number of deaths not reported. No contagious diseases reported.

Brazil—Ceara.—Month of June, 1903. Estimated population, 50,000. Total number of deaths, 62, including 4 from enteric fever.

Canada—British Columbia—Victoria.—Month of July, 1903, Estimated population, 21,000. Total number of deaths, 15, including 1 from tuberculosis.

Quebec—Sherbrooke.—Month of July, 1903. Estimated population, 12,000. Total number of deaths, 20, including 3 from diphtheria.

France—St. Etienne.—Two weeks ended July 15, 1903. Estimated population, 146,671. Total number of deaths, 119, including diphtheria 1, enteric fever 3, measles 3, scarlet fever 1, and 23 from tuberculosis.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended July 18, 1903, correspond to an annual rate of 13.5 per 1,000 of the aggregate population, which is estimated at 15,075,011.

London.—One thousand one hundred and forty-six deaths were registered during the week, including measles 28, scarlet fever 9, diphtheria 10, whooping cough 36, enteric fever 5, and diarrhea 46. The deaths from all causes correspond to an annual rate of 13 per 1,000. In Greater London 1,527 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 2 from measles, and 8 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 18, 1903, in the 21 principal town districts of Ireland was 16.1 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Ballymena and Tralee, viz, 0.0, and the highest in Galway, viz, 54.4 per 1,000. In Dublin and suburbs 124 deaths were registered, including diphtheria 1, scarlet fever 3, smallpox 1, whooping cough 1, and 38 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended July 18, 1903, correspond to an annual rate of 15.2 per 1,000 of the population, which is estimated at 1,702,912. The lowest mortality was recorded in Aberdeen, viz, 12.3, and the highest in Paisley, viz, 18.9 per 1,000. The aggregate number of deaths registered from all causes was 497, including diphtheria 4, measles 11, scarlet fever 2, and 15 from whooping cough.

Malta.—Two weeks ended June 27, 1903. Estimated population, 193,315. Total number of deaths, 244, including diphtheria 1, enteric fever 3, and 1 from whooping cough.

Three weeks ended July 18, 1903. Total number of deaths, 351, including enteric fever 4, measles 1, and 3 from whooping cough.

West Indies—St. Thomas.—Three months ended June 30, 1903. Estimated population, 11,012. Total number of deaths, 274, including 12 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, June 27, 1903, to August 21, 1903.

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from December 27, 1902, to June 26, 1903, see Public Health Reports for June 26, 1903.]
