PUBLIC HEALTH REPORTS.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Summary of work in Chinatown for the week ended October 24.

San Francisco, Cal., October 26, 1903.

WYMAN, Washington:

Following is record of work in Chinatown for week ended October 24:

Buildings reinspected	130
Rooms	1,030
Persons inspected	
Sick	34
Sick prescribed for at Oriental Dispensary	17
Dead examined	8
Necropsies	8
Provisional diagnosis of pest	3
Rats examined bacteriologically	11
Places limed and disinfected	750
Times streets swept	3
Sewers flushed	17
Notices to abate plumbing nuisances	30
Plumbing nuisances abated	9
Undergoing abatement	19
Total number of plumbing inspections	89

BLUE.

Plague death at San Francisco bacteriologically confirmed.

SAN FRANCISCO, CAL., October 22, 1903.

WYMAN, Washington:

Diagnosis bacteriologically confirmed in case 103.

BLUE.

Transactions on account of yellow fever at Laredo and San Antonio.

EL PASO.

EL Paso, Tex., October 22, 1903.

WYMAN, Washington:

Indications are the local authorities will impose no restrictions on passenger traffic coming here from San Antonio, Tex., on ground this uninfectable territory. The local board of health meets to-morrow to discuss question; otherwise nothing new here.

LUMSDEN.

EL PASO, Tex., October 23, 1903.

WYMAN, Washington:

At meeting this afternoon of local board of health and prominent citizens, resolutions adopted to invite people from San Antonio, Tex., to come here without restrictions. I consider this safe for El Paso,

October 30, 1908 1876

but there is some danger of refugees coming here and going to infectable territory before incubation period is completed. Will suggest this unofficially to the local board of health. Local board of health accepts mosquito as sole agent, and members are much pleased to learn decision of Pasteur Institute Commission.

LUMSDEN.

Washington, October 24, 1903.

LUMSDEN, El Paso, Tex.:

Telegram received. Have any measures been set on foot by local board for screening febrile cases?

WYMAN.

EL Paso, Tex., October 25, 1903.

WYMAN, Washington:

Vilas, president local board, informs me suspicious febrile cases occuring here will be thoroughly isolated and screened. No extraordinary precautions, as State is maintaining quarantine of San Antonio. Little travel from there here is anticipated, notwithstanding invitation referred to in my telegram of October 23.

LUMSDEN.

HOUSTON AND BEAUMONT.

Houston, Tex., October 22, 1903.

WYMAN, Washington:

Houston and Harris counties quarantined against San Antonio. Passenger traffic from that point suspended.

EBERSOLE.

Washington, October 24, 1903.

EBERSOLE, Rice Hotel, Houston, Tex.:

Desired no tickets be sold for Louisiana without assurance that passengers from western Texas have not been within last five days in any place infected with yellow fever. Believe this can be arranged through railroad and ticket agents. Wire feasibility. Same will be done at Beaumont.

WYMAN.

NEW ORLEANS, La., October 23, 1903.

WYMAN, Washington:

Will you not station officer at Houston and Beaumont to cooperate with Louisiana State Board of Health in seeing that passengers from western Texas swear that they have not been within the last five days in any place infected with yellow fever? * * * Can furnish two men if desired.

EDMOND SOUCHON.

Washington, October 24, 1903.

Dr. Edmond Souchon, New Orleans, La.:

Send name of physician and address for nomination for duty at Beaumont. Ebersole will do at Houston. I shall instruct that they

1877 October 30, 1903

operate at ticket offices or through ticket agents and demand satisfactory evidence of absence from yellow-fever district for five days and require affidavit. Richardson, San Antonio, wires to-day no tickets being sold to Texas or Louisiana points; trains pass through without stopping. Governor himself has quarantined entire State against San Antonio.

WYMAN.

Washington, October 26, 1903.

Dr. J. G. HENDERSON,

1100 Elysian Fields, New Orleans, La.:

Appointment as temporary acting assistant surgeon recommended. Proceed at once Beaumont; arrange with railroad and ticket agents so that no tickets be sold to points in Louisiana without their first being assured that passengers from western Texas have not been in the yellow-fever-infected places within five days. Wire departure and arrival, giving address in Beaumont.

Wyman.

Washington, October 26, 1903.

EBERSOLE, Rice Hotel, Houston, Tex.:

Cooperate with city and county health authorities, but any expenditures must be previously authorized.

WYMAN.

NEW ORLEANS, La., October 27, 1903.

WYMAN, Washington:

Leave to-night; agents Beaumont ordered to comply your telegram.
Henderson.

BEAUMONT, Tex., October 28, 1903.

WYMAN, Washington:

Arrived to-day. Address 910 Crockett street.

HENDERSON.

LAREDO AND MINERA.

Washington, October 22, 1903.

Guiteras, Laredo, Tex.:

For your encouragement I send extract from letter from Geddings from Paris received to-day: "Doctor Roux tells me Pasteur Institute Commission has absolutely settled upon the mosquito as the sole agent in the dissemination of yellow fever."

Wyman.

LAREDO, TEX., October 22, 1903.

WYMAN, Washington:

New cases, 6; old cases discovered, 6; total to-day, 12; deaths, 1; houses disinfected, 31, with 141 rooms; 195 containers and 5 excavations oiled; 40 premises sprinkled; 123 premises inspected, covering 25 city blocks; 24 barrels crude oil sprinkled on vacant lots and intervening streets, covering 38 city blocks; 23 faucets applied; maximum temperature, 85°; minimum, 55°; 1 new case and 1 death reported

from Minera; no report from New Laredo; Arguellas, governor of Tamaulipas, is now in New Laredo, directing efforts to stamp out epidemic; he called at this office; the visit was returned; your telegram stating that the Pasteur Institute has accepted the mosquito as the sole means of transmitting yellow fever received; it will have a good effect.

GUITERAS.

LAREDO, TEX., October 23, 1903.

WYMAN, Washington:

Seven new cases to-day, 5 old cases discovered, making a total of 12 cases reported; 3 deaths; 32 houses disinfected, with 126 rooms; 99 containers and 5 excavations oiled; 105 premises inspected; 43 sprinkled; 15 faucets put in water barrels; 30 barrels of crude oil sprinkled on premises, vacant lots, and intervening streets, covering 61 city blocks. Maximum temperature, 81°; minimum, 59°. Minera reports 2 new cases; no deaths. The one case at Connel died; no new cases. New Laredo reports 3 new cases and 2 deaths.

GUITERAS.

LAREDO, TEX., October 24, 1903.

WYMAN, Washington:

New cases 7, old cases 6, total reported to-day 13, deaths 1; 30 houses disinfected with 101 rooms; 180 containers and 3 excavations oiled; 100 premises inspected and 60 sprinkled; 23 faucets put in water barrels; 20 barrels of crude oil sprinkled on vacant lots and intervening streets covering 62 city blocks. Maximum temperature 76°, minimum 45°. No new cases at Minera nor Connel; New Laredo reports 2 cases and 1 death. Murray arrived.

GUITERAS.

LAREDO, TEX., October 25, 1903.

WYMAN, Washington:

New cases to-day 8, old cases 4, total reported to-day 12; 13 houses disinfected with 42 rooms; 95 containers and 3 excavations oiled; 62 premises inspected and 36 sprinkled; 29 barrels of crude oil sprinkled on vacant lots and intervening streets covering 34 city blocks; 16 faucets put in water barrels. Maximum temperature 78°, minimum 38°. New Laredo reports one new case and two deaths. No report from Minera or Connel.

GUITERAS.

LAREDO, TEX., October 26, 1903.

WYMAN, Washington:

Sunday and morning inspecting and visiting sick people. Garrett and McGregor progressing fairly well. Propose going to San Antonio Wednesday.

MURRAY.

Laredo, Tex., October 26, 1903.

WYMAN, Washington:

New cases 2, old cases discovered 6, making a total of 8 reported to-day. No deaths. Twenty-eight houses disinfected with 106 rooms. One hundred and eighteen containers and 9 excavations oiled. Fifty-

1879 October 30, 1903

one premises inspected and 97 sprinkled; 18 faucets put in water bar-The oiling of the entire city was completed to-day. During the progress of this work 3,425 water barrels were oiled. The work will be continued with the object of covering the city a second time. The disinfecting of empty houses and public buildings will now be Maximum temperature 80, minimum 48. New Laredo reports 2 new cases and no deaths. No new cases at Minera and Connel. The situation is very gratifying.

GUITERAS.

LAREIO, TEX., October 27, 1903.

WYMAN, Washington:

New cases 8, old cases discovered 15, making a total of 23 reported. Twelve houses disinfected, with 245 rooms. This includes the Hotel Hamilton. Two hundred and eighty-four containers, 56 excavations, and 94 premises oiled. One hundred and ninety-two premises inspected, 23 faucets put in barrels. Sixty-one barrels crude oil sprinkled on vacant lots and intervening streets, covering 70 city Maximum temperature 77, minimum, 47. No cases at Minera or Connel. Over six days have elapsed since the thorough disinfec tion of Minera by Goodman without new cases. The epidemic evidently stamped out. New Laredo reports 4 new cases and no deaths.

Laredo, Tex., October 28, 1903.

WYMAN, W ington:

New cases 6, old cases discovered 9, total reported to-day 15; Twenty-seven houses disinfected with 87 rooms. One hundred and twenty-seven containers and 51 excavations oiled. Sixtyseven premises sprinkled, 31 inspected. Fourteen faucets put in water barrels. Thirty-one barrels of crude oil sprinkled on vacant lots and intervening streets. Maximum temperature 81, minimum 57. Heavy rain last night covering large areas with water. Quarantine between the two Laredos raised to-day for immunes. No report from New Laredo or Minera. Connel continues free from the disease.

GUITERAS.

Disinfecting methods used in fighting yellow fever at Laredo.

LAREDO, Tex., October 23, 1903.

SIR: As directed in Bureau letter of October 17, I have the honor to make the following brief report upon the character and application of the disinfecting material, etc., used in screening houses in the sup-

pression of the present epidemic of yellow fever:
The term "disinfecting material" includes everything utilized in the prevention of the spread of yellow fever, based upon a complete acceptance of the fact that the mosquito is the only means of transmitting the disease. It therefore includes disinfecting material, as usually understood, such as sulphur, pyrethrum, etc., and also lumber for screening purposes, mosquito and wire netting, oil, wooden

The methods instituted are as follows: There are three screening and five disinfecting crews. When a suspicious or positive case of October 30, 1908 1880

yellow fever is reported, a screening crew is at once sent to the house, with a cart containing the necessary material, and the patient is immediately screened—the carpenters putting in ready-made screen doors or windows, or, when these are not available, making them on the spot. Where screening is impossible or impracticable, the patient is placed under a mosquito bar. The disinfecting crew follows immediately after the screening crew and disinfects that part of the house not occupied by the patient. On the conclusion of this disinfection the patient, if able to be moved, is transferred to one of the disinfected rooms and his room disinfected.

All water containers in a house are covered with oil, and faucets

inserted in the barrels of drinking water.

Sulphur and pyrethrum are used in disinfection, the former where there is no danger of injury to the contents of the room, the latter where such injury may be apprehended. Where pyrethrum is used care is taken to sweep the room, so as to collect all the mosquitoes that may have been simply stunned by the fumes of the powder. In the disinfection large quantities of paper strips are used in order to make the rooms air-tight. In some of the houses it is necessary to paper almost the entire building.

Respectfully submitted.

G. M. GUITERAS.

The Surgeon-General.

SAN ANTONIO.

Washington, October 22, 1903.

MURRAY, San Antonio, Tex.:

I quote from letter from Assistant Surgeon-General Geddings received to-day from Paris: "Doctor Roux tells me Pasteur Institute Commission has absolutely settled upon the mosquito as a sole agent in the dissemination of yellow fever." Use this as you see fit.

WYMAN.

(Similar message sent to Assistant Surgeon Lumsden, El Paso, and Assistant Surgeon Ebersole, Houston, Tex.)

San Antonio, Tex., October 22, 1903.

WYMAN, Washington:

Your telegram 22d received; published to-morrow. Have seen five, four positive, one pneumonia. State quarantine proclaimed by Tabor in accedence to Texas counties and New Orleans for mails and freights. Boards are in earnest as to mosquito and prompt reports of cases. People left here will have to camp unless towns will admit them.

Murray.

SAN ANTONIO, TEX., October 23, 1903.

WYMAN, Washington:

One case in city, 1 in Fort Sam Houston; inspected all day with 9 doctors. Evidently some cases are not mentioned for fear of offending patrons. Large mass meeting this forenoon proffering aid, moral cause; in fact, to local boards it was a soul-stirring and confidence-inspiring affair. Murray must go to Laredo to treat Doctor Garrett and Doctor McGregor.

MURRAY.

1881 October 30, 1903

San Antonio, Tex., October 23, 1903.

WYMAN, Washington:

Arrived San Antonio, address Hotel Menger.

RICHARDSON.

SAN ANTONIO, TEX., October 24, 1903.

WYMAN, Washington:

Governor's proclamation of yesterday quarantines entire State against San Antonio. To date have been 9 cases reported with 3 deaths. There are undoubtedly unreported and unrecognized cases. One case at Fort Sam Houston declared yesterday. Local board has divided city into 31 sanitary districts and proposes to make daily house-to-house inspections, screening all febrile cases found. Disinfection mail, freight, and baggage leaving here required by governor's proclamation. No tickets being sold to Texas or Louisiana points. Trains pass through without stopping. Stegomyia apparently not plentiful. Much local interest in mosquito extermination. Weather quite cool.

RICHARDSON.

Washington, October 24, 1903.

RICHARDSON, Hotel Menger, San Antonio, Tex.:

Telegraph daily and send maximum daily and minimum night temperature.

WYMAN.

SAN ANTONIO, TEX., October 24, 1903.

WYMAN, Washington:

One case, 1 death reported to-day; minimum temperature last night, 46° ; maximum yesterday, 74° . Cooler possibly. Frost predicted to-day.

RICHARDSON.

SAN ANTONIO, TEX., October 25, 1903.

WYMAN, Washington:

One case, no death official report to-day. Temperatures last twenty-four hours, 76° maximum, 40° minimum. House-to-house inspection not yet in general operation. No frost last night.

RICHARDSON.

San Antonio, Tex., October 26, 1903.

WYMAN, Washington:

By request Doctor Tabor, I accompany him to Cuero, Tex., to-day to see suspected cases. Will return here to-night.

RICHARDSON.

SAN ANTONIO, TEX., October 26, 1903.

WYMAN, Washington:

One case, same reported yesterday; no death. Official report to-day temperatures last twenty-four hours, 44° and 76°. Colder predicted to-night.

RICHARDSON.

October 30, 1908 1882

SAN ANTONIO, TEX., October 26, 1903.

WYMAN, Washington, D. C.:

Returned from Cuero. Saw with Doctor Tabor 2 cases yellow fever in Dewitt County, on ranch 11 miles north of Cuero. Held necropsy on third case at same house. Finding typical. Several stegomyies seen in house. Infection probably through mild case from Laredo. Do not fear spread; 2 miles to nearest house.

RICHARSON.

San Antonio, Tex., October 27, 1903.

WYMAN, Washington:

No cases; no deaths reported to-day. Temperature last twenty-four hours 44 and 74.

RICHARDSON.

San Antonio, Tex., October 28, 1903.

WYMAN, Washington:

No cases; no deaths reported to-day. Temperature last twenty-four hours 52 and 74.

RICHARDSON.

SUSPICIOUS CASES IN MEDINA COUNTY.

Houston, Tex., October 20, 1903.

Sir: I have the honor to submit for consideration, with regard to the situation in San Antonio and Medina county, the following history of suspicious cases which have occurred there, the details being furnished by Health Officer Brumby, of this city, who was over the

ground a few days since.

The first case, that of Mrs. ——, a nurse, and mother-in-law of one Sylvester Rimero, was taken sick suddenly with fever at the house of Rimero. After the lapse of ten or twelve days the other inmates of the house were taken sick suddenly, first one Gonzales, then Rimero's wife, next his child, and lastly Rimero himself, all developing a fever in quick succession. All had similar symptoms, viz, high fever, subsiding in three or four days, and this followed by a secondary fever,

or, as they say, a relapse. Upon the third or fourth day of his illness the man Gonzales went to San Antonio by train and was admitted to hospital. He wrote to the other members of the household to come to the hospital. Rimero's wife died before receipt of Gonzales's letter, but Rimero started with his child in a wagon for San Antonio. The child died en route, but Rimero reached the hospital and was admitted in a delirious condition. I am informed by Doctor Brumby that he saw this man October 9, ten days after his admission to hospital, and that he noticed some bronzing of patient's skin with a yellowish tint of the conjunctivæ, but not knowing patient's previous history at that time did not investigate further. This patient was again seen by Doctor Brumby, I am informed, on the 14th instant, upon his return to San Antonio, at which time he elicited the above facts with regard to patient's history, and also found slight albuminuria upon examining patient's urine, and noticed some congestion of the conjunctivæ remaining.

From a search of the files of the local papers I found a reference in one of them to the admission of one Rimero to hospital on the 29th

1883

ultimo. From the history given, these patients lived about 18 or 20 miles from San Antonio, west, near the line of the Southern Pacific. In view of the present reports from Hondo and San Antonio, I would respectfully submit the history of these cases for consideration, with due acknowledgment to Health Officer W. M. Brumby, of this city, for the main details of the cases which were furnished me upon his return to the city on the 18th instant.

Respectfully,

R. E. EBERSOLE,
Assistant Surgeon.

The SURGEON-GENERAL.

Inspection service, Mexican border, Eagle Pass, Tex.

Acting Assistant Surgeon Hume reports as follows:

	Transactio	Fransactions for week ended—			
	Oct. 3.	Oct. 10.	Oct. 17.

Inspection service at El Paso.

Passed Assistant Surgeon Lumsden reports, October 17, as follows:

Transactions for the week ended October 17, 1903.

Mexican Central passengers inspected.	183
Mexican immigrants inspected	68
Inspection of Mexicans imported in bond for labor in Sonora, Mexico	27
Disinfection soiled linen imported for laundrypieces	354

Report of train inspection at Laredo, Tex.

Surgeon Guiteras reports as follows:

Week ended October 10, 1903.

Trains inspected	7
Passengers inspected	32
Persons returned to Mexico.	4
Pullman cars disinfected	7

Steamship Adato from Rio de Janeiro held at Savannah for disinfection.

Acting Assistant Surgeon Linley reports from Savannah, October 17, 1903, as follows: The British steamship Adato, twenty-four days from Rio de Janeiro via St. Lucia for orders, arrived in Tybee Roads for orders yesterday, and was subsequently ordered to Savannah. There was no sickness aboard at Rio or during the voyage, and all hands were well on arrival. The vessel is now undergoing, in Tybee Roads, a preliminary fumigation to kill rats, on the completion of which she will be brought to the station for redisinfection of deck houses and disinfection of dunnage, and, unless I am otherwise instructed, she will then be detained five days for observation.

1884

Case of leprosy in Los Angeles, Cal.

Los Angeles, Cal., October 16, 1903.

DEAR SIR: I have the honor to report a case of leprosy in a woman who, to all appearances, is a native of the Hawaiian Islands; age 21, married four years ago, and claims to be a native of British Columbia. She states that she traveled in Australia and the Hawaiian Islands three years ago, and that the disease first appeared about sixteen months ago. Her husband is a native of Indiana, and still lives with her.

They came to San Jacinto, Riverside County, Cal., some months ago,

* * * but shipped their goods * * * to the city of Los Angeles.

She has the tubercular form, tubercles showing over the nose, forehead, both sides of the face, lobes of the ears, hands, and feet. Some ulcers are on forehead and hands.

She is now in care of the county hospital authorities in quarantine.

Very truly, yours,

L. M. Powers, M. D., Health Officer.

The Surgeon-General.

Statistical reports of States and cities of the United States—Yearly and monthly.

ARKANSAS—Fort Smith.—Month of September, 1903. Estimated population, 18,000. Total number of deaths, 17; including 1 from enteric fever.

California—Sacramento.—Month of September, 1903. Estimated population, 30,000. Total number of deaths, 26; including 1 from enteric fever.

FLORIDA—Tampa.—Month of September, 1903. Estimated population, 20,000. Total number of deaths, 23; including enteric fever, 1, and 2 from tuberculosis.

Iowa—Keokuk.—Month of September, 1903. Estimated population, 16,000. Total number of deaths, 11, including 1 from tuberculosis.

MARYLAND—Baltimore.—Month of September, 1903. Estimated population, 553,000—white, 451,000; colored, 82,000. Total number of deaths, 707—white, 526; colored, 172—including diphtheria 12, enteric fever 28, scarlet fever 8, whooping cough 7, and 104 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended October 17, 1903, from 98 observers indicate that scarlet fever, inflammation of kidney, and diphtheria were more prevalent and intermittent fever, cholera morbus, cholera infantum, remittent fever erysipelas whooping cough and measles were less prevalent than in the preceding week. Meningitis was reported present at 3, whooping cough at 10, measles at 13, smallpox at 22, diphtheria at 38, scarlet fever at 60, enteric fever at 94, and phthisis pulmonalis, at 228 places.

Grand Rapids.—Month of September, 1903. Estimated popula-

1885

tion, 95,000. Total number of deaths, 98; including enteric fever 2, and 15 from tuberculosis.

NEW YORK—Auburn.—Month of September, 1903. Estimated population, 36,778. Total number of deaths, 42, including diphtheria 4, enteric fever 1, and 5 from tuberculosis.

Buffalo.—Month of September, 1903. Estimated population, 380,000. Total number of deaths, 454, including diphtheria 8, enteric fever 16, scarlet fever 1, whooping cough 4, and 45 from tuberculosis.

WEST VIRGINIA—Wheeling.—Three months ended September 30, 1903. Estimated population, 41,437. Total number of deaths, 143, including diphtheria 1, enteric fever 3, smallpox 2, whooping cough 1, and 12 from tuberculosis.

FOREIGN AND INSULAR.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports, October 12, as follows: Week ended October 11, 1903: Present officially estimated population, 8,500; number of deaths during the week, 1; prevailing disease, mild type of malarial fever; general sanitary condition of this port and the surrounding country during the week, good. One death, noted above, occurred in this port, an adult colored female, due to pulmonary phthisis.

Bills of health were issued to the following-named vessels:

Date.		Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disin- fected.	
Oct.	8	Spero	17 41	0 7	0 7	0 16	

BRITISH WEST INDIES.

Trinidad quarantines against Bolivar, Venezuela, on account of smallpox.

Consul Smith reports from Trinidad October 7, 1903, to the Department of State as follows: "In consequence of a report having been received here that malignant black smallpox was prevalent in Bolivar (Venezuela), the Trinidad quarantine board on October 5 imposed quarantine of fourteen days on all arrivals from that port."

CANADA.

Report of immigration at Quebec.

Assistant Surgeon Billings reports, October 21, as follows: Week ended September 26, 1903: Number inspected, 696; number passed, 678; number detained, 18.

Week ended October 3,1903: Number inspected, 329; number passed,

327; number detained, 2.

Week ended October 10, 1903: Number inspected, 531; number

passed, 508; number detained, 23.

Week ended October 17, 1903: Number inspected, 191; number passed, 186; number detained, 5.

COLOMBIA.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports, October 14, for the week ended October 13, 1903: Population not obtainable; number of deaths during the week, 5. Prevailing disease, malarial fever. The 5 deaths noted were due, respectively, to phthisis 2, malaria 1, gunshot wound 1, inflammation of stomach 1. General sanitary condition of this port and the surrounding country during the week, good. The smallpox epidemic seems to have been entirely eradicated; no cases reported since September 9, 1903. The isolation hospital was closed October 10, 1903.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.

CUBA.

Report from Cientuegos—Mortuary statistics.

Acting Assistant Surgeon McMahon reports, October 14, as follows: Mortuary report for the week ended October 3, 1903: Tetanus, 1; pernicious fever, 1; tuberculosis, 3; paludism, 1; enteritis, 2; other causes, 6; total, 13.

Mortuary report for the week ended October 10, 1903: Paludism, 2; enteritis, 3; nephritis, 2; meningitis, 1; tetanus infantum, 1; other causes, 7; total, 16.

During the week ended October 10 there were issued 2 bills of health to vessels going to ports in the United States. One of these vessels, steamship *Hydra*, was disinfected here by me before departure for Mobile. This disinfection was done at the request of the master of the vessel. The vessel was very dirty from the cargo of cattle she brought to this port from Tampico. There was nothing quarantinable on board of either of these vessels.

Report from Habana—3 cases of yellow fever at Las Animas, 1 from Progreso, and 2 from Vera Cruz—Mortuary statistics.

Assistant Surgeon Trotter reports, October 17, as follows:

Week ended October 10, 1903:	_
Health certificates issued	89
Vessels inspected and issued bills of health	
Crews of outgoing vessels inspected	649
Passengers of outgoing vessels inspected	261
Pieces of baggage inspected	122
Pieces of freight inspected	
Pieces of express inspected	18

I have to report that I saw Dr. Finlay about the case of Borras fever reported on the 8th instant, and he stated that the case was that of a child 8 years of age who was taken sick with fever, followed by nausea and vomiting. The vomit became blood stained after two days' illness and death resulted on the third day. Examination of the urine during the illness showed absence of albumin and there was no lack of correlation of the pulse and temperature. Owing to the black vomit the attending physician's diagnosis was Borras fever, but the case was probably one of gastritis.

On the 6th instant a nonimmune passenger, under observation at Triscornia, was sent to Las Animas Hospital with fever. The contagious disease commission diagnosed the case as one of yellow fever. This passenger, a Mexican, arrived on the American steamship *Monterey* from Progreso, and had only been at Triscornia a few hours when he was found to have fever and was immediately transferred to Las Animas.

The German steamship *Prinz Adalbert*, from Vera Cruz and Tampico, arrived on the 9th instant with 2 of the crew ill with fever. The men were sent to Las Animas and there the cases were examined by the contagious disease commission and decided to be yellow fever. The *Prinz Adalbert* cleared for European ports on the 10th instant.

I inclose herewith the usual weekly mortuary report.

Mortuary report of Habana for the week ended October 10, 1903.

Report from Matanzas-Mortuary statistics.

Acting Assistant Surgeon Nunez reports as follows: Week ended October 17, 1903, one bill of health was issued to a vessel bound for

the United States, in good sanitary condition.

Several heavy showers have fallen in this city during the past week. washing away the accumulated dust from the streets by the surface drain, and thus contributing to improve their cleanliness, and to bring about a cooler and more pleasant temperature.

Mortuary statistics of Matanzas, for the ten days ended October 20,

1903, are herewith inclosed.

No quarantinable disease has been reported.

Mortuary statistics of Mantanzas, Cuba, for the second ten days ended October 20, 1903.

GERMANY.

Report from Berlin-Plague and cholera in various countries.

Consul-General Mason reports, October 9, as follows:

Plague.

France.—According to a report by the prefect of Marseille of the 23d of September, the various plague patients still under treatment in the hospital may now be regarded as cured.

Egypt.—Between the 19th and 26th of September, inclusive, there were registered in the whole of Egypt 5 cases of plague and 4 deaths,

all in Alexandria.

British India.—In the Bombay presidency during the week ended September 12 there were registered 10,705 cases of plague (7,482 deaths), of which 77 cases (64 deaths) occurred in the city of Bombay, 3 cases (3 deaths) in the town and port of Karachi, and 22 cases (21 deaths) in the harbor of Broach.

Brazil.—During the four weeks from the 10th of August to the 6th of September there were registered in Rio de Janeiro 16, 15, 19, 15

plague cases, and 6, 2, 10, 8 deaths, respectively.

Chile.—In Valparaiso during the period from the 1st to the 13th August 5 cases of plague were registered.

Plague and cholera.

British India.—In Calcutta during the week ended August 29, 17 persons died of plague and 8 persons died of cholera.

Death rate of Berlin.

The death rate of Berlin for the week ended September 26 was lower than it has been since the middle of June, amounting, calculated on the year, to 13.5 per thousand of the population, and was thus also lower than the rate for the corresponding week of last year, in which it amounted to 14.3. Of the large German cities, during the week in question, only the following showed more favorable figures than Berlin, namely: Hanover, Cassel, Barmen, Kiel, Charlottenburg, (with 12.9) and Schoneberg (with 9.2). The following towns had a considerably higher death rate than this city, viz: Hamburg, Leipzig, Cologne, Frankfort-on-the-Main, Stuttgart, Dresden, Munich, Nuremberg, Bremen, Braunschweig, Breslau, Konigsberg, as well as London, Paris, and Vienna. The decrease in the number of deaths was chiefly among children in the first year of life, the falling off in the mortality among the higher age classes being but slight. The rate of mortality among infants fell from 5.5 per year and mille in the preceding week to 4.4 in this week, amounting to only one-third of the rate of Nuremberg.

There was no noticeable abatement of acute diseases of the respiratory organs, which caused 30 deaths. Acute intestinal diseases claimed 90 victims, and 28 persons succumbed to cholerine. There was a notable decrease in the number of deaths from phthisis pulmonalis, which amounted in the week in question to only 61. Thirty-nine persons died of cancer. There were further registered 5 deaths from

October 30, 1903 1908

measles, 4 deaths from scarlet fever, and 5 deaths from diphtheria.

Influenza claimed 2 victims, and 15 persons died by violence.

The death rate of Berlin for the week ended October 3 was higher than that of the preceding week, amounting, calculated on the year. to 14.1 per thousand of the population, thus being, however, a little lower than the rate for the corresponding week of last year, in which it amounted to 14.3. Among the large German cities, only Crefeld. Hanover, and Charlottenburg (with 11.4) showed somewhat more favorable figures than Berlin. The following towns had a considerably higher death rate than that of Berlin, namely: Hamburg, Leipzig. Dresden, Bremen, Frankfurt-on-the Main, Düsseldorf, Munich, Nuremberg, Strassburg, Cologne, Breslau, Königsberg, as well as Paris and Vienna; the death rate of London corresponding exactly with that of this city. The participation of children in the first year of life in the mortality remained about the same as during the foregoing week, so that the increase in the number of deaths was restricted entirely to the higher-age classes. The death rate among infants amounted to 4.4 per year and mille, being only one-half the rate of Munich, Nuremberg. and Breslau. Acute diseases of the respiratory organs showed a considerable increase, causing 40 deaths, and phthisis pulmonalis claimed Thirty-four persons died of cancer, and acute intestinal diseases claimed 70 victims. Fifteen infants died of cholerine. theria caused 4, and scarlet fever 6 deaths. There were 2 deaths from measles, and, finally, 18 persons died by violence.

Emigration from European countries in 1902.

Consul Guenther, at Frankfort-on-the-Main, sends the following. October 1, 1903:

A correspondent from Italy to German papers states that the number of emigrants from different European countries during the year 1902 was as follows:

Italy	288, 947	Sweden	17,960
Great Britain and Ireland	171, 715	Norway	12, 745
Austria-Hungary	65,083	Netherlands	34, 343
Russia	187, 897	Denmark	4,657
Spain	39, 469	Belgium	19, 700
Portugal	44, 746	Switzerland	2, 968

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports, October 12, as follows: Week ended October 12, 1903: Present officially estimated population, about 3,500; number of deaths during the week, 2; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage distn- fected.

INDIA.

Reports from Calcutta.

Passed Assistant Surgeon Sprague reports, September 21 and October 1, 1903, as follows: Total recorded deaths in Calcutta, India, for the week ended September 12, 1903, was 208, of which 4 were due to Asiatic cholera and 13 to bubonic plague. Neither of these diseases were considered as epidemic. None of the cases of cholera were connected with shipping. The plague cases were scattered over nine wards, and occurred among the Hindus and Mohammedans. It is now nearing the close of the rainy season, the effect of which seems to be to greatly reduce the number of cases of these diseases in this region. The average for the past five years during the corresponding period has been 5 deaths from cholera and 24 from plague.

Week ended September 26, 1903, one vessel was inspected bound for the ports of Boston and New York. Eight sailors were passed and 24 "lascars" or Indian sailors. One of the latter was rejected

because of one degree elevation of temperature.

There was one passenger bound for New York. Total inspected: Thirty-three crew (1 rejected), 3 officers, 1 passenger. Total, 36.

ITALY.

Report from Naples and Palermo.

Acting Assistant Surgeon Buonocore reports, October 12 for the week ended October 10, 1903, that the following ships were inspected at Naples and Palermo:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passen- gers in- spected and passed.	Pieces of large bag- gage in- spected and passed.	Pieces of baggage disin- fected.	Number of steer- age pas- sengers recom- mended for rejec- tion.

MEXICO.

Report from Tampico.

Temporary Acting Assistant Surgeon Lippincott reports, October 12, as follows:

Week ended October 10, 1903.

Bills of health issued	 ,
Vessels inspected and passed	
Vessels disinfected and passed	
Personnel of crew	
Passengers	
Baggage .	

During the week there were 26 deaths from all causes, of which 1 was from yellow fever, 5 from tuberculosis, 1 from caquexia palustre. 1 from pernicious fever, and 18 from noncontagious causes.

There were 6 new cases of yellow fever officially reported and 12 left from the previous week, making a total of 18 cases for the week ending October 10, 1903.

The situation is apparently unchanged and the surrounding country is still badly infected.

Report from Vera Cruz.

Assistant Surgeon Goldberger reports, October 12, as follows: During the week ended October 10, 1903, there was recorded in this city a total of 62 deaths, of which 9 were credited to malarial fevers, 5 to tuberculosis, and 11 to yellow fever.

The improvement in the yellow-fever situation referred to in my last report continues. The total number of cases reported during the

first ten days of the current month is 62, with 15 deaths. I believe, however, that conditions are better than these figures would indicate. So far as my opportunities for observation permit me to judge, I believe that at least 50 per cent of these reported cases were astivo-autumnal fever. Of the latter disease very few were fatal, so that the number of deaths (15) reported as due to yellow fever is fairly near the truth and so raises the yellow-fever mortality rate to about 50 per cent, which I believe to be fairly accurate, and if anything rather under than over states it.

NICARAGUA.

Report from Bluefields, fruit port.

Acting Assistant Surgeon Goodman reports, October 11, 1903, as follows: Week ended October 10, 1903. Present officially estimated population, 4,000; number of deaths during the week, 3; prevailing disease, malarial fever; general sanitary condition of this port and the surrounding country during the week, good. Two of the above-reported deaths were from gunshot wounds, the third from tuberculosis.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 4	Alabama	18	5	0	0
8	Utstein	15	1	0	2

QUEENSLAND.

Plague in Brisbane and Townsville.

Consul-General Bray transmits the following telegrams:

VICTORIA, September 15, 1903.

Premier, Queensland, reports two cases plague occurred Brisbane, which ended ratally 12th instant. All precautions taken.

EDMUND BARTON.

VICTORIA, September 10, 1903.

Premier, Queensland, reports fresh case plague occurred Townsville 4th instant; ended fatally 6th. All precautions taken.

EDMUND BARTON.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

Australia—New South Wales—Newcastle.—Month of August, 1903. Estimated population, 49,100. Total number of deaths, 50, including enteric fever 1, and 4 from scarlet fever.

Queensland—Brisbane.—Month of May, 1903. Estimated population, 119,428. Total number of deaths, 137, including diphtheria 2, enteric fever 4, and 4 from plague.

October 30, 1903 1912

Month of June, 1903. Estimated population, 119,428. Total number of deaths, 157, including diphtheria 3, enteric fever 5, measles 1, whooping cough 3, and 1 from plague.

Month of July, 1903. Estimated population, 119,428. Total number of deaths, 109, including diphtheria 3, enteric fever 1, measles 1, scarlet fever 2, and 1 from whooping cough.

BAHAMAS—Green Turtle Cay, Abaco.—Two weeks ended October 7, 1903. Population, 3,314. No deaths reported.

Nassan.—Two weeks ended October 12, 1903. Estimated population, 12,390. Number of deaths not reported.

Brazil--Pernambuco.—Four weeks ended September 15, 1903. Estimated population, 200,000. Total number of deaths, 524, including enteric fever 1, smallpox 23, and 3 from whooping cough.

France—Roubaix.—Month of September, 1903. Estimated population, 124,660. Total number of deaths 147, including enteric fever 2, scarlet fever 2, and 1 from whooping cough.

St. Etienne.—Two weeks ended September 30, 1903. Estimated population, 146,671. Total number of deaths 126, including enteric fever 2, and 1 from whooping cough.

GIBRALTAR.—Two weeks ended October 4, 1903. Estimated population, 27,460. Total number of deaths, 13. No deaths from contagious diseases.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended October 10, 1903, correspond to an annual rate of 15.8 per 1,000 of the aggregate population, which is estimated at 15,075,011.

London.—One thousand two hundred and eighty-three deaths were registered during the week, including measles 9, scarlet fever 10, diphtheria 13, whooping cough 9, enteric fever 13, and diarrhea 132. The deaths from all causes correspond to an annual rate of 14.5 per 1,000. In Greater London 1,796 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 3 from measles, 4 from scarlet fever, and 3 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended October 10, 1903, in the 21 principal town districts of Ireland was 16.5 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Tralee, viz, 0, and the highest in Sligo, viz, 28.8 per 1,000. In Dublin and suburbs 150 deaths were registered, including diphtheria 2, enteric fever 2, whooping cough 2, and 41 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended October 10, 1903, correspond to an annual rate of 16.0 per 1,000 of the population, which is estimated at 1,702,912. The lowest rate of mortality was recorded in Perth, viz, 9.3, and the highest in Dundee, viz, 19.8 per 1,000. The aggregate number of

1913 October 30, 1903

deaths registered from all causes was 525, including diphtheria 3, measles 8, scarlet fever 4, and 6 from whooping cough.

Guiana—Paramaribo.—Month of September, 1903. Estimated population, 32,263. Total number of deaths, 69. No deaths from contagious diseases reported.

Jamaica.—Three weeks ended October 3, 1903. Population, 755,730. Number of deaths not reported. Ten deaths from enteric fever, and 8 from whooping cough reported.

Kingston.—Month of September, 1903. Estimated population. 46,542. Total number of deaths, 138, including enteric fever 8, whooping cough 15, and 14 from tuberculosis.

MALTA.—Two weeks ended October 5, 1903. Estimated population, 193,315. Total number of deaths, 177, including diphtheria 2, enteric fever 1, and 1 from whooping cough.

St. Helena.—Four weeks ended September 19, 1903. Estimated population, 4,000. Total number of deaths, 4. No deaths from contagious diseases.

Spain—Cadiz.—Month of September, 1903. Estimated population, 69,382. Total number of deaths, 124, including enteric fever 3 and 30 from tuberculosis.

Corunna.—Month of September, 1903. Estimated population, 50,000. Total number of deaths, 84, including diphtheria 1, enteric fever 1, measles 1, and 15 from tuberculosis.

TENERIFFE—Grand Canary.—Week ended September 26, 1903. Estimated population, 49,500. Total number of deaths, 14. No deaths from contagious diseases.

Cholera, yellow fever, plague, and smallpox, June 27, 1908, to October 30, 1903.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and from other sources.]

[For reports received from December 27, 1902, to June 26, 1903, see Public Health Reports [cr June 26, 1903.]
