

PUBLIC HEALTH REPORTS.

UNITED STATES.

Amendment to the quarantine regulations regarding bills of health for vessels from ports in British Columbia to adjacent ports in the United States.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, October 27, 1904.

*To the Officers of the Treasury Department, State and
Local Quarantine Officers, and others concerned:*

Under authority of the act of Congress approved August 18, 1894, it is hereby declared that the provisions of paragraph 4, United States Quarantine Regulations, approved April 1, 1903, are extended to include vessels plying between ports in British Columbia and adjacent ports in the United States.

ROBERT B. ARMSTRONG,
Assistant Secretary.

Notification of withdrawal of service inspectors from Progreso, Tampico, and Veracruz, Mexico.

NOVEMBER 1, 1904.

SOUCHON, *President, State Board Health,
New Orleans, La.:*

On account termination active quarantine season service inspectors have been withdrawn from Progreso, Tampico, and Veracruz.

WYMAN.

[Repeated to Goldthwaite, health officer, Mobile, Ala.; Grubbs, quarantine, Biloxi, Miss.; State Health Officer Tabor, Austin, Tex.; Porter, Key West, Fla.; Ebersole, quarantine, Tampa, Fla.]

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

*Summary of work in Chinatown, San Francisco, for the week ended
November 5, 1904.*

Times streets swept.....	3
Sewers flushed	19
Notices sent to abate plumbing nuisance	9
Abated	6
Undergoing abatement	7
Total number of plumbing inspections	145

Diphtheria at Lubec, Me.—Spread of the disease arrested.

Acting Assistant Surgeon Small, at Eastport, Me., reports, November 3, as follows:

The spread of diphtheria at Lubec, Me., is at present arrested. There have been about 20 cases of mild type. No new houses quarantined for nearly a week. I trust the epidemic is over.

Transactions on account of yellow fever at Laredo, Tex.

Reports from San Antonio—Sanitary conditions—Work of the sanitary department during October, 1904—Mortality.

Acting Assistant Surgeon Purnell reports, November 3, as follows:

The health of the city and vicinity is very good, and there seems to be no special disease prevailing. The temperature dropped considerably several days ago, but the cool weather was only temporary, as the summer warmth has returned.

Work of the sanitary department during October, 1904.

Premises inspected.....	7,626
Premises cleaned	139
Privies disinfected.....	128
Houses fumigated	12

Marasmus.....	1	Total.....	115

INSPECTION SERVICE, MEXICAN BORDER.

Inspection at Nogales, Ariz.

Acting Assistant Surgeon Gustetter reports as follows:
 Week ended October 29, 1904: Passengers inspected, 148; immigrants inspected, 45; immigrants deported, 13.

Inspection at Eagle Pass, Tex.

Acting Assistant Surgeon Hume reports as follows:

	Week ended Oct. 29.
Persons inspected.....	214
Persons held.....	0
Pullman cars fumigated.....	8

Bags Pullman linen disinfected, 37.

Inspected on footbridge, 3,424 persons. Returned by State quarantine officer—by train, 3; by bridge, 11.

Inspection at El Paso, Tex.

Acting Assistant Surgeon Alexander reports as follows:

Week ended October 29, 1904: Inspection Mexican Central passengers, 208; inspection Mexican Central immigrants, 66; inspection Mexican immigrants, International Bridge, 223; inspection Syrians, 2; disinfection soiled linen imported for laundry work, 419 pieces; detention of 2 passengers for 2 days being only 3 days out from Tampico; vaccination of children of immigrants, 6.

Inspection at Laredo, Tex.

Acting Assistant Surgeon Hamilton reports, through Passed Assistant Surgeon Richardson, as follows:

Week ended October 29, 1904: Passenger trains from Mexico inspected, 14; persons on trains inspected, 363; immigrants inspected on trains, 9; immigrants vaccinated upon entry, 3; Pullman coaches disinfected, 15; private coaches disinfected, 1; persons inspected on entering via International Foot and Carriage Bridge, 3,485; persons refused entry presenting at International Foot and Carriage Bridge, 17.

Statistical reports of States and cities of the United States—Yearly and monthly.

CONNECTICUT—*Stamford*.—Month of October, 1904. Estimated population, 18,000. Number of deaths not reported. No deaths from contagious diseases reported.

GEORGIA—*Columbus*.—Month of October, 1904. Estimated population, 19,303; white, 10,276; colored, 9,027. Total number of deaths, 29; white 10, colored 19, including diphtheria 1, and 1 from phthisis pulmonalis.

ILLINOIS—*Alton*.—Three months ended September 30, 1904. Estimated population, 16,652. Total number of deaths, not reported. Two deaths from diphtheria, 4 from enteric fever, and 10 from tuberculosis reported.

Peoria.—Month of October, 1904. Census population, 56,100. Total number of deaths, 64, including diphtheria 4, enteric fever 1, and 2 from tuberculosis.

INDIANA.—The total number of deaths reported for September, 1904, was 2,766, which is an annual rate of 13.4. In the corresponding month last year 2,812 deaths were reported, a rate of 13.6. In the preceding month there were 2,933 deaths, a rate of 13.7. The deaths by important ages were: Under 1 year of age, 519; from 1 to 5 years, 245; 5 to 10 years, 65; 10 to 15 years, 66; 65 years and over, 557. The number of deaths under 1 year of age was 19.7 per cent of the total number of deaths, and the deaths of 65 and over was 21.1 per cent. In the corresponding month last year, 20 per cent of the deaths were under 1 year of age and 22.9 per cent, 65 and over. Some important causes of death were as follows: Pulmonary tuberculosis 307, other forms of tuberculosis 40, typhoid fever 166, diphtheria 35, croup 3, scarlet fever 15, measles 6, whooping cough 5, pneumonia 110, diarrheal diseases 265, cerebro-spinal meningitis 32, influenza 3, puerperal fever 12, cancer 92, violence 184, smallpox 2. There is a decided improvement in typhoid fever as compared with the corresponding month last year, when the number of deaths was 232, a rate of 112.7 per 100,000, while this month the deaths numbered 166, a

rate of 80.4. Pneumonia has increased as compared with the preceding month and diarrheal diseases have decreased. The smallpox deaths numbered 12 in August, while this month they numbered but 2. Cancer also shows a decrease. Last month the number of deaths were 124 from this cause and this month they are 92.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended October 29, 1904, from 83 observers, indicate that smallpox, measles, and meningitis were more than usually prevalent, and intermittent fever, dysentery, pneumonia, cholera morbus, cholera infantum, and erysipelas were less prevalent.

Meningitis was reported present at 4, whooping cough at 8, measles at 9, pneumonia at 15, diphtheria at 36, scarlet fever at 40, smallpox at 52, enteric fever at 106, and phthisis pulmonalis at 241 places.

PENNSYLVANIA—*Dunmore*.—Month of August, 1904. Estimated population, 15,000. Total number of deaths, 12, including diphtheria, 1, measles, 1, and 1 from tuberculosis.

ARRIVALS OF IMMIGRANTS.

Report from Baltimore.

OFFICE OF THE COMMISSIONER,
Baltimore, Md., November 5, 1904.

FOREIGN AND INSULAR.

AFRICA.

Report from Cape Colony—Plague—Examination for plague-infected rodents.

COLONIAL SECRETARY'S OFFICE,
Cape Town, Cape of Good Hope, October 10, 1904.

The following report by the medical officer of health for the colony on the state of the outbreak of bubonic plague in the Cape Colony for the week ended October 8, 1904, is published for general information.

NOEL JANISCH,
Under Colonial Secretary.

Port Elizabeth.—One case of plague was discovered during the week, namely, a colored male on the 5th instant. At the plague hospital, 2 European males were discharged. Two cases remain under treatment. One hundred and eighty-six rats (16 found dead) and 63 mice (8 found dead) were bacteriologically examined during the week, of which 10 rats and 7 mice proved to be plague-infected.

East London.—Plague-infected rodents continued to be found in the town during the week.

CAPE TOWN.

Harbor board area and shipping in harbor.—Two hundred and eighty-three rodents were examined; no plague infection was discovered.

Cape Town municipal area.—Three hundred and sixty-two rodents were examined by the medical officer of health for the city; no plague infection was discovered.

Other districts.—No plague infection in man or animals was discovered.

J. A. MITCHELL,
Acting Medical Officer of Health for the Colony.

Report from Lourenço Marquez—Suspect plague at Magude.

Consul Hollis reports, September 27, 1904, as follows:

I have to-day been notified by the secretary-general of the province of Mozambique that there are 2 cases of suspected plague at Magude. The secretary-general gives no further information, but it is presumed that Magude has been isolated.

AUSTRALIA.

*Plague Bulletins from Brisbane, Sydney, and Western Australia—
Examination of rats for plague infection.*

Consul-General Bray, at Melbourne, forwards the following:

DEPARTMENT OF PUBLIC HEALTH, QUEENSLAND,
Brisbane, September 3, 1904.

Plague bulletin No. 30, for the week ended 12 o'clock noon, Saturday, September 3, 1904:

RATS AND MICE.

	Rats.	Mice.	Total.
BRISBANE.			
Total number of rats and mice destroyed during week	242	67	309

B. BURNETT HAM,
Commissioner of Public Health.

DEPARTMENT OF PUBLIC HEALTH,
STATE OF NEW SOUTH WALES,
Sydney, September 12, 1904.

Week ended at 1 p. m. on Saturday, September 10, 1904. *Bubonic plague—Bulletin No. 28.*

PLAGUE IN RATS.

	Rats.	Mice.	Total.
Total number destroyed during week.....	1,554	940	2,494
Number of rodents examined in Bacteriological Laboratory during week....	517	467	984
Number of rodents found infected.....	3	3	6

Plague in man.—On September 9 a coachman in private employment at Eastwood, a suburb of Sydney, made his way to his father's house at Annandale, another suburb, and there died of plague the same night. Dead rats have been found at his place of service. Both places have been disinfected and cleansed.

By order,

JAMES J. POTTER,
For Secretary.

SYDNEY, *September 19, 1904.*

Bubonic plague Bulletin No. 29.—Week ended at 1 p. m. on Saturday, September 17, 1904.

PLAGUE IN RATS.

	Rats.	Mice.	Total.
Total number destroyed during week.....	1,650	1,176	2,826
Number of rodents examined in bacteriological laboratory during week....	561	510	1,071
Number of rodents found infected.....	4	1	5

Plague in man.—On September 12 a housekeeper, employed at the same house as case 11 (reported in bulletin for week ended September 10), was found to be suffering from plague, and died before she could be removed to hospital.

By order,

JAMES J. POTTER,
For Secretary.

SYDNEY, *September 26, 1904.*

Bubonic plague bulletin No. 30, week ended at 1 p. m. on Saturday, September 24, 1904:

PLAGUE IN RATS.

	Rats.	Mice.	Total.
Total number destroyed during week.....	1,576	1,022	2,598
Number of rodents examined in bacteriological laboratory during week....	513	532	1,045
Number found infected.....	0	2	2

Plague in man, 0.

By order,

JAMES J. POTTER,
For Secretary.

DEPARTMENT OF PUBLIC HEALTH.
Perth, September 5, 1904.

Bubonic plague. Bulletin for week ended noon, September 3, 1904:

Total number of cases reported.....	4
Number of deaths.....	1
Discharged from hospital.....	2
Remaining under treatment.....	1
Number of rodents examined at pathological laboratory for week:	
Fremantle.....	31
Perth.....	90
Number of rodents infected:	
Fremantle.....	0
Perth.....	0

No further cases have been reported during the week under notice.
J. R. CAMPBELL, *Secretary.*

PERTH, September 12, 1904.

Bulletin for week ended noon, September 10, 1904.

Total discharged from hospital	2
Remaining under treatment September 24, 1904	1
Number of rodents examined at pathological laboratory during week:	
Fremantle	12
Perth	68
Number of rodents infected:	
Fremantle	0
Perth	0

No further cases have been reported during the week under notice.

J. R. CAMPBELL, *Secretary.*

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended October 27, 1904: Present officially estimated population, 8,500; number of deaths, 5; prevailing disease, malarial fever and intestinal diseases; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 21	Beverly	44	6	10	0
27	Colombia	18	0	0	0

Number of aliens sailing from this port during the week, 3.

Number of inclosures, 8.

CANADA.

Inspection of immigrants at Quebec.

Passed Assistant Surgeon Billings reports as follows: Month of October, 1904: Number of immigrants inspected, 722; number passed, 703; number certified for rejection, 19.

CANAL ZONE.

No deaths among employees of the Isthmian Canal Commission during October, 1904.

WASHINGTON D. C., *November 1, 1904.*

SIR: By a telegram just received from Maj. Gen. George W. Davis, U. S. Army, governor of the Canal Zone, Isthmus of Panama, we are advised that there have been no deaths among the employees of this Commission on the Canal Zone during the past month of October.

Yours, respectfully,

J. G. WALKER,
Chairman of Commission.

The SURGEON-GENERAL.

Circular relative to certificates of successful vaccination against small-pox to be furnished to emigrants to the Canal Zone and the cities of Colon and Panama.

NOVEMBER 5, 1904.

CIRCULAR LETTER.

To medical officers Public Health and Marine-Hospital Service:

You are informed that General Davis, governor of the canal zone, has requested that medical officers of this Service at United States ports as well as foreign ports be instructed to furnish certificates of successful vaccination against smallpox for such emigrants for the Canal Zone, or for the cities of Panama and Colon, Republic of Panama, as apply for and are entitled to the same.

You are directed to comply with this request, keeping a record of such transactions, and make monthly reports of same to the Bureau.

Respectfully,

WALTER WYMAN,
Surgeon-General.

COSTA RICA.

Report from Limon, fruit port—Imported case of yellow fever recovered and discharged.

Acting Assistant Surgeon Goodman reports as follows: Week ended October 22, 1904. Estimated population, 4,000; number of deaths, 4; prevailing diseases, malarial fevers.

General sanitary condition of this port and the surrounding country during the week, fair.

The imported case of yellow fever reported last week recovered and was discharged from the hospital October 17.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
1904.					
Oct. 17	Alleghany.....	46	1	0	0
19	Oracabessa.....	45	0	0	0
20	Venus.....	32	0	0	0
21	Belvernon.....	22	0	0	0

Five bills of health to Panaman ports were viséed, and 55 passengers for Colon were examined and given certificates.

CUBA.

Report from Habana—Inspection of vessels—Yellow fever case from steamship Havana from Mexican ports.

Acting Assistant Surgeon Echemendia reports, November 2, as follows:

Week ended October 29, 1904.

Vessels inspected and bills of health issued.....	20
Crew of outgoing vessels inspected.....	692
Passengers of outgoing vessels inspected.....	327
Pieces of freight passed.....	500

A nonimmune passenger of the American steamship *Havana* arrived at this port from Mexico October 25, 1904, and sent to Tricornia by the Cuban quarantine officers, was taken on the 26th to Las Animas hospital as a suspect ill with yellow fever. •

The case has been confirmed by the commission of infectious diseases as yellow fever.

Mortuary report of Habana for the week ended October 29, 1904.

Disease.	Number of deaths.
Tuberculosis.....	16
Meningitis.....	4
Bronchitis.....	1
Pernicious fever.....	1
Enteritis.....	2
Enteric fever.....	1
Gangrene.....	1
Scarlet fever.....	1

Total number of deaths, 81.

Report from Matanzas—Inspection of vessels—Sanitary conditions unsatisfactory.

Acting Assistant Surgeon Nuñez reports, November 1, as follows:

During the week ended October 29, 1904, one bill of health was issued to a vessel leaving for the United States.

Nothing of interest from a sanitary point of view has occurred in the city or district, to my knowledge, during the past week. No contagious disease has been officially reported. The sanitary condition of the city shows a progressive change for the worse.

DANISH WEST INDIES.

Quarantine against Demerara raised.

According to information received from the Department of State, under date of November 1, 1904, the American legation at Copenhagen announces that the government of the Danish West Indies has raised quarantine against vessels arriving from Demerara.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

Consul-General Mason reports, October 24, 1904, as follows:

Plague.

Egypt.—During the week ended October 7 there were registered in Alexandria 4 fresh cases of plague (and 2 deaths), and in Port Said, 1 death from plague.

Cholera.

Russia.—In the Trans-Caspian territory during the week ended October 2 there were registered 11 cases of cholera (with 3 deaths).

In Baku during the week ended October 4 there were registered 111 cases of cholera (with 61 deaths); in the week ended October 11, 80 cases (53 deaths).

In Saratov during the period from September 27 to October 4 there were registered 13 cases of cholera (5 deaths); from October 4 to 7, 5 cases (4 deaths).

In a village of the district Zarew, in the government of Astrakhan, during the period from September 27 to October 9 there occurred 12 cases of suspected cholera (with 5 deaths).

Turkey.—According to Bulletin No. 38, of October 3, there have been registered 233 fresh cases of cholera and 160 deaths, viz: In Bagdad, 33 cases (39 deaths); Omara, 31 cases (11 deaths); Mendeli, 34 cases (14 deaths); in Deir-Zor, 39 cases (30 deaths); in Mosul, 6 deaths; in Kiazmieh, 7 cases (7 deaths).

Death rate of Berlin and other cities.

The death rate of Berlin for the week ended October 8 was a little higher than that of the preceding week, amounting, calculated on the year, to 13.8 per thousand of the population, being thus lower than the rate for the same week of last year, in which it amounted to 14.4 per thousand. Two-thirds of the large towns and cities of Germany showed less favorable figures than Berlin, the following places having exhibited a considerably higher rate of mortality than this city, namely: Hamburg, Leipzig, Magdeburg, Cologne, Frankfort on the Main, Nuremberg, Stuttgart, Munich, Karlsruhe, Altona, Breslau, Stettin, Königsberg, as well as London, Paris, and Vienna. On the other hand, the following cities had a lower death rate than Berlin, viz: Dresden, Hanover, Brunswick, Düsseldorf, Rixdorf (with 13.2), Charlottenburg (with 12.2), and Schöneberg (with 9.6). Since the preceding week the number of deaths among the children in the first year of life has decreased, the increase in the mortality being confined exclusively to the higher age classes. The death rate among infants amounted to 4.1 per year and thousand, this being considerably lower than the Munich and Breslau figures, but somewhat higher than the Hamburg rate. Acute diseases of the respiratory organs showed practically no variation, causing 50 deaths. Acute intestinal diseases, on the other hand, showed a decrease; claiming, however, 69 victims. Furthermore, there were registered 59 deaths from phthisis pulmonalis, 44 deaths from cancer, 11 deaths from scarlet fever, 7 deaths from diphtheria, 6 deaths from measles, and 2 deaths from enteric fever. Only 2 deaths were caused by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended October 24, 1904. Present officially estimated population, 3,500; no deaths reported; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 18	Belize	18
18	Beverly	44	1
18	Matador	35

The steamships *Beverly* and *Matador* cleared from Puerto Barrios.

HAWAII.

Reports from Honolulu—Outgoing quarantine transactions.

Chief Quarantine Officer Cofer reports, October 24, as follows:

Week ended October 22, 1904.

Vessels inspected and bills of health issued	8
Vessels disinfected	3
Cabin passengers inspected	3
Steerage passengers inspected	0
Crew inspected	848
Pieces of steerage passengers' baggage disinfected and passed	0
Pieces of crew's baggage disinfected and passed	63
Hides and skins disinfected	0
Pieces of freight disinfected	0
Passengers and crews declined certification on account of fever	0

HONDURAS.

Reports from Ceiba, fruit port.

Acting Assistant Surgeon Robertson reports as follows: Week ended October 22, 1904. Present officially estimated population, about 4,000; 1 death; prevailing diseases, malarial, mostly mild type; general sanitary condition of this port and the surrounding country during the week, not reported.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 21	Hispania	22	1
22	Jamaica	18
22	Origen	23

Papers for steamships *Jamaica* and *Origen* were issued, but could not be sent aboard because of the heavy surf, and ships were signaled to clear from Utillo under protest.

Week ended October 29, 1904. No deaths; prevailing diseases, malarial, mostly mild type; general sanitary condition of this port and the surrounding country during the week, good.

No transactions during the week.

Report from Puerto Cortes, fruit port.

Acting Assistant Surgeon Carter reports as follows: Week ended October 25, 1904. Present officially estimated population, 2,125; one death; prevailing diseases, malarial fever of mild type and intestinal diseases; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 18	Hispania	22	0	0	0
19	Habil.	16	0	0	0
20	Beverly	44	9	1	0
21	Bratten	15	0	0	0
22	Gyller	14	0	0	0

Number of aliens sailing from this port during the week, 5.

INDIA.

Report from Bombay—Cholera, plague, and smallpox—Transactions of service.

Acting Assistant Surgeon Edward H. Hume reports, October 15, as follows:

Mortality of Bombay city.

	Week ended—	
	Sept. 27.	Oct. 4.
Plague attacks	101	92
Plague deaths	85	30
Plague mortality per 1,000	5.69	5.36
Smallpox deaths	2	4
Cholera deaths	9	7
Total deaths	663	685
Total mortality per 1,000	44.42	45.90

Plague and cholera have no direct local connection with the shipping and port.

Transactions of service.

Sanitary certificate No. 60 (accompanying consular invoice No. 250 of 1904) was issued October 4, for 58 bales of wool packed in naphthalene shipped to Philadelphia.

Reports from Calcutta—Inspection and fumigation of vessel—Cholera and plague mortality.

Acting Assistant Surgeon Eakins reports, October 13, as follows:

During the week ended October 8, 1904, bill of health was issued to the steamship *Mashona*, bound to Boston and New York with a total crew of 50. The usual precautions were taken, holds fumigated, rat guards placed on wharf lines, and Lascars' effects disinfected.

During the week ended October 8, 1904, there were 6 deaths from cholera and no deaths from plague in Calcutta.

In Bengal during the week ended October 1, 1904, there were 364 cases and 278 deaths from plague.

In India during the week ended September 24, 1904, there were 15,325 cases and 11,866 deaths from plague.

MEXICO.

Report from Progreso—Inspection of vessels—No quarantinable diseases.

Acting Assistant Surgeon Harrison reports as follows: Week ended October 25, 1904. Estimated population, 8,000.

Quarantinable diseases none, and none since July 27 last, according to official reports.

Deaths from all causes as follows: Malarial, 3; entero-colitis, 1; cerebral congestion, 1; old age, 1.

The following vessels have been passed:

Date.	Vessel.	Destination.	Crew.	Passengers.	Transit.
Oct. 16	Vigilancia.....	New York.....	79	39	18
17	Frey.....	do.....	25		
20	Royal Exchange.....	Boston.....	21		
23	Pawnee ^a	Texas City.....	23		

^a Pawnee disinfected.

Reports from Veracruz—Inspection of vessels—Malarial fever.

Passed Assistant Surgeon Lumsden reports, October 26, and November 1, as follows:

During the week ended October 22, 1904, five vessels bound for United States ports were inspected and granted bills of health. The following vessels were fumigated with sulphur dioxide and certified: October 18, British steamship *Degama* bound for Mobile; October 22, Norwegian steamship *Norheim* bound for New Orleans.

During the week there were recorded in the city of Veracruz 39 deaths (62.4 per 1,000 annual death rate) from all causes, including 3 from remittent fever, 5 from pernicious fever, 6 from diseases of the gastro intestinal tract, 2 from pneumonia, and 6 from tuberculosis.

No cases of yellow fever or of other quarantinable disease were reported to have occurred in the port or vicinity. Malarial fever of the æstivo-autumnal type continues to be very prevalent. Quite a number of the cases are pernicious. Many of these cases of æstivo-autumnal fever present a clinical picture which bears a striking resem-

blance to that of typical yellow fever, and seen at certain stages of the attack I do not believe that any physician could make a positive differential diagnosis unless blood examinations were made by a competent observer.

There have been several strong northers lately, some of them lasting two or three days, and as a consequence there has been a rather decided fall in the average daily temperature.

During the week ended October 29, 1904, four vessels bound for United States ports were inspected and granted bills of health. One vessel, viz, the Dutch steamship *Themisto*, bound for New Orleans, was fumigated with sulphur dioxid and certified on October 23.

During the week there were recorded in the city of Veracruz 42 deaths (67.2 per 1,000 annual death rate) from all causes including 3 from remittent fever, 6 from pernicious fever, 1 from disease of the gastro-intestinal tract, 1 from pneumonia, and 8 from tuberculosis.

No cases of yellow fever or of other quarantinable disease were reported.

NICARAGUA.

Report from Bluefields, fruit port.

Acting Assistant Surgeon Reilley reports as follows: Week ended October 22, 1904. Present officially estimated population, 4,000; 1 death. Prevailing diseases, malarial fever and tuberculosis; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 19	Nicaragua	19	5	0	0
21	Condor	15	0	0	0

Number of aliens from this port, 1.

PANAMA.

Report from Colon—Inspection of vessels—Mortality.

Acting Assistant Surgeon Mohr reports, October 24, as follows:

During the week ended October 22, 1904, the following vessels cleared for ports in the United States and were granted bills of health: Norwegian steamship *Belvernon*, for New Orleans, via Limon, October 18, with 22 crew and no passengers; British steamship *Louisianian*, for New Orleans, via Jamaica and Mexican ports, October 18, with 48 crew and 62 passengers; American steamship *Yucatan*, for New York, October 19, with 69 crew and 65 passengers; Norwegian steamship *Mount Vernon*, for New Orleans, via Limon, October 22, with 22 crew and no passengers.

Mortality during week ended October 23, 1904.

Four deaths were reported during the week as follows: One Jamaican, negro, female, 50 years, dropsy; 1 Jamaican, negro, male, 40 years, cause not known; 1 Colombian, white, male, 44 years, disease of the chest; 1 Panaman, negro, male, 3 months, spasm.

No cases of quarantinable diseases have been reported either in Panama or Colon.

PERU.

Reports from Callao—Plague situation—Inspection and fumigation of steamship Chile.

Assistant Surgeon Lloyd reports, October 8 and 11, as follows:

During the two weeks ended October 1, 11 new cases of plague occurred in Lima and 1 in Callao (provisional).

At this writing more than thirty days have elapsed since a case of plague was reported in Salaverry, and twenty-eight days since the last case was reported in Payta. In Eten and Pacasmayo cases are still occurring.

On September 29 the British steamship *Chile* was issued a bill of health, after fumigation and inspection. Because this vessel failed to comply with the United States quarantine regulations on the day of sailing the bill of health was withheld until the following morning in order to secure this compliance.

The plague situation in South America, though apparently somewhat improved, is practically unchanged in so far as the danger of infecting other ports is concerned, and in my opinion restrictive measures should be continued until the general sanitary conditions are improved, whether we have few cases of plague or many.

Summary of plague.

Reports from Salaverry give 32 cases of plague with 19 deaths during the recent outbreak.

In Eten, from August 29 to October 5, there were 41 cases of plague with 21 deaths; population, about 6,000.

In Arica cases continue to occur frequently, and vessels, as a rule, are not calling there at present.

Suggestions relative to the docking and fumigation of vessels—Sanitary conditions in South American cities not satisfactory.

With the approval of the Bureau, bills of health issued to vessels which dock in Callao between the hours of sunset and sunrise will contain the following clause:

Vessels which lie at the dock between the hours of sunset and sunrise are not recommended by this office as absolutely safe risks, whether fumigated here or not.

I have not construed paragraph 14, page 16, of the United States quarantine regulations as being absolutely prohibitive of docking. Vessels frequently bring machinery and other heavy material that can not be very well handled on lighters, and I do not believe that docking in the daytime is attended with very much danger. Occasionally vessels complete their voyage here and after lying at the dock for several days receive orders to proceed to ports in the United States. The effect of the above clause placed on the bill of health will be to prevent the docking of vessels unless it is absolutely necessary, or at least it can easily be made to have this effect by proper measures at ports of entry in the United States.

I think that vessels which lie at the dock during the night at plague-infected ports ought to be fumigated to kill vermin on arrival at a port in the United States. Vessels which do not dock and which are fumigated here are probably safe risks, provided there is no chance for subsequent infection. Because of the comparatively short distance between this port and Ancon, Canal Zone, vessels do not dock here when north bound. Some dissatisfaction has been expressed in San Francisco because vessels bound to New York were received in New York without fumigation, while those of the Kosmos line were being fumigated in San Francisco. I wish to say that the fumigation in San Francisco has usually been at my suggestion and because the Kosmos steamers have not been complying with the regulations here in a satisfactory manner until quite recently, whereas I have had no such trouble with the steamers for New York. These steamers have frequently taken our bills of health and been fumigated by request when they were on their outward voyage and did not require a bill of health.

* * * * *

I believe we are justified in continuing sulphur fumigation until the coast towns of Chili, Ecuador, and Peru are placed in better sanitary condition, and I have suggested to many people concerned that we will be glad to remove restrictions from their commerce as soon as this is done.

* * * * *

I believe that Peru will shortly begin the work of general sanitation.

* * * * *

I do not wish to be understood as disparaging the efforts of the present sanitary authorities. * * * Their outgoing quarantine is perhaps as rigid as circumstances will allow. Their disposal of actual cases of plague and the treatment of infected houses has already been discussed in a previous communication.

TURKEY.

Report from Bagdad—Cholera.

Vice-Consul Hürner forwards the following, through the American legation at Constantinople, under date of September 15 and 22:

Weekly bulletin, September 3 to 10, 1904.

	Cases.	Deaths.
Bagdad	241	148
Kazemein	39	50
Solimkineh	18	18
Khanakin	8	5
Mendeli	13	2
Amara	19	13
Serbatiech	18	6
Menieb	4	2
Samara	5	8

Weekly bulletin, September 10 to 17, 1904.

	Cases.	Deaths.
Bagdad	163	122
Samara	10	7
Khanakin	5	1
Mendeli	27	5
Kazemein	71
Serbatiech	6	3
Delbauch	13	6
Dindieh	8	1
Kinrabad	7	4

WEST INDIES.

Reports from Barbados—Inspection and fumigation of vessels—Health of the Island.

Assistant Surgeon Ward reports, October 24 and 25, as follows:

During the week ended October 22, 1904, I inspected, and bills of health were issued to, 4 steamships with 177 crew, 54 steerage, and 42 cabin passengers, of whom 9 steerage and 6 cabin passengers were taken on at this port.

On October 22 I fumigated with sulphur dioxide all the compartments, including the holds, of the British steamship *Bernard*, from Para bound to Galveston, in water ballast, with 36 crew, all well; no passengers.

There have been no diseases of a quarantinable nature reported this week. The general sanitary condition of this island is good.

Smallpox on barkentine Ensenada, from Rosario, via Santos, for Santa Cruz, Cuba.

The British barkentine *Ensenada*, bound to Santa Cruz, Cuba, in stone ballast, where, it is expected, she will load cedar for New York, arrived at Barbados this morning, 29 days from Santos, with 2 cases of smallpox aboard. The vessel was placed in quarantine in the open bay and the sick were removed to Pelican Island.

Upon the invitation of the health authorities I visited the vessel about noon with one of the health officers and examined the sick. There were 4 men sick, the first and the second mate and 2 seamen. All were taken ill on or about October 18, 22 days out. The first mate, however, was soon able to be about, and he showed at no time any signs of an eruption. When I saw him, though he seemed far from well, he was not suffering from smallpox. The second mate was in his bunk, but, aside from a few crusts on his face, arms, and chest, he showed nothing characteristic. One of the seamen complained of great pain in his leg and he had a few papules on his chest, but it could not be said that he had smallpox. This man, however, was removed to Pelican Island with the second mate and the other seaman. The latter was the only really typical case aboard. This man was taken sick at the same time as the others, but when I saw him his face was covered with discrete pustules, with a rash of the same character on his wrist and a few on his chest. He showed no other symptoms at the time, but told me that when he was first taken sick he had a severe headache and backache and some fever. After the eruption came out he said he felt very much better, and had had no pain since. All those whom I saw who had been or were sick had been vaccinated at some period during their lives, though not very recently.

This vessel left Santos September 26, 1904, with 12 crew, all apparently well. She had come from Rosario to Santos, spending two weeks at the latter port. While there the captain placed no restrictions on his crew about going ashore. On September 30 one of the crew complained of headache, backache, and sore throat, with general weakness. In spite of treatment the man got worse. A day or two later a general macular eruption appeared on his body, but at no time did this change to papules. Just before this man's death, on October 7, the eruption changed to a bluish tinge, but with no "blood spots" perceptible. The dead man was buried at sea. * * *

The vessel is to be fumigated with sulphur dioxide, some new men are to be shipped here, and then be released that she may proceed to Cuba. I have been asked to assist the authorities here during the disinfection. Whether they expect to disinfect the dunnage of the men or not I am not in a position to say as yet.

I shall report further to you relative to the disinfection at the earliest possible moment.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

BRITISH GUIANA—*Demerara—Georgetown.*—Month of August, 1904. Estimated population, 36,567. Total number of deaths, 238, including 36 from tuberculosis.

CHILE—*Antofagasta.*—Month of September, 1904. Estimated population, 8,000. Total number of deaths, 52, including enteric fever 3 and 6 from tuberculosis.

DANISH WEST INDIES—*St. Thomas.*—Two weeks ended October 14, 1904. Estimated population, 11,012. Total number of deaths, 18. No deaths from contagious diseases.

Three months ended September 30, 1904. Total number of deaths, 194, including diphtheria 3, enteric fever 13, and 9 from phthisis pulmonalis.

DUTCH GUIANA—*Paramaribo*.—Month of September, 1904. Estimated population, 32,547. Total number of deaths, 79. No deaths from contagious diseases.

FRANCE—*Rouen*.—Month of September, 1904. Estimated population, 116,316. Total number of deaths 208, including diphtheria 2, enteric fever 2, measles 1, whooping cough 1, smallpox 4, and 37 from tuberculosis.

GERMANY—*Weimar*.—Month of September, 1904. Estimated population, 30,606. Total number of deaths 49, including 1 from enteric fever.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended October 15, 1904, correspond to an annual rate of 15.2 per 1,000 of the aggregate population, which is estimated at 15,271,287.

London.—One thousand two hundred and seventy deaths were registered during the week, including measles 15, scarlet fever 11, diphtheria 17, whooping cough 5, enteric fever 15, and 49 from diarrhea. The deaths from all causes correspond to an annual rate of 14.2 per 1,000. In Greater London 1,732 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 4 from measles, 2 from scarlet fever, and 1 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended October 15, 1904, in the 21 principal town districts of Ireland was 17.7 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Dundalk, viz, 4, and the highest in Galway, viz, 58.3 per 1,000. In Dublin and suburbs 162 deaths were registered, including enteric fever 1, whooping cough 3, and 21 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended October 15, 1904, correspond to an annual rate of 15.8 per 1,000 of the population, which is estimated at 1,726,236. The lowest rate of mortality was recorded in Perth, viz, 12.3, and the highest in Greenock, viz, 19.4 per 1,000. The aggregate number of deaths registered from all causes was 522, including diphtheria 8, measles 5, scarlet fever 4, and 21 from whooping cough.

MALTA.—Two weeks ended October 8, 1904. Estimated population, 197,070. Total number of deaths, 191, including diphtheria 1, and 4 from enteric fever.

SPAIN—*Barcelona*.—Ten days ended October 20, 1904. Estimated population, 600,000. Total number of deaths, 342, including diphtheria 3, enteric fever 20, whooping cough 2, smallpox 2, and 27 from tuberculosis.

Huelva.—Month of September, 1904. Estimated population, 20,000. Total number of deaths, 65, including diphtheria 1, enteric fever 1, and 12 from tuberculosis.

SWITZERLAND.—Reports for the two weeks ended October 8, 1904, from 18 cities and towns having an aggregate population of 808,000, show a total of 460 deaths, including diphtheria 9, enteric fever 2, measles 3, scarlet fever 5, whooping cough 6, and 58 from phthisis pulmonalis.

Cholera, yellow fever, plague, and smallpox, June 25 to November 11, 1904.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and from other sources.]

[For reports received from December 26, 1903, to June 24, 1904, see PUBLIC HEALTH REPORTS for June 24, 1904.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
