FOREIGN AND INSULAR.

AFRICA.

Report from Cape Colony—Plague—Examination for plague-infected animals—Infectious diseases.

COLONIAL SECRETARY'S OFFICE,
Cape Town, Cape of Good Hope, April 3, 1905.

The following report by the medical officer of health for the Colony on the occurrence of bubonic plague in the Cape Colony for the week ended April 1, 1905, is published for general information.

NOEL JANISCH,
Under Colonial Secretary.

Port Elizabeth.—No case of plague was discovered during the week. At the plague hospital no cases were under treatment. One hundred and ninety-one rats (9 found dead) and 213 mice (12 found dead) were bacteriologically examined during the week, of which 4 rats and 5 mice proved to be plague infected.

East London.—Five cases of plague were discovered during the week, 4 of the patients being European males and 1 a native male, the latter discovered after death at King Williams Town, whither he had recently arrived from East London. At the plague hospital no cases were discharged or died. Seven cases remain under treatment. One hundred and thirty-four rats (56 found dead) 37 mice (35 found dead) and 1 cat were bacteriologically examined during the week, of which 24 rats, 11 mice, and 1 cat proved to be plague infected.

Other districts of the Colony.—No plague infection was discovered either in man or animals. Four hundred and seven rodents were examined during the week from the Cape Town Harbor board area and the shipping in the harbor, and 630 were examined by the medical officer of health for the city from the Cape Town municipal area.

A. JOHN GREGORY,
Medical Officer of Health for the Colony.

Return of cases of infectious disease in the Cape division for the week ended April 1, 1905.

Total.....	6	5

AUSTRALIA.

Report from Brisbane—Epidemic dengue fever.

Consul Goding reports, March 25, as follows:

There is an epidemic of dengue fever in Brisbane, Queensland. More than one-half of the inhabitants have been stricken, although the death rate has been very low. It has greatly interfered with the transaction of business, both officially and privately, which condition continues and will continue for some time.

AUSTRIA-HUNGARY.

Report from Fiume—Inspection of emigrants—Disinfection of baggage.

Consular Agent La Guardia reports, April 15, as follows:

Steamship *Ultonia* sailed April 14 for New York; inspected and passed 1,342 steerage passengers; rejected 17 steerage and 2 cabin passengers; inspected and labeled 1,600 pieces small and 40 large baggage; disinfected 20 pieces (used feathers and bedding).

Reports from Trieste—Inspection of emigrants—Disinfection of baggage.

Consul Hossfeld reports, April 13, 15, and 17, as follows:

The Cunard steamship *Ultonia* left this port on April 12, bound for New York via Fiume and Palermo.

The number of steerage passengers embarked was 90; at the final inspection 21 were rejected.

The baggage of all the emigrants, consisting of 109 pieces, was disinfected.

The Austrian emigrant ship *Gerty* left this port for New York, via Palermo, on April 14.

The number of steerage passengers embarked was 1,415; at the final inspection 17 were rejected:

The number of pieces of baggage disinfected was 153.

The Cunard steamship *Slavonia* left this port on April 15, bound for New York, via Fiume and Palermo.

The number of steerage passengers embarked was 68; at the final inspection 10 were rejected.

The baggage of all the emigrants, consisting of 52 pieces, was disinfected.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended April 27, 1905. Present officially estimated population, 8,500; number of deaths, 7; prevailing diseases, mild type of malarial fever and influenza; general sanitary condition of this port and the surrounding country during the week, fairly good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 21	Olympia	41	5	13	0
22	Belize	18	4	13	0
26	B. Frank Nealley	8	0	0	0

CANADA.

Report from St. John, New Brunswick—Inspection of immigrants.

Passed Assistant Surgeon Billings reports as follows: Month of April, 1905. Number of immigrants inspected, 629; number passed, 622; number certified for rejection, 7; none certified for dangerous contagious or loathsome diseases.

Report from Vancouver, British Columbia—Inspection of immigrants.

Acting Assistant Surgeon Riggs reports as follows: Month of April, 1905. Number of immigrants inspected, 255; number passed, 251; number certified for rejection on account of dangerous contagious or loathsome diseases, 4.

CHINA.

Report from Hongkong—Inspection and fumigation of vessels—Quarantinable diseases—Emigrants recommended for rejection.

Passed Assistant Surgeon White reports, March 24 and April 3, as follows:

Precautions taken at Hongkong during the months of January, February, and March, 1905, for the protection of the public health of the United States, the Insular Territory, and the Republic of Panama.

Vessels inspected and granted bills of health	94
Vessels on which variola was found at inspection	2
Vessels fumigated to kill vermin	4
Vessels disinfected on account of variola	2

Examined for diseases contemplated in paragraphs 29 and 67 of the Quarantine

Regulations:

One bill of health to Panaman port was viséed.

CUBA.

Report from Cienfuegos.

Acting Assistant Surgeon McMahon reports, April 30, as follows: There were no transactions at this station during the week ended April 29, 1905.

No quarantinable disease has been reported at any point in this district during the week.

Report from Habana—Inspection of vessels—Case of tuberculosis on steamship Esperanza—Mortuary statistics.

Surgeon Wertenbaker reports, May 1, as follows: Week ended April 29, 1905.

Vessels inspected and bills of health issued.....	23
Crew of outgoing vessels inspected.....	943
Passengers of outgoing vessels inspected.....	855
Certificates issued for New Orleans and Mobile.....	13

On board the American steamship *Esperanza* there was 1 passenger in transit for the United States, suffering from tuberculosis of lungs.

No quarantinable diseases have been reported in the city or island during the week.

Mortality in Habana during the ten days ended April 20, 1905.

Disease.	Number of deaths.
Broncho-pneumonia.....	2
Cancer.....	8
Diphtheria.....	3
Enteric fever.....	2
Enteritis.....	10

Tuberculosis.....	28

Total number of deaths from all causes, 161.

Report from Matanzas—Inspection of vessels—Precautionary detention of steamship Irisbrook from Tampico—Mortality—Summary of transactions and mortality month of April, 1905.

Acting Assistant Surgeon Nuñez reports, May 2, as follows:

During the week ended April 29, 1905, four bills of health were issued to vessels leaving for United States ports.

The British steamship *Irisbrook*, from Tampico, Mexico, via Cardenas, Cuba, was held in precautionary quarantine for five days while loading sugar at this port. No sickness developed on board this vessel up to April 24, when she cleared for New York direct.

The contagious diseases officially reported during the week were: Scarlet fever, 1; enteric fever, 1; diphtheria, 1, and measles, 25 new cases with 2 deaths.

The rate of mortality for the last ten days of April is considerably larger than for any similar period, either in the previous year or in the present year, as will be noted by the following statistics:

Mortality, April 20-30, 1905.

Causes of death.	Number of deaths.	Bertillon number.
Arterio-sclerosis	4	81
Tuberculosis, pulmonary	8	27
Grippe	2	10
Lesion of the heart (unqualified).....	2	79
Septicæmia	1	20
Measles	2	6
Enteritis, infantile.....	4	105
Athrepsia.....	1	105
Hemorrhage, traumatic.....	2	166
Tetanus, infantile	1	72
Nephritis	1	119
Broncho-pneumonia.....	1	92
Cancer of the uterus.....	2	42
Syphilis.....	1	36
Calculus, urinary.....	1	122
Abscess of psoas muscle.....	1	149
Eclampsia, puerperal.....	1	138
Total.....	35

Annual average of mortality per mille for the 10 days, 26.61; estimated population, 48,000.

Summary of transactions, and mortality, month of April, 1905.

During the month of April, 1905, 20 bills of health were issued to vessels bound for United States ports with a total number of 534 crew, and 104 passengers in transit for several ports in Cuba. No certificates of vaccination were issued for the Canal Zone, nor for the Republic of Panama, as no passengers left during the month for any ports of the above-mentioned territory.

No quarantinable diseases have been reported within this district during the period covered by this report. The local epidemic of measles appears to be gradually abating. Scarlet fever in sporadic cases is still reported in same sections of town. A child in the stage of desquamation from scarlet fever, and who was attending school in that condition, was detected last week walking about the streets. The case evidently had been so mild that no medical aid had been demanded.

The following cases of contagious diseases have been officially reported during the month: Enteric fever, 3; measles, 59; scarlet fever, 2; diphtheria, 2.

The mortality for the past month shows a difference of only one in excess as compared with that of March, 1905. The principal cause of death, as usual, has been tuberculosis, followed by diseases of the respiratory system, as will be noted by the following summary report:

Mortality, month of April, 1905.

Disease.	Number of deaths.
Measles.....	2
Tuberculosis.....	16
Scarlet fever.....	2
Anthrax.....	1
Syphilis.....	1
Grippe.....	4
Cancer.....	3
Diseases of the nervous system.....	4
Diseases of the circulatory system.....	14
Diseases of the respiratory system.....	5
Diseases of the digestive system.....	14
Diseases of the genito-urinary system.....	5
Puerperal state.....	2
Other causes.....	2
Total	74

Annual average of mortality per mille, 18.51.

Report from Santiago—Inspection of vessels—Site for immigration station to be selected—Mortuary statistics.

Acting Assistant Surgeon Wilson reports, April 26, as follows:

During the week ended April 22, 1905, bills of health were issued to 5 vessels bound for the United States.

No quarantinable disease has been reported.

The secretary of the superior board of health of the island is here on an inspection tour to select a good place for an immigration station.

Mortuary report for the week ended April 22, 1905.

Causes of death.	Number.	Bertillon number.
Malarial fever.....	1	4
Malarial cachexia.....	1	4

Rupture of uterus.....	1	136
Congenital debility.....	1	151
Ill defined or unspecified.....	1	179
Total	26	

Annual rate of mortality for the week, 23.71 per 1,000. Estimated population, 45,500.

ECUADOR.

*Report from Guayaquil—Mortality—Smallpox and yellow fever—
Inspection of vessels from Chilean coast towns for Ancon—Epidemic
smallpox in coast towns not noted on bills of health.*

Acting Assistant Surgeon Gruver reports, April 20, as follows:
Week ended April 18, 1905:

Present officially estimated population, 60,000. Mortality from all causes, 68, as follows: Infectious fever, 6; paludic fever, 3; pernicious fever, 5; enteric fever, 1; fever (without classification), 9; enteric diseases, 14; smallpox, 3; tetanus, 4; tuberculosis, 7; whooping cough, 1; from all other causes, 15.

Death by ages: Less than 1 day, 5; 1 day to 1 month, 4; 1 month to 1 year, 19; 1 year to 5 years, 12; 5 to 10 years, 2; 10 to 20 years 1; 20 to 30 years, 6; 30 to 40 years, 9; 40 to 50 years, 2; 50 to 60 years, 4; 60 to 70 years, 2; 70 to 80 years, 2; 80 to 90 years, 1.

On April 15 steamship *Chile* cleared for Ancon with 1 passenger from this port. Twenty-one cabin and 3 steerage passengers from ports south were placed in quarantine to complete ten days from port of last exposure. This vessel came from ports along the Chilean and Peruvian coast, in many of which plague exists and smallpox is epidemic, but the American bills of health issued at the several ports omit any mention whatsoever of the condition. The bills of health from Antofagasta and Coquimbo, Chile, are especially remiss in this respect, as they are practically blank, except for the name of the vessel, its destination, and the signature of the consular officer.

April 18, steamship *Ecuador*, a coasting vessel, cleared for Ancon, Canal Zone, and Panama, Republic of Panama. A bill of health was issued for both ports. Crew, 59; cabin passengers, 23; steerage passengers, 12; all told, 94. Vessel, passengers, and crew not examined, but passed on a certificate from the ship's surgeon. These coasting steamers take no passengers from Guayaquil for Panama. Vessel not fumigated.

Fifteen laborers were taken on board the *Chile* to work cargo. These continued on as members of the crew to Panama, as the port regulations do not permit communication with vessels coming from the south except by the quarantine officers. They were vaccinated.

GERMANY.

Report from Berlin—Death rate of Berlin and other cities.

Consul-General Mason reports, April 23, as follows:

The death rate of Berlin for the week ended April 8 was higher than it has been for two months past, amounting, calculated on the year, to 17.2 per thousand of the population, thus being also considerably higher than the rate for the same week of last year, in which it amounted to only 14.7 per thousand. The following cities, however, had a higher death rate than Berlin, namely: Konigsberg, Breslau, Dresden, Aix-la-Chapelle, Munich, as well as Paris and Vienna. The rate of mortality of the following cities was slightly lower than the Berlin figure, viz: Hamburg, Bremen, Cologne, Frankfort on the

Main, Nuremberg, Hanover, Madgeburg, Halle, and also London. The following places showed considerably more favorable health conditions than Berlin—Rixdorf (with a death rate of 14.2), Charlottenburg (with 12.9), Schöneberg (with the minimum rate of 8.6), Leipzig, Brunswick, and Carlsruhe. The infant death rate in Berlin amounted to 4.3 per year and thousand, and was thus higher than the Hamburg and Liepzig figure, but lower than the Munich and Dresden rate.

There were registered 101 deaths from phthisis-pulmonalis, 126 deaths from acute diseases of the respiratory organs, 38 deaths from cancer, 10 deaths from scarlet fever, 9 deaths from measles, 7 deaths from diphtheria, 2 deaths from influenza. Finally, 24 persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended April 22, 1905: Present officially estimated population, 3,500; total number of deaths, 2; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 17	Drot	25	0	0	0
18	Olympia	41	12	0	0
18	John Wilson	17	0	0	0
20	Belize	18	13	0	0
21	Altai	47	21	0	0

The steamships *Drot*, *Olympia*, and *John Wilson* cleared from Puerto Barrios, Gautemala.

HAWAII.

Smallpox on steamship Coptic from oriental ports at Honolulu.

Chief Quarantine Officer Cofer reports, April 24, as follows:

The steamship *Coptic* from oriental ports arrived this morning with a case of smallpox on board in the steerage. The case, together with 401 steerage contacts, was removed to the quarantine station. The quarters occupied by these persons were disinfected and the San Francisco steerage passengers were bathed, disinfected, and returned to the steamer.

HONDURAS.

Report from Ceiba, fruit port.

Acting Assistant Surgeon Robertson reports as follows: Week ended April 22, 1905. Present officially estimated population about 4,000; 1 death; prevailing diseases, malarial, and a few cases of dysen-

tery; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 16	Nicaragua	18	0	0	0
21	Bratten	16	0	0	0
21	John Wilson	17	1	0	0

Report from Puerto Cortez, fruit port.

Acting Assistant Surgeon Carter reports as follows: Week ended April 21, 1905. Present officially estimated population, 4,000; 4 deaths; prevailing diseases, malarial fever of mild type; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 15	Hiram	14	3	0	0
16	Viator	17	0	0	0

INDIA.

Report from Bombay—Mortality—Plague and smallpox—Recommendations relative to general inoculation against plague.

Acting Assistant Surgeon Hume reports, April 15, as follows:

Mortality in Bombay City.

	Week ended—	
	Apr. 4, 1905.	Apr. 11, 1905.
Plague deaths	681	765
Plague mortality per 1,000	45.63	51.26
Smallpox deaths	118	86
Cholera deaths	0	0
Total deaths	1,506	1,488
Total mortality per 1,000	100.91	99.71

I have the honor to inclose a recommendation from the executive health officer to the Government of Bombay regarding the need of a scheme to bring about inoculation on a very extensive scale against plague.

Recommendations of the executive health officer of Bombay relative to antiplague inoculation.

When the Bombay Sanitary Association thought of organizing a health section at the Industrial and Agricultural Exhibition in Bombay (December, 1904, to February, 1905), it was suggested that Colonel Bannerman, the director of the plague research laboratory, should take this opportunity of laying before the public any new facts regarding the preparation and use of the plague prophylactic so that the confidence of the people, shaken by the Mulkowal disaster, should be restored. With this object in view the government gave permission to Colonel Bannerman to give demonstrations on the preparation and use of the prophylactic. The government of India, in granting its permission, emphasized the necessity of diffusing among the people the knowledge of the advantage of inoculation. The lectures and demonstrations of Colonel Bannerman at the health section were attended by a large number of persons, and the lecture was printed and circulated in Bombay.

The officers of the plague research laboratory are perfectly satisfied and have satisfied the government that the fluid now prepared is absolutely sterile; that it confers a greater immunity than previously; that the inoculation is harmless, and that the operation properly done can not cause any ill effects. The figures given by Colonel Bannerman show that immunity against plague can be conferred and that even if a person is incubating the disease the case will run a milder course.

Those who are in the best position to judge are absolutely positive that the fluid now prepared is sterile, that it is harmless to healthy men, and that it is a protection against plague.

The governments of India and of Bombay are fully satisfied that these three postulates are correct. In order to put before the public something tangible, I quote the latest figures on inoculation. The case rate of plague among the population of Bombay for the past eight years shows 23.2 per 1,000 of the population, and the mortality from plague 19.5 per 1,000 of the population. Taking the population at 800,000, 18,340 were attacked and 15,643 died annually.

Now, it is estimated that the death rate among the inoculated is 0.44 per mille of the population (in general), while among the Bombay population it is 1.9 per mille. Therefore, had the whole population of Bombay been inoculated only 3,250 would have died every year instead of 15,600, or 12,000 lives would have been saved annually, or 96,000 in eight years. In Bombay during the past eight years the case rate has been 23 per 1,000 and the mortality rate is 85 per cent of those attacked. The latest inoculation figures give the case rate among the inoculated as 18 per 1,000 and the mortality rate as 23 per cent of those attacked.

From my personal knowledge of the people I am sure that unless some great inducement be offered to them to accept inoculation very little can be done.

Report from Calcutta—Inspection and fumigation of vessels—Cholera and plague mortality—Plague in Rangoon.

Acting Assistant Surgeon Eakins reports, April 12, as follows:

During the week ended April 8, 1905, bill of health was issued to the steamship *Kybfels* bound for Philadelphia and New York with a

total crew, 56. The usual precautions were taken, holds fumigated, rat guards on wharf lines, and lascars effects disinfected.

During the week ended April 8, 1905, there were 58 deaths from cholera and 712 deaths from plague in Calcutta.

In Bengal during the week ended April 1, 1905, there were 10,488 cases of and 9,701 deaths from plague. In India during the same week 65,789 cases and 57,702 deaths.

Plague in Rangoon.

Up to April 11 there have been in Rangoon nearly 500 cases of plague, with 380 deaths. There is a panic among the natives, who are leaving in numbers at every opportunity.

ITALY.

Reports from Naples—Inspection of vessels—Plague in Mozambique—Infectious diseases in various countries—Anthrax in Russia—Anchylostomiasis and leprosy in Germany—Sanitary agreement between France and Italy.

Assistant Surgeon Foster reports, April 17, as follows:

During the week ended April 15, 1905, the following ships were inspected at Naples and Palermo:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage inspected and passed.	Pieces of baggage disinfected.	Number of steerage passengers recommended for rejection.

---------	-----------------------	-------------------	-----	----	-----	----

PLAGUE IN MOZAMBIQUE.

According to a notification dated February 2, 1905, a mild epidemic of plague has broken out among the natives in the Govuro district, Mozambique, about 70 miles south of Beira on the Save River. A physician was sent to this district by the government.

RUSSIA—ENTERIC FEVER AND ANTHRAX.

At St. Petersburg, Russia, from March 8 to 29, 1905, 691 cases of enteric fever were reported.

In the government of Viatka 6 cases of anthrax were reported from February 25 to March 3, 1905.

ANCHYLOSTOMIASIS—GERMANY.

From March 8 to 29, 1905, 82 cases of anchylostomiasis were reported in the Arnsberg mining district, Germany.

STRAITS SETTLEMENTS—QUARANTINE REGULATIONS.

On February 20, 1905, the port of Shanghai, China, was declared to be infected with smallpox.

LEPROSY—GERMANY.

In the German Empire, during the year 1904, there were officially registered 24 cases of leprosy. Of these, 19 cases occurred in Prussia, 3 at Hamburg, 1 in Mecklenburg-Schwerin, and 1 in Alsace-Lorraine.

BOSNIA AND HERZEGOVINA—INFECTIOUS DISEASES.

During the month of February, 1905, there were officially registered in Bosnia and Herzegovina 6,949 cases and 286 deaths from infectious diseases, including influenza 6,091 cases and 127 deaths; smallpox, 30 cases and 2 deaths; measles, 84 cases and 9 deaths; diphtheria, 14 cases and 6 deaths; whooping cough, 129 cases and 18 deaths; enteric fever, 39 cases and 10 deaths; scarlatina, 273 cases and 84 deaths, and trachoma 3 cases.

NORWAY—INFECTIOUS DISEASES.

In the cities of Norway during the year 1904 the following cases and deaths from infectious diseases were officially registered: Enteric fever, 406 cases and 41 deaths; puerperal fever, 80 cases and 22 deaths; scarlatina, 1,197 cases and 18 deaths; measles, 4,328 cases and 133 deaths; whooping cough, 1,755 cases and 49 deaths; diphtheria, 2,087 cases and 110 deaths; mumps, 852 cases; influenza, 8,818 cases and 41 deaths, and dysentery, 20 cases and 2 deaths.

For the month of February, 1905, the following cases and deaths from infectious diseases were registered in Norway: Enteric fever, 14 cases and 4 deaths; cerebro-spinal meningitis, 2 cases and 2 deaths; puerperal fever, 4 cases and 1 death; smallpox, 4 cases and 1 death (occurred at Christiania); scarlatina, 156 cases and 5 deaths; measles, 216 cases and 9 deaths; whooping cough, 555 cases and 24 deaths; diphtheria, 372 cases and 23 deaths; mumps, 100 cases; and influenza, 2,517 cases and 18 deaths.

MORTALITY—BUENOS AYRES.

Buenos Ayres.—Month of January, 1905: Estimated population, 982,261. Total number of deaths, 1,246, including enteric fever, 10; smallpox, 28; measles, 1; scarlatina, 1; whooping cough, 7; diphtheria, 3; dysentery, 3; leprosy, 2; erysipelas, 3; anthrax, 1; and pulmonary tuberculosis, 163.

SANITARY AGREEMENT BETWEEN FRANCE AND ITALY.

The French Government has invited the Italian Government to establish a sanitary agreement, based on the International Sanitary Convention of Paris, December 3, 1903, stipulating that both States

shall recognize and admit the efficacy of sanitary measures taken in each other's country, on board of ships coming from ports infected with plague and cholera. This measure will insure for a ship coming, for example, from India and having been subjected to the necessary sanitary measures in an Italian port, free pratique in a French port without further restrictions, and vice versa.

The proposed agreement would constitute a notable advantage to the commerce and navigation of both countries and the invitation has been willingly accepted by the Italian Government. The director general of public health in Italy (at present in Paris) has been authorized by the Italian Government to negotiate with the French authorities in regard to this matter.

Inspection of vessels—Infectious diseases in Italy—Plague in Egypt—Rules governing importation of hides into Ottoman ports—Measles in France.

During the week ended April 22, 1905, the following ships were inspected at Naples, Messina, and Palermo:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage inspected and passed.	Pieces of baggage disinfected.	Number of steerage passengers recommended for rejection.

ITALY—INFECTIOUS DISEASES.

For the week ended April 13, 1905, the following reports of infectious diseases in Italy were officially registered:

Smallpox.—There were reported 2 cases in the province of Lecce, 3 cases at Castelmezzano (Potenza), 3 cases at Syracuse, 3 cases at Augusta (Syracuse), 8 cases at Palermo, 2 cases at Monreale (Palermo), 5 cases at Caltagirone, and 23 cases in the province of Catania. Of these, 9 cases were in the city of Catania. Cases of smallpox were also reported in the provinces of Caltanissetta, Ancona, Perugia, and Massa.

Measles.—The malady is still epidemic in several communes of the province of Belluno.

Enteric fever.—Very few cases are reported.

Diphtheria.—Cases are reported at Catania, Rome, Milan, Clusone (Bergamo), Citta della Pieve, and Fabri (Perugia).

Pellagra.—The disease is still prevailing in the province of Perugia, but very few cases are now reported.

EGYPT—PLAGUE.

During the week ended March 30, 1905, the following cases of plague were reported in Egypt: March 29, 1905, 2 fatal cases were reported at Tanta el Gezireh, Tukh district, province of Kaliubieh, making a total number since January 1, 1905, of 11 cases and 8 deaths. One case was also reported in the Magaga district, province of Minieh, March 29, 1905. It is a recurrence of the epidemic which prevailed at that place March 31, 1904. On account of these cases of plague, outgoing quarantine was ordered in the Egyptian ports.

TURKEY—IMPORTATION OF HIDES.

By decision of the Turkish supreme council of health, dated February 28, 1905, the following regulations were put in force for the importation of hides into Ottoman ports from countries where epidemics are prevailing:

1. Raw hides arriving in good condition from countries where cholera, plague, or yellow fever prevail can be received only in a tannery. By raw hides are to be understood hides in a natural state and which have not undergone any preparation.

2. The same hides coming from a like source and which arrive in a putrid state of fermentation will be sent back or destroyed. In the latter case a declaration certifying to the bad state of the hides will be signed conjointly by the sanitary and local authorities.

3. All other kinds of hides, such as those salted, dried, smoked, prepared with arsenic, or having undergone a chemical process in order to prevent putrefaction, as well as tanned hides, will be freely admitted as merchandise and will not undergo the same treatment as those above mentioned.

FRANCE—MEASLES.

An epidemic of measles is prevailing in Pons, Charente-Inférieure, France. The college students have been sent to their homes.

JAPAN.

Report from Yokohama—Inspection of vessels—Smallpox on steamships Hudson and Firth of Dornoch—Rinderpest in Korea—Emigrants recommended for rejection.

Passed Assistant Surgeon Moore reports, April 2, as follows:

During the week ended April 1, 1905, three steamships, having an aggregate personnel of 404 crew and 268 passengers, were inspected and granted bills of health.

On the 1st instant the representative of this office, while inspecting British steamship *Hudson* prior to issuance of bill of health, discovered a mild case of smallpox in the person of a Chinese fireman. Bill of health was withheld pending the execution of suitable measures of

isolation, vaccination, and disinfection. The *Hudson* arrived at Shanghai from New York via ports on March 2, left Shanghai March 23, and arrived at Yokohama March 29, so that it is evident that the infection was contracted at Shanghai, thus swelling the already long list of recent instances of the development of smallpox on vessels arriving from Shanghai.

An engineer officer of the British steamship *Firth of Dornoch*, which arrived at Kobe from Rangoon via ports on March 23, is reported, April 5, to be ill with smallpox at the first-named port.

Rinderpest is reported prevalent in some parts of Korea.

Emigrants recommended for rejection.

Number of emigrants per steamship *Korea* recommended, April 4, 1905, for rejection: For Honolulu, 39; for San Francisco, 2.

Per steamship *Minnesota*, for Seattle, April 5, 1905, 12.

MEXICO.

Reports from Tampico—Inspection and fumigation of vessels—Mortality.

Acting Assistant Surgeon Frick reports, April 29 and May 1 and 2, as follows:

Week ended April 29, 1905: Inspected and passed 2 steamships, 196 crew (personnel) and 11 passengers. Fumigated and passed 3 steamships. Eight bills of health were issued during the week, 3 of the vessels expecting to sail April 30. Of the above-mentioned inspected and passed steamships, 1 sailing via Cuba was fumigated by the Cuban medical officer stationed at this port. I have heard of no quarantinable diseases being reported during the past week.

Mortality report for the week ended April 29, 1905.—Tuberculosis, 5; diarrhea, infantile, 1; pneumonia, 3; unknown, 1; syphilis, hereditary, 1; bronchitis, capillary, 1; fever, pernicious, 1; diarrhea, chronic ulcerative, 1; debility, congenital, 1; tetanus, 1; anemia, paludal, 1; cancer of the throat, 1; fever, bilious, 1; cachexia, 1; convulsions, 1; rachitis, congenital, 1; fever, intermittent, 1; affection of the breast, 1; injuries received at birth, 1; total number of deaths, 25. Mortality rate, 65 on estimated population of 20,000.

Inspection of vessels.

March 27 to 31, 1905.—Inspected and passed 3 steamships, 128 crew (personnel), 99 passengers.

Month of April, 1905.—Inspected and passed 17 steamships, 960 crew (personnel), 97 passengers. Fumigated 12 steamships. Of the steamships inspected and passed, sailing for the United States, via Cuban ports, 6 were fumigated by the Cuban medical officer stationed at this port. Adding the 6 vessels fumigated by the Cuban medical officer to the 12 fumigated by myself, the report would show 18 vessels of the 29 leaving this port for the United States as having been fumigated.

Report from Veracruz—Inspection and fumigation of vessels—Sanitary conditions—Mortality.

Passed Assistant Surgeon Wilson reports, April 25, as follows:
Week ended April 22, 1905—

Vessels inspected and bills of health issued	8
Vessels fumigated with sulphur to kill mosquitoes	3
Crew inspected and passed	283
Passengers inspected and passed	112

The health conditions have been similar to those of the previous few weeks, no quarantinable disease having been reported during the present calendar year. Of the 35 deaths reported for the week, 8 were due to tuberculosis, 3 to tetanus, 1 to measles, and 1 to meningitis.

NICARAGUA.

Report from Bluefields, fruit port.

Acting Assistant Surgeon Layton reports as follows: Week ended April 28, 1905. Present officially estimated population, 3,500; 1 death; prevailing diseases, malarial fever and tuberculosis; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 26	Condor	16	1	2	0
27	Utstein	16	5	0	0

Passed, after inspection, 300 cured alligator hides.

PANAMA.

Report from Colon—Inspection and fumigation of vessels—Fruit vessels to be fumigated by maritime quarantine service—Mortality.

Acting Assistant Surgeon Mohr reports, April 27, as follows:

During the week ended April 22, 1905, the following vessels cleared for ports in the United States and were granted bills of health:

American steamship *Advance* for New York, April 18, with 61 crew and 101 passengers.

British steamship *Beverly* for New Orleans, via Bocas del Toro, April 18, with 43 crew and 6 passengers.

Norwegian steamship *Urd* for a port in the United States, via Santiago, Cuba, April 18, with 25 crew and no passengers.

British steamship *Darien* for New Orleans, via Jamaica and Mexican ports, April 20, with 47 crew and 40 passengers.

American steamship *Finance* for New York, April 22, with 63 crew and 36 passengers.

The living quarters of the Norwegian steamship *Urd* were fumigated just prior to sailing for Santiago by the quarantine officer of Colon.

In the future all vessels of the United Fruit Company clearing from this port for New Orleans, via Bocas del Toro, will be fumigated before sailing by the maritime quarantine service of the Isthmian Canal Commission.

During the week ended April 25, 1905, 9 deaths have been officially reported, as follows: Malaria, 2; bilious fever, 1; pulmonary tuberculosis, 2; pneumonia, 1; capillary bronchitis, 1; diarrhea, 1; dropsy, 1.

There have been no more cases of yellow fever reported in Colon, since April 6, and none have been reported in Panama since March 27.

That thirty-one days should elapse without a case occurring in Panama, with its present large nonimmune population, and that so few cases have occurred in Colon, are evidence of the excellent work done by the sanitary department.

Report from Bocos del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows: Week ended April 22, 1905. Present officially estimated population not obtainable; no deaths; prevailing diseases, malarial fever; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage.
Apr. 15	J. B. Camors	Colon		4	0	(a)
16	Katie	Mobile	23	0	0	
18	Herald	Colon		10	0	(a)
19	Bound Brook	New Orleans	34	0	0	
20	Fort Morgan	Mobile	21	0	0	
21	Beverly	New Orleans	43	1	4	(a)

a Not inspected.

Steamship Fort Morgan shipped 1 coal trimmer.

Fruit vessels arriving from Colon bound for New Orleans not to be refumigated at Bocas.

Instructions have been sent the representative of the Louisiana State board of health that he need not fumigate fruit vessels arriving from Colon and bound to New Orleans, provided they have been so treated by this Service prior to their departure from Colon.

PERU.

Report from Callao—Plague situation—Smallpox on steamships Pentaur and Mapocho from Chilean ports; vessels disinfected.

Assistant Surgeon Lloyd reports, April 15, as follows:

Week ended April 9, 1905.

PLAGUE.

	New cases.	Died.	Recov-ered.	Remain- ing.
Chiclayo.....	5	5	8	16
Eten	0	0	0	2
Lambayeque.....	0	0	1	6
Huanchaco	0	0	2	0
Chepin.....	2	0	0	2
Mollendo	13	3	7	53
Callao.....	0	0	0	0
Lima.....	1	0	2	2
Total.....	21	8	20	81

On April 11 the German steamship *Pentaur* arrived here from Chilean ports with a case of smallpox among her coast (Chilean) crew. This case was removed and placed in quarantine and the entire personnel vaccinated. On April 13 the Chilean steamship *Mapocho* arrived with a case of confluent smallpox among her crew. Similar measures were taken, and in addition the vessel and effects of personnel were disinfected. Neither of these vessels was bound for ports in the United States or the Republic of Panama.

Bills of health from Arica, under date of April 10, report 4 new cases of plague during the two weeks just preceding. Plague has been reported in Valparaiso and newspapers in that port are discussing the matter, but the bill of health issued by the consul in Valparaiso gives no information on the subject, the column corresponding to the number of cases and deaths from plague being left entirely blank. Under the head of remarks concerning smallpox the disease is said to be prevalent with no definite statistics available.

The case of the young student who inoculated himself with plague, as reported last week, is progressing favorably at this writing.

Plague has been reported in Chanaral, province of Atacama, Chile.

PORTO RICO.

Report from Ponce—Mortuary statistics for the month of March, 1905.

Acting Assistant Surgeon Torres reports, April 27, as follows:

Mortuary statistics of the Ponce jurisdiction, city, playa, and surrounding country, for the month of March, 1905.

Digestive system	27	Tuberculosis	18
Nervous system	16	Enteric fever	1
Circulatory system	7	Grippe	7
Respiratory system	19	Hepatitis	2
Malarial fever	6	Uncinariasis	7
Hydroemia	1	Cancer	1
Anemia, inanition	6	Puerperal fever	3
Nephritis	6	Without official data	7
Old age	4		
Rhachitis	2	Total	143
Congenital malformation	3		

TURKEY.

Return of the pilgrimage of the Hedgaz—Arrivals and departures of vessels at quarantine station of Tor.

[From the Bulletin Quarantenaire, Alexandria, April 13, 1905.]

VESSELS ARRIVED FROM YAMBO AND TOR.

April 4, 1905.—British steamship *Assouan*, with 962 Egyptian pilgrims; 2 sick during voyage.

April 5.—Greek vessel *St. Georges*, with 681 Tripolitan pilgrims; destination, Tripoli in Barbary. Some cases of sickness during voyage.

April 8.—French steamer *Alsace*, with 922 Moroccans; destination, Tangier.

April 10.—British steamer *Mariout*, with 814 Egyptians.

April 12.—British steamer *Neghileh*, with 519 Egyptians.

Vessels cleared from Tor.

April 6.—British steamships *Missir* and *Fayoum* with 532 and 937 Egyptians.

April 8.—British steamer *Menzaleh*, 948 Egyptians; British steamer *Rahmanieh*, 671 Egyptians; Greek steamer *St. Georges*; pilgrims on steamship *Assouan* and French steamer *Alsace*.

April 12.—Egyptian pilgrims on steamers *Minieh* and *Mariout*.

Quarantine camp at Suakim.

April 9.—Arrival of the Sambouk *Foutouh el Kher* with 54 Sudanese. One case of ordinary sickness.

WEST INDIES.

Report from Barbados—Inspection of vessels—Certificates of vaccination for persons going to the Canal Zone—Examination of laborers for work on the Panama Canal—Beriberi on barkentine St. Paul from Forcados, West Africa.

Assistant Surgeon Ward reports, April 18, as follows:

During the week ended April 15, 1905, bills of health were issued to 1 steamship and 5 sailing vessels with 121 crew and 42 cabin and 161 steerage passengers. Of this number I inspected 1 steamship, 3 sailing vessels, 107 crew, and 161 steerage passengers, of whom 5 crew and 16 cabin and 42 steerage passengers were taken on at this port. A person suffering from a recurrent disease, wishing a third-class passage for the United States, was recommended for rejection.

On April 10 I viséed the bill of health of the Republic of Panama issued to the Royal Mail steamship *Tagus*, bound to Colon, via ports on the Caribbean Sea, with 149 crew and 24 laborers and passengers. There were 15 certificates of vaccination issued to deck passengers for Colon and 174 to laborers recruited for work on the Panama Canal.

For the two weeks ended April 15 I examined 240 men to ascertain their fitness to act as laborers for work on the Panama Canal, and rejected 57.

The British barkentine *St. Paul*, from Forcados, West Africa, in sand and stone ballast, cleared April 11, for Providence, R. I., via Turks Island, to load salt. On her arrival at this port a seaman suffering from beriberi (paraplegic form) was removed to the general hospital. The captain, who is suffering from the dropsical or wet form of the same disease, did not feel sufficiently ill to leave the vessel. The rest of the crew, 8 in number, including the 2 men shipped at this port, are well.

The sanitary condition of this island continues good; no quarantinable diseases have been reported.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—YEARLY AND MONTHLY.

AFRICA—*Sierra Leone.*—Two weeks ended March 24 and April 7, 1905. Estimated population, 50,000. Total number of deaths, 22 and 23, respectively. No deaths from contagious diseases reported. Smallpox increasing.

BRAZIL—Pernambuco.—Two weeks ended March 15, 1905. Estimated population, 200,000. Total number of deaths, 374, including enteric fever 4, measles 1, smallpox 181, and 39 from tuberculosis.

Two weeks ended March 31, 1905. Total number of deaths, 515, including measles 1, whooping cough 1, smallpox 240, and 51 from tuberculosis.

CHILE—Antofagasta.—Month of January, 1905. Estimated population, 16,000. Total number of deaths, 69, including enteric fever 4, scarlet fever 1, whooping cough 3, smallpox 1, and 9 from tuberculosis.

Month of February, 1905. Total number of deaths, 62, including whooping cough 1, smallpox 1, and 8 from tuberculosis.

FRANCE—Rouen.—Month of March, 1905. Estimated population, 116,316. Total number of deaths, 270, including enteric fever 4, scarlet fever 1, whooping cough 3, smallpox 4, and 42 from tuberculosis.

St. Etienne.—Two weeks ended March 31, 1905. Estimated population, 146,671. Total number of deaths, 157, including enteric fever 1, measles 1, and 28 from tuberculosis.

GERMANY—Weimar.—Month of March, 1905. Estimated population, 30,829. Total number of deaths, 45, including 6 from tuberculosis.

GIBRALTAR.—Two weeks ended April 16, 1905. Estimated population, 27,460. Total number of deaths, 30, including diphtheria 1, enteric fever 1, and 3 from measles.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended April 15, 1905, correspond to an annual rate of 16.6 per 1,000 of the aggregate population, which is estimated at 15,609,377.

London.—One thousand four hundred and forty-three deaths were registered during the week, including measles 47, scarlet fever 13, diphtheria 14, whooping cough 64, enteric fever 6, and 14 from diarrhea. The deaths from all causes correspond to an annual rate of 16.1 per 1,000. In Greater London 1,971 deaths were registered. In the "outer ring" the deaths included 4 from diphtheria, 7 from measles, 2 from scarlet fever, 14 from whooping cough, and 1 from diarrhea.

Ireland.—The average annual death rate represented by the deaths registered during the week ended April 15, 1905, in the 21 principal town districts of Ireland was 23.3 per 1,000 of the population, which is estimated at 1,093,959. The lowest rate was recorded in Lurgan, viz, 4.4, and the highest in Ballymena, viz, 58.1, per 1,000. In Dublin and suburbs 167 deaths were registered, including diphtheria 1, enteric fever 1, measles 4, scarlet fever 1, diarrhea 1, whooping cough 3, and 28 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the

week ended April 15, 1905, correspond to an annual rate of 18.0 per 1,000 of the population, which is estimated at 1,749,917. The lowest rate of mortality was recorded in Paisley, viz, 14.0, and the highest in Greenock, viz, 24.5, per 1,000. The aggregate number of deaths registered from all causes was 603, including diphtheria 6, measles 17, scarlet fever 1, and 36 from whooping cough.

ITALY—*Naples*.—Month of February, 1905. Estimated population, 572,368. Total number of deaths, 1,572, including diphtheria 10, enteric fever 1, measles 5, smallpox 1, and 72 from tuberculosis.

ST. HELENA.—Three weeks ended April 1, 1905. Estimated population, 3,342. Total number of deaths, 4. No deaths from contagious diseases.

WEST INDIES—*St. Thomas*.—Three weeks ended April 14, 1905. Total number of deaths, 15, including 3 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, December 31, 1904, to May 12, 1905.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from June 25 to December 30, 1904, see PUBLIC HEALTH REPORTS for December 30, 1904.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
