

## PUBLIC HEALTH REPORTS.

### SUMMARY OF SANITARY REPORTS.

#### *Status and progress of epidemics.*

*Asiatic cholera*.—According to an official notification, 1 case of Asiatic cholera was reported May 2 at Ashabad, Transcaspian province of Russia, and 1 case May 4 at Tzaritzin, government of Saratow, Russia. In view of the threatening danger of an epidemic of cholera, arrangements have been made for the construction of barracks and a bacteriological station at Wilna, a city with a considerable trade and a population of about 100,000. Wilna is a railroad center, the capital of a province of the same name, and is situated only about 100 miles from the German frontier. Because of information received by the Austro-Hungarian Government, that Asiatic cholera has ceased to prevail at Baku and Batum in Transcaucasian Russia, Austria-Hungary suspended the sanitary measures adopted against arrivals from the places mentioned.

*Bubonic plague*.—It was announced May 20 that bubonic plague had broken out in the Bahrein Islands, Turkish territory in the Persian Gulf, with a Mohammedan population, engaged principally in the pearl and tortoise fishery and the exportation of dates and other fruits. The fishery employs during the season a large number of boats, and some Bahrein ships are employed in the India trade, a sort of shipping difficult to regulate in regard to sanitation.

During the week ending May 13 there was a fatal case of plague at Manila. The previous week 2 cases of the disease, with 1 death, occurred at Manila and 2 fatal cases at Cebu. June 20, there was a death from plague at Waipahu, near Honolulu.

*Yellow fever*.—As shown from reports, the west coast of South America is comparatively free from yellow fever. Ecuador, which does not appear to share the plague epidemic prevailing in Peru and Chile, has suffered, however, from yellow fever during the past six months, deaths being reported from Guayaquil, the last during the week ending May 23. These cases have occurred during the half year of rain just finished, ending with it the local trade on the estuaries of the rivers dependent on wet weather for navigation. Guayaquil is on the mail route, 835 nautical miles south of Panama, and connected with the places north and south by a port-to-port service. The public

health of Guayaquil is of especial importance to United States interests, because it is the only port on the Pacific coast of South America in which the volume of trade engaged in by United States vessels approaches that carried on under the German and British flags.

A railroad operated by an American company extends inland from Guayaquil, the chief market for foreign goods. Work is being done on railroad connections between the port and Quito, the capital, in the Andes, nearly 10,000 feet above the sea level, a height which in the past has been reached only by a journey of 320 miles by means of pack animals, difficulties of transportation having their fortunate side in limiting the spread inland of epidemic disease.

The consul at Belize, British Honduras, reports under date of June 9, that the last case of yellow fever there occurred June 1. At Puerto Cortez, Honduras, 1 additional case, fatal, was reported June 6.

In the canal zone there were 18 cases and 3 deaths from June 1 to June 12. The consul-general telegraphs from Panama under date of June 16 that in fifteen days there had been 24 cases of yellow fever and 6 deaths, and that the epidemic is increasing.

#### GENERAL SANITARY INFORMATION.

*Ainhum and leprosy.*—L. E. Ashley-Emile, of Mopra, Zambezi River, East Africa, discusses in the Journal of Tropical Medicine, February 1, 1905, the question whether ainhum, which is spread widely over the African continent, particularly on the west coast, is a manifestation of leprosy. Zambaco Pascha, an authority on leprosy, is of the opinion that this obscure disease is a modified form of leprosy, a view in which Ashley-Emile coincides. He believes ainhum to be a leprous manifestation occurring in persons not the subjects of typical leprosy, but of a leprous diathesis. Classical leprosy and ainhum have not been observed occurring together in the same person, but the subjects of ainhum often present the facial appearance of lepers and are in close family relationship with them.

*Mortality statistics of the United States for 1903.*—In the present number of the Public Health Reports a table is published giving the mortality statistics of 1,423 cities and towns in the United States for the calendar year 1903, compiled from 1,423 reports received in reply to 3,750 circular letters sent to local boards of health and health officers. The table for the year 1902, published in the Public Health Reports for August 7, 1903, did not contain, as does the present one, a table of the annual mortality for the year under consideration as estimated by the Bureau of the Census. The mortality for 1902 was reckoned only according to the population for the census year 1900 and the locally estimated population. The census population for the year 1903, the added feature of the present tables, has been estimated by the Bureau of the Census in accordance with a provision whereby

that Bureau is directed by Congress to prepare such annual estimates in the interval between decennial censuses. The method used by the Census Bureau in the preparation of the annual estimates is the so-called arithmetical one, a system which, though admittedly subject to uncertainty, has been shown by experience to come nearer to accuracy than any other available method.

Director S. N. D. North, of the Census Bureau, writes, in his letter of transmittal of the estimates of population of the larger cities of the United States in 1901, 1902, and 1903, that the method "rests on the assumption that the annual increase for each year since the last census would be one-tenth of the decennial increase between the last two censuses. The country as a whole, and most of the States and cities," he continues, "are growing with a steadily decreasing per cent of increase. As this condition has obtained in the United States for the last twenty years, it is likely to hold good in the immediate future. Under such conditions the arithmetical method has been proved more accurate than any alternative method available."

The Director of the Census states that undoubtedly in a number of individual cases the estimates will ultimately prove to be wide of the truth, but even in such cases it is believed they will be of value in establishing a basis for the computation of statistical rates.

The estimated population (local), on which mortality has also been estimated in the tables, is that furnished directly to the Public Health and Marine-Hospital Service by the local boards of health or health officers in their entries on the forms used in making their reports.

The favorable features of these local estimates are evident. They were made by officials on the spot at the very time the death statistics were furnished and were gathered from police enumerations, directory canvasses, and intimate personal knowledge of local conditions.

The particular instances in which the census and the local estimates are at variance and the resulting divergence in annual mortality can be seen by an examination of the tables. The tables, which do not include towns of under 1,000 inhabitants, cover an aggregate population of 22,400,567, according to the United States census of 1900, which gives the total population of the mainland of the United States as 75,994,575.

The population covered, as estimated December 31, 1903, by the Bureau of the Census, is 24,072,374, and as locally estimated is 25,430,232. It should be observed, however, in drawing conclusions from these general figures, that in some cases the estimate of population of individual municipalities has not been furnished by the Bureau of the Census, from inability to obtain data, and is hence omitted from the tables.

All the places included in the tables except Honolulu (population 39,306, census 1900) are comprised in the mainland of the United

States. A distinction is made in census work between the mainland of the United States and the entire area of enumeration, excluding from the mainland enumeration the population of Alaska and Hawaii and persons in the military and naval service of the United States (including civilian employees) stationed abroad. There were in 1903 about 3,750 cities and towns in the United States having a population of 1,000 or over. The exact numbers can not be precisely determined, except after the lapse of a certain period, for the reason that municipalities are constantly consolidating, large cities by suburban extension absorbing surrounding incorporated places, and places of all sizes meeting others in their spread from initial centers.

Figures from 1,423 of the 3,750 municipalities were utilized. Thus the grand totals furnish fairly accurate annual mortality figures for the urban population of the United States for the year 1903, namely, 16.12 per mille of the Census Bureau's estimated population for the year and 15.43 per mille of the locally estimated population. A calculation of annual mortality founded on the official United States census for 1900 yields a rate of 17.52 per mille. The tables published for the year 1902 gave an annual mortality of 16.84 per mille, reckoned on the United States census of 1900, and 15.38 on the locally estimated population. The variance of results obtained by the use of the Census figures for 1900 and of the local estimates is seen to be greater with the advance of a year from the date of the decennial census. The object of the yearly United States census estimate is to rectify such variances, as far as possible, and for this reason has been used in preparing the tables of mortality. The tables show a grand total of 43,269 deaths from tuberculosis in 1903 among the population covered by the reports. In 1902 the tables gave 41,404 deaths from this infection among a population of 22,469,816, based on the official United States census for 1900.

---

## UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

### *Vaccination in Boston, Mass.*

The following is received from the Department of health of Boston, through Surgeon Woodward, under date of June 15:

For the eight months beginning October 1, 1904, and ended May 31, 1905, there were 1,749 vaccinations with the State virus. Of these 1,692 were primary vaccinations and 57 secondary vaccinations. For successful primary vaccination 276 certificates were issued; for successful secondary vaccination 12 certificates. During this time there were returned 12 cases of unsuccessful primary vaccination and 11 cases of unsuccessful secondary vaccination, or 23 in all. Of the 12

unsuccessful primary cases, after rescarification 4 returned successfully vaccinated. The remaining 8 did not come back to this office.

	Vacci-nated.	Certi-ficates issued.		Vacci-nated.	Certi-ficates issued.

*Report from Gulf Quarantine, Miss.—Steamship Hiram discharged from quarantine.*

Passed Assistant Surgeon Wille reports, June 12, as follows:

The steamship *Hiram* was discharged from this quarantine yesterday morning, June 11, there having been no developments beyond the 2 cases of yellow fever previously reported. This vessel was held seven days after sulphurization less five hours, which time would be consumed in proceeding to Mobile.

*Report from Gulfport, Miss.—Death from enteric fever.*

Acting Assistant Surgeon Sheely reports, June 11, as follows:

During the past week there occurred 1 death from enteric fever in the third week; otherwise there is nothing of importance to report.

**INSPECTION SERVICE, MEXICAN BORDER.**

*Inspection at Eagle Pass, Tex.*

Acting Assistant Surgeon Hume reports as follows:

	Week ended June 11, 1905.
Persons inspected on trains .....	169
Persons held .....	0

*Inspection at El Paso, Tex.*

Acting Assistant Surgeon Alexander reports as follows:

Week ended June 10, 1905.

Inspection Mexican Central passengers, 217; inspection Mexican Central immigrants, 87; inspection of Japanese, 2; inspection of Spaniards, 4; inspection certificate cause of death of corpse transferred into the United States, 1; disinfection of soiled linen imported for laundry work, 517 pieces; vaccination of children of immigrants, 7.

*Inspection at Laredo, Tex.*

Acting Assistant Surgeon Hamilton reports, June 13, as follows:  
Week ended June 10, 1905.

Passenger trains from Mexico inspected, 14; persons on passenger trains from Mexico inspected, 592; immigrants on passenger trains from Mexico inspected, 49; immigrants from Mexico vaccinated upon entry, 13; persons detained or refused entry for reason of being from or having passed through Tierra Blanca within five days, 37.

**STATISTICAL REPORTS OF STATES AND CITIES OF THE UNITED STATES,  
YEARLY AND MONTHLY.**

**CALIFORNIA—*Los Angeles.***—Month of May, 1905. Estimated population, 180,000. Total number of deaths 256, including cerebro-spinal meningitis 4, diphtheria 1, enteric fever 4, scarlet fever 1, whooping cough 4, and 57 from tuberculosis.

**Sacramento.**—Month of May, 1905. Estimated population, 35,000. Total number of deaths 49, including diphtheria 1, enteric fever 1, and 3 from tuberculosis.

**Stockton.**—Month of May, 1905. Census population, 19,500. Total number of deaths 14, including 1 from tuberculosis.

**ILLINOIS—*Danville.***—Period from May 5 to 31, 1905. Estimated population, 25,090. Total number of deaths, 34, including 3 from tuberculosis.

**Rockford.**—Month of April, 1905. Estimated population, 37,000. Total number of deaths, 43, including enteric fever 2, and 4 from tuberculosis.

**INDIANA.**—The Monthly Bulletin of the State board of health gives the following:

Total number of deaths month of April, 1905, 2,639; rate, 12.1. In the corresponding month last year, 3,322 deaths; rate, 15.2. In the preceding month, 3,656 deaths; rate, 16.2. Deaths by important ages were: Under 1 year, 309 deaths, or 12.6 per cent of the total deaths; 1 to 5, 142; 5 to 10, 51; 10 to 15, 52; 15 to 20, 110; 65 and over, 730, or 29.8 per cent. Some important causes of death were: Pulmonary tuberculosis, 344; other forms of tuberculosis, 46; typhoid fever, 27; diphtheria, 13; scarlet fever, 23; whooping cough, 14; pneumonia, 223; diarrheal diseases, 18; cerebro-spinal meningitis, 46; influenza, 35; puerperal fever, 15; cancer, 86; violence, 132; smallpox, 4.

**LOUISIANA—*New Orleans.***—Month of May, 1905. Estimated population, 325,000; white, 239,000; colored, 86,000. Total number of deaths, 712; white, 422; colored, 290, including diphtheria 2, enteric fever 6, whooping cough 6, smallpox 1, and 92 from tuberculosis.

**MICHIGAN.**—The total number of deaths reported to the department of state for the month of May, 1905, was 2,700, a decrease of 322 from April. The death rate was 12.5 per 1,000 population, as compared with 14.4 for the preceding month.

By ages there were 456 deaths of infants under 1 year, 140 deaths of children aged 1 to 4 years, and 837 deaths of elderly persons aged 65 years and over.

Important causes of death were as follows: Tuberculosis of the lungs, 204; other forms of tuberculosis, 28; typhoid fever, 22; diphtheria and croup, 28; scarlet fever, 5; measles, 20; whooping cough, 16; pneumonia, 171; meningitis, 43; cancer, 147; accidents and violence, 181.

There were also 18 deaths from smallpox: 1 in the city of Detroit, 1 in the city of Big Rapids, Mecosta County; 1 in Walker Township, Kent County; and 15 in the city of Grand Rapids.

MINNESOTA—*Winona*.—Month of May, 1905. Estimated population, 23,000. Total number of deaths, 18, including diphtheria 1, and 2 from phthisis pulmonalis.

NEW HAMPSHIRE—*Franklin*.—Month of May, 1905. Estimated population, 6,000. Total number of deaths, 5, including 1 from tuberculosis.

*Manchester*.—Month of May, 1905. Estimated population, 62,000. Total number of deaths, 109, including cerebro-spinal meningitis 10, enteric fever 1, measles 2, and 8 from tuberculosis.

NEW JERSEY—*West Hoboken*.—Two weeks ended June 11, 1905. Estimated population, 30,000. Total number of deaths not reported. No deaths from contagious diseases reported.

NEW YORK—*Auburn*.—Month of May, 1905. Estimated population, 38,500. Total number of deaths, 45, including diphtheria 1, enteric fever 1, measles 1, and 5 from tuberculosis.

*Buffalo*.—Month of May, 1905. Estimated population, 400,000. Total number of deaths, 447, including diphtheria 8, enteric fever 3, measles 6, scarlet fever 2, whooping cough 8, and 55 from tuberculosis.

*Syracuse*.—Month of May, 1905. Estimated population, 120,000. Total number of deaths 147, including diphtheria 1, enteric fever 2, scarlet fever 4, and 14 from tuberculosis.

OHIO—*Cleveland*.—Month of May, 1905. Estimated population, 440,000. Total number of deaths 499, including diphtheria 1, enteric fever 6, measles 2, scarlet fever 1, whooping cough 2, and 53 from tuberculosis.

*Columbus*.—Month of April, 1905. Census population, 125,560. Total number of deaths, 173, including diphtheria 2, enteric fever 12, whooping cough 3, smallpox 2, and 30 from tuberculosis.

Month of May, 1905. Total number of deaths, 142, including cerebro-spinal meningitis 3, diphtheria 1, enteric fever 5, whooping cough 2, and 17 from tuberculosis.

**TENNESSEE—Chattanooga.**—Month of May, 1905. Estimated population, 40,000; white 27,000, colored 13,000. Total number of deaths, 37; white, 24; colored, 13, including 6 from phthisis pulmonalis.

**UTAH—Ogden.**—Month of May, 1905. Estimated population, 20,000. Total number of deaths, 22, including 1 from diphtheria.

**WASHINGTON—Tacoma.**—Month of May, 1905. Estimated population, 70,000. Total number of deaths, 49, including diphtheria 1, and 3 from phthisis pulmonalis.

#### ARRIVALS OF IMMIGRANTS.

##### *Report of immigration at Baltimore.*

*Mortality statistics of 1,423 cities and towns of the United States for the year ended December 31, 1903.*

The following table shows the mortality of each city, incorporated town, and village, the mortality rate being based upon the population according to the United States census of 1900, the Census Bureau's estimated population for 1903, and the local estimated population for 1903. It also gives the total mortality from certain contagious diseases.

This table has been compiled and prepared in the Bureau of Public Health and Marine-Hospital Service from replies received in response to the following circular letter, which was addressed to every city, incorporated town, and village in the United States having a population according to the United States census of 1900 of 1,000 or more.

The total number of letters thus addressed was 3,750; 1,716 replies were received, of which number only 1,423 could be utilized, 293 being incomplete.

Form 8958.]

[Circular letter.]

*Information relative to mortality and morbidity statistics.*

TREASURY DEPARTMENT,  
BUREAU OF PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE,  
Washington, D. C., January, 1904.

*To the Secretary of the Local Board of Health or Local Health Officer.*

SIR: I have to request that you will furnish this Office, at your earliest convenience, with the following information relative to the mortality and (as far as possible) the morbidity statistics of the city, incorporated town, or village of ..... during the year 1903:

Population, United States official census of 1900 .....  
 Estimated population .....  
 Total number of deaths from all causes, including those from noncontagious diseases, accidents and violence (stillbirths excluded) .....  
 Death rate per 1,000 of the estimated population .....

Disease.	Cases.	Deaths.	Disease.	Cases.	Deaths.
Tuberculosis .....	.....	.....	Measles .....	.....	.....
Smallpox .....	.....	.....	Scarlet fever .....	.....	.....
Varioloid .....	.....	.....	Diphtheria .....	.....	.....
Typhus fever .....	.....	.....	Membranous croup .....	.....	.....
Typhoid fever .....	.....	.....	Whooping cough .....	.....	.....

A penalty envelope, addressed to this Office, is inclosed for the return of this circular letter, and you are further requested to return the letter in case it is found impossible to make the desired entries in the above table, with a statement to that effect.

Respectfully,

WALTER WYMAN, Surgeon-General.

Name of city or town .....

### AFRICA.

*Report from Cape Colony—Plague—Examination for plague-infected rodents.*

COLONIAL SECRETARY'S OFFICE,  
*Cape Town, Cape of Good Hope, May 15, 1905.*

The following report by the medical officer of health for the Colony, on the occurrence of bubonic plague in the Cape Colony for the week ended May 13, 1905, is published for general information.

NOEL JANISCH,  
*Under Colonial Secretary.*

*Port Elizabeth.*—No case of plague was discovered during the week. At the plague hospital 1 case remains under treatment. 256 rats (29 found dead) and 327 mice (26 found dead) were bacteriologically examined during the week, of which 12 rats and 10 mice proved to be plague infected.

*Uitenhage.*—82 rats (7 found dead) and 87 mice (5 found dead) were bacteriologically examined during the week, of which 2 mice proved to be plague infected.

*East London.*—8 cases of plague were discovered during the week, namely: 6 native males (3 found dead) and 2 native females. At the plague hospital 2 European and 1 colored male were discharged, and 1 native male died. 16 cases (including 3 from King Williams Town and 1 from Fort Beaufort, the latter admitted during the week), remain under treatment. 107 rats (63 found dead), 21 mice (17 found dead), were bacteriologically examined during the week, of which 17 rats and 3 mice proved to be plague infected.

*King Williams Town.*—No case of plague was discovered during the week; 208 rats (166 found dead) and 70 mice (60 found dead) were bacteriologically examined during the week, of which 18 rats and 8 mice proved to be plague infected.

*Queenstown.*—1 case of plague, in the person of a native, was discovered (after death) at Mousa during the week. The patient had recently arrived in the Queenstown district from East London.

*Other districts of the colony.*—No plague infection was discovered either in man or animals. 414 rodents were examined during the week from the Cape Town harbor board area and the shipping in the harbor, and 606 were examined by the medical officer of health for the city from the Cape Town municipal area.

A. JOHN GREGORY,  
*Medical Officer of Health for the Colony.*

### BRAZIL.

*Reports from Bahia—Mortuary statistics—Smallpox and typhus fever.*

Consul Furniss reports, April 17 and 24, and May 1, 8, and 15, as follows:

During the week ended April 15, 1905, there were interred in the Bahia cemeteries 71 bodies. The causes given for interment were the following: Aneurism, 1; arterio-sclerosis, 5; asphyxia, 1; berberi, 1;

Bright's disease, 2; bronchitis, 4; cancer, 1; cerebral congestion, 4; cirrhosis of liver, 2; diarrhea and dysentery, 6; diphtheria, 1; epilepsy, 1; hepatitis, 2; malarial fever, 3; meningitis, 1; organic diseases of heart, 1; pneumonia, 1; pulmonary tuberculosis, 7; rachitis, 1; senile debility, 1; stillborn, 1; syphilis, 1; tetanus, 1; tetanus neonatorum, 2; typhus fever, 1; other causes, 19.

Week ended April 22, 1905, 68 bodies. Causes given for interment: Arterio-sclerosis, 3; beriberi, 4; bronchitis, 2; cerebral congestion, 2; death by violence, 3; diarrhea and dysentery, 7; gangrene, 1; hepatitis, 2; malarial fevers, 4; organic diseases of heart, 4; pneumonia, 3; pulmonary tuberculosis, 7; rachitis, 2; senile debility, 3; septicæmia, 1; stillborn, 8; tetanus neonatorum, 1; enteric fever, 1; uræmia, 2; other causes, 8.

Week ended April 29, 1905, 58 bodies. Causes given for interment: Alcoholism, 1; asphyxia, 1; arterio-sclerosis, 2; beriberi, 1; Bright's disease, 1; bronchitis, 4; cerebral congestion, 2; cirrhosis of liver, 1; diarrhea and dysentery, 10; fibroma, 1; hepatitis, 1, malarial fevers, 3; nephritis, 1; pulmonary tuberculosis, 17; senile debility, 1; still-born, 2; syncope, 1; syphilis, 1; enteric fever, 1; other causes, 6.

Week ended May 6, 1905, 66 bodies. Causes given for interment: Arterio-sclerosis, 3; Bright's disease, 1; bronchitis, 8; cerebral congestion, 4; cirrhosis of liver, 1; diarrhea and dysentery, 9; erysipelas, 1; hepatitis, 1; malarial fevers, 3; nephritis, 1; organic diseases of heart, 2; pneumonia, 1; pulmonary tuberculosis, 14; rachitis, 1; scabies, 1; senile debility, 1; stillborn, 2; syncope, 1; tetanus, 2; other causes, 9.

There were reported 5 cases of smallpox, with no deaths.

Week ended May 13, 1905, 87 bodies. Causes given for interment: Apoplexy, 1; arterio-sclerosis, 4; asphyxia, 1; beriberi, 1; Bright's disease, 1; bronchitis, 3; cerebral congestion, 2; cirrhosis of liver, 1; diarrhea and dysentery, 7; epilepsy, 1; hepatitis, 2; malarial fevers, 7; meningitis, 5; organic diseases of heart, 3; pleurisy, 1; pulmonary tuberculosis, 14; senile debility, 5; septicæmia, 1; smallpox, 1; still-born, 8; syncope, 1; tetanus neonatorum, 1; other causes, 15.

During the same period there were reported 11 cases of smallpox, with 1 death.

*Report from Rio de Janeiro—Inspection of vessels—Cholera and plague in various countries—Emigration and immigration in Argentina—Mortality in cities in Brazil; plague in São Paulo; smallpox and yellow fever in Rio.*

Acting Assistant Surgeon Stewart reports, May 16, as follows:

During the week ended the 13th instant the following vessels were inspected by me before departure and bills of health issued from this consulate-general: On the 10th instant the German steamship *Capri*, for New York, with a cargo of coffee, 1 first-class and no steerage passengers from this port, but with 2 first-class and 8 steerage passengers from Buenos Ayres, and no change in the personnel of the crew while here; on the 11th instant the British steamship *Castilian Prince*, for New York, with a cargo of coffee, no passengers and no change in the crew while here; on the 12th instant the British ship *Kambira*, for Philadelphia, with a small cargo of manganese ore, no passengers, and 3 new members of the crew taken on while in this

port; and on the same date the Norwegian bark *Wakefield*, for Brunswick, Ga., via Barbados, for orders, with no cargo, in stone ballast, and also with a small amount of sand ballast from the Plate region, 1 passenger, and no change in the personnel of the crew while in this port.

No other vessels left this port for United States, Canal Zone, or Cuban ports during the period under consideration.

#### *Bubonic plague in Chile.*

There have been no reports received here from Chile for almost a month, with the single exception of the following, received on the 14th instant from Santiago: "There are now under treatment in the lazaretto of the city of Valparaiso 160 persons who are suffering from bubonic plague."

#### *Immigration and emigration in Argentina.*

During the month of April, 1905, there entered the ports of the Republic of Argentina 16,872 immigrants, and departed from the same ports 13,289; thus leaving as a gain in the population the number of 3,583.

#### *Cholera in Persia.*

A dispatch has been received from Teheran, Persia, stating that 3 deaths from Asiatic cholera had occurred in that city on the 12th instant.

#### *Mortality in the State of São Paulo.*

*São Paulo* (capital).—Population estimated at about 225,000. Week ended April 30, 1905. Total deaths 84, not including 7 stillbirths. Causes of death: Whooping cough, 1; malarial fever, 1; tuberculosis, 3; cancer, 2; diseases of the nervous system, 11; of the circulatory system, 7; of the respiratory system, 8; of the digestive system, 23; of the urinary system, 2; congenital debility, 5; senile debility, 2; violence, 4, and diseases badly defined, 8. Natives, 68; foreigners, 16. Daily average number of deaths, 12.

Week ended May 7, 1905: Total deaths, 93, not including 14 stillbirths. Causes of death: Bubonic plague, 1; measles, 1; grippe, 1; enteric fever, 1; dysentery, 1; malarial fevers, 2; tuberculosis, 2; scepticæmia, 1; anchyllostomiasis, 2; general diseases, 2; diseases of the nervous system, 9; of the circulatory system, 10; of the respiratory system, 13; of the digestive system, 20; of the urinary system, 1; of the skin, 3; congenital debility, 6; violence, 1, and diseases badly defined, 1. Daily average of deaths, 13.2. Natives, 68; foreigners, 25.

*Santos*.—Week ended April 30, 1905. Total deaths, 31, not including 3 stillbirths. Causes of death: Tuberculosis, 1; cancer, 1; general diseases, 1; diseases of the nervous system, 3; of the circulatory system, 3; of the respiratory system, 3; of the digestive system, 10; accidents during puerperal state, 1; disease of the skin, 1; congenital debility, 2, and diseases badly defined, 3. Natives, 24; foreigners, 6. Daily average of deaths, 4.42.

*Campinas*.—Week ended April 30, 1905. Total deaths, 24; no stillbirths. Causes of death: Tuberculosis, 3; septicæmia, 1; syphilis,

1; diseases of the nervous system, 1; of the circulatory system, 5; of the respiratory system, 3; of the digestive system, 3; of the urinary system, 1; congenital debility, 1; violence, 4; diseases badly defined, none; poisoning, 1. Natives, 17; foreigners, 7. Daily average of deaths, 3.41.

*Mortality of Rio de Janeiro for the week ended May 14, 1905.*

During the week ended on the above-named date there were in all 281 deaths. Of this number 18 were caused by yellow fever, with 42 new cases reported, of which number 29 were confirmed before the issuance of the report. Nine of the deaths occurred in the hospital São Sebastião, and the remainder in 6 of the city districts. At the close of the week there were 41 cases in the hospital and 3 other cases under observation.

This report does not seem so favorable as the last one, and it is very difficult, indeed impossible, to predict the future from the information at hand.

Variola caused only 3 deaths with 8 new cases, and at the end of the week there were 24 cases in the hospital São Sebastião.

There were no cases and no deaths from bubonic plague, and there is but 1 case remaining in the hospital, convalescent.

There have been no cases of plague in this city for 3 weeks, and there has been only 1 death during that period.

Other causes of death were: Measles, 1; whooping cough, 1; grippe, 11; enteric fever, 1; beriberi, 1; erysipelas, 1; malarial fevers, 2; tuberculosis, pulmonary form, 58; other forms 3; septicaemia, 1; cancer, 2; diseases of the nervous system, 25; of the circulatory system, 41; of the respiratory system, 37; of the digestive system, 40; of the urinary system, 10; puerperal septicaemia, 2; diseases of the skin, 1; congenital debility, 9; senile debility, 5; violence, 7; and suicide, 1.

By localities: In houses, homes, hotels, etc., 187; in civil hospitals, 27; in military hospitals, 3; in Santa Casa de Misericordia, 56; in asylums, convents, etc., 5; in localities unknown, 3.

Natives, 201; foreigners, 78; and nationality unknown, 2. All yellow fever deaths this week were among foreigners.

Daily average of deaths, 40.14; same for the preceding week, 36.14; and for the corresponding week of 1904, 49.85.

Rate per each 1,000 of the population, estimated at 905,000, 16.19.

Highest range of the thermometer, centigrade, 27°; lowest, 17.3°; average for the week, 21.29°. Total rainfall for the week, 5.16 mm.

*Recurrence of yellow fever at Rio de Janeiro following on commencement of harbor works—Mortality among fish in bay.*

The following report from Consul-General Seeger, dated May 20, has been transmitted to this Bureau from the Department of State:

Yellow fever, which has prevailed in this port for many years, had been almost completely eradicated, when recently the following coincidences were observed in the Rio port: Commencement of dredging in an infected part of the harbor for the new harbor works; great mortality among the fish of the bay; recurrence of the yellow fever in an epidemic form, and this in the winter season.

During the construction of the harbor works in Santos the same conditions were observed, viz, great mortality among the fish and an alarming increase in the number of yellow fever cases.

The question naturally arises, Has the alarmingly bad sanitary condition of the fish, which are so largely consumed by a harbor population, any direct bearing on the increase of yellow fever; or are the fish victims of the same conditions that produce the yellow fever epidemic?

#### BRITISH HONDURAS.

##### *Report from Belize, fruit port—Yellow fever.*

Acting Assistant Surgeon Carson reports as follows: Week ended June 8, 1905. Present officially estimated population, 8,500; number of deaths, 10, including 1 from yellow fever; prevailing disease, malarial fever; general sanitary condition of this port and the surrounding country during the week, infected.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
June 2	Salybia.....	38	28	3	5
2	Olympia.....	41	0	2	0
3	Belize .....	18	0	0	0
8	Magician .....	38	0	1	0

#### COSTA RICA.

##### *Reports from Limon, fruit port—Sanitary improvements.*

Acting Assistant Surgeon Goodman reports as follows: Week ended June 3, 1905. Estimated population, 4,000; number of deaths, 7; prevailing diseases, malarial fever and dysentery; general sanitary condition of this port and the surrounding country during the week, good.

By order of the health officer of the port, numerous drains have been constructed from back yards into the cemented street gutters; many sidewalks, formerly of dirt and necessarily with puddles of water, have been replaced by cement pavements. This is in the line of sanitation, as lessening the number of places for ovipositing by the mosquito.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 28	Limon.....	43	2	0	0
29	Sarnia.....	53	19	2	0
31	Origen.....	23	0	0	0
31	Venus.....	38	0	0	0
June 1	Miami.....	46	3	0	0
2	Taunton.....	24	1	0	0

Two bills of health for Panaman ports were viséed.

Week ended June 10, 1905. Number of deaths, 4; prevailing disease, malarial fever; general sanitary condition of this port and the surrounding country during the week good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
June 4	San José.....	42	2	0	0
	Alleghany.....	46	13	5	0
	Katie.....	24	1	0	0
	Hispania.....	21	0	0	0
	Alps.....	25	0	0	0
	Montevideo.....	127	43	104	0
	Pacuare.....	50	8	0	0
	Mt. Vernon.....	21	0	0	0
	Ellis.....	33	3	0	0

Three bills of health for Panaman ports were viséed.

#### CUBA.

##### *Report from Cienfuegos—Inspection of vessels.*

Acting Assistant Surgeon McMahon reports, June 13, as follows:

During the week ended June 10, 1905, 5 vessels, with a total crew of 139, no passengers, were inspected, and bills of health were issued to ports in the United States.

All of these vessels were in good sanitary condition; no sickness aboard of any of them.

##### *Report from Habana—Inspection of vessels.*

Surgeon Wertenbaker reports, June 12, as follows:

##### *Week ended June 10, 1905.*

Vessels inspected and bills of health issued .....	21
Crew of outgoing vessels inspected .....	899
Passengers of outgoing vessels inspected .....	972

No quarantinable diseases have been reported in the city or island during the week.

##### *Report from Matanzas—Inspection of vessels—Precautionary detention of steamship Almerian—Diphtheria and scarlet fever.*

Acting Assistant Surgeon Nuñez reports, June 13, as follows:

During the week ended June 10, 1905, bills of health were issued to 6 vessels bound to the United States.

Precautionary detention in quarantine while in port was observed with the British steamship *Almerian*, which arrived here June 4, on her way from Liverpool to New Orleans via Barbados, Trinidad, Puerto Cabello, Curaçao, Barranquilla, Cartagena, and Habana. She cleared for her port of destination via Caibarien, Cuba, on June 8, with no sickness on board.

Two cases of scarlet fever and 1 of diphtheria were officially reported in the city during the past week. The reports on the epidemic of measles have been discontinued; therefore it is no longer possible to ascertain the number of cases prevailing at present or in the future.

No quarantinable diseases have been reported during the week within this district.

*Reports from Santiago—Inspection of vessels—Precautionary detention of steamship *Straits of Dover*.*

Acting Assistant Surgeon Wilson reports, June 9 and 13, as follows:

During the week ended June 3, 1905, bills of health were issued to 5 vessels bound for the United States.

No quarantinable disease has been reported.

During the week ended June 10, 1905, bills of health were issued to 2 vessels bound for the United States.

No quarantinable disease has been reported.

The British steamship *Straits of Dover*, which arrived June 5 from Colon, was kept in quarantine to complete the five days of observation. There was no sickness on board. The steamer left June 9 for Philadelphia.

**ECUADOR.**

*Report from Guayaquil—Mortality—Yellow fever—Inspection of vessel.*

Acting Assistant Surgeon Gruver reports, May 25, as follows:

Week ended May 23, 1905. Present officially estimated population, 60,000. Mortality from all causes 68, as follows: Bilious fever, 1; cerebral fever, 1; gastric fever, 1; infectious fever, 2; paludic fever, 4; pernicious fever, 10; yellow fever, 2; enteric diseases, 13; grippe, 1; tetanus, 4; tuberculosis, 7; whooping cough, 3; stillbirths, 4; cause unknown, 1; from all other causes, 14.

On May 22 steamship *Tucapel*, from Chilean and Peruvian ports, cleared for Ancon, Canal Zone. One passenger from Callao was put in quarantine. Five cabin and 13 steerage passengers sailed from here. Vessel was fumigated.

**GERMANY.**

*Report from Berlin—Plague in South Africa and Australia.*

Consul-General Mason reports, June 3, as follows:

*Egypt.*—During the period from May 13 to 20 there were registered 2 plague cases in Damanhur.

*British South Africa.*—Cape Colony: During the period from April 16 to 29 there were registered in King Williams Town 5 cases of plague, and in East London 8 cases.

*Queensland.*—During the period from April 1 to 15 a fresh case of plague occurred.

*New South Wales.*—During the period from April 7 to 10 there occurred 4 fresh cases of plague in Sydney.

*Death rate of Berlin and other cities.*

The death rate of Berlin for the week ended May 20 was lower than that of the preceding week, amounting, calculated on the year, to 16.5 per thousand of the population, thus being, however, higher than the

rate for the same week of last year, in which it amounted to only 14.8 per thousand. Of the large German towns and cities, more than a third showed less favorable health conditions than Berlin, including Munich, Nuremberg, Carlsruhe, Frankfort-on-the-Main, Magdeburg, Breslau, Konigsberg, Rixdorf (with 18.6). On the other hand, the following cities showed more favorable health conditions than Berlin, namely: Hamburg, Stuttgart, Cologne, Dusseldorf, Brunswick, Hanover, Charlottenburg (with 13.8), and Schoneberg (with 11.1). The rate of mortality in London was also lower than the Berlin figure, that of Paris and Vienna being higher than the rate of this city. The infant death rate, amounting to 4.1 per year and mille, was higher than the Hamburg rate, but lower than the Munich and Leipzig figure. There were registered 123 deaths from phthisis pulmonalis, 122 deaths from acute diseases of the respiratory organs, 41 deaths from cancer, 16 deaths from scarlet fever, 7 deaths from measles, 3 deaths from diphtheria, and 3 deaths from influenza. Finally, 18 persons died by violence.

#### GUATEMALA.

##### *Report from Livingston, fruit port.*

Acting Assistant Surgeon Peters reports as follows: Week ended June 3, 1905. Present officially estimated population, 3,500; no deaths reported; prevailing diseases malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 30	Olympia.....	41	.....	.....	.....
June 1	Belize .....	18	.....	.....	.....

The steamer *Olympia* cleared from Puerto Barrios.

#### HAWAII.

##### *Death from plague at Waipahu.*

HONOLULU, June 21, 1905.

WYMAN, Washington:

There was a death from plague at Waipahu near Honolulu on June 20.

COFER.

#### HONDURAS.

##### *Report from Ceiba, fruit port.*

Acting Assistant Surgeon Robertson reports as follows: Week ended June 10, 1905. Present officially estimated population, about 4,000; one death; prevailing diseases, malarial, mostly mild type, but a few severe cases; general sanitary condition of this port and the surrounding country during the week, good.

## Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
June 5	Jamaica .....	16	0	0	0
6	Jos. Vaccaro.....	29	0	0	0
8	Condor .....	17	1	0	0
9	Bratten.....	16	0	0	0

*Report from Puerto Cortez, fruit port—Yellow fever.*

Acting Assistant Surgeon Carter reports as follows: Week ended June 1, 1905. Present officially estimated population, 4,000; 4 deaths, including 3 from yellow fever; prevailing diseases, yellow fever and malarial fever in all types; general sanitary condition of this port and the surrounding country during the week, infected.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage inspected.
May 29	Hiram .....	14	29	0	45
June 1	Olympia.....	41	0	2	0

Number of aliens sailing from this port during week, 9.

*Yellow-fever cases and deaths—Sanitary measures—Fumigation of vessels.*

JUNE 6, 1905.

I have to report another death from yellow fever, making 4 deaths in all since the first case was reported. The situation up to date is 8 cases and 4 deaths. Of the 4 cases on hand 3 are discharged and 1 is convalescent. The last death reported was that of a native girl. She was treated by the Government surgeon, who reported the case and death as of yellow fever. The cleaning and oiling are continued and 3 doctors are making a house-to-house inspection. All steamers coming to this port from Mobile and New Orleans are carrying marine medical inspectors. Steamers are being disinfected under my supervision, temperatures of all on board being taken before sailing, and as far as possible every precaution is taken.

#### INDIA.

*Report from Calcutta—Inspection of vessel—Mortality from cholera and plague—Measures for rat extermination recommended for Bengal.*

Acting Assistant Surgeon Eakins reports, May 18, as follows:

During the week ended May 13, 1905, bill of health was issued to the steamship *Gordon Castle*, bound for Boston and New York with a total crew of 41. The usual precautions were taken, holds fumigated, and rat guards placed on wharf lines.

During the week ended May 13, 1905, there were 31 deaths from cholera and 324 from plague in Calcutta.

In Bengal during the week ended May 6, 1905, there were 2,641 cases of and 2,435 deaths from plague.

*Measures for rat extermination recommended for Bengal.*

The Bengal Chamber of Commerce has written to the government of Bengal relative to the extermination of rats as a preventive measure against plague. In its letter it calls attention to the good results following crusades against rats and intimates that any measures adopted by the government toward the extermination of rats would meet with strong support. It suggests that to be of real service in preventing plague epidemics any efforts made against rats should be widespread and cover every district of the city and should be persisted in throughout the year and not confined to times when plague is prevalent. In closing the letter reference was made to the measures adopted at Giridih and their attendant success.

**ITALY.**

*Report from Naples—Inspection of vessels—Rejections recommended—Infectious diseases in Italy.*

Passed Assistant Surgeon McLaughlin reports, June 5, as follows:  
During the week ended June 3, 1905, the following ships were inspected at Naples:

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage inspected and passed.	Pieces of baggage disinfected.
June 1	Baionne .....	Philadelphia .....			
1	Roma .....	New York .....	1,263	150	1,450
1	Città di Milano .....	do .....	1,461	110	1,650
2	König Albert .....	do .....	1,496	200	1,750
3	Italia .....	do .....	963	70	980

*Rejections recommended.*

Date.	Name of ship.	Tra-choma.	Favus.	Suspected trachoma.	Suspected favus.	Other causes.	Total.
June 1	Baionne .....						
1	Roma .....	42	5	53		3	103
1	Città di Milano .....	38	1	19	2	11	71
2	König Albert .....	29	5	30	1	7	72
3	Italia .....	38	3	33	3	6	83
		147	14	135	6	27	329

*Infectious diseases in Italy.*

For the week ended May 25, 1905, the following reports were officially registered:

*Smallpox.*—There were reported 9 cases in 5 communes of the Province of Lecce, 3 cases in the Province of Palermo, 44 cases at Catania. Cases were reported, too, in the Provinces of Chieti and Avellino.

*Measles.*—The malady is epidemic at Pitoniano and San Vito (Rome), at Cesena (Forli), at Palmoli (Chieti), and Latiano (Lecce). In the last-named commune there were reported 800 cases.

*Enteric fever.*—Few cases.

*Epidemic cerebro-spinal meningitis.*—Cases were reported in the Provinces of Cosenza, Avellino, Rome, Catania, and Lecce.

The number of cases of infectious diseases in Italy for the month of January, 1905, was as follows: Measles, 13,351; scarlatina, 1,089; smallpox, 657; enteric fever, 1,385; diphtheria, 2,105; puerperal fever, 288; pulmonary tuberculosis, 499; pellagra, 280; hydrophobia, 2; anthrax, 114, and glanders, 2.

#### MEXICO.

*Reports from Progreso—Inspection and fumigation of vessels—Weather conditions.*

Acting Assistant Surgeon Harrison reports, June 2, as follows:

During the week ended June 2, 1905, no quarantinable disease was reported in Progreso or Merida; deaths from other causes not learned, but will be reported next week; weather remains warm and dry, but tempered by almost constant sea breeze and occasional rains.

The following-named vessels have been dispatched:

May 28, steamship *Vigilancia*, New York, via Habana, crew 79, passengers from Progreso 54 (to New York 13); steamship *Progreso*, Texas City, crew 25, was fumigated. May 30, steamship *Floridian*, New Orleans, crew 42, passengers in transit to Europe 5, was fumigated. May 31, steamship *Acworth*, New York, crew 23.

Period from May 27 to June 9. No quarantinable disease has been reported here or in Merida. In Progreso there have been 11 deaths from the following causes: Athrepsia, 1; railway accident, 1; dysentery, 3; malarial fever, 1; tuberculosis (intestinal), 1; worms, 1; dentition, 1; paralysis, 1.

Mosquitoes are not numerous or annoying and are seldom seen aboard ship here, even at wharf.

Ships cleared: June 3, steamship *Sahara*, New Orleans; crew, 31; was fumigated and sealed. June 4, steamship *Havan*, New York via Habana; crew, 100; passengers from Progreso, 67 (to New York 35). June 8, steamship *Helvetia*, New Orleans; crew, 35; was fumigated and sealed. June 9, steamship *Tjomo*, New York via Campeche; crew, 18.

*Report from Tampico—Inspection and fumigation of vessels—Mortuary statistics.*

Acting Assistant Surgeon Frick reports, June 12, as follows:

Week ended June 10, 1905. Inspected and passed, 3 steamships; personnel (crews), 125; passengers, 3. Fumigated and passed, steamships, 1.

#### *Mortuary report.*

Remittent fever, 1; nephritis, 1; alcoholism, 1; diarrheal-enteritis, 1; railroad accident, 1; pneumonia, 3; pulmonary tuberculosis, 2; miliary tuberculosis, 1; intestinal tuberculosis, 1; ulcerative stomatitis, 1;

meningitis, 1; infantile diarrhea, 1; syphilis, 1; dysentery, 1; gangrene of the face, 1. Total number of deaths, 18. Estimated population, 20,000. Mortality rate, 46.80. No quarantinable disease reported during the week. The sanitary situation continues about the same as reported last week.

#### NICARAGUA.

*Report from Bluefields—No precautions yet taken against importation of yellow fever from British and Spanish Honduras.*

Acting Assistant Surgeon Layton reports, June 6, as follows:

The governor of this department (of the entire east coast of Nicaragua) has been petitioned to proclaim quarantine against both British and Spanish Honduras. So far this request has not been granted.

#### PANAMA.

*Reports from Colon—Inspection and fumigation of vessels—Yellow fever situation in Colon and Panama—Case removed from steamship Finance and vessel fumigated.*

Acting Assistant Surgeon Mohr reports, June 3, 4, and 12, as follows:

During the week ended June 3, 1905, the following-named vessels cleared for ports in the United States and were granted bills of health:

German steamship *Alene*, for New York, via Santa Marta, Colombia, May 29, with 61 crew and no passengers.

American steamship *Segurancia*, for New York, May 31, with 72 crew and 140 passengers.

British steamship *Straits of Dover*, for a port in the United States, via Santiago, Cuba, May 31, with 24 crew and no passengers.

British steamship *Beverly*, for New Orleans, via Bocas del Toro, May 31, with 43 crew and 1 passenger in transit.

British steamship *Rhoda*, for New York, via San Blas coast, June 1, with 8 crew and no passengers.

British steamship *Magician*, for New Orleans, via Mexican ports, June 2, with 40 crew and no passengers.

The British steamship *Beverly*, bound for New Orleans, was fumigated in all the living compartments, as per the inclosed certificate.

The British steamship *Straits of Dover*, bound for Santiago, Cuba, was fumigated in all the living compartments by the Isthmian quarantine service.

Week ended June 10, 1905:

Norwegian steamship *Saphir*, for New Orleans, June 3, with 19 crew and no passengers.

American steamship *Advance*, for New York, June 4, with 63 crew and 103 passengers.

British steamship *Suntana*, for a port in the United States, via Daiquiri, Cuba, with 27 crew and no passengers.

Norwegian steamship *Belvernon*, for Mobile, via Bocas del Toro, June 5, with 22 crew and no passengers.

American schooner *Oscar G.*, for Pascagoula, June 6, with 7 crew and no passengers.

Norwegian steamship *Preston*, for New Orleans, via Bocas del Toro, with 34 crew and 5 passengers.

British steamship *Antillian*, for New Orleans, via Jamaican and Mexican ports, June 7, with 74 crew and no passengers.

American steamship *Allianca*, for New York, June 8, with 64 crew and 23 passengers.

British steamship *Wanderer*, for New Orleans, via Mexican ports, with 39 crew and no passengers, June 10.

The steamships *Saphir*, *Belvernon*, and *Preston*, bound for New Orleans, were fumigated in their living quarters prior to sailing. The steamship *Santona*, bound for Daiquiri, Cuba, was fumigated by the quarantine officer of Colon.

#### *Yellow-fever situation.*

JUNE 4, 1905.

Since my report of May 30, 1905, 10 new cases of yellow fever have occurred on the Isthmus, as follows: Panama, 4 (2 Americans, 1 Peruvian, 1 Spaniard); Colon, 6 (all Americans).

JUNE 12, 1905.

The sanitary condition of Colon and Panama shows no improvement during the past week. Since my report of the 4th instant 4 new cases have been admitted to the hospitals in Panama (2 Americans, 2 Italians).

Two deaths from yellow fever have occurred in Panama during the week.

In Colon 4 cases (3 Americans, 1 Ecuadorian):

One death from yellow fever occurred in Colon during the week.

The case reported on the 11th was removed from the steamship *Finance*, to sail for New York on the 12th instant. The patient was a passenger from the Pacific coast and was just five days out from Corinto, Nicaragua, when he landed and passed quarantine at Panama. He came directly from the ship at Panama to the ship at Colon, arriving here in the afternoon of the 9th, and was taken sick during the night of the 9th. He was removed to the Colon hospital on the 10th, and on the following day pronounced to be a case of yellow fever. The after part of the ship, to which the case had been confined, was immediately fumigated under the supervision of the quarantine officer of Colon and myself.

#### *Yellow fever in Panama increasing.*

[Received at Bureau over telephone from Department of State of June 17, 1905.]

PANAMA, June 16.

SECRETARY STATE, Washington.

Yellow fever, 24 cases; 6 deaths; 15 days; increasing.

LEE, Consul-General.

#### *Report from Bocas del Toro, fruit port.*

Acting Assistant Surgeon Osterhout reports as follows: Week ended June 3, 1905. Present officially estimated population not obtainable; 2 deaths; prevailing disease, malarial fever; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage.
May 27	J. B. Camors .....	Colon.....		4	0	(a) 6

#### PERU.

*Reports from Callao—Vaccination of emigrants for the Canal Zone.*

Assistant Surgeon Lloyd reports, May 6 and 22, as follows:

During the month of April, 1905, 12 certificates of vaccination were issued to passengers going to ports in the United States and Panama.

*Smallpox on steamships Guatemala and Mexico from Chilean ports.*

MAY 22, 1905.

The British steamship *Guatemala* arrived at this port this morning, en route to Panama, with a case of smallpox on board (crew). The steamship *Mexico* arrived yesterday, coastwise, with smallpox on board. Both of these vessels were from Chilean ports.

#### PHILIPPINE ISLANDS.

*Report from Manila—Plague at Manila and Cebu—Inspection and fumigation of vessels.*

Chief Quarantine Officer Heiser reports, May 15, as follows:

During the week ended May 6, 1905, quarantinable disease was reported as follows: Manila, plague, 2 cases, 1 death. Cebu, plague, 2 cases, 2 deaths.

The following-named vessels cleared for ports in the United States or its dependencies:

On May 1, 1905, the British steamship *Indrani*, with 57 crew, en route from Yokohama to New York, via Iloilo, was granted a supplemental bill of health. Final inspection to be made at Iloilo.

On May 1, 1905, the British steamship *Taming*, en route from Hongkong to Cebu, was granted a supplemental bill of health. The vessel carried 69 crew and 40 passengers.

During the week ended May 13, 1905, quarantinable disease was reported as occurring in the city of Manila, as follows: Plague, 1 case, 1 death.

The following-named vessels cleared for ports in the United States or its dependencies:

On May 8, 1905, the U. S. army transport *Dix* cleared for Seattle, Wash., with 132 crew and 5 passengers. All on board were inspected at the hour of sailing.

On May 8, 1905, the British steamship *Oakburn*, with 32 crew, cleared for Boston and New York, via Iloilo. Vessel was fumigated throughout while in port. Final inspection will be made at Iloilo.

On May 12, 1905, the British steamship *Kaifong*, en route from Hongkong to Iloilo and Cebu, was granted a supplemental bill of health. Crew, 66; passengers, cabin, 20, steerage, 24.

On May 13, 1905, the American steamship *Hyades* cleared for Tacoma, via Hongkong and Japan ports, with 48 crew and 3 passengers. All closed spaces of the vessel, except hold No. 3 and cabins, were fumigated with sulphur while in port; 1,943 pieces cargo certified. Persons on board were inspected at the hour of sailing.

*Quarantine transactions of the Service in the Philippine Islands during the month of March, 1905, as follows:*

## WEST INDIES.

*Report from Barbados—Inspection of vessels—Legislative bill for creating uniform quarantine measures for the British West Indies—Case of smallpox discharged, cured—Death from beriberi on steamship Benjamin Constant—Vaccination of emigrants for the Canal Zone.*

Assistant Surgeon Ward reports, June 7, as follows:

During the week ended June 3, 1905, bills of health were issued to 3 steamships and 2 sailing vessels with 194 crew, 27 cabin and 15 steerage passengers. Of this number I inspected 2 steamships, 59 crew, 16 cabin and 15 steerage passengers. There were 11 crew, 23 cabin and 15 steerage passengers taken on at this port for ports in the United States.

The quarantine bill which has been before the legislature of Barbados for several months has just been passed. This bill makes provision for giving effect to the recommendations made by a conference of the several British West Indian colonies which was held in 1904 to consider the question of quarantine in those colonies, and the substitution for the existing systems of uniform precautionary measures of a different nature. If this act is not disallowed by the Imperial Govern-

ment it will come into operation upon such day as the governor of this island shall notify the people by proclamation.

The case of smallpox found in Bridgetown, Barbados, May 9, and isolated at the Pelican Island quarantine station, was discharged as cured the 1st instant. None of the contacts on this island developed the disease.

The Brazilian training ship *Benjamin Constant*, which arrived at this port May 27, with the body of an officer who had died of smallpox that morning, will leave Barbados on the 10th instant for Norfolk, Va. All precautions have been taken to prevent the spread of this disease on board, and up to the date of this report no cases have been reported. Yesterday afternoon, the 6th instant, a young seaman, who had been suffering from the wet form of beriberi, died suddenly while taking exercise on the deck.

The quarantine authorities of this port have received a report from Grenada, dated June 1, which says that a case of smallpox occurred in the original infected district (St. Andrew parish) on the 23d ultimo, and that on the 28th ultimo a case was discovered in the adjoining parish of St. John and isolated, with its contacts. No other cases have been found so far in that parish.

The general sanitary condition of Barbados is good; no quarantinable diseases have been reported.

*Certificates of vaccination of emigrants for the Canal Zone.*

**FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.**

AUSTRALIA—*New South Wales—New Castle*.—Month of April, 1905. Estimated population, 50,570. Total number of deaths, 52, including diphtheria 1, enteric fever 1, plague 2, and 4 from tuberculosis.

BAHAMAS—*Dunmore Town*.—Two weeks ended May 26, 1905. Estimated population, 1,232. No deaths and no contagious diseases.

*Green Turtle Cay—Abaco*.—Two weeks ended June 1, 1905. Estimated population, 3,314. No deaths and no contagious diseases reported.

*Nassau*.—Two weeks ended June 3, 1905. Estimated population, 12,650. Number of deaths not reported. No contagious diseases reported.

BRAZIL—*Pernambuco*.—Two weeks ended April 30, 1905. Estimated population, 200,000. Total number of deaths, 508, including measles 2, whooping cough 1, smallpox 200, and 47 from tuberculosis.

FRANCE—*Roubaix*.—Month of May, 1905. Estimated population, 124,660. Total number of deaths, 161, including enteric fever 3, scarlet fever 1, and 2 from whooping cough.

*Rouen*.—Month of April, 1905. Estimated population, \* 116,316. Total number of deaths, 233, including enteric fever 2, whooping cough 2, and 58 from tuberculosis.

GIBRALTAR.—Two weeks ended May 27, 1905. Estimated population, 27,460. Total number of deaths, 16. No deaths from contagious diseases.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended May 27, 1905, correspond to an annual rate of 14.6 per 1,000 of the aggregate population, which is estimated at 15,609,377.

*London*.—One thousand three hundred and eleven deaths were registered during the week, including measles 44, scarlet fever 4, diphtheria 6, whooping cough 50, enteric fever 5, and 16 from diarrhea. The deaths from all causes correspond to an annual rate of 14.5 per 1,000. In Greater London 1,742 deaths were registered. In the “outer ring” the deaths included 4 from diphtheria, 2 from measles, 2 from scarlet fever, 6 from whooping cough, and 5 from diarrhea.

*Ireland*.—The average annual death rate represented by the deaths registered during the week ended May 27, 1905, in the 21 principal town districts of Ireland was 19 per 1,000 of the population, which is estimated at 1,093,959. The lowest rate was recorded in Limerick, viz., 9.6, and the highest in Sligo, viz., 48, per 1,000. In Dublin and suburbs 143 deaths were registered, including diphtheria 1, enteric fever 1, measles 1, whooping cough 1, and 41 from tuberculosis.

*Scotland*.—The deaths registered in 8 principal towns during the week ended May 27, 1905, correspond to an annual rate of 18.1 per 1,000 of the population, which is estimated at 1,749,917. The lowest rate of mortality was recorded in Leith, viz., 15.4, and the highest in Perth, viz., 21.3 per 1,000. The aggregate number of deaths registered from all causes was 606, including diphtheria 7, measles 30, scarlet fever 3, and 24 from whooping cough.

JAMAICA—*Port Antonio*.—Two weeks ended June 3, 1905. Estimated population not reported. No deaths reported.

MALTA.—Three weeks ended May 20, 1905. Estimated population, 202,134. Total number of deaths, 92, including diphtheria 3, and 3 from enteric fever.

SPAIN—*Barcelona*.—Ten days ended May 31, 1905. Estimated population, 600,000. Total number of deaths, 372, including diphtheria 1, enteric fever 7, measles 14, whooping cough 3, smallpox 3, and 38 from tuberculosis.

Seville.—Month of April, 1905. Estimated population, 148,315.

Total number of deaths, 475, including enteric fever 4, measles 6, scarlet fever 1, whooping cough 2, and 48 from tuberculosis.

**WEST INDIES—Curaçao.**—Two weeks ended June 2, 1905. Estimated population, 31,600. Total number of deaths, 10. No contagious diseases reported.

**St. Thomas.**—Two weeks ended May 26, 1905. Estimated population, 11,012. Total number of deaths, 20, including 1 from tuberculosis.

*Cholera, yellow fever, plague, and smallpox, December 31, 1904, to June 23, 1905.*

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from June 25 to December 30, 1904, see PUBLIC HEALTH REPORTS for December 30, 1904.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
