

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

Reports from Biloxi, Miss.—Investigation of fever lately prevailing.

Passed Assistant Surgeon Berry reports, November, 26 as follows:

Supplementing previous telegrams, I have the honor to submit the following written report as to the late prevailing fever in Biloxi. I am unable to identify the first case or cases in this city, but I presume the fever was introduced from Scranton, Miss., with which city Biloxi had free communication until October 1, when quarantine was established. At this date, October 1, there had already been a large number of cases of mild fever in Scranton. Most of the cases in Biloxi were sick in the latter part of October. Doctor Folkes, the representative of the State board of health, saw 2 convalescents about November 6, which he thought at the time might be cases of yellow fever, and he so reported to Surgeon Wasdin at Gulfport. Scattering cases occurred up to the time of my arrival here. Two cases occurred after my arrival, which I reported by telegram. So far I have learned that over 60 cases occurred here. A motorman on the street railway had the only case that I have so far learned of that had any typical symptoms of yellow fever.

December 1 Passed Assistant Surgeon Berry telegraphed:

During recent norther, Biloxi, minimum temperature night of November 29, 40° F.; night of November 30, 39° F. No new cases of fever.

*Réports from Pascagoula, Miss.—Fever cases diagnosed as dengue—
Stegomyia present.*

Passed Assistant Surgeon Berry reports, November 28 and 30, as follows:

Since forwarding my last report I have seen 3 cases of the fever which has prevailed in this section during the past three months. These cases were positively not yellow fever. They were characterized by severe pains in limbs and back, sore throat and headache of moderate intensity; duration of fever three to four days; distinct rash on the third day; temperature at no time above 103° F.; no lack of correlation between pulse and temperature; and no albumen in urine. They are undoubtedly dengue fever.

Physicians assure me these cases were similar to other cases which have occurred during past season.

At present the disease has practically disappeared.

Stegomyia are abundant in all houses which I have visited.

In compliance with instructions I have made careful investigation as to the presence of *Stegomyia* in Scranton, Pascagoula, and Moss Point, and find them present in all three places. They were much more abundant in Scranton than in other places. *Anopheles* are also present in considerable numbers at Scranton and Moss Point, and to a less extent at Pascagoula.

STATISTICAL REPORTS OF STATES AND CITIES OF THE UNITED STATES,
YEARLY AND MONTHLY.

CALIFORNIA.—For October, vital statistics were reported from all except 4 of the 57 counties in California. The population of the 53 counties reported is estimated at 1,678,124; total number of deaths, 2,117, including enteric fever, 52, and 299 from tuberculosis.

Tuberculosis was the main cause of death. Statistics show that of the 299 persons who died of tuberculosis during October, 8 had been in the State less than a month, 9 had lived there only one or two months, and altogether 24, or 8 per cent, of the total had resided there less than six months, while an aggregate of 34, or 11.4 per cent, had been residents of the State less than a year.

San Francisco city and County.—Month of September, 1905. Estimated population, 475,000. Total number of deaths, 573, including diphtheria 4, enteric fever 8, whooping cough 2, and 74 from tuberculosis.

MISSOURI—*St. Louis.*—Month of October, 1905. Estimated population, 685,000. Total number of deaths, 770, including diphtheria 5, enteric fever 23, measles 1, whooping cough 4, and 94 from tuberculosis.

NEW YORK—*Troy.*—Month of October, 1905. Estimated population, 76,861. Total number of deaths, 91, including enteric fever 2, diphtheria 1, scarlet fever 1, and 8 from tuberculosis.

VIRGINIA—*Richmond.*—Month of October, 1905. Estimated population, 100,000; white 62,250, colored 37,750. Total number of deaths, 118; white 67, colored 51, including diphtheria 2, enteric fever 2, and 13 from tuberculosis.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 30 to December 8, 1905.

For reports received from December 30, 1904, to June 30, 1905, see PUBLIC HEALTH REPORTS for June 30, 1906.

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

FOREIGN AND INSULAR.

AFRICA.

Report from Cape Colony—No cases of plague present—Examination of rats and mice.

The report of the medical officer of health of Cape Colony shows that during the week ended October 21, 1905, no case of plague was discovered. Out of a large number of rats and mice examined bacteriologically, 2 mice found at Port Elizabeth were plague infected. No plague-infected rats or mice were found at King Williams Town or in the other districts of the colony.

Plague at Chinde.

Consul Hollis, Lourenço Marquez, reports October 14, through the Department of State, as follows:

I have just been officially advised of an outbreak of plague at Chinde.

The latest news regarding this outbreak is as follows: Up to September 29 there were 5 deaths; between the 6th and 7th instants, 1 case and no deaths; on the 8th, 1 case and 1 death, and on the 9th and 10th, neither case nor death.

AUSTRIA-HUNGARY.

Report from Trieste—Inspection of emigrants.

Assistant Surgeon Foster reports, November 16, as follows:

During the week ended November 11, 1905, the following ships were inspected at this port: On November 6 the steamship *Slavonia* sailed for New York via Fiume. There were inspected and passed 29 steerage passengers. The number of pieces of baggage disinfected was 36.

On November 7 the steamship *Gerty* sailed for New York via Messina and Palermo. There were inspected and passed 79 steerage passengers. The number of pieces of baggage disinfected was 185.

BELGIUM.

Disease on the bark Undine, from Pisagua, Chile, not identified as plague.

A dispatch dated November 25, from the American legation at Brussels, received through the Department of State, transmits correspondence with the Belgian Government concerning cases of sickness suspected of being bubonic plague on board the German bark *Undine*, from Pisagua, Chile, detained in quarantine at Doel, from which it appears that the medical authorities have been as yet unable to identify the disease as bubonic plague.

CANADA.

Inspection of immigrants at Quebec and St. Johns.

Passed Assistant Surgeon Kerr reports as follows:

Month of November, 1905. Number of immigrants inspected, 848; number passed, 831; number rejected, 17; number certified for rejection on account of dangerous contagious disease, 5.

CHINA.

Reports from Hongkong—Quarantine precautions—Quarantinable diseases.

Passed Assistant Surgeon White reports, October 15, 17, and 23, as follows:

Week ended October 7, 1905:

Return of quarantinable diseases, none.

Week ended October 14:

Return of quarantinable diseases:

Plague—	
Cases	2
Deaths	2
Smallpox—	
Cases	1
Deaths	0

Week ended October 21:

Return of quarantinable diseases:

Plague—	
Cases	1
Deaths	1

Examined for diseases contemplated in paragraphs 29 and 67 of the Quarantine Regulations:	
(a) Personnel	2,794
(b) Passengers	713
Required to bathe and undergo special examination:	
(a) Personnel	1,859
(b) Passengers	389
Examination for diseases contemplated by the laws controlling immigrations:	
Aliens	253
Rejected	64
Baggage.	
(a) Inspected and labeled	2,236
(b) Disinfected and labeled	80
Return of quarantinable diseases:	
Plague—	
Cases	6
Deaths	6
Smallpox—	
Cases	1
Deaths	0

Emigrants recommended for rejection:

Number of emigrants per steamship *China* recommended, October 17, 1905, for rejection: For Honolulu, 4; for San Francisco, 43.

Per steamship *Shawmut*, October 25, 1905: For Seattle, 5.

Per steamship *Doric*, October 31, 1905: For Honolulu, 2; for Mazatlan, 2; for San Francisco, 15.

Report from Niuchwang—Precautions against plague.

Consul-General Sammons, Niuchwang, Manchuria, reports October 12, through the Department of State, that at a meeting of the consular body, held at the American consulate-general, in that port, immediately after the notice of the existence of plague there, it was agreed to cooperate in the enforcement of every necessary precaution in stamping out the disease.

Steps have been taken to isolate the infected locality and to conduct a careful medical inspection of the inhabitants within the isolated limits. All passes authorizing the owners to take passage on the military train at Niuchwang for the interior have been nullified. No vessels are to be allowed to go up the Liao until further notice. Traffic between Yingkow and Niuchwang is suspended.

COSTA RICA.

Modification of quarantine.

Consul Caldwell, San José, reports through the Department of State, November 11, as follows:

By government decree of November 9, quarantine against the ports of the Republic of Panama on account of prevalence of yellow fever on the Isthmus is now raised, fever having disappeared from the ports of that Republic.

CUBA.

Report from Cienfuegos—Bills of health issued—No quarantinable diseases.

Consul Baehr reports, November 24, as follows:

For the week ended November 18, 1905, 2 bills of health were issued for vessels bound for the United States, with 51 total crew. No passengers. The sanitary condition of these vessels was reported good; no sickness on board. No quarantinable diseases were reported at this port during the week.

Reports from Habana—Inspection of vessels—Yellow fever—Quarantine against United States recommended to be removed.

Passed Assistant Surgeon von Ezdorf reported from Habana, November 27, as follows:

Week ended November 25, 1905:

Vessels inspected and bills of health issued.....	28
Crew of outgoing vessels inspected.....	1,023
Passengers of outgoing vessels inspected.....	319
Immune certificates issued.....	32
Vessels fumigated.....	10

During the week 6 cases of yellow fever were reported as follows: One case November 21, died November 21; 2 cases November 22, 2 cases November 24, 1 case November 25.

The question of raising quarantine against Mobile and New Orleans was brought to the notice of the quarantine authorities of Cuba. The matter was considered by the superior board of health at a meeting held November 25, in which it was decided to recommend for approval by the secretary of the treasury of the island to raise the quarantine now in force against the United States.

Recommendation of removal of quarantine not approved—Yellow fever

November 30, December 2, 4 and 5. Passed Assistant Surgeon von Ezdorf, Habana, telegraphed:

Two new cases, 2 deaths yellow fever reported to-day. Removal of quarantine by Cuba against Gulf ports recommended by superior board of health was not approved by secretary of finance.

One new case, 1 death yellow fever reported for yesterday.

Three new cases, 1 death yellow fever reported 2d instant. Two new cases yellow fever confirmed yesterday.

Two new cases, one death yellow fever reported for yesterday.

Reports from Matanzas—History of imported yellow fever case.

Acting Assistant Surgeon Nuñez reports, November 27 and 28, as follows:

The case of yellow fever at Matanzas during the incubation period, before the medical inspection of trains was in operation was not detected by the sanitary authorities until late at night at the close of the fourth day of the disease. Therefore no sanitary precautions could be taken until then, and the probability is that the infection has disseminated itself in the neighborhood where the patient was living. On or about the 10th instant the patient was at Habana, and stayed at a hotel on Consulado street, within the known infected zone of that city, for about eight days. The case is now lodged in the isolation ward of the civil hospital of this city, a place well protected with wire netting against mosquitoes.

Inspection and precautionary detention of vessels—Precautions against spread of yellow fever—Mortality.

Week ended November 25, 1905:

Five bills of health issued to vessels leaving for United States ports, all in good sanitary condition.

Precautionary detention in quarantine was observed for the last two weeks with the British schooner *Charlevoix*, which arrived in this harbor from Mobile November 7. She cleared for her port of origin on the 21st instant, without any sickness on board.

The case of yellow fever reported on November 26 is improving, and is expected to recover. No other cases have been reported since.

As a further precautionary measure against the propagation of yellow fever, a careful search has been made for all non-immunes residing in the vicinity of the focus of infection, in order to subject them to observation, by daily visits, for twenty days, to cover the incubation period of the infected mosquitoes, and that of man, and detect

any future cases that may occur in time to apply the necessary prophylactic measures.

Mortality of Matanzas from November 10 to 20, 1905, 23.

Annual rate of mortality for the ten days, 17.48. Estimated population, 48,000.

Report from Santiago—Inspection of vessels—No quarantinable disease—Mortality.

Acting Assistant Surgeon Wilson reports, November 28, as follows:
Week ended November 25, 1905:

Bills of health issued to 6 vessels bound for the United States.

No quarantinable disease reported.

Mortality for the week ended November 25, 1905, 18.

Annual rate of mortality for the week, 20.57 per 1,000. Estimated population, 45,500.

ECUADOR.

Report from Guayaquil—Yellow fever—Inspection of vessels¹—Plague reported on steamship Pizarro at Paita, Peru.

Acting Assistant Surgeon Gruver reports, November 16, as follows:
Week ended November 14, 1905.

Two deaths from yellow fever were reported.

On November 10, steamship *Denderah*, from Hamburg via Chilean and Peruvian ports, cleared for San Francisco, via South and Central American and Mexican ports. Ten cabin and 3 steerage passengers were taken from here. Vessel fumigated and passengers examined. November 11, steamship *Loa*, from Chilean and Peruvian ports, cleared for Ancon, Canal Zone, with 10 cabin and 1 steerage passengers from here. Two cabin and 11 steerage passengers from ports south were placed in quarantine to complete ten days from port of last exposure. Vessel fumigated and passengers examined. November 14, steamship *Ecuador*, a coasting vessel, cleared for Ancon, Canal Zone, with the following personnel: Crew, 58; cabin passengers, 9; steerage passengers, 6; all told, 73. Vessel, crew, and passengers not examined; passed on certificate from ship's surgeon that all were well. Vessel not fumigated.

On November 10 the president of the superior board of health received a cable from the Ecuadorean consul at Paita that the steamship *Pizarro*, which sailed from Panama via Guayaquil November 4, arrived at that port with a case of plague on board. To this date no further confirmation has been received.

GERMANY.

Report from Berlin—No cholera present in Germany or Galicia—Cholera diminishing in Russia.

Passed Assistant Surgeon McLaughlin reports, November 18, as follows:

No cases of cholera have been registered in Germany or Galicia since my last report.

In Russia the official report for the week ended October 26 shows a diminution in the number of cases, viz, 12 cases as against 26 cases in the previous week. Of the 12 cases 5 were in the city of Lodz and environs, 1 in Tykotchine, 2 in Lomja (city), 2 in Pultusk (district), and 2 in Masowetzk (district).

Report from Kehl—No cholera in Strasburg.

Consul Brittain reports, November 10, as follows:

From inquiry made at the police department of Strasburg, as well as at other localities, I am informed that there are at present no cases of cholera in the city. The soldier reported in my dispatch dated October 19, 1905, has recovered and been discharged from the lazaretto. There appear to have been doubts as to the second case reported in my dispatch.

Quarantine measures against immigrants from Russia.

Following cablegram sent November 29 by the Department of State to the consular officers at Bremen, Hamburg, Antwerp, and Rotterdam:

Immigrants from Russia arriving overland should be detained five days quarantine and baggage disinfected according to Treasury regulations.

HAWAII.

Quarantine transactions at Honolulu.

Passed Assistant Surgeon Cofer reports, November 13, as follows:

Quarantine transactions week ended November 11:

Vessels inspected and bills of health issued.....	4
Vessels disinfected and bills of health issued.....	3
Cabin passengers inspected.....	58
Steerage passengers inspected.....	174
Crew inspected.....	136
Steerage baggage disinfected.....	250
Baggage for crew disinfected.....	241

ITALY.

Reports from Naples—Inspection of vessels—Rejections of emigrants recommended—Smallpox.

Smallpox.—For the week ended November 9, 1905, there were reported 9 cases in 3 communes in the province of Caltanissetta.

Week ended November 16: Four cases in the province of Caltanissetta, 2 in the province of Cosenza, 2 in the province of Lecce, 3 at Genoa, 3 at Pitano (Novara), and 2 in the province of Bologna.

JAPAN.

Report from Yokohama—Inspection of vessels—Plague at Kobe and at Ying Kow, China.

Passed Assistant Surgeon Moore reports, October 28, as follows:

During the week ending October 21, 1905, five steamers, having an aggregate personnel of 486 crew and 456 passengers, were inspected prior to the issuance of bills of health. One hundred and ninety-eight steerage passengers were bathed and their body clothing disinfected. Three hundred and thirty-four aliens, would-be steerage passengers to the United States, were examined with special reference to their freedom from any loathsome, or any dangerous contagious disease barred by the United States immigration laws.

Plague.—Three fatal cases of plague are reported to have occurred in Kobe during the week ended October 21. According to a Japanese consular report, dated Ying Kow, October 21, 6 cases of plague had occurred there (Ying Kow) up to that date, 5 of which had proved fatal. No cases are reported in the neighboring districts. Strict sanitary measures have been adopted.

Report from Kobe—Immigrants recommended for rejection.

Acting Assistant Surgeon Fowler reports, November 8, as follows:

Month of October, 1905, steamship *Minnesota*, for Seattle, 1; steamship *Siberia*, for San Francisco, 1; steamship *Doric*, for Manila, 5; steamship *Mongolia*, for Honolulu, 7; steamship *Mongolia*, for San Francisco, 2; steamship *China*, for Honolulu, 5; steamship *China*, for San Francisco, 5.

MEXICO.

Report from Tampico—Inspection of vessels—Sanitary conditions—Decrease in mortality from malarial diseases.

Acting Assistant Surgeon Frick reports, November 27, as follows:

November 19, 1905: Inspected and passed the British steamship *Trojan*, bound for a port in the United States, north of Hatteras, via Coatzacoalcos, with 32 in the crew; vessel sails in partial cargo of American rails.

November 20: Inspected and passed the British steamship *Cayo Bonito*, bound for a port in the United States, via Mexican ports, with 31 in the crew; vessel sails in general cargo. Inspected and passed the British steamship *Cayo Largo*, bound for Galveston, via Mexican ports, with 32 in the crew and 1 passenger; vessel sails in general cargo.

November 22, 1905: Fumigated and passed the Norwegian steamship *Caprivi*, bound for Mobile, with 26 in the crew; vessel sails in ballast.

November 23, 1905: Inspected and passed the American steamship *Orizaba*, bound for New York, via Habana and Inagua, British West Indies, with 66 in the crew, 2 first-class and 2 steerage passengers, together with 67 British negro laborers, their three years' labor contract having expired and they being sent home.

November 25, 1905: Inspected and passed the Norwegian steamship *Norheim*, bound for Port Arthur, with 18 in the crew; vessel sails in a partial cargo of ixtle.

No quarantinable disease was reported during the week.

Report from Veracruz—Inspection and fumigation of vessels—Yellow fever.

Passed Assistant Surgeon Wilson reports, November 27, as follows: Transactions week ended November 25, 1905:

Vessels inspected and bills of health issued.....	6
Vessels fumigated with sulphur to kill mosquitoes.....	1
Crew inspected.....	260
Passengers inspected.....	110

Only 1 case and 1 death of yellow fever were reported during the week.

NICARAGUA.

Report from Managua—Health conditions.

Vice-Consul Wallace reports, October 30, as follows:

According to all reports obtained from the official and medical authorities not a single case of yellow fever is known to have existed at any time during the present year in the region of Nicaragua, between Greytown and Brito, or at either of these ports. No other contagious diseases have been reported and only a small number of cases of malaria have occurred.

During the months of June, July, August, and September quite a number of fatal cases of yellow fever and typhoid fever have occurred in the cities of Managua, Leon, and Masaya, Nicaragua, principally among foreigners newly arrived in the country (majority Italians and Spaniards) and natives coming from the higher altitudes.

PANAMA.

Report from Colon—Yellow fever at Panama—Quarantine against Bocas del Toro—Malarial fever.

Acting Assistant Surgeon Mohr reports, November 22, as follows:

During the week ended November 21, 1905, the following vessels cleared for ports in the United States and were granted bills of health:

American steamship *Allianca* for New York, November 17, with 70 crew and 57 passengers.

British steamship *La Plata* for New York, via Kingston, Jamaica, November 17, with 175 crew and 14 passengers for New York and 214 for Jamaica.

British steamship *Darien* for New Orleans, via Jamaica and Mexican ports, November 18, with 48 crew and 101 passengers.

A new case of yellow fever was reported in Panama November 20. The patient was a Colombian who lived in the San Tomas Hospital, the charity hospital in the city of Panama. According to the official report he was taken sick in that institution, admitted to the ward as a patient on November 11, and died on November 20. This is the third case of yellow fever reported on the Isthmus since November 1, one of which, as previously reported, occurred in Colon.

As no steps have been taken by the Panama authorities to stamp out the infection in Bocas del Toro, a quarantine has been enforced against that place by the sanitary department here. All nonimmunes arriving from Bocas will be placed in detention for 5 days and the small sailing craft bringing such passengers will be fumigated before being allowed to come alongside the docks.

PHILIPPINE ISLANDS.

Reports from Manila—Cholera, plague, and smallpox—Interisland quarantine period reduced—Inspection and disinfection of vessels.

Chief Quarantine Officer Heiser reports, October 12, 19, and 25, as follows:

During the week ended October 7, 1905, quarantinable diseases were reported for the city of Manila as follows: Plague, 1 case, 1 death; cholera, 12 cases, 11 deaths.

The number of cholera cases for the week showed an increase over that of the preceding week. Seven of the cases occurred on one day. There is no explanation to show why this sudden increase should have taken place. Before this sharp rise took place cases averaged about 1 a day. The condition in the provinces is about the same as reported last week.

Total number of cases of cholera in Manila since the beginning of the outbreak, 210; deaths, 183.

Total number in the provinces, 437 cases, 326 deaths.

The following vessels bound for United States ports were granted bills of health during the week:

On October 1, 1905, the U. S. army transport *Logan* was released from five days' quarantine and granted a bill of health for San Francisco. All persons on board—188 crew, 102 cabin, and 216 steerage passengers—were inspected just prior to sailing.

On October 4, 1905, the British steamship *Changsha*, en route from Kobe to Zamboanga, was granted a supplemental bill of health after serving two days' quarantine at Mariveles, the vessel completing her five days' quarantine en route to Zamboanga.

On October 5, 1905, the British steamship *Kaifong*, en route from Hongkong and Amoy to Cebu and Iloilo, was granted a supplemental bill of health after serving three days' quarantine at Mariveles, the vessel completing the five days' detention en route to Cebu.

On October 7, 1905, the American ship *Erskine M. Phelps* completed her five days' quarantine and was inspected and granted a bill of health for Honolulu.

Week ended October 14, 1905. Quarantinable diseases: Smallpox, 2 cases, no deaths; cholera, 4 cases, 6 deaths.

No vessels were cleared for ports in the United States.

Week ended October 21, 1905. Quarantinable diseases: Plague, 1 case, 1 death; cholera, 5 cases, 5 deaths.

The number of cholera cases has remained about stationary and the situation has not shown much change, except that the cases for the week, in a number of instances, could be traced to direct infection from the provinces; so that, practically speaking, the city has been almost entirely free from the disease.

Interisland quarantine.

In view of the urgent necessity for more frequent communication with the provinces on account of the conditions which were brought about by the recent typhoon, and in view of the fact that the quarantine had been in operation for nearly two months with only 1 case of cholera making its appearance upon a vessel undergoing quarantine detention; and, furthermore, since the experience of the Service with cholera during the past three years has demonstrated that for practical purposes the incubation period of cholera is less than three days, it was decided to reduce the period of quarantine upon outgoing inter-island vessels from five to three days. The circular letter putting this order into effect is inclosed herewith.

During the week vessels bound for United States ports were treated as follows:

On October 15, 1905, the American bark *Hecla*, with 17 crew, entered quarantine prior to sailing for Port Townsend. Crew bathed, ship disinfected, and all held for five days. Released on October 20, 1905.

On October 15, 1905, the U. S. army transport *Buford*, with 157 crew and 792 steerage passengers on board, entered quarantine prior to being cleared for San Francisco. Crew and steerage passengers were bathed and their effects and baggage disinfected and detained in quarantine five days. Cabin passengers were embarked on the 20th, and, after inspection, vessel was granted a bill of health. Baggage and cargo either disinfected or passed after inspection, and so labeled.

On October 16, 1905, the German steamship *Vandalia*, en route from Japan ports to New York, was granted a supplemental bill of health. Vessel carried no passengers. Crew inspected on board prior to sailing.

On October 18, 1905, the British steamship *Sungkiang*, en route from Hongkong and Amoy to Iloilo and Cebu, entered quarantine prior to proceeding to Iloilo. Crew and steerage passengers were bathed and effects disinfected at the Mariveles quarantine station upon arrival from Amoy.

On October 19, 1905, the British steamship *Chingtu* entered quarantine prior to being granted a supplemental bill of health for Zamboanga. Vessel was cleared so as to make the quarantine and voyage total five days upon her arrival at Zamboanga. Crew and passengers inspected daily.

On October 20, 1905, the American steamship *Shawmut*, en route to Tacoma via Hongkong and Chinese and Japanese ports, was granted a bill of health. Vessel carried no steerage passengers for the United States, and after a rigid inspection of the personnel was cleared without quarantine.

Circular modifying quarantine.

MANILA, P. I., *October 20, 1905.*

To the owners and agents of vessels, Manila, P. I.

SIR: Owing to the improvement in the cholera situation in Manila, the quarantine heretofore imposed upon outgoing interisland vessels will be reduced from five to three days, beginning October 23, 1905. All other regulations prescribed in circular letters issued by this office August 26, 1905, and October 4, 1905, will be enforced.

Respectfully,

VICTOR G. HEISER,
*Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.*

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND
CITIES—UNTABULATED.

CANADA—*British Columbia—Victoria.*—Month of October, 1905: Estimated population, 21,000. Total number of deaths 25, including enteric fever 2, and 1 from tuberculosis.

Ontario.—The health report for October shows a great increase in the number of smallpox cases, but no deaths were reported. There were 63 cases and no deaths. The other diseases are as follows: Diphtheria, 190 cases, 29 deaths; scarlet fever, 93 cases, 1 death; measles, 25 cases, 1 death; whooping cough, 36 cases, 6 deaths; enteric fever, 336 cases, 47 deaths; tuberculosis, 170 cases, 163 deaths. Total from all causes, 2,004. The returns were from 702 divisions.

DUTCH GUIANA—*Paramaribo.*—Month of October, 1905. Estimated population, 33,003. Total number of deaths, 92. No deaths from contagious diseases.

FRANCE—*St. Etienne.*—Two weeks ended October 31, 1905. Census population, 146,671. Total number of deaths 136, including diphtheria 2, enteric fever 1, and 17 from tuberculosis.

Great Britain mortality during quarter ended September 30, 1905.—The deaths registered in England and Wales last quarter numbered 102,792, and were in the proportion of 14.0 annually per 1,000 persons living, the average rate in the ten preceding fourth quarters having been 16.5. In registration counties, with populations exceeding 100,000 persons, the death rates ranged from 10.3 in Surrey and in Hertfordshire, 10.5 in Berkshire, 10.6 in Bedfordshire, 10.7 in Dorsetshire, 10.8 in Cambridgeshire to 15.1 in the East Reding of Yorkshire, 15.9 in Glamorganshire, 16.1 in Northumberland and in Monmouth, 16.8 in Lancastershire, and 17.1 in Durham.

The 120,792 registered deaths included 63,282 of males and 57,510 of females, the death rate among males being 15.2 and that among females 12.9 per 1,000 of the estimated populations of the respective sexes.

Compared with the average for each sex in the ten preceding fourth quarters, the death rate of males showed a decrease of 2.7 and that of females a decrease of 2.4 per 1,000 living. Out of equal numbers living the deaths of males were to those of females as 118 is to 100, the proportion in the third quarters of the ten preceding years having been 117 to 100.

Urban and rural mortality.—In 76 great towns, in each of which the population at the census of 1901 exceeded 50,000, and of which the aggregate population in the middle of 1905 is estimated at more than fifteen and a half millions, the death rate was 15.2 per 1,000 living, or 1.2 in excess of the death rate in the whole country. The rates in the several towns ranged from 6.4 in Hornsey, 8.3 in Handsworth (Staffs), 7.4 in Kings Norton, 10.0 in Walthamstow, 9.0 in Burton on Trent, and 9.2 in Bournemouth to 19.4 in Manchester, 19 in Liverpool and in Wigan, 19.8 in Merthyr Tydfil, 20.1 in Booth, and 22.5 in Rhondda.

In 141 smaller towns, with populations ranging between 20,000 and 50,000 at the census of 1901, and with an aggregate population estimated at about four and three quarter millions in the middle of 1905, the death rate was 13.3 per 1,000 living, or 1.9 per 1,000 below the rate in the great towns.

In the remainder of England and Wales, with an aggregate population estimated at more than thirteen and three-quarter millions in the middle of 1905, of whom nearly six and a quarter millions live in small towns and more than seven and a half millions in rural districts, the death rate was 13.0.

Mortality from certain epidemic diseases.—The 120,792 deaths from all causes include 1,655 that were attributed to measles, 15,733 to diarrhea, 1,087 to diphtheria, 1,639 to whooping cough, 786 to scarlet fever, 773 to "fever," 4 to smallpox.

Thus, to the above-mentioned epidemic diseases in the aggregate, 21,677 deaths were referred last quarter, being in the proportion of 2.52 annually in each 1,000 of the estimated population, or 0.80 per 1,000 less than the average proportion in the third quarters of the previous ten years.

GIBRALTAR.—Seven days ended November 13, 1905. Estimated population, 27,460. Total number of deaths, 10. No deaths from contagious diseases.

ITALY—*Milan.*—Month of September, 1905. Estimated population, 536,209. Total number of deaths 722, including diphtheria 7, enteric fever 24, measles 3, and 71 from tuberculosis.

SPAIN—*Barcelona.*—Ten days ended November 10, 1905. Estimated population, 600,000. Total number of deaths 410, including diphtheria 3, enteric fever 14, measles 3, smallpox 6, and 34 from tuberculosis.

WEST INDIES—*St. Thomas.*—For the thirteen weeks in the third

quarter of 1905. Estimated population, 11,012. Total number of deaths, 82, including enteric fever 2, and 12 from tuberculosis.

Three weeks ended November 10, 1905. Estimated population, 11,012. Total number of deaths, 16, including 2 from tuberculosis.

Cholera, yellow fever, and smallpox, June 30, to December 8, 1905.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from December 30, 1904, to June 30, 1905, see PUBLIC HEALTH REPORTS for June 30, 1905.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
