

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Report from Gulfport, Miss.—Sanitary conditions satisfactory.

Passed Assistant Surgeon Ames reports, July 30, as follows:

Week ended July 28, 1906. The sanitary squad has continued its effective work, eradicating many foci of enteric infection and compelling property owners to keep their premises free from débris of every kind. Several new cases of enteric fever were reported. Half the population are unprovided with the proper means for the disposal of waste.

As far as a most careful survey can determine, there is no sickness of a suspicious character in Gulfport or Mississippi City. The encampment of the National Guard of Mississippi was concluded July 26. The hospital report showed few admissions and no deaths. Malarial cases were reported.

Disinfection of schooner Joseph G. Ray at Galveston, Tex., for tuberculosis.

Passed Assistant Surgeon Gardner reports, July 24, as follows:

A seaman suffering with pulmonary tuberculosis was taken off the American schooner, *Joseph G. Ray*. The forecastle of the schooner was disinfected, in accordance with the provisions of Department Circular No. 15, 1902.

STATISTICAL REPORTS OF STATES AND CITIES OF THE UNITED STATES, YEARLY AND MONTHLY.

CALIFORNIA—*Sacramento*.—Month of June, 1906. Estimated population, 35,000. Total number of deaths, 41, including whooping cough 1, smallpox 1, and 5 from tuberculosis.

CONNECTICUT—*Bridgeport*.—Month of June, 1906. Estimated population, 90,000. Total number of deaths, 127, including diphtheria 2, measles 2, and 13 from tuberculosis.

MICHIGAN.—Month of June, 1906. The total number of deaths returned to the Department of State for the month of June was 2,650, a decrease of 377 from May, but an increase of 256 over the corresponding month of 1905. The death rate was 12.5 per 1,000 estimated population, as compared with 13.8 for the preceding month. •

By ages there were 480 deaths of infants under 1 year, 179 deaths of children aged 1 to 4 years, and 713 deaths of elderly persons aged 65 years and over.

Important causes of death were as follows: Tuberculosis of lungs, 228; other forms of tuberculosis, 35; typhoid fever, 20; diphtheria and croup, 34; scarlet fever, 15; measles, 36; whooping cough, 33; pneumonia, 120; diarrheal diseases, under 2 years, 96; meningitis, 43; cancer, 123; accidents and violence, 207, of which number 54 were deaths from drowning.

There was one death returned from smallpox, occurring in the city of Bay City, Bay County.

Grand Rapids.—Month of June, 1906. Estimated population, 100,000. Total number of deaths, 99, including diphtheria 5, scarlet fever 1, whooping cough 1, and 4 from tuberculosis.

MISSOURI—*St. Louis*.—Month of June, 1906. Estimated population, 710,000—white, 665,000; colored, 45,000. Total number of deaths, 727; white, 643; colored, 84, including diphtheria 6, enteric fever 3, measles 1, whooping cough 10, and 110 from tuberculosis.

TENNESSEE—*Chattanooga*.—Month of June, 1906. Estimated population, 55,000—white, 38,000; colored, 17,000. Total number of deaths, 74; white, 35; colored, 37, including enteric fever 3, whooping cough 1, and 7 from tuberculosis.

WISCONSIN—*Milwaukee*.—Month of June, 1906. Estimated population, 345,000. Total number of deaths, 335, including diphtheria 2, enteric fever 6, measles 1, scarlet fever 1, whooping cough 1, and 42 from tuberculosis.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 29 to August 10, 1906.

[For reports received from December 29, 1905, to June 29, 1906, see PUBLIC HEALTH REPORTS for June 29, 1906.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

FOREIGN AND INSULAR.

AFRICA.

Report from Freetown, Sierra Leone—Sanitary conditions good.

Vice-Consul Dougherty reports, July 3, as follows:

Conditions remain about the same. There has been a slight increase in the number of deaths among the natives during the past few weeks. The whites have suffered a good deal from sickness, but the mortality has not increased. No malignant diseases are prevalent.

Report from Cape Town—Plague-infected rodents found at East London.

The following is received from the medical officer of health for Cape Colony, under date of June 25, 1906:

East London.—Week ended June 23, 1906: 119 rodents, of which 11 were found dead, bacteriologically examined. Of this number 2 were found to be plague infected.

AUSTRALIA.

Plague bulletins—Plague in Queensland, New South Wales, and Western Australia—Examination of rodents for plague infection.

The following information is taken from reports received from Consul-General Bray, at Melbourne:

In Queensland a mild case of plague was reported at Brisbane on the 9th instant. The patient was a boy employed as a porter at a railway station. He is now convalescent. During the four weeks ended June 16, 1906, 1,789 rodents were destroyed and 1,006 were examined. Ten were found infected.

In New South Wales 1 case was reported at Sydney during the week ended June 16, 1906. The patient had been employed in rat catching at a place on the inner harbor. No infection was found among rodents taken from the locality. During the four weeks ended June 16, 1906, 7,786 rodents were destroyed and 2,250 examined. Infection was found in 6.

In New South Wales 1 case was reported at Fremantle during the week ended June 2, 1906, and during the week ended June 9, 1 case. The patients had worked on the same premises. One case ended fatally during the week ended June 9. During the three weeks ended June 16, 87 rats were examined at Perth and 95 at Fremantle. Of the latter number 2 were found infected.

• BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Cooke reports as follows:

Week ended July 26, 1906. •Present officially estimated population, 9,000; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
1906.					
July 20	Olympia	New Orleans	43		
20	Donna Christina	Pensacola	6	10	
23	Musician	do	66		

CUBA.

Report from Banes—Investigation of sanitary conditions on Nipe Bay—Malarial fever.

Acting Assistant Surgeon McConnell reports, July 22, as follows:

I visited Antillia, Preston, and Saetia, the settlements of Nipe Bay, and investigated the conditions at those places. I found nothing suspicious.

Antillia is the terminus of the Cuban Central Railroad, and it is from this point that the rumor of yellow fever originated. I am informed that a number of persons applied for tickets to points on the railroad, some of whom were too ill to proceed. These cases came from Guaro, a camp about 18 miles from Preston. The sick at this camp are attended by the resident physician at Preston. He assures me that these cases and others seen by him at the same time presented no symptoms of yellow fever, but were frankly malarial fever. He states that his examination of the blood confirmed the diagnosis; that there was no albumin in the urine, and that the pulse conformed absolutely to the temperature. The deaths, he believes, were due to insufficient and bad food and lack of early treatment.

Doctor Gomez, of Saetia, also saw these cases, and states positively that none were suspicious of yellow fever.

There were no sick at Antillia when I was there. At Preston I saw about 20 cases of fever, all malarial with the exception of 1 case of enteric fever. The sanitary arrangement there is excellent.

No fever exists at Saetia.

At Banes numerous cases of malarial fever, measles, and enteric fever exist, but I have been unable to find any suspicious illness.

I fumigated the steamship *Freke* clearing for Charleston on the 19th instant, certifying that the vessel had been fumigated and had in all respects complied with the provisions of Department's circular No. 32.

Report from Habana—Yellow-fever death at Colon, in Matanzas Province.

Passed Assistant Surgeon von Ezdorf reports, August 2, as follows: A case of yellow fever confirmed 1st instant; died last night at hospital in Colon, Matanzas Province. Case was from Mercedes plantation, near Guareiras, which is south of Colon. Infection has not been traced. Last December Real Campina, on same railroad, south of Guareiras, was infected.

Report from Matanzas—Inspection and fumigation of vessels—Yellow fever.

Acting Assistant Surgeon Nuñez reports, July 30, as follows:

Week ended July 28, 1906: Bills of health granted to 3 vessels, the ultimate destination of which were ports in the United States. They were all in good sanitary condition, and left without any sickness on board up to the time of their inspection. Three certificates of immunity were issued to passengers bound to the United States via Habana.

No quarantinable disease has been reported in the city or province.

August 2: Yellow fever at Colon; died last night. Case confirmed by necropsy.

ECUADOR.

Report from Guayaquil—Smallpox and yellow fever—Inspection and fumigation of vessels.

Temporary Acting Assistant Surgeon Gomez reports, July 15, as follows:

Two weeks ended July 14, 1906: Present officially estimated population, 60,000. Mortality from all causes, 193, including yellow fever 9, and smallpox 7.

Four bills of health were issued. July 4 German steamship *Anubis* cleared for San Francisco; no passengers from here for that port; vessel fumigated. July 11 British steamship *Quito*, a coasting steamer, cleared for Ancon, Canal Zone; no passengers from here for that port. July 11 Chilean steamship *Aconcagua* cleared for Ancon, with 18 cabin and 5 steerage passengers; vessel fumigated. July 12 German steamship *Abydos* cleared for San Francisco; no passengers from here for that port; vessel fumigated.

Fifty-two pieces of baggage passed; 9 certificates of immunity to yellow fever issued.

The movement of yellow fever at the pesthouse during the last two weeks was as follows: Remaining, 9; new cases, 9; cured, 6; deaths, 8.

GUATEMALA.

Report from Puerto Barrios—Inspection of vessels.

Acting Assistant Surgeon Wailes reports as follows: Week ended July 24, 1906. Present officially estimated population, 3,500; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 21	Constance	Trinidad	33			
21	Flandria	New York	35	4	2	
24	Anselm	New Orleans	41			

HAWAII.

Reports from Honolulu—Outgoing quarantine transactions—Plague.

Chief Quarantine Officer Cofer reports as follows: Week ended July 7, 1906—

Vessels inspected and bills of health issued	11
Vessels disinfected and bills of health issued	4
Cabin passengers inspected	68
Steerage passengers inspected	473
Crew inspected	104
Steerage baggage disinfected	363
Baggage for crew disinfected	109
Hides disinfected	0
Pieces of freight disinfected	0
Persons declined certificates on account of fever	0

Week ended July 14, 1906:

Vessels inspected and bills of health issued	7
Vessels disinfected and bills of health issued	3
Cabin passengers inspected	88
Steerage passengers inspected	297
Crew inspected	145
Pieces steerage baggage disinfected	519
Pieces baggage for crew disinfected	108
Hides disinfected	84
Pieces of freight disinfected	0
Persons declined certificates on account of fever	8

August 7. There was a death from plague yesterday.

HONDURAS.

Report from Tela—Inspection of vessels.

Acting Assistant Surgeon Roe reports as follows: Week ended July 21, 1906. Present officially estimated population, about 4,000; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected
July 15	Utstein	New Orleans	17	0	0	0
18	Jos. Vaccarodo	30	0	0	0
15	John Wilson	Mobile	17	0	0	0
21	Condordo	16	0	0	0

INDIA.

Report from Calcutta—Transactions of Service—Cholera, plague, and smallpox.

Acting Assistant Surgeon Eakins reports, July 5, as follows:

Week ended June 30, 1906. Bill of health issued to the steamship *Trifels*, bound for Boston and New York, with a total crew of 56. The usual precautions were taken—holds fumigated, rat guards placed on wharf lines, and Lascars' effects disinfected.

Week ended June 23, 1906, there were 31 deaths from cholera, 29 deaths from plague, and 8 deaths from smallpox in Calcutta.

In India during the same week there were 1,130 cases and 952 deaths from plague.

ITALY.

Report from Naples—Inspection of vessels—Rejection of emigrants recommended.

Passed Assistant Surgeon McLaughlin reports, July 16, as follows:

Week ended July 14, 1906. Vessels inspected at Naples and Palermo as follows:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage inspected and passed.	Pieces of baggage disinfected.

JAPAN.

Report from Yokohama—Emigrants recommended for rejection.

Passed Assistant Surgeon Cumming reports as follows:

Number of emigrants per steamship *Minnesota*, recommended June 25, 1906, for rejection: For Seattle, 17. Per steamship *Tango Maru*, June 29, 1906: For Seattle, 37. Per steamship *Nippon Maru*, June 30, 1906: For Honolulu, 21; for San Francisco, 2. Per steamship *Doric*, July 7, 1906: For Honolulu, 27; for San Francisco, 1.

Report from Nagasaki—Rejection of emigrants.

Sanitary Inspector Bowie reports as follows:

June 30, 1906: Number of emigrants examined and rejected, 34.

MEXICO.

Report from Progreso—Inspection and fumigation of vessels—Yellow fever in Merida.

Acting Assistant Surgeon Harrison reports, July 22, as follows:

Period from July 14, 1906, included, to July 22, 1906. No quarantinable disease appeared in Progreso, but in Merida yellow fever continued with no apparent increase or abatement. Six steamships and one sailing vessel carrying crews, 228, and passengers from this port, 39, were dispatched; fumigated, 4.

Report from Veracruz—Inspection and fumigation of vessels—Sanitary conditions favorable—Decrease in number of mosquitoes.

Acting Assistant Surgeon Frick reports, July 23, as follows:

Week ended July 21, 1906.

July 15. Fumigated and passed the British steamship *Barrister*, bound for Pensacola with 40 in the crew; vessel sails in a partial general cargo. July 17. Fumigated and passed the American schooner *Kate Feore*, bound for Pascagoula with 7 in the crew; vessel sails in ballast. July 18. Fumigated and passed the British steamship *Bishopsgate*, bound for Gulfport, with 24 in the crew; vessel sails in ballast. July 19. Inspected the Norwegian steamship *Fortuna*, bound for a port in the United States via Progreso, with 24 in the crew; vessel sails in ballast. Inspected the American steamship *Seguranca*, bound for New York via Progreso and Habana, with 82 in the crew, 61 first-class and 31 second-class passengers; vessel sails in general cargo. July 20. Fumigated the British steamship *Olivemoor*, bound for Tampa, with 24 in the crew; vessels sails in ballast. July 21. Inspected and passed the British steamship *Alexandrian*, bound for a port in the United States via Coatzacoalcas; vessel sails in general cargo. Sanitary conditions are favorable. Deaths from malarial diseases are few, and I hear of little malarial fever. Mosquitoes have decreased during the past two weeks.

NICARAGUA.

Reports from Bluefields, fruit port—Smallpox.

Acting Assistant Surgeon Layton reports as follows: Week ended July 22, 1906. Present officially estimated population, 3,500; general sanitary conditions of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected
July 17	Sarstoon	Boston via Rio Grande, Nicaragua.	28	1	0	0
19	Bluefields.....	Mobile, Ala	23	9	0	0

One employee of the Mahogany Company sailed as a passenger on the steamship *Sarstoon*. As both the ship and passenger were bound for a northern United States port no certificate of the service was furnished the passenger, who had been under my observation for more than five days.

British steamship *Sarstoon*, engaged in mahogany trade, did not actually enter port. A supplemental bill of health was granted under provisions of paragraph 3, page 14, of national quarantine regulations.

Two new members of crew of steamship *Bluefields* were vaccinated while the vessel was in port.

August 6. One smallpox.

PANAMA.

Reports from Colon—Inspection and fumigation of vessels—Smallpox—Malarial fever on vessels.

Acting Assistant Surgeon Mohr reports, July 21, as follows:

Week ended July 20, 1906. Vessels cleared for ports in the United States and granted bills of health as follows:

American steamship *Allianca* for New York, July 16, with 70 crew and 111 passengers.

Norwegian steamship *Egda* for New Orleans, July 16, with 23 crew and no passengers; holds and living quarters fumigated.

British steamship *Musician* for Pensacola, via Belize, British Honduras, July 17, with 65 crew and no passengers; holds and living quarters fumigated.

British schooner *Caledonia* for New York, via San Blas coast, July 17, with 8 crew and no passengers.

British steamship *Orinoco* for New York, via Kingston, Jamaica, with 163 crew and 12 passengers.

Norwegian steamship *Karen* for New Orleans, July 20, with 23 crew and no passengers; holds and living quarters fumigated.

Since my report of the 18th instant 5 new cases of smallpox have developed in the infected area, making a total up to date of 37 cases. The infection is still confined to the original area, which continues to be kept under strict supervision. No deaths have occurred.

There has been an unprecedentedly heavy and continuous rainfall during the past month, and in consequence malarial fever is on the increase. Cases of this disease occurring on the vessels in port are kept under close observation by the quarantine officer and myself.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows:

Week ended July 21, 1906. Present officially estimated population not obtainable; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage.
July 14	Katie.....	Mobile.....	24	0	0	0
18	Greenbrier.....	New Orleans.....	47	0	0	0

PERU.

Report from Callao—Inspection and fumigation of vessels—Plague and smallpox in Chilean ports.

Assistant Surgeon Wightman reports, July 8, as follows:

Week ended July 7, 1906. Vessels dispatched by this office as follows:

The British steamship *Coya* on the 1st, for San Francisco, Cal., with general cargo, and a total personnel of 35, of whom 4 cabin passengers and 3 members of the crew were from this port.

The British steamship *Earl of Douglas* on the 2d, for New York, with general cargo, and a total personnel of 59, of whom 3 cabin passengers were from this port.

The Chilean steamship *Aconcagua* on the 4th, for Ancon, Canal Zone, with general cargo, and a total personnel of 187, of whom 65 cabin passengers and 43 steerage were from this port.

The German steamship *Abydos* on the 5th, for San Francisco, Cal., with general cargo, and a total personnel of 55, of whom 1 cabin passenger and 1 new member of crew were from this port.

All the vessels were fumigated prior to departure, one hold of the steamship *Coya* being excepted from fumigation. Effects of steerage passengers were inspected and passed or fumigated.

No new case of plague was reported in Lima or Callao during the week, and no new statistics of plague in other localities of Peru have been received since the last one forwarded.

Bills of health from Chilean ports show in Antofagasta 27 cases of smallpox with 9 deaths, and 10 cases of plague with 2 deaths in 2 weeks prior to June 24; and in Iquique, smallpox still present.

PHILIPPINE ISLANDS.

Reports from Manila—Inspection and disinfection of vessels—Cholera in Manila and the provinces; epidemic at Tanay; case on steamship Ban Yek at Mariveles quarantine station—Circular.

Chief Quarantine Officer Heiser reports, June 20 and 28, as follows: Week ended June 16, 1906. Quarantinable disease reported for the city of Manila as follows: Cholera, 6 cases, 4 deaths.

During the same week, cholera was reported for the provinces as follows: Province of Rizal, 10 cases, 6 deaths.

Vessels bound for United States ports were treated as follows: On June 13 the American ship *Wm. P. Frye*, with 29 crew, was released after five days' quarantine and proceeded to Honolulu.

On June 15 the U. S. army transport *Sherman*, with 183 crew and 343 passengers, was granted a bill of health for San Francisco via Nagasaki and Honolulu. Crew and steerage passengers were bathed and their effects and baggage disinfected at Mariveles quarantine station. Forecasts, decks, and steerage compartments of vessel disinfected by washing down with bichloride solution. Cargo inspected and either disinfected or passed, and so labeled. All persons on board inspected at the hour of sailing.

On June 16 the American schooner *H. K. Hall*, with 12 crew, was released after five days' quarantine prior to sailing for Port Townsend.

On June 16 the American ship *Arthur Sewall*, with 29 crew, entered quarantine prior to sailing for Honolulu.

On June 16 the American ship *James Tuft*, with 13 crew, entered quarantine prior to departure for Port Townsend.

Week ended June 23, 1906. Quarantinable disease reported for the city of Manila as follows: Cholera 17 cases, 13 deaths.

During the week cholera was reported for the provinces as follows:

Province.	Cases.	Deaths.
Rizal.....	86	48
Pampanga.....	2	2
Laguna.....	2	2
Total.....	90	52

After cholera had almost entirely disappeared, with the exception of a few isolated cases, it suddenly made its appearance in a number of widely separated towns. At Tanay, one of the small towns situated in the province of Rizal, bordering upon Laguna de Bay (Lake of Bay), the disease has assumed epidemic proportions, nearly 100 cases being reported within ten days. The disease also appeared at Camp Stotsenberg, Angeles, Guagua, and San Luis, in the province of Pampanga; at Malolos, in Bulacan Province; at Pila, Siniloan, and Santa Cruz, Laguna Province; and at Pasig and Cainta, province of Rizal. One noteworthy feature of the outbreak is that the appearance of the disease in the places mentioned above occurred almost upon the same day. So far no satisfactory explanation has been offered for the outbreak. Those who believe in the theory of Pettenkofer, namely, that outbreaks of cholera depend on certain conditions of the soil, which

occur when certain meteorological conditions are present, are proclaiming that this is a vindication of his theory.

Another case of cholera was detected at Mariveles June 22, 1906, on the steamship *Ban Yek* at the outgoing quarantine inspection, which is made of vessels bound for ports in the Philippine Islands. The case was promptly removed to the station hospital. The vessel and the effects of the crew and passengers were thoroughly disinfected. So far there has been no further outbreak.

During the week no bills of health were issued to vessels proceeding to the United States.

CIRCULAR.

MANILA, P. I., June 29, 1906.

To the owners, agents, and masters of vessels, and others concerned:

Owing to the increase of cholera in Manila and vicinity the quarantine heretofore imposed upon outgoing interisland vessels will be increased from twenty-four hours to forty-eight hours. Time to count from the hour of arrival at Mariveles.

Vessels whose first port of call is either Iloilo or Cebu will be permitted to sail direct, but pratique will not be granted at port of arrival until fifty hours have elapsed from the time of departure from Manila.

All other regulations will remain as heretofore, except as above modified.

This regulation takes effect immediately.

Very respectfully,

VICTOR G. HEISER,
*Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.*

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND
CITIES—UNTABULATED.

AFRICA—*Lourenço, Marquez.*—Month of May, 1906. Estimated population, 10,000. Total number of deaths, 53, including 8 from tuberculosis.

BAHAMAS—*Dunmore Town.*—Two weeks ended July 14, 1906. Estimated population, 1,232. No deaths.

Green Turtle Cay.—Two weeks ended July 12, 1906. Estimated population, 3,314. No deaths and no contagious diseases reported.

Nassau.—Three weeks ended July 21, 1906. Estimated population, 12,656. No deaths and no contagious diseases reported.

FRANCE—*Marseille.*—Month of June, 1906. Estimated population, 519,285. Total number of deaths, 1,095, including diphtheria 9, enteric fever 19, measles 63, scarlet fever 4, whooping cough 6, smallpox 1, and 124 from tuberculosis.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended July 14, 1906, correspond to an annual rate of 11.7 per 1,000 of population, which is estimated at 15,818,360.

Bradford.—Two weeks ended July 14, 1906. Estimated population, 288,544. Total number of deaths 134, including measles 4, whooping cough 1, and 18 from phthisis pulmonalis.

London.—One thousand and seventy-two deaths were registered during the week, including measles 22, scarlet fever 6, diphtheria 9, enteric fever 4, whooping cough 18, and 35 from diarrhea. The deaths from all causes correspond to an annual rate of 11.8 per 1,000. In Greater London 1,474 deaths were registered. In the "outer ring" the deaths included 2 from diphtheria, 2 from measles, 2 from scarlet fever, and 1 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 14, 1906, in the 21 principal town districts of Ireland was 16.9 per 1,000 of the population, which is estimated at 1,093,959. The lowest rate was recorded in Waterford, viz, 7.8, and the highest in Lurgan, viz, 35.4 per 1,000. In Dublin and suburbs 140 deaths were registered, including enteric fever 1, measles 1, typhus fever 1, whooping cough 6, and 28 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended July 14, 1906, correspond to an annual rate of 14.3 per 1,000 of the population, which is estimated at 1,787,788. The lowest rate of mortality was recorded in Paisley, viz, 10.2, and the highest in Greenock, viz, 17 per 1,000. The aggregate number of deaths registered from all causes was 491, including diphtheria 3, enteric fever 7, measles 12, scarlet fever 2, and 17 from whooping cough.

JAMAICA—Kingston.—Month of June, 1906. Estimated population, 52,065. Total number of deaths 122, including diphtheria 1, and 10 from phthisis pulmonalis.

JAPAN—Formosa.—Ten days ended June 20, 1906. Estimated population, 3,050,004. Total number of deaths not reported; 209 deaths from plague reported.

Nagasaki.—Estimated population, 163,324. Ten days ended June 30, 1906. One death from enteric fever reported.

JAVA—Batavia.—Two weeks ended June 16, 1906. Estimated population, 160,000. Total number of deaths not reported. No deaths from contagious diseases reported.

ST. HELENA.—Four weeks ended June 23, 1906. Estimated population, 3,700. Total number of deaths, 5. No contagious diseases.

SPAIN—Barcelona.—Ten days ended June 30, 1906. Estimated population, 600,000. Total number of deaths, 406, including diphtheria 1, enteric fever 7, measles 2, scarlet fever 1, whooping cough 3, smallpox 6, and 21 from tuberculosis.

Ten days ended July 10, 1906. Total number of deaths, 382, including diphtheria 1, enteric fever 4, measles 2, scarlet fever 1, whooping cough 5, smallpox 6, and 30 from tuberculosis.

Seville.—Month of June, 1906. Estimated population, 148,315. Total number of deaths, 456, including diphtheria 2, enteric fever 4, measles 2, whooping cough 3, smallpox 26, and 73 from tuberculosis.

WEST INDIES—*Curaçao*.—Two weeks ended July 20, 1906. Estimated population, 31,600. Total number of deaths, 17. No deaths from contagious diseases.

Cholera, yellow fever, plague, and smallpox, from June 29 to August 10, 1906.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from December 29, 1905, to June 29, 1906, see PUBLIC HEALTH REPORTS for June 29, 1906.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
