

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Report from Delaware Breakwater quarantine—Case of sickness on steamship Elswick Lodge from Tampico—Departure of vessel.

Passed Assistant Surgeon Bahrenburg reported as follows:

August 30. *Elswick Lodge* arrived here to-day. The patient has no jaundice nor albuminuria. Morning temperature to-day, 37.4, pulse 108; at 5 p. m., 37.2 and 72, respectively; nausea moderate; no epigastric tenderness. Probable diagnosis, malarial fever.

On August 31 the Bureau instructed Passed Assistant Surgeon Bahrenburg as follows:

Remove patient from steamship *Elswick Lodge* to shore; fumigate vessel for destruction mosquitoes; inspect personnel critically and if all well on completion process and no reason to contrary known to you release vessel and personnel. Bureau understands steamer will remain at Breakwater possibly several days awaiting charter. Keep her under observation and wire her departure and destination.

September 1. Passed Assistant Surgeon Bahrenburg reported as follows:

Elswick Lodge sailed at 3 o'clock for Cape Charles bound to Norfolk.

The steamship *Elswick Lodge* arrived at Cape Charles quarantine, Va., with a case of sickness on board which was regarded as suspicious. The vessel was fumigated, August 26, and allowed to proceed to Delaware Breakwater quarantine, August 28. See Public Health Reports, August 31, page 1007.

STATISTICAL REPORTS OF STATES AND CITIES OF THE UNITED STATES, YEARLY AND MONTHLY.

ILLINOIS—*Rockford*.—Month of July, 1906. Estimated population, 40,000. Total number of deaths, 33, including enteric fever 1, and 2 from tuberculosis.

MICHIGAN.—Month of July, 1906. The total number of deaths returned to the department of state for the month of July was 2,779, an increase of 129 over June and an increase of 297 over the corresponding month of 1905. The death rate was 12.7 per 1,000 estimated population, as compared with 12.5 for the preceding month.

By ages there were 627 deaths of infants under 1 year, 226 deaths of children aged 1 to 4 years, and 678 deaths of elderly persons aged 65 years and over.

Important causes of deaths were as follows: Tuberculosis of lungs, 185; other forms of tuberculosis, 35; typhoid fever, 33; diphtheria and croup, 22; scarlet fever, 14; measles, 23; whooping cough, 43; pneumonia, 84; diarrheal diseases, under 2 years, 259; meningitis, 27; cancer, 147; accidents and violence, 222, of which number 50 were from drowning, 4 less than the number returned from this cause for the month of June.

Grand Rapids.—Month of July, 1906. Estimated population, 100,000. Total number of deaths, 137, including diphtheria 4, enteric fever 4, and 8 from tuberculosis.

MINNESOTA—*Minneapolis.*—Month of July, 1906. Estimated population, 277,168. Total number of deaths, 233, including diphtheria 1, enteric fever 3, scarlet fever 1, whooping cough 2, and 27 from tuberculosis.

OHIO—*Cleveland.*—Month of July, 1906. Estimated population, 470,000. Total number of deaths, 636, including diphtheria 8, enteric fever 6, measles 3, scarlet fever 5, whooping cough 1, and 58 from tuberculosis.

VIRGINIA—*Richmond.*—Month of July, 1906. Estimated population, 100,000—white, 62,250; colored, 37,750. Total number of deaths, 170—white, 80; colored, 90—including diphtheria 1, enteric fever 3, whooping cough 19, and 18 from tuberculosis.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 29 to September 7, 1906.

[For reports received from December 29, 1905, to June 29, 1906, see PUBLIC HEALTH REPORTS for June 29, 1906.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

FOREIGN AND INSULAR.

AFRICA.

Report from Cape Town—Examination of rodents for plague infection at East London and King Williams Town; infection found.

The following is received from the medical officer of health for Cape Colony, under date of July 23, 1906:

East London.—Week ended July 21, 1906: sixty-seven rodents, of which 23 were found dead, bacteriologically examined; 7 were found to be plague-infected.

King Williams Town.—Sixteen rodents, all of which were found dead, were bacteriologically examined during the week, of which 12 proved to be plague-infected.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Cooke reports as follows:

Week ended August 23, 1906. Present officially estimated population, 9,000; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
Aug. 17	Olympia.....	New Orleans.....	41
21	Senator.....	Port Eads, La	41

COSTA RICA.

Report from Limon, fruit port.

Acting Assistant Surgeon Goodman reports as follows:

Week ended August 25, 1906. Estimated population, 5,000; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
Aug. 19	Esparta.....	Boston.....	42	8	0

Two bills of health for Panaman ports were viséed.

CUBA.

Report from Cienfuegos—Inspection and fumigation of vessels—Sanitary conditions.

Acting Assistant Surgeon Flint reports, August 27, as follows:

Week ended August 25, 1906:

One original and 3 supplemental bills of health have been issued, 3 vessels fumigated, 135 crew inspected, and 9 immune certificates issued.

No quarantinable diseases reported.

The general sanitary condition of the city is good. The sewerage system is at present very limited and imperfect.

Preliminary surveys have already been made for a complete sewerage system, to cover the whole city.

Report from Habana—Inspection of vessels—Yellow fever—Source of infection on steamship Miguel M. Penillos undetermined—Dengue fever during month of July, 1906.

Passed Assistant Surgeon von Ezdorf reports, August 27, as follows:

Week ended August 25, 1906.

Vessels inspected and bills of health issued.....	17
Vessels not inspected and bills of health issued.....	5
Crew of outgoing vessels inspected.....	675
Crew of outgoing vessels not inspected.....	189
Passengers of outgoing vessels inspected.....	289
Passengers of outgoing vessels not inspected.....	153
Immune certificates issued.....	94
Health certificates issued for New Orleans.....	29
Vessels fumigated prior to sailing.....	9
Pieces of baggage inspected.....	90

One case of yellow fever was reported in Habana during the week.

This case occurred in a Spaniard aged 18 years, a resident in Cuba for two years. He resided at Obispo 82, which is in the best business section of the city. He was taken sick on August 19 and entered La Quinta Benefica on the 21st, was reported as suspicious on the 23d, and confirmed as a case of yellow fever on the evening of the 24th instant.

It is believed that the infection in this case was from the same source as that of the one reported on the 15th instant, whose residence was three blocks distant.

Some effort has been made to ascertain the source of infection in the case which occurred on the steamship *Miguel M. Pinillos*, discovered in Matanzas and confirmed on August 17. (See Public Health Reports, August 31, 1906, p. 1020.) Nothing could be learned except that the man stated that he had been sleeping around the docks and that he had not lived in any particular house in Habana. The registers of lodging houses near and around the water front were examined, but the name could not be found. This would indicate that an unknown focus of infection exists near the water front.

There were 2 cases of yellow fever reported from the Esperanza plantation, which is near Alacranes, of which I received no reports until to-day. The first case was taken sick on August 13 and was confirmed some days afterwards. The second case was taken sick on August 21, and while not yet confirmed as yellow fever, is believed to be a case.

Thirty-nine cases of dengue fever were reported during the month of July, 1906.

September 3: One new case of yellow fever reported and confirmed to-day; Spaniard, taken sick August 28; had been diagnosed dengue. There are 8 suspects.

September 6: Case of yellow fever reported September 3 died yesterday, September 5.

Report from Santiago—Inspection and fumigation of vessels.

Acting Assistant Surgeon Wilson reports, August 22, as follows:

Week ended August 18, 1906: Bills of health issued to 6 vessels bound for the United States.

No quarantinable disease has been reported.

The Cuban steamship *Julia*, which sailed on the 13th instant for San Juan, P. R., via Santo Domingo, was fumigated at the agents' request, as they received a telegram that morning stating that Porto Rico had removed the quarantine against Santo Domingo. The French steamship *Salvador*, which left the day before for Porto Rico, via Haiti and Santo Domingo, was not fumigated, the vessel having been refumigated at Porto Rico on the previous trip, on account of having stopped at infected ports after leaving Santiago.

GUATEMALA.

Report from Puerto Barrios—Inspection of vessels.

Acting Assistant Surgeon Wailes reports as follows: Week ended August 21, 1906. Present officially estimated population, 3,500; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 17	Alabama	New Orleans via Li-	19	0
21	Anselm.....	mon. New Orleans	4	0

HAWAII.

Plague at Honolulu.

Chief Quarantine Officer Cofer reports as follows:
September 1. There was a death from plague August 30.

HONDURAS.

Report from Ceiba, fruit port—Yellow fever officially declared present.

Acting Assistant Surgeon Robertson reports as follows: Week ended August 25, 1906. Present officially estimated population, about 4,000; general sanitary condition of this port and the surrounding country during the week, infected.

Yellow fever declared, on August 19, by Surgeon Guiteras. The patient died August 20. The existence of yellow fever in this port is still vehemently denied by local authorities. This denial is based upon reports of local physicians (excepting Dr. V. C. Reynolds).

Yellow fever was reported by Acting Assistant Surgeon Robertson July 20. Diagnosis of cases was concurred in by Dr. V. C. Reynolds, vice and deputy consul. The existence of yellow fever was vigorously denied by local health and city authorities. An expert, Surgeon Guiteras, on request of local authorities and of Dr. Robertson and others, was sent to Ceiba, where he arrived August 17, and on August 19 declared yellow fever to be present in Ceiba.—[EDITOR.]

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.

a Traveling under special permission as expert for Public Health and Marine-Hospital Service.

Reports from Puerto Cortez, fruit port—Sanitary conditions—Campaign against Stegomyia.

Acting Assistant Surgeon Kahle reports as follows:

Week ended August 18, 1906. Present officially estimated population, 4,000; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 12	Utstein	New Orleans.....	16	0	0	0
12	Banan	Mobile	18	1	0	0
14	Taunton.....	New Orleans.....	24	1	0	0
15	Hiram	Mobile.....	14	7	0	0
18	Mercatordo.....	18	0	0	0

On August 12 traffic was opened between Pimienta, San Pedro and Choloma, and Puerto Cortez. All passengers from Pimienta to this port are held under observation for five days, although the town is perfectly clean and has been free from yellow fever since July 6, 1906.

At this port, during the past week, all tanks, cisterns, and barrels have been oiled, and the ditches through which the sea water finds its way to the low parts of the town have been reopened. The ground on the north side of the railroad track is being cleared of trees and shrubbery. It has been ordered that all yards must be cleared of broken bottles, tin cans, etc. The weeds are also being cut. Efficient screening of tanks, cisterns, and barrels will probably be done this coming week.

Week ended August 25, 1906: General sanitary condition of this port and the surrounding country during the week good, as regards Cortez.

The campaign against the *Stegomyia* is still vigorously carried on. San Pedro, Pimienta, and Choloma are still free from yellow fever. Prophylactic measures are continued.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 20	Atlantis	19	0	0	0

INDIA.

Report from Calcutta—Cholera, plague, and smallpox—Mortality in the Punjab in 1905.

Acting Assistant Surgeon Eakins reports, August 2, as follows:

Week ended July 28, 1906: No transactions.

During the week ended July 21, 1906, there were 14 deaths from cholera, 8 deaths from plague, and 12 deaths from smallpox in Calcutta.

In India during the week ended July 14, 1906, there were 450 cases and 346 deaths from plague.

Mortality in the Punjab in 1905.

The Punjab, for the fourth successive year, shows the highest rate of mortality in India in 1905. Of a total of 956,108 deaths which occurred in the province, 334,897 were due to plague, the ratio per mille from this cause alone being 16.65.

The sanitary commissioner for the Punjab remarks that since the appearance of plague there have been 1,127,186 deaths recorded from the disease. The registered deaths from "fever" are much more numerous, numbering 3,925,247. Calculating from the last census in 1901 the deaths from fevers during the four years and nine months have numbered 2,239,146 and from plague 1,122,977, making a total of 3,362,123 from these two causes alone.

ITALY.

Report from Naples—Inspection of vessels—Rejection of emigrants recommended.

Passed Assistant Surgeon McLaughlin reports, August 14, as follows:

Vessels inspected at Naples week ending August 11, 1906.

JAPAN.

Report from Yokohama—Emigrants recommended for rejection.

Passed Assistant Surgeon Cumming reports as follows:

Number of emigrants per steamship *Dakota* recommended, August 3, 1906, for rejection: For Seattle, 22.

Per steamship *Shawmut*, August 7, 1906: For Tacoma, 6.

Per steamship *Aki Maru*, August 9, 1906: For Seattle, 23.

MEXICO.

Reports from Progreso—Yellow fever.

Acting Assistant Surgeon Harrison reports, August 18 and 25, as follows:

Period from August 4, inclusive, to August 18, 1906: On August 8 there was 1 fatal case of yellow fever in the lazaretto at Progreso. The history of the case has not been obtained. In Merida conditions remain unchanged. The Mexican medical officer here has begun the inspection of all passengers embarking from this port for all other ports. During the period covered by this report 10 steamships and 2 sailing vessels were dispatched, with crews of 481 persons, and passengers from this place, 87. Of these vessels 6 were fumigated.

Week ended August 24, 1906. In Progreso no quarantinable disease has been reported since the one case and death of yellow fever in lazaretto August 8. In Merida yellow fever has been continuous, with 1 or 2 new cases daily. During the week 6 steamers were dispatched, carrying passengers from this port, 29, and crews, 257; 1 vessel fumigated.

Report from Veracruz—Mosquito breeding places found in vicinity of locality in which yellow fever case occurred.

Acting Assistant Surgeon Frick reports, August 4, as follows:

In confirmation of my cablegram of this date stating that a case of yellow fever had been reported on the previous day, of which Veracruz was the focus, I have further to say that I found several mosquito breeding places in the vicinity of the house in which the case was found. These breeding places contain many larvæ of the *Culex tæniorynchus* and *Tæniorynchus fascialatus*, some *Stegomyia fasciata*, and other larvæ.

PANAMA.

Report from Bocas del Toro, fruit port—Sanitary conditions.

Acting Assistant Surgeon Osterhout reports as follows:

Week ended August 25, 1906. Present officially estimated population not obtainable; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage.

TURKEY.

Report from Trebizond—Suspect plague—Measures to be taken to prevent spread.

Consul Jewett reports, August 9 and 11, as follows:

Four cases of suspect plague were discovered in the prisons here on August 8. One case proved fatal. Two new cases, also in prison, were reported August 9. Dead rats have been seen during the past two months. Vessels leaving Trebizond are to be disinfected and rats destroyed. Medical examination and detention are to be enforced at Sinope and Karak.

WEST INDIES.

Report from Bridgetown, Barbados—Sanitary conditions good.

Acting Assistant Surgeon Urquhart reports, August 18, as follows: Week ended and including August 18, 1906. The health of Bridgetown continues good; no deaths from any quarantinable diseases are reported.

Report from St. Lucia—Arrival of service representative.

Acting Assistant Surgeon Rush reports as follows: September 3. Arrived.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

BRAZIL—*Ceará*.—Month of June, 1906. Estimated population, 50,000. Total number of deaths, 87, including 9 from enteric fever.

FRANCE—*Marseille*.—Month of July, 1906. Estimated population, 517,498. Total number of deaths, 1,077, including diphtheria 3, enteric fever 30, measles 31, scarlet fever 3, whooping cough 2, smallpox 5, and 111 from tuberculosis.

GERMANY—*Weimar*.—Month of July, 1906. Estimated population, 31,127. Total number of deaths, 33, including diphtheria 1, enteric fever 1, measles 1, and 2 from tuberculosis.

GIBALTAR.—Two weeks ended August 12, 1906. Estimated population, 27,460. Total number of deaths, 17, including 1 from tuberculosis.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended August 11, 1906, correspond to an annual rate of 14.6 per 1,000 of population, which is estimated at 15,818,360.

Bradford.—Two weeks ended August 11, 1906. Estimated population, 288,544. Total number of deaths 151, including diphtheria 2, enteric fever 2, measles 2, scarlet fever 1, and 12 from phthisis pulmonalis.

London.—One thousand three hundred and fifty-two deaths were registered during the week, including measles 25, scarlet fever 10, diphtheria 13, enteric fever 5, whooping cough 14, and 288 from diarrhea. The deaths from all causes correspond to an annual rate of 14.9 per 1,000. In Greater London 1,989 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 4 from measles, 2 from scarlet fever, and 2 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended August 11, 1906, in the 21 principal town districts of Ireland was 17 per 1,000 of the population, which is estimated at 1,101,499. The lowest rate was recorded in Newry, viz, 4.2, and the highest in Galway, viz, 31.1, per 1,000. In Dublin and suburbs 130 deaths were registered, including diphtheria 2, enteric fever 1, measles 2, whooping cough 3, and 25 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended August 11, 1906, correspond to an annual rate of 14 per 1,000 of the population, which is estimated at 1,787,788. The lowest rate of mortality was recorded in Paisley, viz, 10.2, and the highest in Perth, viz, 18.1, per 1,000. The aggregate number of deaths registered from all causes was 481, including diphtheria 3, enteric fever 6, measles 11, scarlet fever 1, and 8 from whooping cough.

ITALY—*Milan*.—Month of June, 1906. Estimated population, 551,317. Total number of deaths not reported. Six deaths from diphtheria, 8 from enteric fever, 8 from measles, 1 from scarlet fever, and 98 from tuberculosis reported.

JAPAN—*Formosa*.—Ten days ended July 20, 1906. Estimated population, 3,050,004. Total number of deaths not reported. Forty deaths from plague reported.

Nagasaki.—Ten days ended July 20, 1906. Estimated population, 163,324. Total number of deaths not reported. No deaths from contagious diseases reported.

Ten days ended July 31, 1906. One death from enteric fever reported.

JAVA—*Batavia*.—Two weeks ended July 14, 1906. Estimated population, 160,000. Total number of deaths not reported. No contagious diseases reported.

MALTA.—Two weeks ended August 4, 1906. Estimated population, 205,059. Total number of deaths, 272, including diphtheria 7, enteric fever 2, and 1 from whooping cough.

SPAIN—*Barcelona*.—Ten days ended August 10, 1906. Estimated population, 600,000. Total number of deaths, 408, including diphtheria 1, enteric fever 7, measles 1, scarlet fever 2, smallpox 11, and 26 from tuberculosis.

Cadiz.—Month of July, 1906. Estimated population, 69,382. Total number of deaths, 160, including enteric fever 3, smallpox 1, and 30 from tuberculosis.

Seville.—Month of July, 1906. Estimated population, 148,315. Total number of deaths, 440, including smallpox 20, whooping cough 2, and 72 from tuberculosis.

WEST INDIES—*Antigua*.—Two weeks ended August 4, 1906. Estimated population, 36,700. Total number of deaths, 3. No contagious diseases.

Curaçao.—Two weeks ended August 17, 1906. Estimated population, 31,600. Total number of deaths, 21. No contagious diseases reported.

Cholera, yellow fever, plague, and smallpox, from June 29 to September 7, 1906.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from December 29, 1905, to June 29, 1906, see PUBLIC HEALTH REPORTS for June 29, 1906.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
