

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Report from Galveston, Tex.—Yellow fever on steamship Basil, from Para.

Passed Assistant Surgeon Corput reports, March 18, as follows:

One case yellow fever on steamship *Basil*, seventeen days from Para. Patient taken to hospital. Necropsy just finished; positive.

Referring wire last night, steamship *Basil* now at quarantine. Three members crew have elevation temperature this morning. *Stegomyia* present here, not abundant. Authorities making efforts to locate all persons to keep under observation. Full written report follows.

Since my wire of this morning three men aboard *Basil* taken ill. Temperature 102° F and above. No positive diagnosis in these cases yet.

The following telegram was received from State Health Officer Brumby, Galveston, Tex.:

March 18. Seaman aboard steamship *Basil*, from Para, died yesterday of yellow fever. All precautions being taken.

March 19. Passed Assistant Surgeon Corput was instructed by the Bureau as follows:

Regarding steamship *Basil*, see collector and examine bill of health and report by wire what was on it; also wire nature of cargo, if any, in *Basil*.

To this telegram reply was received:

March 19. Replying Bureau wire, *Basil* sailed from Para March 1, water ballast. Bill of health shows 10 cases, 5 deaths yellow, 13 cases, 8 deaths plague. Now has on board part cargo cotton taken before being remanded quarantine. Agent threatens go to sea at once without disinfection.

March 20. Passed Assistant Surgeon Corput was further instructed by the Bureau as follows:

Replying to your telegram 19th, steamer *Basil* is now considered a yellow fever infected vessel, and having been remanded to quarantine, must be treated as such. As she comes from a port badly infected with plague, she comes under special regulations account plague, paragraphs 126 to 137, Quarantine Regulations. Thorough and simultaneous fumigation all parts vessel required to insure killing rats. Inform quarantine officer. Inform agents vessel, if she leaves quarantine and goes to sea, every other port in the United

States will be notified, and these provisions will be enforced wherever she seeks to enter. Promptly inform Bureau as to destination vessel if she departs.

The steamship *Basil* left Liverpool January 19 for Para, Brazil. Arrived at Para February 11 for Manaos. Left Para March 1 for Galveston. Reports received by the Public Health and Marine-Hospital Bureau show 57 deaths from yellow fever at Para from July 1, 1906, to February 23, 1907. Yellow fever was not reported at Manaos in 1906. In 1905, 8 cases and 7 deaths were reported from July 30 to August 12.

March 20. All quarantine officers on the Gulf and Atlantic coast were informed that Para is a port considered infected with both yellow fever and bubonic plague.

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES OF THE UNITED STATES—UNTABULATED.

CALIFORNIA—*Los Angeles*.—Month of February, 1907. Estimated population, 250,000. FOREIGN AND INSULAR.

Current quarantine measures.

[From the Veröffentlichungen des Kaiserlichen Gesundheitsamtes, Berlin, February 27, 1907.]

STRAITS SETTLEMENTS.—January 22. The port of Bangkok declared infected with plague and cholera.

BRITISH EAST INDIES.—January 25. Quarantine measures ordered at the port of Orissa against arrivals from Djeddah.

AUSTRALIA.

Plague at Brisbane—Examination of rodents for plague infection.

The following information is taken from plague bulletins issued by the department of health of Australia, and forwarded by Consul-General Bray at Melbourne:

PLAGUE.

QUEENSLAND—Brisbane.—Week ended January 19, 1907. Plague cases admitted to hospital, 8; 1 plague death. The cases are numbered in sequence from the recurrence of plague November 24, 1906. Case No. 2. January 11. Form, bubonic. The premises were in good order; no rat infestation. The patient had frequented the wharves in search of work. Case No. 3. Assistant in a dairy. Premises particularly clean, but patient had handled chaff and feed from a produce store in which 4 plague-infected rats were found December 20 and 23. The case occurred January 15 and ended fatally January 18. Cases 4 to 7 came from one locality, the patients having resided in close vicinity to each other. They were in constant association up to the time of being attacked. Two cases are under observation. The rat destruction force has been increased and the infected area is being thoroughly cleaned.

In cases 4 to 7 smear preparations from material obtained from the glands showed *B. pestis*. No glandular swellings having developed in cases 8 and 9, these patients are held under observation as suspect cases. Case No. 8 belongs to the group of cases 4 to 7.

Number of rodents destroyed during the week, 467; examined, 313; found infected, 1.

NEW SOUTH WALES—Sydney.—Week ended January 19, 1907. Number of rodents destroyed, 842; examined, 842; found infected, 3.

BRAZIL.

Report from Rio de Janeiro—Inspection of vessels—Mortality—Plague, smallpox, and yellow fever.

Acting Assistant Surgeon Stewart reports, February 11, as follows: Week ended February 9, 1907. Vessels inspected and received bills of health as follows: On the 4th instant the British steamship *Horace*, for New Orleans, with a cargo of coffee, no passengers, and with two new members of the crew signed on in this port; on the same date the British steamship *Myrtledene*, for New York, with a cargo of coffee, no passengers, and with no change in the personnel of the crew while here; on the 6th instant the German steamship *Gunther*, for New York, with cargo of coffee and 4 third-class passengers, and with no change in the crew personnel; on the same date the British steamship *Eastern Prince*, for New York, with a cargo of coffee, no passengers, and with no change in the crew personnel, and on the 7th instant the British steamship *Byron*, for New York, with a cargo of coffee, 22 first-class and 12 steerage passengers from this port, with no change in the crew personnel while here and with 8 first-class and 54 steerage passengers transferred from the steamship *Atlantique*, coming from the River Plata, to the *Byron* in the harbor an hour before sailing. These last-mentioned passengers held no communication with the shore while in the harbor.

No other vessels left this port during the period mentioned for United States or other American ports.

Mortality reports.

Buenos Aires, Argentina.—Week ended January 19, 1907. Total deaths not reported. Variola, 1 death; bubonic plague, 1 death.

Week ended January 26, 1907. Total deaths not reported. Variola, 2 deaths. Population of Buenos Aires, 1,125,000 (estimated); census population, 1905-6, 1,025,000.

Pernambuco, Brazil.—Two weeks ended January 15, 1907. Variola, 68 deaths; bubonic plague, 1 death.

Population, census 1900, 200,000, Population (estimated) 1907, 210,000.

Rio de Janeiro.—Week ended February 10, 1907. Total deaths, 270. Yellow fever, 1 case, no deaths; plague, 4 cases, 1 death; variola, 1 death. Rats destroyed, 8,441, bringing the total of rat destruction to 1,251,132. Population (estimated), 912,900; census, 1906, 811,265.

CANADA.

Report from Halifax, Nova Scotia—Smallpox on steamship Pomeranian.

Vice and Deputy Consul-General Hill reports, February 2, as follows:

The steamship *Pomeranian*, which arrived last night from London and Havre, anchored at quarantine grounds. When the port health officer boarded her he found a mild case of smallpox on board. This morning 21 cabin passengers were allowed to disembark.

The steamship will take the steerage passengers to the quarantine station at Lawlors' Island, where they will have to remain for the regulation period of eighteen days before they will be allowed to proceed to their destination.

After disembarking the passengers the steamship will be fumigated, and after five days allowed to dock. The *Pomeranian* had 21 cabin and 160 steerage passengers.

(See Public Health Reports, Mar. 8, 1907, p. 271, table.)

CHINA.

Report from Niuchwang—Plague.

Vice and Deputy Consul-General Pontius reports, January 28, as follows:

Plague has again broken out in epidemic form in Niuchwang. The disease appeared 5 or 6 days ago. More than 30 deaths have resulted to date.

The disease is malignant in form, death occurring within a few hours. The first symptoms are headache and fainting spells, which are followed by a bloody foam running from the mouth, death resulting after a few hours.

This consulate is in receipt of a circular letter from the Japanese consul relative to sanitary examinations at certain places for travelers coming from Yinkow.

The customs taotai took immediate steps to prevent the spread of the disease, recognizing it to be both epidemic and endemic in nature.

January 30.—The number of plague cases to date is 39, with 36 deaths. There are at present 7 physicians engaged in measures for checking the spread of the disease. Five of these are Chinese and 2 are Japanese. As soon as a death is reported prompt measures are taken and a general disinfection of the neighborhood is made.

INCLOSURE.

NIUCHWANG, *January 28, 1907.*

As Yinkow is at present known to be infected by plague the Japanese authorities at Port Arthur have decided to begin sanitary examination at the following places with regard to travelers coming from Yinkow: The stations of Niu-Chia-t'un, Ta-Shih-Ch'iao, Hsin-min-t'un, and Mukden.

A. SAGAMA,
Consul from Japan.

Report from Shanghai—Inspection of vessels—Smallpox.

Acting Assistant Surgeon Ransom reports, February 13, as follows:
Week ended February 9, 1907: Five supplemental bills of health issued to 5 steamships. There were inspected 5 vessels, 506 crew, 7 cabin, and 71 steerage passengers, and 2 cases of illness were investigated, neither of which proved to be quarantinable disease. The

personal effects of 59 crew were disinfected with steam and those of 3 steerage passengers with formalin. Certificates of vaccination were issued to 107 individuals and manifests were viséed for 2,128 pieces of freight. Four emigrants for San Francisco, per steamship *Nippon Maru*, were examined and passed.

The weekly report of the municipal health officer shows that there were reported among foreigners 1 new case of smallpox and among natives 1 death from smallpox.

No quarantinable diseases have been reported officially from out-ports. The suffering in the famine area continues unabated.

CUBA.

Report from Cienfuegos—Inspection and fumigation of vessels—Malarial fever on steamship Phoenix from Colon.

Acting Assistant Surgeon Marsillan reports, March 11, as follows:

Week ended March 9, 1907. Bills of health issued to 5 vessels going to ports in the United States; crews inspected, 304; passengers inspected, none; immune certificate issued, none.

The Norwegian steamship *Phoenix*, which arrived on February 28 with a clean bill of health from Colon, had 6 of her crew, including the captain, sick with malarial fever. This vessel was fumigated on her arrival at Colon from Fernandina, and she was at wharf here taking a cargo of sugar for New York; said vessel was mechanically foul; so stated on the bill of health.

On March 9 a supplemental bill of health was granted to the United States second-class cruiser *Dixie*, from Habana, with 178 persons all told on board, and bound for Guantanamo Bay, United States Naval Station.

No quarantinable disease has arrived at this port during the week on vessels entering and none has appeared in the city.

The sanitary condition of the city is fair.

Municipal physicians are vaccinating against variola, as a precautionary measure only, there being no case of the disease present now.

Report from Habana—Inspection and fumigation of vessels.

Passed Assistant Surgeon von Ezdorf reports, March 12, as follows:

Week ended March 9, 1907.

Vessels inspected and bills of health issued	22
Vessels not inspected and bills of health issued	10
Crew of outgoing vessels inspected	1, 275
Crew of outgoing vessels not inspected.....	433
Passengers of outgoing vessels inspected	1, 733
Passengers of outgoing vessels not inspected.....	161
Vaccination certificates issued for Colon, Panama	17
Vessels fumigated prior to sailing	4

No quarantinable disease was reported during the week.

Report from Matanzas—Inspection and precautionary detention of vessels.

Acting Assistant Surgeon Nufiez reports, March 12, as follows:

Week ended March 9, 1907. Bills of health granted to 8 vessels leaving this harbor for United States ports. The German steamship *Clara Zelck*, originally from Veracruz, was subjected to precautionary quarantine while at this port. No sickness developed on board of this vessel up to the time of her inspection. No vessel was fumigated during the week.

No quarantinable diseases have been reported either in the city or province.

GREAT BRITAIN.

Report from Glasgow—Cerebro-spinal meningitis.

Reports received from Consul Austin, under dates of February 22 and 26, show the presence of cerebro-spinal meningitis at 22 localities in Scotland, with an increased area of prevalence in Glasgow. The total number of cases reported in Scotland since the outbreak in January is 372; deaths, 210, of which 272 cases and 143 deaths were reported at Glasgow and 26 cases and 23 deaths at Edinburgh. The number of cases reported in Glasgow in the year 1906 was 213; deaths, 148; cases bacteriologically verified, 87; deaths, 65.

The origin of the present increased prevalence of the disease and the method by which infection is conveyed have not yet been determined.

INDIA.

Report from Calcutta—Transactions of service—Cholera, plague, and smallpox—Increase of plague in the Punjab.

Acting Assistant Surgeon Eakins reports, February 21, as follows:

Week ended February 16, 1907: Bill of health issued to the steamship *Swanley*, bound for Boston and New York, with a total crew of 64 and 4 passengers. The usual precautions were taken, holds fumigated, rat guards placed on wharf lines, and lascars' effects disinfected.

Week ended February 9, 1907: One hundred and five deaths from cholera, 21 from plague, and 50 from smallpox in Calcutta.

In Bengal during the same week 1,580 cases and 1,205 deaths from plague.

In India during the weeks ended February 2 and 9, 1907, 20,262 cases and 16,601 deaths, and 25,208 cases and 20,706 deaths from plague.

During the week ended February 9 the official returns showed 7,964 deaths from plague in the Punjab, as against 5,475 for the preceding week. For the corresponding period of last year there were but 634 deaths.

ITALY.

Reports from Naples—Inspection of vessels—Emigrants recommended for rejection—Smallpox in Italy.

Passed Assistant Surgeon McLaughlin reports, February 25 and March 4, as follows:

MEXICO.

Reports from Veracruz—Inspection of vessels—Sanitary conditions improved—Mosquitoes.

Acting Assistant Surgeon Frick reports, March 4 and 11, as follows:
Week ended March 2, 1907.

February 25, inspected the German steamship *Clara Zelck*, bound for an American port via Morro Castle for further orders, with 20 in the crew; vessel sails in ballast. Inspected the British steamship *Laura*, bound for an American port via Progreso.

February 26, inspected the Norwegian steamship *Nor*, bound for Galveston, with 20 in the crew; vessel sails in a full cargo of Mexican cotton, bound for Europe via Galveston. Inspected the German steamship *Westphalia*, bound for Galveston, with 36 in the crew; vessel sails in ballast.

February 28, inspected the American schooner *Henrietta J. Powell*, bound for Pascagoula, with 9 in the crew; vessel sails in ballast. Inspected the Honduran schooner *Blanche Cefalo*, bound for Mobile, with 7 in the crew; vessel sailed in ballast.

March 1, inspected the American steamship *Mexico*, bound for New York, via Progreso and Habana, with 127 in the crew, 74 cabin and 5 steerage passengers.

March 2, the American yacht *Alvina* passed without inspection, bound for Miami, Fla., with 37 in the crew and 3 passengers; sailed March 3. Inspected the Danish steamship *St. Jan*, bound for Galveston via Tampico, with 46 in the crew; vessel sails in a small general cargo. Inspected and passed the Norwegian steamship *Galveston*, bound for Texas City via Progreso, with 22 in the crew and 1 passenger; vessel sails in general cargo. A bill of health was issued the Spanish steamship *Antonio Lopez*, but, sailing March 3, will be included in the report for next week.

Week ended March 9, 1907.

March 3. Inspected the Spanish steamship *Antonio Lopez*, bound for New York via Habana, with 127 in the crew, 53 cabin, and 32 steerage passengers; vessel sails in general cargo.

March 5. Inspected the British steamship *Teodoro de Larrinaga*, bound for Galveston, with 35 in the crew; vessel sails in ballast.

March 6. Inspected the American schooner *Margaret*, bound for a port in the United States via Mexican ports, with 6 in the crew. Inspected the Norwegian steamship *Norheim*, bound for New Orleans, with 18 in the crew and 7 passengers; vessel sails in general cargo. Inspected the British steamship *Peerless*, bound for Pascagoula, with 24 in the crew; vessel sails in ballast.

March 7. Inspected the American steamship *Monterey*, bound for New York via Progreso and Habana, with 97 in the crew, 101 cabin and 11 steerage passengers; vessel sails in general cargo.

March 8. Inspected the Norwegian steamship *Fitzas*, bound for Galveston, with 31 in the crew; vessel sails in ballast. Inspected the Norwegian steamship *City of Tampico*, bound for New Orleans, with 20 in the crew and 21 passengers; vessel sails in a small general cargo.

March 9. Inspected the German steamship *Bitchin*, bound for New Orleans, with 38 in the crew; vessel sails in general cargo.

A case of sickness was found among the cabin passengers sailing on the *Monterey* and one on the Norwegian steamship *City of Tampico*. The respective bills were so indorsed. Both were one day out from Mexico City.

The sanitary situation has improved, the weather not being favorable to the increase of mosquitoes.

PERU.

Report from Callao—Inspection and fumigation of vessel—Plague in Peru—Smallpox in Lima—Plague and smallpox in Chilean ports.

Assistant Surgeon Wightman reports, February 18, as follows:

Week ended February 16, 1907. The British steamship *Panama* was dispatched on the 16th for Ancon, Canal Zone, with general cargo and a total personnel of 261, of whom 18 members of crew, 58 cabin, and 69 steerage passengers were from this port. The vessel

was fumigated, steerage baggage inspected and passed or disinfected, and steerage passengers for Panama vaccinated when necessary.

A case of plague was reported in Callao during the week. Smallpox continues in Lima. Actual figures are impossible to obtain.

The following is the latest report on plague in Peru received from the Director de Salubridad:

Locality.	Cases Feb. 7.	New.	Recov-ered.	Died.	Remain- ing Feb. 13.
Lima.....	4	6	2	4	4
Callao.....	1		1		
Trujillo.....	24	12		3	33
Catacaos.....	5				5
Pacasmayo and San Pedro.....	23	2		1	24
Mollendo.....	1	1			2
Paita, city.....	3				3
Paita, district of La Huaca.....	3				3
Chiclayo.....	9	6		6	9
Pueblo Nuevo, country.....		2			2
Ferrenafe.....		7		6	1

The nearest port to Pueblo Nuevo and Ferrenafe is Eten.

The following is reported by bills of health from Chile: Antofagasta, 14 cases of plague with 6 deaths, in two weeks ended February 6; Coquimbo, 25 cases of smallpox with 2 deaths, in two weeks ended February 3; Santiago, plague present, February 2.

PHILIPPINE ISLANDS.

Reports from Manila—Cholera in the provinces—Inspection of vessel—Smallpox on steamship Pioneer.

Chief Quarantine Officer Heiser reports, January 30 and February 8, as follows:

Week ended January 26, 1907. One imported case of smallpox reported for the city of Manila.

During the week reports were received of cholera in the provinces as follows: Province of Capiz, January 6 to 12, 41 cases, 22 deaths; province of Occidental Negros, 2 cases, 1 death.

During the week vessels were granted consular bills of health and treated as follows:

On January 21 the American ship *John Currier*, with 21 crew, was granted a consular bill of health for Astoria, Oreg. Personnel was inspected on board at the hour of sailing.

On January 21 the German steamship *Ambria*, with 53 crew and 1 passenger, en route from Yokohama to Cebu, was granted a supplemental bill of health.

On January 22 the British steamship *Kelchattan*, with 56 crew, was granted a consular bill of health for Zamboanga, after the usual inspection.

On January 25 the British steamship *Chingtu*, with 70 crew and 22 passengers, en route from Yokohama to Zamboanga, was granted a supplemental bill of health.

On January 25 the American steamship *Shawmut*, with 142 crew and 54 passengers, was granted a consular bill of health for Tacoma. Cargo and baggage either disinfected or passed after inspection. All persons on board inspected at the hour of sailing.

On January 26 the British steamship *Candia*, with 105 crew, was granted a consular bill of health for Cebu.

Week ended February 2, 1907. No quarantinable diseases reported for the city of Manila.

Smallpox on vessel.—A case of smallpox was detected at the quarantine inspection at Manila of the steamship *Pioneer* on January 29, 1907. The vessel, with all on board, was remanded to Mariveles Quarantine Station. The persons on board were vaccinated and their clothing and effects disinfected with steam. The vessel, with the exception of the cargo holds, which had not been opened, was disinfected with bichloride solution. The case of smallpox originated in the island of Marinduque, which is one of the provinces which have not as yet been systematically vaccinated.

This is the time of the year in which the dry season occurs, and smallpox has always been more prevalent in the past during this period.

During the week vessels were granted consular bills of health as follows:

On January 28 the British steamship *Wray Castle*, with 43 crew, en route from Kobe to Boston and New York via Cebu, was granted a supplemental bill of health. Personnel inspected and cargo manifests viséed.

On January 30 the U. S. army transport *Dix*, with 149 crew, was granted a bill of health for Seattle. Crew were inspected on board at the hour of sailing. Cargo inspected and either disinfected or passed and labeled accordingly.

PORTO RICO.

Report from Ponce—Summary, month of February, 1907.

Acting Assistant Surgeon Ferrer-Torres reports, March 1, through Chief Quarantine Officer Foster, as follows:

Transactions of service, month of February, 1907.

Passengers detained in quarantine.....	10

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

ALGERIA—Algiers.—Two weeks ended February 23, 1907. Estimated population, 155,000. Total number of deaths not reported. One death from diphtheria, 4 from measles, 2 from smallpox, and 9 from tuberculosis reported.

BRAZIL—State of São Paulo, including the cities of São Paulo, Santos, and Campinas.—Week ended January 27, 1907. Estimated

population, 300,000. Total number of deaths, 199, including whooping cough 3, enteric fever 2, and 14 from tuberculosis.

Pernambuco.—Two weeks ended January 31, 1907. Estimated population, 210,000. Total number of deaths, 326, including enteric fever 1, smallpox 60, yellow fever 1, whooping cough 1, and 57 from tuberculosis.

CANADA—*Ontario—Hamilton*.—Month of February, 1907. Estimated population, 63,000. Total number of deaths, 71, including diphtheria 2 and 3 from tuberculosis.

COSTA RICA—*Limón*.—Month of February, 1907. Estimated population, 8,000. Total number of deaths, 27. No deaths from contagious diseases reported.

CUBA—*Matanzas*.—Eight days ended February 28, 1907. Estimated population, 49,990. Total number of deaths, 22, including 5 from tuberculosis.

FRANCE—*Calais*.—Month of February, 1907. Estimated population, 66,627. Total number of deaths not reported. Three deaths from measles, 1 from whooping cough, and 24 from tuberculosis reported.

Cherbourg.—Month of January, 1907. Estimated population, 43,948. Total number of deaths, 125, including diphtheria 2, enteric fever 5, scarlet fever 1, and 14 from tuberculosis.

St. Etienne.—Two weeks ended February 15, 1907. Estimated population, 146,836. Total number of deaths, 194, including diphtheria 1, measles 1, and 29 from tuberculosis.

GIBRALTAR.—Two weeks ended February 24, 1907. Estimated population, 27,385. Total number of deaths, 19. No deaths from contagious diseases reported.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended February 23, 1907, correspond to an annual rate of 17.8 per 1,000 of population, which is estimated at 16,024,458

London.—One thousand five hundred and fifty-eight deaths were registered during the week, including measles 38, scarlet fever 8, diphtheria 16, enteric fever 1, whooping cough 31, and 18 from diarrhea. The deaths from all causes correspond to an annual rate of 17.1 per 1,000. In Greater London 2,210 deaths were registered. In the "outer ring" the deaths included 3 from diphtheria, 6 from measles, 2 from scarlet fever, and 4 from whooping cough.

Salford.—Three months ended December 31, 1906. Estimated population, 234,077. Total number of deaths 1,111, including diphtheria 30, enteric fever 18, measles 42, scarlet fever 12, whooping cough 9, and 105 from phthisis pulmonalis.

Ireland.—The average annual death rate represented by the deaths registered during the week ended February 23, 1907, in the 21 principal town districts of Ireland was 25.2 per 1,000 of the population.

which is estimated at 1,117,547. The lowest rate was recorded in Queenstown, viz, 6.6, and the highest in Armagh, viz, 61.8 per 1,000. In Dublin and suburbs 209 deaths were registered, including diphtheria 1, enteric fever 2, whooping cough 3, and 34 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended February 23, 1907, correspond to an annual rate of 18.8 per 1,000 of the population, which is estimated at 1,812,171. The lowest rate of mortality was recorded in Aberdeen, viz, 14.6, and the highest in Dundee, viz, 20.8 per 1,000. The aggregate number of deaths registered from all causes was 654, including diphtheria 6, enteric fever 2, scarlet fever 1, measles 2, and 27 from whooping cough.

HONDURAS—Puerto Cortes.—Months of January and February, 1907. Estimated population, 2,000. Total number of deaths, 4, including diphtheria 1, and 1 from tuberculosis.

ITALY—Florence.—Month of December, 1906. Estimated population, 233,653. Total number of deaths, 454, including diphtheria 5, enteric fever 8, measles 5, whooping cough 5, and 41 from phthisis pulmonalis.

JAPAN—Nagasaki.—Ten days ended February 10, 1907. Estimated population, 163,324. Total number of deaths not reported. Two deaths from diphtheria reported.

MALTA.—Week ended February 9, 1907. Estimated population, 205,059. Total number of deaths, 111, including diphtheria 2.

SPAIN—Barcelona.—Ten days ended February 20, 1907. Estimated population, 650,000. Total number of deaths, 448, including diphtheria 2, enteric fever 2, measles 1, whooping cough 2, and 47 from tuberculosis.

Madrid.—Month of January, 1907. Estimated population, 547,399. Total number of deaths, 1,845, including diphtheria 17, enteric fever 24, measles 86, scarlet fever 3, smallpox 1, whooping cough 5, and 151 from tuberculosis.

SWITZERLAND.—Week ended February 16, 1907. Reports from 18 cities, having an aggregate population of 867,056, show as follows: Total number of deaths, 386, including diphtheria 3, measles 4, scarlet fever 1, whooping cough 6, and 44 from tuberculosis.

URUGUAY—Montevideo.—Month of December, 1906. Estimated population, 307,482. Total number of deaths, 446, including enteric fever 4, measles 7, scarlet fever 1, whooping cough 3, and 69 from tuberculosis.

WEST INDIES—Curaçao.—Two weeks ended March 1, 1907. Estimated population, 31,600. Total number of deaths, 14. No deaths from contagious diseases reported.

St. Thomas.—Three weeks ended February 22, 1907. Estimated population, 11,012. Total number of deaths, 26, including enteric fever 1 and 1 from tuberculosis.

Cholera, yellow fever, plague, and smallpox from December 28, 1906, to March 22, 1907.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from June 29, 1906, to December 28, 1906, see PUBLIC HEALTH REPORTS for December 28, 1906.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
