CUBA.

Report from Cardenas—Health conditions good.

Acting Consular Agent Fitz Gibbon reports, May 20:

No infectious diseases reported by the health department of this city since May 13, 1907.

Report from Cienfuegos—Inspection of vessels—Sanitary conditions good—Stegomyia calopus present.

Acting Assistant Surgeon Marsillan reports, May 27:

Week ended May 25, 1907.

Vessels inspected and bills of health issued.....	3
Crews inspected.....	91
Crews inspected landed here.....	0
Crews inspected taken on here.....	0
Passengers inspected, cabin, landed here.....	1
Immune certificates issued.....	0

No vessel fumigated this week.

The British steamship *Etona*, from Buenos Aires and San Juan, P. R., and bound for a port in the United States via Cuban ports, landed here one cabin passenger from Buenos Aires in good sanitary condition.

The Danish steamship *Nordvalen*, from Hamburg and cleared for New York with a cargo of sugar, had one case of ordinary sickness treated on board until recovery.

The Norwegian steamship *Melderskin*, from Buenos Aires, Barbados and Frederickstad, St. Croix, W. I., and bound for New York via Habana, left during her voyage 2 passengers at Barbados and one crew at Frederickstad, but none in this port, nor for the United States.

No quarantinable disease entered the port during the week.

The sanitary condition of the city and surrounding country is satisfactory.

Stegomyia calopus mosquitoes are more numerous.

Report from Habana—Inspection and fumigation of vessels—Further relative to yellow fever case from San Nicolas—Second case of yellow fever from San Nicolas.

Passed Assistant Surgeon Stansfield reports, May 28 and 31:

Week ended May 25, 1907.

Vessels inspected and bills of health issued.....	20
Vessels not inspected and bills of health issued.....	5
Crew of outgoing vessels inspected.....	996
Crew of outgoing vessels not inspected.....	115
Passengers of outgoing vessels inspected.....	1,071
Vessels fumigated prior to sailing.....	3

A case of yellow fever was reported at San Nicolas, Habana Province, May 27, 1907.

The patient was a Spanish boy, 14 years old, who arrived in Cuba six months ago. He has been living in San Nicolas for some time (just how long I was not able to find out), and received his infection there. He was taken sick May 21, and was reported as suspicious May 26, and a board of experts was sent to decide upon the case. They arrived in San Nicolas on May 27 and reported him positive the same date. The boy died during the night of May 27.

San Nicolas is 15 miles this side of Nueva Paz, and Union de Reyes is situated 15 miles the other side. Habana can be reached by electric car in one hour and a half or two hours from San Nicolas, and passengers can reach Tampa from the infected district in forty hours.

May 31. One case yellow fever in Benefica Hospital, Habana, infected in San Nicolas. Taken sick May 24, entered Benefica May 25. Official diagnosis May 31. Two suspects in Guines.

Report from Matanzas—Inspection of vessels—Precautions taken at Union de Reyes to prevent spread of yellow fever.

Acting Assistant Surgeon Nuñez reports May 28:

Week ended May 25, 1907.

Bills of health issued to 9 vessels leaving for United States ports; 2 sailing vessels were fumigated, the British schooner *Prosperare*, bound for Mobile, and the American schooner *Lizzie B. Willey*, for Pensacola. Both vessels left on the morning of May 24, being towed out of the harbor immediately after the fumigation was completed, with all well on board. Two breeding places of mosquitoes, in barrels containing rain water, were detected on the *Lizzie B. Willey*, and their content was dumped overboard.

On May 21, late in the evening, I was notified that a case of yellow fever was reported in Habana as originating from the town of Union de Reyes, this province. The report was cabled to the Bureau the same evening. On the following morning a telegram was received from Passed Assistant Surgeon Stansfield reporting the case to this office. I am informed that the case occurred in a young Spaniard who has been in the island seven months, and resided in that town since his arrival in Cuba, without being recently in Habana. It is presumed by the Cuban sanitary authorities that the origin of the infection in this case is to be attributed either to the neighboring town of Los Palos, where the previous case of that disease was reported, or to the 3 cases ending in death reported in that town on December last.

A sanitary squad has been ordered from Habana to Union de Reyes, and I am informed that every precaution is being taken to preclude the dissemination of the disease.

Report from Santiago—Inspection of vessels.

Acting Assistant Surgeon Wilson reports, May 22:

Week ended May 18, 1907. Bills of health issued to 8 vessels bound for the United States. No vessel was fumigated.

No quarantinable disease reported.

ECUADOR.

Report from Guayaquil—Inspection and fumigation of vessels—Small-pox and yellow fever.

Passed Assistant Surgeon Lloyd reports, May 5:

Month of April, 1907. Immune certificates issued, 21. Persons vaccinated, 5. Vessels fumigated, 10.

There were 569 deaths in Guayaquil during the month, including smallpox 5 and yellow fever 23. Population variously estimated from 60,000 to 70,000.

GUATEMALA.

Report from Puerto Barrios—Inspection of vessels—Yellow fever at Gualan.

Acting Assistant Surgeon Wailes reports as follows: Week ended May 22, 1907. Present officially estimated population, 250; general sanitary condition of this port and the surrounding country during the week, good. Three cases yellow fever have occurred at Gualan, 88 miles from port. One death.

Bill of health issued to the following-named vessel:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.
May 22	Henry T. Inge	New Orleans	0

History of yellow fever cases at Gualan—Quarantine declared at Puerto Barrios against interior—Passenger traffic suspended.

I have, since last report, made another visit of inspection to Zacapa, Gualan, and other points on railroad, induced by continued bad condition and rumors of fever. The yellow-fever patient reported by cable is convalescent and will leave his room to-day. The hospital, which has been occupied only since December, was built in accordance with recent sanitary advancement. The patient was promptly isolated and protected, and no other case has occurred. The hospital has, at the present time, only 12 or 14 patients, a large diminution since my last visit, indicating a decided improvement in general sanitary conditions. As to the town of Zacapa my investigations were entirely negative. It is currently reported that there is an unusual number of cases of sickness and deaths.

At Gualan I found that there had occurred, 2 days before my visit, a death which, from information obtained, leaves no doubt of its having been due to a fulminant case of yellow fever, attacked, attended with the characteristic features of such cases, and terminating with black vomit on the third day. A case occurred in a person of the better class, a native of Guatemala, who lived through the epidemics of 1905 and 1906 in Gualan, and immediately in the center of infection of those years, and who is now occupying a house in which 4 cases of fever occurred in 1905. The death alluded to also occurred in a house in the infected center. This patient has an exceptionally good sanitary history, has always enjoyed good health; indeed, does not know of ever having had a malarial attack. Her case was well defined, and she was already convalescing.

The second case, an English woman, who has until recently lived at Guatemala City, 5,000 feet altitude; has never before been exposed to yellow fever, and as far as she knows has been free from malaria. None of the characteristic symptoms so prominent in chronic malaria in the tropics are apparent. I saw her first on the afternoon of the fifth day of her attack, and gathered the following history: Conditions—Attacked at night with chill, severe headache, backache, nausea and

vomiting, first of contents of stomach mixed with bile; nausea continued; ejecta white and mucous; eyes injected, tongue red, narrow, clean, but soft and moist; gums clean, free from sordes, and intensely red; in fact the entire fauces participated in this livid color; intense epigastric tenderness, with tenderness over splenic region; no perceptible enlargement. Bowels constipated, urine very scant; could not obtain specimen for examination at this visit. Temperature 102° F. Pulse 86.

On the following day, accompanied by Doctor Lytle, from railroad hospital, we saw the patient at 11 a. m. General condition showing progressive march of disease. Temperature, 99½°; pulse, 84, weak and small; nausea continued, gums bleeding; show of hemorrhage from vagina; conjunctiva and skin of face perceptibly yellow; urine almost suppressed, but scant amount obtained showed albumin; heart failure threatening. Being compelled to return to port to meet steamer, and train being delayed, could not stop to see patient on yesterday, eighth day of the fever. Saw her attendant at depot, who reported slight improvement with increased urinary secretion.

This port so far continues free from infection. Conditions in cuartel have materially improved. No medical officer in port. Authorities have established quarantine against interior by proclamation. Passenger traffic suspended.

HAWAII.

Reports from Honolulu—Quarantine transactions.

Chief Quarantine Officer Cofer reports, May 12 and 19:

Week ended May 11, 1907.

Vessels inspected and bills of health issued.....	6
Vessels disinfected and bills of health issued.....	2
Cabin passengers inspected.....	161
Steerage passengers held in quarantine.....	125
Crew inspected.....	162
Pieces of steerage baggage disinfected.....	136
Pieces of baggage for crew disinfected.....	189
Hides disinfected.....	1, 326

HONDURAS.

Reports from Ceiba, fruit port—Increase of mosquitoes.

Acting Assistant Surgeon Reynolds reports as follows: Week ended May 19, 1907. Present officially estimated population, about 6,500; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 13	John Wilson	New Orleans	16	0	0	0
17	Spero	do	17	0	0	0
18	Alene	do	32	5	0	0
19	Joseph Vaccaro	do	31	4	1	0

Week ended May 26, 1907. General sanitary condition of this port and the surrounding country during the week, good. Frequent showers have produced breeding places for mosquitoes, and the *Culex* and *Anopheles* are abundant.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected
May 21	Colombia	Mobile	17	0	0	0
24	Habil	New Orleans	15	0	0	0
25	Rosina	do	31	5	0	0

Report from Tela—Inspection of vessels.

Acting Assistant Surgeon Roe reports as follows: Week ended May 25, 1907. Present officially estimated population about 1,250; general sanitary condition of this port and the surrounding country during the week, good.

Bill of health issued to the following-named vessel:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
May 23	Rosina	New Orleans	31	0	0

INDIA.

Report from Calcuttu—Transactions of Service—Cholera, plague, and smallpox—Increase of plague.

Acting Assistant Surgeon Eakins reports, May 9:

Week ended May 4, 1907. Bill of health issued to the steamship *Goldenfels*, bound for Philadelphia and New York, with a total crew of 45, and to the steamship *Swazi*, bound for Boston and New York, with a total crew of 51. The usual precautions were taken, holds fumigated, rat guards placed on wharf lines, and lascars' effects disinfected.

Week ended April 27, 1907. Thirty-three deaths from cholera, 423 from plague, and 67 from smallpox in Calcutta.

In Bengal and India during the same week, 3,811 cases and 3,527 deaths from plague, and 87,394 cases and 76,711 deaths, respectively.

Reports of the ravages of plague in the Punjab continue. From Peshawar the disease is spreading to the outlying districts. Hundreds of people are leaving the city.

Notwithstanding the extreme heat plague still rages at Delhi, where over 100 deaths are reported daily. About 40,000 Hindus have fled from the city. Meerut, a town much smaller than Delhi, reports over 200 deaths daily.

Reports describe Aligarh as a city of the dead. The Hindus there seem generally to distrust inoculation in spite of official assurances.

ITALY.

Report from Naples—Inspection of vessels—Emigrants recommended for rejection—Smallpox in Italy.

Passed Assistant Surgeon McLaughlin reports, May 13:

Vessels inspected at Naples and Palermo week ended May 11, 1907.

No cases of smallpox have been reported in Torre Annunziata since May 7, 1907. The municipal registers show that 20,000 persons have been revaccinated. There are still 3 patients in the lazaretto, but these are convalescent and will be discharged in a few days. No other case of smallpox has been reported in Boscotrecase. All necessary sanitary measures are still in force.

Smallpox.—Week ended May 16, 1907: Feltre (Belluno), 1 case; Trovo (Paria), 1; Genoa, 1; Montefiascone, 1; Canino (Rome), 1; Trasaceo (Aquila), 1; Benestare (Reggio Calabria), 7; Faviguana (Trapani), 2.

MEXICO.

Report from Veracruz—Inspection and fumigation of vessels— Stegomyia present.

Acting Assistant Surgeon Frick reports, May 20:

Week ended May 20, 1907. May 14. Fumigated the British steamship *Twilight*, bound for Mobile, with 25 in the crew; vessel sailed in ballast. May 15. Fumigated the Norwegian steamship *City of Mexico*, bound for New Orleans via Tampico, with 22 in the crew and 1 passenger; vessel sailed in the remainder of an American cargo. May 17. Inspected the American steamship *Esperanza*, bound for New York via Progreso and Habana, with 94 in the crew, 78 cabin, and 17 steerage passengers; vessel sailed in general cargo. May 18. Fumigated the British steamship *Silverdale*, bound for Pascagoula, with 23 in the crew; vessel sailed in ballast.

While the *Stegomyia* are not numerous, they are found in all parts of the city. No quarantinable disease was reported during the week.

NICARAGUA.

Report from Bluefields, fruit port—Water famine relieved.

Acting Assistant Surgeon Layton reports as follows:

Week ended May 21, 1907. Present officially estimated population, 2,800; general sanitary condition of this port and the surrounding country during the week, fair.

Bill of health issued to the following-named vessel:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
May 13	Bluefields.....	New Orleans.....	23	6	0

The water famine has been relieved; the streets and premises have been cleaned by heavy rains.

PANAMA.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows:

Week ended May 19, 1907. Present officially estimated population, 4,954; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.

19	Katie.....	Mobile.....	23	3	0	0

Report from Colon—Sanitary conditions good—Water supply and sewerage system—Quarantine service.

Acting Assistant Surgeon Scales reports, May 18:

Present sanitary conditions at Colon are very good. Several of the streets are paved with brick and macadam; the buildings are being raised and filled in underneath to elevate the surface to the level of the streets. Oil barrels are placed wherever there are pools of water, and immediately after rainfalls the surface of the pools is covered with oil to kill the larvæ of mosquitoes. *Stegomyia*, *Culex*, and *Anopheles* are very scarce.

The most prevalent disease is malarial fever. There are a few cases of enteric fever. The last case of yellow fever occurred in May, 1906. The city is supplied with cisterns and waterworks. The source of water for the latter is distant about 3 miles from Colon. The water is good and plentiful.

Colon has also a very good sewerage system.

The rainy season has just commenced. It attains its greatest precipitation in July and August.

The death rate for the month of April is said to be lower than ever before in the history of Colon.

Panama City enjoys the same approximate freedom from mosquitoes as Colon. Its sanitary condition is very satisfactory, and the same precautions are practiced against the propagation of mosquitoes.

Along the Canal Zone the different varieties of mosquitoes are more abundant. This is due to the more numerous breeding places, but excellent work is being done in filling low places and in the distribution of oil.

The system of sanitation is carried out in a practical manner. Daily and weekly reports are sent to the department of sanitation, and the increase or decrease of infectious diseases is noted. If an increase, a sanitary officer is immediately detailed to the place in question and steps are taken at once to improve the condition existing.

The general work of sanitation is carried on at all times.

Strict quarantine is maintained, both at Panama and Colon, against all infected places. Quarantine officers board vessels immediately on their arrival, and all persons with a temperature above normal are sent to the quarantine station; also all persons not previously successfully vaccinated are vaccinated before being allowed to land.

During the month of April 1 case of smallpox occurred in a passenger from Cartagena. He was sent to the quarantine station at Colon.

PHILIPPINE ISLANDS.

Reports from Manila—Inspection of vessels—Smallpox—Issuance of bills of health for vessels engaged in interisland traffic discontinued; circular—Quarantine detention of vessels from ports in China on account of plague.

Chief Quarantine Officer Heiser reports, April 1, 12, 17, and 26 and May 3:

Week ended March 30, 1907. No quarantinable diseases reported for the city of Manila.

Vessels granted consular bills of health as follows:

On March 27, British steamship *Palma*, with 113 crew, granted a supplemental bill of health for Cebu after the usual inspection.

On March 27, British steamship *Gulf of Venice*, with 55 crew, granted a supplemental bill of health for Cebu after the usual inspection of vessel, cargo, and personnel.

Week ended April 6, 1907, there were no quarantinable diseases. Bill of health issued to vessel as follows:

On April 3, British steamship *Indramayo*, with 58 crew, granted a supplemental bill of health for Iloilo after the usual inspection of personnel, vessel, and cargo.

Week ended April 13, 1907. No quarantinable diseases. Bills of health issued to vessels clearing for United States ports as follows:

On April 8, British steamship *Indrapura*, with 67 crew, en route from Kobe and Cebu to Boston and New York, granted a supplemental bill of health after the usual inspection of crew and cargo.

On April 11, American steamship *Lyra*, with 58 crew, granted a consular bill of health for Tacoma via China and Japan ports. All persons on board inspected at hour of sailing. Cargo inspected and passed, or disinfected during the process of loading, and certified on the manifests.

Week ended April 20, 1907. Smallpox, 1 case; 1 death.

Vessels granted consular bills of health as follows:

On April 15, United States army transport *Thomas* granted a bill of health for San Francisco via Nagasaki and Honolulu. Crew and steerage passengers bathed and their effects and baggage disinfected. Cargo and baggage either disinfected or inspected, and so certified. All persons on board inspected at Mariveles at the hour of sailing.

On April 20, British steamship *Jesserie* granted a consular bill of health for Boston and New York via Cebu. Cargo inspected and passed and manifests viséed.

Week ended April 27, 1907. No quarantinable diseases reported.

Vessels clearing for the United States granted bills of health as follows:

On April 27 the British steamship *Saint George*, with 37 crew, en route from Shanghai to New York, granted a supplemental bill of health after the usual inspection of cargo and personnel.

Issuance of bills of health discontinued.—Owing to the improved health conditions in the Philippine Islands, and in accordance with the spirit of act 1340 of the Philippine Commission, which has for its object the reduction of restrictions upon interisland vessels, commencing May 1, 1907, bills of health are no longer required for vessels pro-

ceeding from one port in the Philippine Islands to another port in the Philippine Islands. The circular letter putting this order into effect is inclosed herewith.

Following the usual custom of the service which has been observed in the Philippines since 1900 to enforce a quarantine at the season of the year at which plague is most likely to be conveyed from near-by foreign countries to the Philippines, the following letter, which is self-explanatory, has been sent to the American consul at Amoy and the shipping firms most interested and published in the Manila daily papers:

[Inclosures.]

MANILA, P. I., April 23, 1907.

To the owners and agents of vessels and others concerned:

After May 1, 1907, it will not be necessary for masters of vessels commencing a voyage at one port in the Philippine Islands to another port in the Philippine Islands to obtain the bill of health issued by the officers of this Service, which heretofore has been the case.

Respectfully,

VICTOR G. HEISER,
*Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.*

MANILA, P. I., April 26, 1907.

THE UNITED STATES CONSUL-GENERAL,
Amoy, China.

SIR: In view of the appearance of plague at a number of different places in China, I have the honor to state that after May 10, 1907, vessels proceeding from China to the Philippines, and which carry steerage passengers, or passengers who ordinarily travel as such, upon entering ports of the Philippine Islands will be subject to a quarantine detention of seven days, which is to date from the time the disinfection of the vessel is completed in the Philippines. Vessels from ports at which regular officers of the United States Public Health and Marine-Hospital Service are stationed, and at which adequate facilities exist for the treatment of steerage passengers, will not be subject to detention in the Philippines, unless quarantinable disease makes its appearance on board during the voyage.

Respectfully,

VICTOR G. HEISER,
*Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.*

TURKEY.

Report from Bassorah—Plague.

Information is received from the consular agent at Bassorah, through the Department of State, under date of June 3, that plague is present at Bassorah.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

ALGERIA—*Algiers*.—Month of April, 1907. Estimated population, 155,000. Total number of deaths, 306, including 1 from diphtheria, 2 from enteric fever, 4 from measles, 10 from smallpox, 5 from typhus fever, and 60 from tuberculosis.

BRAZIL—Pernambuco.—Two weeks ended March 31, 1907. Estimated population, 210,000. Total number of deaths, 352, including enteric fever 2, leprosy 1, smallpox 60, plague 1, malarial fever 12, and 43 from tuberculosis.

COSTA RICA—San Jose.—Month of April, 1907. Estimated population, 25,525. Total number of deaths, 64, including enteric fever 1, whooping cough 1, and 3 from tuberculosis.

DUTCH GUIANA—Paramaribo.—Month of April, 1907. Estimated population, 34,085. Total number of deaths, 86. No deaths from contagious diseases reported. Malarial fever prevalent.

FALKLAND ISLANDS—Port Stanley.—Month ended April 23, 1907. Estimated population, 1,080. Total number of deaths, 2. No deaths from contagious diseases reported.

FRANCE—Cannes.—Month of March, 1907. Estimated population, 37,361. Total number of deaths, 70, including 1 from scarlet fever.

Month of April, 1907. Total number of deaths, 58, including 4 from smallpox.

Marseille.—Month of April, 1907. Estimated population, 517,498. Total number of deaths, 1,165, including diphtheria 7, enteric fever 19, measles 4, scarlet fever 3, smallpox 170, whooping cough 2, and 151 from tuberculosis.

Nice.—Month of April, 1907. Estimated population, 130,000. Total number of deaths, 238, including enteric fever 1 and 4 from smallpox.

GERMANY—Weimar.—Month of April, 1907. Estimated population, 31,127. Total number of deaths 33, including diphtheria 1, enteric fever 1, and 4 from tuberculosis.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended May 11, 1907, correspond to an annual rate of 15.7 per 1,000 of population, which is estimated at 16,024,458.

London.—One thousand four hundred and thirty-one deaths were registered during the week, including measles 39, scarlet fever 9, diphtheria 15, enteric fever 4, whooping cough 63, tuberculosis 205, and 9 from diarrhea. The deaths from all causes correspond to an annual rate of 15.7 per 1,000. In Greater London 1,996 deaths were registered. In the "outer ring" the deaths included 3 from measles and 12 from whooping cough.

Portsmouth.—Four weeks ended April 13, 1907. Estimated population, 208,291. Total number of deaths, 321, including diphtheria 3, measles 45, and whooping cough 10.

Ireland.—The average annual death rate represented by the deaths registered during the week ended May 11, 1907, in the 21 principal town districts of Ireland was 22.3 per 1,000 of the population, which is estimated at 1,117,547. The lowest rate was recorded in Galway,

viz, 3.9, and the highest in Newtownards, viz, 34.3, per 1,000. In Dublin and suburbs 195 deaths were registered, including diphtheria 1, enteric fever 1, measles 6, whooping cough 8, and 27 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended May 11, 1907, correspond to an annual rate of 19.3 per 1,000 of the population, which is estimated at 1,812,171. The highest rate of mortality was recorded in Perth, viz, 24.0, and the lowest in Aberdeen, viz, 12.9, per 1,000. The aggregate number of deaths registered from all causes was 671, including diphtheria 4, enteric fever 5, measles 12, scarlet fever 3, and 40 from whooping cough.

RUSSIA—Riga.—Month of February, 1907. Estimated population, 320,000. Total number of deaths, 658, including diphtheria 10, enteric fever 2, measles 54, scarlet fever 19, smallpox 6, and 71 from tuberculosis.

SPAIN—Barcelona.—Ten days ended May 10, 1907. Estimated population, 600,000. Total number of deaths, 356, including diphtheria 5, enteric fever 2, measles 2, scarlet fever 1, whooping cough 1, smallpox 3, and 20 from tuberculosis.

Cadiz.—Month of April, 1907. Estimated population, 69,382. Total number of deaths, 174, including diphtheria 3, enteric fever 2, smallpox 3, and 25 from tuberculosis.

Huelva.—Month of April, 1907. Estimated population, 22,000. Total number of deaths, 72, including diphtheria 1, smallpox 4, and 8 from tuberculosis.

Seville.—Month of April, 1907. Estimated population, 148,315. Total number of deaths, 490, including diphtheria 4, enteric fever 2, measles 3, whooping cough 7, smallpox 3, and 81 from tuberculosis.

SWITZERLAND.—Week ended May 4, 1907. Reports from 18 cities, having an aggregate population of 867,056, show as follows: Total number of deaths, 255, including diphtheria 1, measles 1, scarlet fever 3, and 59 from tuberculosis.

WEST INDIES—St. Christopher.—Three weeks ended May 4, 1907. Estimated population, 49,289. Total number of deaths, 81, including measles 1 and 5 from tuberculosis.

St. Thomas.—Three months ended March 31, 1907. Estimated population, 11,002. Total number of deaths, 127, including leprosy 1, enteric fever 1, and 15 from phthisis pulmonalis.

Trinidad—Port of Spain.—Two weeks ended May 11, 1907. Estimated population, 60,000. Total number of deaths, 43, including yellow fever 2 and 9 from tuberculosis.

Cholera, yellow fever, plague, and smallpox from December 28, 1906, to June 7, 1907.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State, and from other sources.]

[For reports received from June 29, 1906, to December 28, 1906, see PUBLIC HEALTH REPORTS for December 28, 1906.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
