

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Report from Vanceboro, Me.—Smallpox on Canadian border—Train inspection.

Acting Assistant Surgeon Young reports, January 14, as follows: Week ended January 12, 1907. Inspected 18 passenger trains, carrying about 970 passengers; vaccinated 68 passengers; accepted official certificates of vaccination and nonexposure to infection in the case of 30 more, from the infected portions of New Brunswick, Nova Scotia, and Cape Breton Island.

Smallpox has developed at Sydney, Cape Breton. The extent of prevalence is not reported.

Report from New York Quarantine—Arrival of steamships Massilia and Indus.

The following is received from Quarantine Officer Doty:

January 19. The steamship *Massilia* arrived on January 16 with 45 steerage passengers on board. The captain was removed at Madeira, ill with smallpox. Satisfactory report of consul as to disinfection at that place. All well on arrival after a period of sixteen days from removal of captain. Steamship *Indus* arrived on January 15. No steerage. Crew all well with the exception of one native. Vessel held twenty-four hours until it was determined that said case was not a menace to public health. Satisfactory evidence of disinfection at Cuban port. These vessels were referred to in communications from your office.

The *Indus* had a history of suspect plague en route from Calcutta to Trinidad, 23 deaths having occurred among passengers. (See Public Health Reports, January 4, 1906, pp. 10, 12.)

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES OF THE UNITED STATES—YEARLY AND MONTHLY.

CALIFORNIA—*Stockton*.—Month of December, 1906. Estimated population, 20,000. Total number of deaths, not reported. Three deaths from tuberculosis reported. Cases of contagious diseases, not reported.

CONNECTICUT.—Month of December, 1906. Reports to the State board of health from 166 towns, having an aggregate population of 1,003,945, show as follows: Total number of deaths from all causes, 1,480, including diphtheria 37, enteric fever 17, measles 7, scarlet fever 5, whooping cough 16, and 132 from phthisis pulmonalis. Cases of contagious diseases were reported as follows: Diphtheria, 230 in 36 towns; enteric fever, 73 in 32 towns; measles, 206 in 25 towns; scarlet fever, 153 in 42 towns; smallpox, 1 case in *Manchester*; whooping cough, 98 in 21 towns, and phthisis pulmonalis, 32 in 15 towns.

FLORIDA.—Reports to the State board of health for the week ended January 12, 1907, show as follows: Diphtheria—Duval County (*Jacksonville*), 1 case. Enteric fever—Duval County (*Jacksonville*), 2 cases; Hillsboro County (*Plant City*), 1 case; Leon County (*Tallahassee*), 2 cases; Volusia County (*Daytona*), 1 case. Tuberculosis—Duval County (*Jacksonville*), 3 cases; Hillsboro County (*Tampa* and *Ybor City*), 2 cases; Marion County (*Ocala*), 1 case.

INDIANA.—Month of November, 1906. Estimated population, 2,648,549. Total number of deaths, 2,908, corresponding to an annual death rate of 13.3 per 1,000 of population, includes 81 from diphtheria, 135 from enteric fever, 1 from measles, 14 from scarlet fever, 6 from whooping cough, and 323 from tuberculosis.

IOWA—*Keokuk*.—Month of December, 1906. Estimated population, 16,000. Total number of deaths, 27, including 3 from tuberculosis. Cases of contagious diseases reported: Scarlet fever, 2.

MASSACHUSETTS—*Worcester*.—Month of September, 1906. Estimated population, 132,550. Total number of deaths, 191, including diphtheria 9, enteric fever 3, whooping cough 1, and 24 from tuberculosis. Cases of contagious diseases reported: Diphtheria 152, enteric fever 16, scarlet fever 5, tuberculosis 26. Month of October, 1906. Total number of deaths, 201, including diphtheria 6, enteric fever 1, whooping cough 1, and 19 from tuberculosis. Cases of contagious diseases reported: Diphtheria 200, enteric fever 16, scarlet fever 17, tuberculosis 26.

MINNESOTA—*Stillwater*.—Month of December, 1906. Estimated population, 12,435. Total number of deaths, 19. Two deaths from tuberculosis and 3 cases of scarlet fever reported.

MONTANA—*Helena*.—Month of December, 1906. Estimated population, 21,000. Total number of deaths not reported. Two deaths from diphtheria. Contagious diseases reported: Diphtheria 2, enteric fever 1, and scarlet fever 2.

NEW HAMPSHIRE—*Manchester*.—Month of December, 1906. Estimated population, 64,000. Total number of deaths reported, 122, including diphtheria 4, whooping cough 5, and 3 from phthisis pulmonalis. Cases of contagious diseases reported: Diphtheria 21, enteric fever 5, measles 2, and scarlet fever 2.

NEW YORK—*Auburn*.—Month of December, 1906. Estimated population, 38,500. Total number of deaths, 38, including 4 from phthisis pulmonalis. Cases of contagious diseases reported: Diphtheria 4, enteric fever 2, scarlet fever 2, phthisis pulmonalis 4.

OHIO—*Ironton*.—Month of December, 1906. Estimated population, 11,868. Total number of deaths, 21. No deaths from contagious diseases.

TENNESSEE—*Nashville*.—Month of December, 1906. Estimated population, 119,053. Total number of deaths, 165 (6 nonresidents), including diphtheria 1, enteric fever 6, scarlet fever 1, whooping cough 1, and 32 from tuberculosis. Cases of contagious diseases reported: Diphtheria 7, enteric fever 11, measles 1, scarlet fever 29, phthisis pulmonalis 5.

TEXAS—*San Antonio*.—Month of October, 1906. Estimated population, 85,000. Total number of deaths, 96, including diphtheria 1, enteric fever 2, and 14 from phthisis pulmonalis. Cases of contagious diseases reported: Diphtheria 28, enteric fever 5, scarlet fever 5. Month of November, 1906. Total number of deaths, 119, including diphtheria 1 and 36 from phthisis pulmonalis. Cases of contagious diseases reported: Diphtheria 34, enteric fever 6, measles 1, scarlet fever 7.

WASHINGTON—*Spokane*.—Month of December, 1906. Estimated population, 75,000. Total number of deaths, 76, including enteric fever 3, scarlet fever 1, and 6 from phthisis pulmonalis. Cases of contagious diseases reported: Diphtheria 5, enteric fever 6, measles 3, scarlet fever 11, smallpox 23, phthisis pulmonalis 1.

Seattle.—Month of December, 1906. Estimated population, 180,000. Total number of deaths, 145, including enteric fever 1, diphtheria 1, scarlet fever 1, and 14 from tuberculosis. Cases of contagious diseases reported: Diphtheria 49, enteric fever 2, measles 35, scarlet fever 13, smallpox 1, whooping cough 1, and tuberculosis 4.

Tacoma.—Month of December, 1906. Estimated population, 85,000. Total number of deaths, 61, including diphtheria 1, enteric fever 5, and 6 from phthisis pulmonalis. Cases of contagious diseases reported: Diphtheria 3, enteric fever 10, scarlet fever 1, and phthisis pulmonalis 3.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, December 28, 1906, to January 25, 1907.

For reports received from June 29, 1906, to December 28, 1906, see PUBLIC HEALTH REPORTS for December 28, 1906.

FOREIGN AND INSULAR.

Current quarantine measures.

[From the Veröffentlichungen des Kaiserlichen Gesundheitsamtes. Berlin, December 28, 1906.]

PLAGUE.

BRITISH EAST INDIES.—November 24, 1906. Quarantine measures at the port of Orissa against arrivals from Verawal suspended.

CHOLERA.

GERMANY—*Bremen*.—November 15, 1906. Sanitary control of Russian emigrants passing through Bremen, instituted in September, 1905, suspended till further notice. Measures with regard to steerage passengers who have evaded the control and registration stations remain in force.

AUSTRALIA.

Recurrence of plague at Brisbane—Cairns declared free of plague—Examination of rodents.

The following information is taken from plague bulletins issued by the department of health and forwarded by Consul-General Bray, at Melbourne:

QUEENSLAND—*Brisbane*.—Week ended November 24, 1906. After an interval of 151 days bubonic plague made its appearance at Brisbane. Two fatal cases occurred during the week. The first case was in the person of a woodcutter whose house adjoined the wood yard. The house was found to be free from rats. The second case occurred in the vicinity of a house in which an infected rat was found on October 27. Bacteriological examination demonstrated plague in both cases.

Week ended December 1, 1906. No further cases reported. Rodents destroyed, 476; examined, 352; found infected, none.

Cairns.—Week ended November 17, 1906. Declared free from plague.

New South Wales—Sydney.—Week ended November 17, 1906: Rodents destroyed, 1,710; examined, 421; found infected, 0.

Week ended November 24, 1906: Rodents destroyed, 1,852; examined, 501; found infected, 1.

Week ended December 1, 1906: Rodents destroyed, 1,914; examined, 524; found infected, 0. Date on which last plague-infected rodent was found, November 11, 1906.

BRAZIL.

Reports from Rio de Janeiro—Inspection of vessels—Plague and smallpox—Mortality in certain cities.

Acting Assistant Surgeon Stewart reports, December 17 and 28, as follows:

Week ended December 15, 1906. Vessels inspected and received bills of health as follows:

On the 12th instant the Swedish bark *Dharwar*, for Philadelphia, with a cargo of manganese ore, no passengers, and with 8 new members of the crew taken on in this port; on the same date the Italian ship *Canara*, for Gulfport, Miss., in stone ballast, with no passengers, and no change in the personnel of the crew while here; and on the 14th instant the British steamship *Virgil* for New York, with a cargo of coffee, no passengers, and with 2 new members of the crew signed on in this port.

During this week no other vessels left requiring inspection or issuance of bills of health.

Mortality reports.

Para.—Months of July and August, 1906. Population, 177,000. July—total deaths, 312. Yellow fever, 8 deaths; plague, 2 deaths. August—total deaths, 281. Yellow fever, 13 deaths.

Pernambuco.—Two weeks ended November 30, 1906. Total deaths, 252. Total population, census of 1900, 200,000; estimated population, 210,000. Variola, 26 deaths.

Rio de Janeiro.—Week ended December 16, 1906. Estimated population, 912,000. Total deaths, 317. No deaths nor cases of yellow fever. Seven cases of variola; no deaths. Plague, 9 new reported cases and 2 deaths. At the close of the week there were in the hospital of São Sebastião 26 cases of plague and 21 cases of suspicious illness under observation.

Week ended December 23, 1906. Vessels inspected and received bills of health as follows: The Norwegian bark *Fredsail*, for Gulfport, Miss., in stone ballast, with no passengers and no change in the crew personnel; on the 19th instant the British steamship *Castilian Prince*, for New York, with coffee, no passengers, and no change in the personnel; on the 20th instant the British steamship *Kirkby*, for New Orleans, La., in water ballast, no passengers, and no change in personnel; on the 19th instant the British steamship *Vimeira*, for New York, in water ballast, no passengers, and no change in personnel; on the 21st instant the American bark *Benjamin F. Hunt, Jr.*, in stone ballast, no passengers, and 11 new members of the crew signed on while in this port, left without inspection; the same date the Belgian steamship *Cervantes*, for New York, with coffee, no passengers, and no change in the crew personnel, and on the same date the British steamship *Imperial* for New Orleans, La., in water ballast with no passengers, and no change in the personnel of the crew. All the vessels named above, with the exception of the *Benjamin F. Hunt*, lay in the open bay while discharging and taking on cargo.

No other vessels left this week requiring inspection.

Mortality reports.

City of Rio de Janeiro.—Week ended December 23, 1906. Total deaths, 348. Yellow fever, no cases and no deaths for more than 2 weeks. Bubonic plague, 14 new reported cases and 7 deaths. Variola, 3 new reported cases and no deaths; no deaths from variola for more than 2 weeks.

At the close of the week there were in the hospital São Sebastião no cases of yellow fever or variola, and 17 cases of bubonic plague, with 24 cases of suspicious illness under observation.

CUBA.

Report from Cienfuegos—Inspection of vessels—History of fatal yellow fever case at Santa Clara.

Acting Assistant Surgeon Marsillan reports, January 14, as follows: Week ended January 12, 1907. Bills of health issued to 2 vessels bound for ports in the United States; 98 members of crews inspected; no passengers; no immune certificate issued.

The British steamship *Indus*, for New York, was fumigated by the Cuban quarantine officers prior to taking cargo as already stated. I inspected the crew of 80 men before sailing, finding 3 of them with temperature higher than normal; so stated on the bill of health.

No quarantinable disease has been reported during the week. The sanitary condition of the city has not improved.

The port and the surrounding country are reported infected on bills of health in consequence of the occurrence of a new case of yellow fever at Santa Clara, the capital of the province. The history of the case is as follows: R. V., 18 years old, a native of Asturias, Spain, resident fourteen months in Cuba and in Santa Clara; had been employed continuously in the same locality since his arrival in this country.

The locality is a block next to that previously infected and in which 3 cases have originated. The case occurred on the evening of the 2d instant, was seen by special commissioner on the 6th instant for the first time, and was then diagnosed as yellow fever of moderate intensity. A telegram from Santa Clara to the local board of health at Cienfuegos, dated January 10, states that the patient died that day.

The yellow fever situation at Cruces continues to improve. No new case has occurred there since November 30.

Report from Habana—Inspection and fumigation of vessels—Disinfection of steamship Puerto Rico—Decree of provisional governor relative to the inspection of vessels.

Passed Assistant Surgeon von Ezdorf reports, January 14, as follows:

Week ended January 12, 1907.

Vessels inspected and bills of health issued.....	23
Vessels not inspected and bills of health issued.....	7
Crew of outgoing vessels inspected.....	899
Crew of outgoing vessels not inspected.....	479
Passengers of outgoing vessels inspected.....	766
Passengers of outgoing vessels not inspected.....	106
Vessels fumigated prior to sailing.....	8

No new cases of yellow fever were reported in Habana during the week.

The case of yellow fever reported in Santa Clara on the 8th instant resulted in death on the 10th. There are now no reported cases of yellow fever in the island of Cuba.

The crew and passengers of the Spanish steamship *Puerto Rico*, from which a case of smallpox was landed January 6, have been vaccinated, and the vessel has been disinfected by the Cuban quarantine service. The vessel returned to Habana to discharge the cargo, which is being done in open bay and in quarantine. The *Puerto Rico* will proceed to Guantanamo, Santiago, and Manzanillo before sailing for New Orleans.

The Gaceta Oficial, of Cuba, dated January 8, 1907, published a decree providing for inspection of vessels between sunset and sunrise as follows:

Resolved that paragraph 2, article 1, of the quarantine regulations to be observed in the ports of Cuba shall hereafter read as follows:

"The inspection of vessels required by these regulations shall be made during the day, except in case of arrival by stress of weather or when authorization has been granted by the Treasury Department on request of the consignees, and always providing the vessels come from ports against which there is no quarantine restriction, and also providing they do not carry a great number of immigrants." * * *

CHARLES E. MAGOON,
Provisional Governor.

Report from Matanzas—Inspection and fumigation of vessels.

Acting Assistant Surgeon Nuñez reports, January 14, as follows: Week ended January 12, 1907. Bills of health issued to 7 vessels leaving for United States ports. The Italian barge *Cristoforo Colombo*, bound for Pensacola, was fumigated January 11 and left with all well on board for her port of destination.

No quarantinable contagious diseases were reported in this district during the week.

Reports from Santiago—Inspection of vessels.

Acting Assistant Surgeon Wilson reports, January 9 and 15, as follows:

Week ended January 5, 1907. Bills of health issued to 3 vessels bound for the United States. One vessel was fumigated to kill mosquitoes.

No quarantinable disease reported.

The mayor has just issued a circular letter to the physicians of this city requesting them to report any indigent cases of leprosy, in order that they may be segregated.

Week ended January 12, 1907. Bills of health issued to 6 vessels bound for the United States. One vessel fumigated.

No quarantinable disease has been reported.

ECUADOR.

Report from Guayaquil—Smallpox and yellow fever.

Passed Assistant Surgeon Lloyd reports, December 21, as follows:

December 1 to 15, 1906, 9 deaths from yellow fever and 10 from smallpox in Guayaquil. Other places in Ecuador continue to be infected, but statistics are not available.

INDIA.

Report from Calcutta—Transactions of Service.

Acting Assistant Surgeon Eakins reports, December 20, as follows:
 Week ended December 15, 1906. Bill of health issued to the steamship *Stolzenfels*, bound for Boston and New York, with a total crew of 64 and 1 passenger. The usual precautions were taken, holds fumigated, rat guards on wharf lines, and Lascars' effects disinfected.

ITALY.

Report from Naples—Inspection of vessels—Emigrants recommended for rejection—Smallpox in Italy.

Passed Assistant Surgeon McLaughlin reports, December 31, as follows:

Week ended December 29, 1906. Vessels inspected as follows:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage inspected and passed.	Pieces of baggage disinfected.

	Total	28	6	9	1	2	46

Smallpox.—Week ended December 27, 1906. Rotondello (Potenza), 1 case.

JAPAN.

Report from Yokohama—Emigrants recommended for rejection.

Passed Assistant Surgeon Cumming reports as follows:

Number of emigrants per steamship *Coptic* recommended, December 21, 1906, for rejection: For Honolulu, 49:

Per steamship *Shimano Maru* December 26, 1906: For Seattle, 16.

Per steamship *Amiral Exelmans*, December 29, 1906: For Honolulu, 22.

Per steamship *Hongkong Maru*, December 29, 1906: For Honolulu and San Francisco, 10.

Report from Nagasaki—Emigrants recommended for rejection.

Sanitary Inspector Bowie reports as follows:

Number of emigrants per steamship *Coptic* recommended, December 13, 1906, for rejection, 89.

Per steamship *Chusu Maru*, December 15, 1906, 60.

MEXICO.

Proposed sanitary improvements at Mazatlan.

The following is received from Consul-General Gottschalk, at the City of Mexico, under date of December 29:

The work of sanitation of the city of Mazatlan is to begin three months from date and to be concluded within two years.

Report from Veracruz—Inspection of vessel—Mosquitoes.

Acting Assistant Surgeon Frick reports, January 14, as follows:

Week ended January 12, 1907. Bills of health issued as follows: The American fishing smack *Aloha*, which has been recently released by the Mexican Government, was issued a bill of health on the 12th instant, expecting to sail on the 13th, but is still in the harbor. Mosquitoes do not appear to be numerous. I have noticed a few *Culex*, but no *Stegomyia*, *Calopus*, nor *Anopheles* mosquitoes.

No quarantinable disease was reported during the week.

PERU.

Report from Cullao—Inspection and fumigation of vessels—Plague in Peru—Plague and smallpox in Chilean ports.

Assistant Surgeon Wightman reports, December 24, as follows:

Week ended December 22, 1906. Vessels dispatched as follows: The British steamship *Condor* on the 19th for Tacoma, Wash., with niter and ores and a total personnel of 43, of whom 8 members of crew and 8 cabin passengers were from this port.

The British steamship *Peru* on the 22d for Ancon, Canal Zone, with general cargo and a total personnel of 216, of whom 4 members of crew and 81 cabin and 29 steerage passengers were from this port.

The United States light-house supply steamship *Armeria* on the 22d for San Francisco, Cal., with a total crew of 34, none from this port.

The *Condor* was fumigated on arrival by the Peruvian quarantine officers. She lay in open bay and took only ore here, and was dispatched after inspection of her personnel without further fumigation. The U. S. S. *Armeria* had not been to a wharf since leaving Porto Rico, and carried no cargo. She was dispatched without fumigation after inspection of personnel. The *Peru* was fumigated, her personnel inspected, steerage passengers for Panama vaccinated when necessary, and steerage baggage inspected and passed or disinfected.

Plague continues in the Chicama Valley, but no official statistics have been received. The consular agent at Mollendo reports 9 cases of plague with 3 deaths in two weeks ended December 18, 1906.

The following is reported from Chilean ports: Antofagasta, 2 cases of plague and 3 of smallpox (mortality not known) in two weeks ended

December 15; Coquimbo, 19 cases of smallpox with 2 deaths in two weeks ended December 13; Iquique, smallpox still present.

PHILIPPINE ISLANDS.

Reports from Manila—Inspection of vessels—Cholera in Manila and the provinces—Improvement in cholera situation.

Chief Quarantine Officer Heiser reports, December 5 and 14, as follows:

Week ended December 1, 1906. Quarantinable disease reported for the city of Manila as follows: Cholera, 1 case, 1 death.

During the same period cholera was reported from the provinces as follows:

Provinces.	Cases.	Deaths.
Negros Occidental	7	5
Iloilo	42	32
Capiz	66	42
Total	115	79

A peculiarity of the few scattering cases of cholera that have occurred in Manila during the past few weeks is the fact that they were found only among Japanese fishermen. There has also been a decided improvement in the cholera situation in the province of Iloilo, only a few cases having been reported during the past week. The rumor of the presence of the disease in Catubig, Samar, was confirmed. In all, about 20 cases have occurred. In the past seven days, however, there have been no new cases. A number of additional cases have also occurred in the province of Negros Occidental.

In none of the provinces, however, does the disease seem to show any particular tendency to spread.

During the week the following vessels cleared for United States ports:

On November 26 the British steamship *Teucer* with 86 crew, en route from Glasgow to Seattle, was granted a supplemental bill of health after the usual inspection of personnel and cargo.

On November 27 the American schooner *Erskine M. Phelps* cleared for Honolulu. Crew were inspected on board prior to the vessel's departure.

On November 27 the British steamship *Seneca*, with 48 crew and 2 passengers, was granted a consular bill of health to Boston and New York. Personnel inspected at hour of sailing. Miscellaneous cargo certified, 23,426 packages.

Week ended December 8, 1906. No quarantinable disease reported for the city of Manila.

During the same period cholera was reported from the provinces as follows:

Provinces.	Cases.	Deaths.
Samar	31	27
Negros Occidental	3	1
Total	34	28

During the week consular bills of health were issued as follows:

On December 6 the British steamship *Tsinan*, with 70 crew and 6 passengers, en route from Yokohama to Zamboanga, was granted a supplemental bill of health after the usual inspection.

PORTO RICO.

Report from Ponce—Inspection of vessels.

Acting Assistant Surgeon Ferrer-Torres reports, January 2, as follows:

Month of December, 1906.

Vessels inspected.....	17
Vessels in quarantine.....	6
Bills of health issued.....	26
Passengers inspected:	
Incoming.....	65
In transit.....	893
Crew inspected.....	1,350
Immigrants inspected.....	18
Passengers in quarantine.....	13
Pieces of baggage disinfected.....	0
Immigrants rejected.....	0

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

AFRICA—*Lourenço Marquez*.—Month of November, 1906. Estimated population, 10,000. Total number of deaths, 36, including 3 from tuberculosis.

AUSTRALIA—*New South Wales—Newcastle*.—Month of November, 1906. Estimated population, 51,250. Total number of deaths, 47, including enteric fever 3 and 6 from tuberculosis.

BAHAMAS—*Dunmore Town*.—Two weeks ended January 11, 1907. Estimated population, 1,232. One death. No contagious diseases.

Governors Harbor.—Week ended January 12, 1907. Estimated population, 1,500. No deaths and no contagious diseases reported.

Nassau.—Two weeks ended January 12, 1907. Estimated population, 12,656. No deaths and no contagious diseases reported.

BRAZIL—State of São Paulo, including the cities of *São Paulo*, *Santos*, and *Campinas*.—Week ended December 9, 1906. Estimated population, 286,000. Total number of deaths, 201, including diphtheria 1, enteric fever 2, measles 1, whooping cough 2, and 10 from tuberculosis. Week ended December 16, 1906. Total number of deaths, 201, including enteric fever 1, measles 1, whooping cough 1, plague 1, and 17 from tuberculosis.

CANADA—*Hamilton*.—Twelve months ended October 31, 1906. Estimated population, 61,000. Total number of deaths, 828, corresponding to a death rate of 13.57 per 1,000 of the population. There were reported during the year: Diphtheria, 21 deaths; enteric fever, 20 deaths; measles, 1 death; scarlet fever, 1 death; whooping cough, 1 death; phthisis pulmonalis, 70 deaths.

Quebec—Sherbrooke.—Month of December, 1906. Estimated population, 13,950. Total number of deaths, 15. No deaths from contagious diseases reported.

FRANCE—Roubaix.—Month of December, 1906. Estimated population, 124,660. Total number of deaths, 209, including 1 from enteric fever, 1 from measles, 1 from scarlet fever, and 2 from whooping cough.

St. Etienne.—Two weeks ended December 15, 1906. Estimated population, 146,836. Total number of deaths, 164, including diphtheria 1, enteric fever 4, and 14 from tuberculosis.

GIBRALTAR.—Two weeks ended December 30, 1906. Estimated population, 27,385. Total number of deaths, 14. No deaths from contagious diseases reported.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended December 29, 1906, correspond to an annual rate of 19.7 per 1,000 of population, which is estimated at 15,818,360.

London.—One thousand eight hundred and fifty deaths were registered during the week, including measles 29, scarlet fever 8, diphtheria 26, enteric fever 4, whooping cough 31, and 21 from diarrhea. The deaths from all causes correspond to an annual rate of 20.4 per 1,000. In Greater London 2,615 deaths were registered. In the "outer ring" the deaths included 1 from diphtheria, 2 from whooping cough, and 3 from scarlet fever.

Ireland.—The average annual death rate represented by the deaths registered during the week ended December 29, 1906, in the 21 principal town districts of Ireland was 19.8 per 1,000 of the population, which is estimated at 1,101,499. The lowest rate was recorded in Sligo, viz, 4.8, and the highest in Portadown, viz, 41.3 per 1,000. In Dublin and suburbs 170 deaths were registered, including diphtheria 1, measles 2, enteric fever 1, scarlet fever 1, whooping cough 3, and 32 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended December 29, 1906, correspond to an annual rate of 19 per 1,000 of the population, which is estimated at 1,787,788. The lowest rate of mortality was recorded in Greenock, viz, 13.3, and the highest in Aberdeen, viz, 23.2 per 1,000. The aggregate number of deaths registered from all causes was 652, including diphtheria 4, enteric fever 4, scarlet fever 4, typhus fever 1, measles 6, and 18 from whooping cough.

HAWAII—Honolulu.—Month of December, 1906. Estimated population, 39,306. Total number of deaths reported, 115, including diphtheria 1, enteric fever 2, measles 1, and 21 from tuberculosis.

JAMAICA—Kingston.—Month of December, 1906. Estimated population, 52,065. Total number of deaths, 151, including enteric fever 3 and 14 from phthisis pulmonalis.

JAPAN—Nagasaki.—Ten days ended December 21, 1906. Estimated population, 163,324. Total number of deaths not reported. One death from diphtheria and 3 from enteric fever reported.

MADEIRA—Funchal.—Two weeks ended December 30, 1906. Estimated population, 44,049. Total number of deaths, 56, including enteric fever 2, and 5 from tuberculosis.

ST. HELENA.—Five weeks ended December 15, 1906. Estimated population, 3,500. Total number of deaths, 4. No deaths from contagious diseases.

SPAIN—Barcelona.—Ten days ended December 30, 1906. Estimated population, 600,000. Total number of deaths, 398, including diphtheria 5, enteric fever 6, smallpox 7, and 28 from tuberculosis.

SWITZERLAND.—Week ended December 22, 1906. Reports from 18 cities, having an aggregate population of 846,710, show as follows: Total number of deaths, 215, including measles 6, scarlet fever 2, whooping cough 1, and 44 from tuberculosis.

TURKEY—Constantinople.—Two weeks ended December 30, 1906. Estimated population, 800,000. Total number of deaths, 450, including diphtheria 2, enteric fever 13, measles 1, scarlet fever 2, smallpox 1, and 84 from tuberculosis.

WEST INDIES—Curaçao.—Two weeks ended January 4, 1907. Estimated population, 31,600. Total number of deaths, 10. No deaths from contagious diseases.

Cholera, yellow fever, plague, and smallpox from December 28, 1906, to January 25, 1907.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from June 29, 1906, to December 28, 1906, see PUBLIC HEALTH REPORTS for December 28, 1906.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
