Plague in Alameda and Contra Costa counties.

Doctor Blue further reports:

July 16. A native of California, aged 7 years, died July 15 at Concord, Contra Costa County, and the findings indicate plague. The usual antiplague measures are being taken.

July 23. The diagnosis of plague in a case at Concord, July 16, has been confirmed by bacteriological examination.

July 25. A woman, aged 24, nativity Portugal, died July 24, in Pre-nois Valley, Contra Costa County, 10 miles from Martinez. Pathological and bacteriological findings indicate plague.

July 28. Diagnosis of plague has been confirmed by bacteriological examination in the case of a man aged 27 years, nativity California, who died July 21 at Oakland.

Reports from Seattle, Wash.—Plague-prevention work—Plague rats.

Passed Assistant Surgeon Glover reports, July 13 and 20:

Week ended July 11.

Date of finding of last plague rat, July 6, 1908.

Rats received.....	1, 039
Rats necropsied.....	995
Plague rats found.....	5
Plague-infected rats to date.....	16
Vessels inspected.....	4
Vessels fumigated.....	4

Dates of finding of plague rats: June 23, 1 rat; June 29, 2 rats; July 6, 2 rats; all from one locality, stable in wood yard, corner of Eighth avenue and Madison street.

Week ended July 18.

Date of finding of last plague rat, July 9, 1908.

Rats received.....	1, 097
Rats necropsied.....	1, 063
Plague rats found.....	4
Plague-infected rats to date.....	20
Vessels inspected.....	6
Vessels fumigated.....	8

Examination of plague rats.

Assistant Surgeon Chapin reports, July 18, through Passed Assistant Surgeon Glover:

Four rats delivered July 9 have been proved plague-infected and recorded as plague rats Nos. 17, 18, 19, and 20. These were all from the stable in the wood yard where the 5 plague-infected rats reported July 6 and July 11 were found. These 4 rats, among others, were killed during the work of cleaning up the premises. All 4 showed to a greater or less degree gross lesions suggestive of plague infection and plague-like bacilli in more or less abundance in smears from the organs. The bacilli isolated from the organs were culturally verified in each case. A guinea pig inoculated from the organs of plague rat No. 17 died July 16 with the gross and microscopic appearances of plague infection. The animal test was omitted in the other cases.

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES
OF THE UNITED STATES—UNTABULATED

IOWA—*Keokuk*.—Month of June, 1908. Estimated population, 16,000. Total number of deaths, 17, including 2 from tuberculosis. Cases: Enteric fever 1, whooping cough 1, and smallpox 1.

MINNESOTA.—Month of March, 1908. Estimated population, 1,979,658. Reports to the State board of health show as follows: Total number of deaths, 1,951, including diphtheria 41, enteric fever 20, measles 7, scarlet fever 21, whooping cough 11, smallpox 4, and 168 from tuberculosis. Deaths reported from State institutions during the month numbered 37, including diphtheria 1, enteric fever 1, and 9 from tuberculosis.

MINNEAPOLIS.—Month of June, 1908. Estimated population, 300,000. Total number of deaths, 212, including diphtheria 7, enteric fever 3, scarlet fever 1, whooping cough 1, and 28 from tuberculosis. Cases: Diphtheria 50, enteric fever 8, scarlet fever 15, smallpox 21, and tuberculosis 28.

NEW YORK—*Yonkers*.—Month of May,^a 1908. Estimated population, 72,000. Total number of deaths, 69, including diphtheria 1, scarlet fever 1, and 10 from tuberculosis. Cases: Diphtheria 5, measles 25, scarlet fever 55, and phthisis pulmonalis 16.

OREGON—*Portland*.—Month of May, 1908. Estimated population, 225,000. Total number of deaths, 151, including diphtheria 1, enteric fever 4, scarlet fever 1, and 24 from tuberculosis. Cases: Diphtheria 32, enteric fever 7, measles 28, scarlet fever 10, whooping cough 6, and smallpox 86.

PENNSYLVANIA—*Homestead*.—Month of June, 1908. Estimated population, 17,000. Total number of deaths, 26, including 1 from tuberculosis. Cases: Scarlet fever 3, whooping cough 2, enteric fever 5, tuberculosis 2, and measles 5.

^a Received out of regular order.

WEST VIRGINIA—*Charleston*.—Month of April,^a 1908. Estimated population, 26,000. Total number of deaths, 25, including diphtheria 2, and 3 from tuberculosis. Cases: Diphtheria 2, measles 3, tuberculosis 1, and enteric fever 1.

Month of May, 1908. Total number of deaths, 34, including 4 from tuberculosis. Cases: Diphtheria 4 and enteric fever 3.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 27 to July 31, 1908.

[For reports received from December 27, 1907, to June 26, 1908, see PUBLIC HEALTH REPORTS for June 26, 1908.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

α Intervening week previously reported.

FOREIGN AND INSULAR.

CURRENT QUARANTINE MEASURES.

[From the Veröffentlichungen des Kaiserlichen Gesundheitsamtes, Berlin, June 17 and 24 and July 1, 1908.]

PLAGUE.

British India.—May 8. Quarantine ordered at Orissa against arrivals from Hongkong.

China.—June 4. The German consul-general at Shanghai, in agreement with the consuls of the other powers, has declared sanitary police control in force against German vessels arriving from Canton, Hongkong, Amoy, and Swatow.

Norway.—June 13. Venezuela, Uruguay, and Peru declared plague-infected and quarantine measures put in force against arrivals from ports in those countries.

Portugal.—The port of San Francisco declared clean since April 30.

Russia.—May 31 and June 3. Hongkong and Bagdad declared plague-infected.

Straits Settlements.—May 9. By order of the colonial government the port and province of Puket, on the island of Salanga, on the west coast of Malacca (Siam), are declared plague-infected.

Venezuela.—May 29. The port of La Guaira declared open for traffic with the interior and for communication with the United States of America and Europe.

BARBADOS.

Report from Bridgetown—Inspection of vessels—Sanitary conditions.

Acting Assistant Surgeon Urquhart reports:

Week ended July 4. Bills of health issued to 6 vessels, with total number of passengers 57, and members of crews, 284.

Sanitary condition of vessels, cargoes, crews, and passengers good. Sanitary condition of this port good, no quarantinable diseases being reported for this port or island for the week.

BRAZIL.

Reports from Rio de Janeiro—Inspection of vessels—Mortality—Plague, smallpox, and yellow fever.

Acting Assistant Surgeon Stewart reports, June 26 and July 2:

Week ended June 21. Vessels inspected and received bills of health: June 17 the British steamship *Hughenden*, for New York, with coffee

cargo, no passengers, and no change in the personnel; June 18 the British steamship *Verdi*, for New York, in cargo of coffee from Rio, with 8 cabin and 13 steerage passengers from Rio, and no change of crew personnel in this port; on the same date the German steamship *Gunther*, for New York, in coffee cargo, with 1 cabin passenger, and with no change in the crew personnel; June 19 the British steamship *Kildare*, for Norfolk, Va., in water ballast, with no passengers, and no change in crew personnel, and on June 20 the British steamship *Italian Prince*, for New York, with no passengers, no change in the personnel, and in cargo of coffee.

No other vessels left this port for the United States during the period under report.

Mortality—Plague, smallpox, and yellow fever. Week ended June 21, 1908. Total deaths, 392. One new case of yellow fever reported, with no deaths; no cases nor deaths due to bubonic plague, and 395 new reported cases of smallpox, with 151 deaths. At the close of the week there were in the Hospital São Sebastião 410 cases of smallpox and 1 case of plague under treatment.

Week ended June 28. Vessels inspected and received bills of health: June 23 the British steamship *Bellenden*, for New Orleans, in coffee cargo, with no passengers and no change in the crew personnel, and on June 27 the British steamship *Spanish Prince*, for New Orleans, in cargo of coffee, no passengers, and no change in the crew personnel.

Mortality—Plague, smallpox, and yellow fever.—Week ended June 28. Total deaths, 405. One death reported due to yellow fever and one new case of plague. Smallpox caused 173 deaths, with 328 cases. At the close of the week there were in the Hospital São Sebastião 1 case of plague and 416 cases of smallpox under treatment.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Mengis reports:

Week ended July 16. Present officially estimated population, 10,000. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
July 10	Belize	Mobile.....	18	4	0
10	Corinto	New Orleans.....	27	10	9
10	Fred W. Homans.....	Tampa, Fla.....	6	0	0
11	Frutera.....	New York.....	26	0	0
14	Orion.....	United States via Cuba...	35	0	0

CHILE.

Report from Iquique—Sanitary conditions at Arica and Antofagasta—Plague.

The following is received from Consul Mackirdy, under date of June 8:

The consular agent at Arica reported, March 31:

There is no sewerage system at Arica. The soil on which the town is built is sandy and there is no vegetation except in those portions of the suburbs which have the benefit of irrigation from a small river near the town, or by a system of wells. In the lower part of the town the subsoil is gravel and there is a good supply of water not far from the surface. The municipality keeps the streets clean by an ordinance requiring all householders to sweep the street opposite their houses to the middle of the roadway, and this order is strictly enforced by the police. Refuse is collected daily from the houses and streets by the municipal carts and destroyed outside the town.

The public wells are open and quite unprotected against contamination of all kinds.

This port is a sanitary station for ships arriving from Peruvian and other northern ports bound for Chilean ports. It has a special medical sanitary officer who visits all vessels on arrival and supervises their fumigation.

There is a fairly well managed hospital.

At certain times of the year there is a good deal of malarial fever, but it appears to be of a very mild type. In some of the surrounding valleys the inhabitants suffer very much from it. The town has known in the past several epidemics of smallpox, scarlet fever, and bubonic plague. At present there are several cases of the latter disease under treatment. The fatal cases of plague have been of late very few. At the present time, with the exceptions noted, the public health is good.

Conditions at Antofagasta—Plague and smallpox.

[Statement from press report.]

The statistics for the year 1907 show 1,778 deaths. Population 8,000. The sanitary conditions are very bad and no action is taken by the municipality to improve them. Epidemics of smallpox and bubonic plague have diffused themselves throughout the city, causing many deaths. Tuberculosis is endemic, with considerable mortality.

CHINA.

Report from Canton—Quarantine against port on account of plague.

Vice-Consul-General Hull reports, June 10:

The commissioner of customs at this port is in receipt of a telegram from Shanghai stating that until further notice quarantine regulations will be enforced against this port owing to the existence here of bubonic plague. Although the disease is not present in epidemic form the situation in Hongkong appears to be quite serious, and on account of the immense traffic between Canton and that port the conditions are being carefully watched.

[Inclosure.]

Acting Sanitary Inspector Swan reports, June 9, under cover to the vice-consul-general:

Plague is not present in any part of Canton in epidemic form. There are, however, quite a number of sporadic cases occurring in various quarters. With two exceptions, the only cases I have seen, about 8 or 10, were imported from Hongkong.

COSTA RICA.

Report from Limon, fruit port.

Acting Assistant Surgeon Goodman reports:

Week ended July 11. Estimated population, 6,000. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
July 5	Esparta.....	Boston.....	46	2	0
6	Prinz Aug. Wilhelm.....	New York.....	133	110	14
7	Pacuare.....	do.....	57	0	0
7	Manuel Calvo.....	Ponce, P. R.....	122	14	0
8	Bluefields.....	New Orleans.....	25	6	0
8	H. T. Inge.....	do.....	35	3	22
8	Juan.....	New York.....	29	0	0
9	Karen.....	New Orleans.....	25	1	0
10	Zent.....	New York.....	55	9	0
11	Chickahominy.....	New Orleans.....	46	4	0

Three bills of health for Panaman ports were viséed and certificates issued to 40 passengers bound for Colon.

CUBA.

Reports from Cienfuegos—Inspection and fumigation of vessels.

Acting Assistant Surgeon Marsillan reports, July 13 and 20:

Week ended July 11.

Vessels inspected, fumigated, and bills of health issued.....	3
Members of crews inspected.....	57
Steerage passengers landed at this port.....	6

No measures are taken by authorities at this port as regards vessels arriving from the infected district of Santiago de Cuba or railway communication.

There is complaint of excess of mosquitoes and unsatisfactory disposal of garbage from some quarters of the city. The sanitary condition of the city remains fair. No quarantinable disease reported during the week.

Week ended July 18.

Vessels inspected.....	3
Vessels inspected and fumigated.....	2
Bills of health issued.....	5
Members of crews inspected.....	111
Cabin passengers inspected, in transit.....	2
Immune certificates issued.....	2

No quarantinable disease was reported in the city, and none entered the port, during the week.

Mosquitoes of all varieties are becoming excessively abundant in the city.

Reports from Habana—Inspection and fumigation of vessels—Sanitary conditions—Inspection of houses and water deposits—Yellow fever at Daiquiri.

Passed Assistant Surgeon Amesse reports, July 20:

Week ended July 18.

Vessels inspected.....	15
Bills of health issued.....	19
Members of crews of outgoing vessels inspected.....	780
Passengers of outgoing vessels inspected.....	454
Certificates of immunity issued.....	30
Certificates issued to passengers bound for New York.....	237
Certificates issued to passengers bound for southern ports.....	106
Vessels fumigated prior to sailing.....	3

Sanitary conditions, Habana and vicinity, continue satisfactory. The health department reports 10,888 house inspections and a total of 26 deposits of mosquito larvæ, of which 8 were those of *Stegomyia*.

Reports from Daiquiri, Province of Santiago, show some improvement. During the week 7 cases of yellow fever were discharged recovered and 5 new cases registered, leaving 5 under treatment at the close of the week.

Every effort is being made by the authorities to limit the infection to Daiquiri. The measures employed include a census of the entire district and a daily roll call to insure proper surveillance and inspection.

July 28. The sanitary department announces 2 new cases of yellow fever with 1 death at Daiquiri.

Report from Matanzas—Inspection of vessels.

Acting Assistant Surgeon Nuñez reports, July 14:

Week ended July 11. Bills of health issued to 4 vessels clearing for United States ports in good sanitary condition.

Report from Santiago—Inspection of vessels—Water supply not satisfactory.

Acting Assistant Surgeon Wilson reports, July 14:

Week ended July 11. Bills of health issued to 3 vessels bound for the United States.

No quarantinable disease reported in the city during the week.

There has been much general complaint on account of the condition of the water served in the pipes. The water supply is from the new dam.

CURAÇAO.

Precautions taken to prevent introduction of plague.

Passed Assistant Surgeon Vogel reports, July 15:

The following precautions are being taken here to prevent the introduction of plague: All personnel of vessels arriving from Trinidad, Puerto Cabello, and La Guaira are detained to complete 10 days' detention from last exposure. The vessels are fumigated before being

allowed to dock, and must use rat funnels on their lines when at dock and remove gangways at night. All the lines touching at Venezuelan ports are running to touch here first and afterwards at the Venezuelan port. The Red D freight boats come here from Maracaibo, then from here they go to Puerto Cabello and then direct to New York.

The Italian line to Colon does not stop at Venezuelan ports. The Dutch line touches here from New York, then at Puerto Cabello and Trinidad, but going to New York they stop here first, then at Puerto Cabello and Haitian ports. The Leland and Harrison lines, British freight steamers, make New Orleans their American port. They touch at all Spanish Main ports and the British West Indian ports.

At Curaçao the authorities are cleaning up and paying a rat bounty and have received 3,000 rats and 8,000 mice since May 1.

As far as I can ascertain, there has been no human plague here.

GUATEMALA.

Report from Puerto Barrios, fruit port.

Acting Assistant Surgeon Wailes reports:

Week ended July 16. Present officially estimated population, 250. General sanitary condition of this port and the surrounding country during the week, not reported. Mosquitoes in abundance. Sanitary work at a standstill.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 8	Belize	Mobile	18	1	0	0
12	Frutera	New York	25	5	0	0
16	Mobila	New Orleans	49	6	0	0

HONDURAS.

Report from Ceiba, fruit port—Sanitary measures suspended—Stegomyia calopus present.

Acting Assistant Surgeon Jumel reports:

Week ended July 14. Present officially estimated population, 6,500. General sanitary condition of this port and the surrounding country during the week, good. Owing to the urgent need of all available able-bodied natives for military duty, practically all sanitary work has been temporarily suspended. *Culex*, *Anopheles*, and *Stegomyia calopus* are numerous. Daily afternoon showers continue.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 11	Joseph Vaccaro	34	2	0	0
12	Colombia	19	0	0	0

Report from Tela, fruit port.

Acting Assistant Surgeon Roe reports as follows:
 Week ended June 27. Present officially estimated population, about 1,250. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health issued to the following-named vessel:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.

Smallpox in Naples.—During the week ended July 11, 18 cases of smallpox, with 2 deaths, were reported at the office of public health of the city of Naples. The total number of cases since the first case,

which occurred on June 13, is 29, with 4 deaths. Of these, 12 cases occurred in the same neighborhood; the others in various places throughout the city. Inhabitants of infected houses, those in houses immediately adjoining, inmates of charitable institutions, hospitals, military barracks, schools, etc., have been ordered by the mayor to be vaccinated. Disinfection of houses and contents is effected by means of corrosive sublimate, milk of lime, and the steam chamber.

Editorial note.—In some of the copies of the Public Health Reports, July 24, 1908, page 1079, a mechanical defect occurred in the printing of the table accompanying a report by Assistant Surgeon Wollenberg on the campaign against malaria in Italy. Owing to the important results obtained by prophylactic measures against malaria in Italy, the corrected table is reprinted below.

State quinine and mortality from malaria in Italy.

Consumption of State quinine.		Deaths.
Fiscal year.	Kilograms sold.	Malaria.
1905-6.....	18,000	7,753
1906-7.....	20,723	4,871

JAPAN.

Report from Kobe—Inspection and fumigation of vessels—Examination of emigrants—Smallpox at Kobe and Osaka—Plague at Osaka.

Acting Assistant Surgeon Slade reports, June 24:

Week ended June 20. Supplemental bills of health granted to 3 steamships and original bill of health granted to 1 steamship.

There were inspected 42 crew and 170 steerage passengers; bathed and had effects disinfected by steam, crew 35 and steerage passengers 79. The number of pieces of baggage steamed was 233 and bedding 192. Manifests were viséed for 15,036 pieces of freight, amounting to 972 tons.

Emigrants examined: Per steamship *Shawmut* for Tacoma, passed 19, rejected 18; per steamship *Iyo Maru* for Seattle, passed 46, rejected 8.

The emigrants passed, together with 8 intending passengers to Victoria by the steamship *Iyo Maru*, were inspected, bathed, and disinfected and had their effects disinfected before embarkation.

The official reports of infectious diseases in Kobe for the week show smallpox, 4 cases and no deaths. The report from Osaka for the week ended June 13 shows plague, 2 cases and 2 deaths; smallpox, 9 cases and 3 deaths, and for the week ended June 20, plague, new cases none and 1 death; smallpox, 15 cases and 4 deaths.

Report from Nagasaki—Examination of emigrants.

Sanitary Inspector Bowie reports:

June 22. Number of emigrants per steamship *Korea* recommended for rejection: For Honolulu, 5.

MEXICO.

Report from Coatzacoalcos—Yellow fever at Veracruz and Frontera.

Acting Assistant Surgeon Thompson reports, July 12:

The local quarantine officer reports that there are 2 cases of yellow fever at Veracruz and 1 at Frontera. The 2 cases at Veracruz are on a ship and the case at Frontera is in town.

Frontera is the first port between this place and Progreso, and is about 90 miles distant. It has about 6,000 population, is on the east side of the river, and about 7 miles from the bar. The water supply is chiefly from wells and the drainage is surface with very little fall.

Fruit vessels sail from Frontera to Texas City or to Galveston about once a week.

Report from City of Mexico—Summary of yellow fever at Laguna, Frontera, and Veracruz—Precautionary measures taken.

The following is received from Doctor Liceaga, president of the superior board of health, under date of July 22:

On May 18 last the delegate at the port of Laguna reported that the captain of the Russian bark *Lembit* had died on that date of yellow fever. Later, the said delegate reported 12 other cases which developed successively on May 27 and 31; 4, 5, 20, 24, 26, and 29 of last June and on July 6 and 12. Of these 7 occurred on board various vessels anchored in the bay and 5 among the inhabitants of the town of Laguna. Of these 12 cases 5 died.

On July 4 the delegate at Frontera reported that there had arrived at that port from Laguna a patient in whose case yellow fever was confirmed.

On July 7 the board was advised by the chief of the service against yellow fever at Veracruz, of a case of yellow fever at that place which terminated fatally, and yesterday a new case was reported which is at present isolated.

All necessary measures have been taken to extinguish the small epidemic at Laguna and to prevent the occurrence of more cases at Frontera and Veracruz. These include the isolation of the suspect and patients, destruction of mosquitoes and larvæ, and the cleaning of the city. Domiciliary visits will be made daily at Frontera and Laguna to ascertain the number of immunes and nonimmunes residing there, with the object of isolating from the first day any cases that may occur. This is already being done at Veracruz.

On July 16 another case of yellow fever was reported at Veracruz.

Report from Salina Cruz—Inspection and fumigation of vessels.

Acting Assistant Surgeon McPherson reports, July 16:

Period, July 1 to 15, inclusive. Two steamships cleared from this port for the United States. Both vessels inspected; one fumigated.

Reports from Veracruz—Inspection and fumigation of vessels—New case of yellow fever at Laguna—Quarantine maintained against Laguna—Mosquitoes increasing.

Acting Assistant Surgeon Jacobs reports, July 12:

Week ended July 11. Total bills of health issued, 4. Fumigated and temperatures of crews taken, 2. Inspected only, 2 vessels.

Laguna de Terminos reports 1 new case for the week ended July 4. The exact date was not given, but the case occurred after June 29, and is a new case not previously reported, making a total of 9 cases, including the 2 reported in my letter of June 27.

Quarantine regulations previously reported continue against Laguna. Heavy rains continue daily. Mosquitoes increasing.

Yellow fever at Veracruz.

Doctor Jacobs further reports:

July 14. Another case of yellow fever has occurred in Veracruz. The history of the case is as follows:

J. C., Mexican, 20 years old, native of Zacualtipam, State of Hidalgo, twenty days' residence in Veracruz.

Taken sick July 10 and sent to isolation hospital. Diagnosis of yellow fever was made to-day and confirmed by national board of health. To-day's case is only one block removed from locality where the former fatal case occurred. The patient had not been out of the city since arrival.

July 17. Yellow fever case confirmed by the superior board of health July 16.

The history of the case is as follows:

Male, Spaniard, 28 years old, office assistant in commercial house, five months' residence in Veracruz. Has not left city since arrival. Taken sick evening of July 12.

The man worked in the office of a wholesale grocery house, about six blocks from where the original case occurred, and lives in the same building. The house has been fumigated and the patient screened.

This makes 3 cases and 1 death to date.

None of the cases have been traced to outside infection. The patients had all been employed at indoor work.

The second case occurred about one block from the first case.

PANAMA.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports:

Week ended July 14. General sanitary condition of this port and the surrounding country during the week, good. Present officially estimated population, 4,954.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.

PERU.

Report from Callao—Inspection and fumigation of vessels—Status of plague in Peru—Smallpox in Lima—Plague in Chilean ports.

Acting Assistant Surgeon Gutierrez reports, June 30:

Week ended June 27. One steamship and 5 sailing vessels were dispatched with an aggregate personnel of 157 crew, 76 cabin and 75 steerage passengers. Only 4 of the 5 vessels dispatched were fumigated; the captain of the other vessel did not accept the fumigation.

The following is the last report on plague in Peru received from the Director de Salubridad:

Locality.	Cases June 9.	New.	Recovered.	Died.	Remaining June 22.
Lima	8	2	2	8
Callao	3	5	2	1	5
Trujillo (city)	31	6	12	9	30
Trujillo (country)					
Mollendo	1	1	1	1
Monsefu	1	1
Niepos (Hualgayoc)	2
Chiclayo	5	1	5

One case of smallpox remains in the lazaretto in Lima.

Since my last report a case of plague has occurred in Callao; it was removed to lazaretto.

Bills of health from Chile report as follows: Antofagasta (June 15), 7 cases of plague and 2 deaths; Iquique (June 17), 4 cases of plague in the lazaretto (1 case in two weeks); Arica (June 18), no cases of plague.

PHILIPPINE ISLANDS.

Report from Manila—Quarantine transactions, month of April, 1908.

Chief Quarantine Officer Heiser reports, May 22:

Quarantine transactions of the Service in the Philippine Islands during the month of April, 1908.

PORT OF MANILA.

ST. LUCIA ISLAND.

Reports from Castries—Sanitary conditions.

Acting Assistant Surgeon Maylie reports, July 6 and 13:

Two weeks ended July 4. Sanitary condition of this port and vicinity good. No quarantinable diseases exist.

VENEZUELA.

Reports from Puerto Cabello—Plague situation at Caracas and La Guaira.

Consul Johnson reports, June 29, that owing to the plague situation in Caracas there is a steady exodus from that city to Puerto Cabello.

The following information is received from the Department of State, under date of July 23:

The consul at Puerto Cabello, Venezuela, states, under date of July 8, that, according to trustworthy information, there have appeared several new cases of plague in both La Guaira and Caracas within the past five days.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND
CITIES—UNTABULATED.

AFRICA—*Kimberley.*—Month ended June 13, 1908. Estimated population, 54,141. Total number of deaths, 82, including 2 from diphtheria.

Zanzibar.—Month of May, 1908. Estimated population, 75,000. Total number of deaths, 136, including 10 from tuberculosis.

ALGERIA—*Algiers.*—Month of June, 1908. Estimated population, 155,000. Total number of deaths, 238, including enteric fever 3, diphtheria 1, measles 1, whooping cough 1, smallpox 2, and 42 from tuberculosis.

BRAZIL—*Bahia.*—Month of June, 1908. Estimated population 265,000. Total number of deaths, 534, including smallpox 1, and 51 from tuberculosis.

Sao Paulo, Santos, and Campinas.—Week ended June 21, 1908. Estimated population, 300,000. Total number of deaths, 175, including enteric fever 1, whooping cough 1, smallpox 1, and 13 from tuberculosis.

COSTA RICA—*San Jose.*—Month of June, 1908. Estimated population, 26,682. Total number of deaths, 92, including measles 3, enteric fever 2, and 2 from tuberculosis.

CUBA.—Month of June, 1908. Reports from the 6 provinces, having an aggregate population of 1,572,797, show as follows: Deaths from contagious diseases: Diphtheria 14, enteric fever 21, yellow fever 1, measles 3, scarlet fever 1, and 163 from tuberculosis.

DUTCH GUIANA—*Paramaribo.*—Month of June, 1908. Estimated population, 34,085. Total number of deaths 81. No deaths from contagious diseases reported. Malarial fever prevalent.

FRANCE—*Calais.*—Month of June, 1908. Estimated population, 70,000. Total number of deaths, 109, including enteric fever 1, scarlet fever 1, and 26 from tuberculosis.

Marseille.—Month of June, 1908. Estimated population, 517,498. Total number of deaths, 988, including diphtheria 3, enteric fever 43, measles 29, scarlet fever 5, whooping cough 6, and 97 from tuberculosis.

St. Etienne.—Month of June, 1908. Estimated population, 150,000. Total number of deaths, 263, including measles 2, scarlet fever 1, enteric fever 2, diphtheria 1, whooping cough 1, and 49 from tuberculosis.

GIBRALTAR.—Two weeks ended July 5, 1908. Estimated population, 36,830. Total number of deaths, 13.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended July 4, 1908, correspond to an annual rate of 11.8 per 1,000 population, which is estimated at 16,234,952.

Dartmouth.—Month of June, 1908. Estimated population 7,000. Total number of deaths, 4.

London.—One thousand and seven deaths were registered during the week, including measles 20, scarlet fever 9, diphtheria 7, whooping cough 16, tuberculosis 154, and 21 from diarrhea. The deaths from all causes correspond to an annual rate of 10.9 per 1,000. In Greater London 1,413 deaths were registered. In the "outer ring" the deaths included 5 from measles, 5 from diphtheria, and 1 from whooping cough.

Salford.—Two weeks ended July 4, 1908. Estimated population, 239,294. Total number of deaths, 132, including measles 10, scarlet fever 1, whooping cough 7, and 11 from phthisis pulmonalis.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 4, 1908, in the 21 principal town districts of Ireland was 16.8 per 1,000 of the population, which is estimated at 1,131,959. The lowest rate was recorded in Armagh, viz, 6.9, and the highest in Kilkenny, viz, 34.3 per 1,000.

Scotland.—The deaths registered in 8 principal towns during the week ended July 4, 1908, correspond to an annual rate of 12.5 per 1,000 of the population, which is estimated at 1,839,038. The highest rate of mortality was recorded in Paisley, viz, 15.6, and the lowest in Aberdeen, viz, 10.5 per 1,000. The aggregate number of deaths registered from all causes was 440, including measles 3, scarlet fever 4, diphtheria 3, enteric fever 1, and 13 from whooping cough.

ITALY—Genoa.—Month of May, 1908. Estimated population, 273,011. Total number of deaths, 434, including enteric fever 6, diphtheria 2, measles 1, scarlet fever 1, and 44 from tuberculosis.

JAMAICA—Kingston.—Month of June, 1908. Estimated population, 52,065. Total number of deaths, 145, including enteric fever 9 and 12 from phthisis pulmonalis.

ST. HELENA.—Five weeks ended June 27, 1908. Estimated population, 3,500. Three deaths reported.

SPAIN—Almeria.—Month of June, 1908. Estimated population, 46,806. Total number of deaths, 111.

Cadiz.—Month of June, 1908. Estimated population, 69,382. Total number of deaths, 153, including enteric fever 3, measles 2, and 31 from tuberculosis.

Huelva.—Month of June, 1908. Estimated population, 24,000. Total number of deaths, 40, including enteric fever 1, measles 1, whooping cough 5, and 12 from tuberculosis.

Madrid.—Month of June, 1908. Estimated population, 556,663. Total number of deaths, 1,027, including diphtheria 6, enteric fever 9, measles 6, scarlet fever 2, whooping cough 8, and 93 from tuberculosis.

WEST INDIES—Curaçao.—Two weeks ended July 10, 1908. Estimated population, 31,600. Total number of deaths, 16, including 1 from yellow fever.

Cholera, yellow fever, plague, and smallpox, from June 26 to July 31, 1908.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State, and from other sources.]

[For reports received from December 27, 1907, to June 26, 1908, see PUBLIC HEALTH REPORTS for June 26, 1908.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
