

## PUBLIC HEALTH REPORTS.

---

### REPORT OF THE TRANSACTIONS OF THE INTERNATIONAL COMMISSION FOR THE REVISION OF THE INTERNATIONAL CLASSIFICATION OF THE NOMENCLATURE OF DISEASES AND CAUSES OF DEATH. HELD IN PARIS, IN JULY, 1909.

By H. D. Geddings, Surgeon, United States Public Health and Marine-Hospital Service.

The commission convened at 9.30 o'clock on the morning of July 1, 1909, in the conference room of the ministry of the interior, Paris, under the presidency of Dr. Arnold Netter, member of the academy of medicine, professor of medicine of the Trousseau Hospital and member of the superior council of hygiene of France. Dr. Jacques Bertillon acted as secretary-general.

On calling the roll of countries the following were found to be represented by one or more delegates, viz: Austria, Australia, Belgium, Brazil, Bulgaria, United States of Colombia, Costa Rica, China, United States of America, Spain, France, Greece, Italy, Mexico, Monaco, Montenegro, Holland, Roumania, and Switzerland.

The delegation of the United States was as follows: Surg. Frank L. Pleadwell, U. S. Navy; Surg. H. D. Geddings, U. S. Public Health and Marine-Hospital Service; Dr. Wilmer R. Batt, state registrar of vital statistics of Pennsylvania; Prof. Walter F. Willcox, of Cornell University; Dr. William H. Guilfooy, registrar of records of the department of health of the city of New York, and Dr. Cressy L. Wilbur, chief statistician of the Bureau of the Census, Washington, D. C.

At a preliminary meeting of the delegation of the United States, which your representative was unable to attend, Surg. Frank L. Pleadwell, U. S. Navy, was chosen as the chairman of the delegation, and at the opening session Doctor Wilbur was announced as one of the vice-presidents.

Addresses of welcome were delivered by the president, Professor Netter, and the secretary-general, Dr. Jacques Bertillon.

The object of the commission was then explained at length by Doctor Bertillon, and the work of revision was at once proceeded with. Two sessions daily were held during the continuance of the meeting, and the transactions were marked by a spirit of entire harmony and good feeling, although, as was naturally to be expected,

there was a wide diversity of opinion upon the revision of many of the titles and rubrics.

It was noticeable, as the work of the commission progressed, that there was opposition to any subdivision of titles and multiplication of the number of rubrics, any proposition looking to either of these ends being almost universally voted down and in some instances the discussion on such propositions being apparently cut short.

Another feature worthy of notice was that in the arrangement of the classification of diseases and causes of death, it was the convenience of the statistician, rather than the ideas of the pathologist that was given chief consideration, but as the classification is intended primarily for the use of statisticians, this would seem to be justifiable.

After five sessions, a protocol of signature was prepared and signed by one delegate from each country on the afternoon of July 3, and immediately thereafter the commission adjourned.

The delegates were the recipients of numerous hospitalities, and among the invitations received was that to a lunch to the American delegation by the American ambassador at Paris, and one to a reception to the entire commission by the President of the French Republic and Madame Faillières, on Sunday, July 4, 1909.

### AMŒBIC DYSENTERY IN SAN FRANCISCO, CAL.

By H. W. Austin, Surgeon, United States Public Health and Marine-Hospital Service

Cases of amœbic dysentery are now frequently admitted to this hospital (Marine Hospital, San Francisco). The total number of such cases received from December 1, 1908, to August 9, 1909, was 55, 16 of which, it is believed, originated in California.

A thorough and careful examination was made in each case, and no case was recorded as amœbiasis until living motile amœbae were found in the stools on several different days, nor was it then recorded unless the patient had also the clinical symptoms of the disease. In one case operated on for appendicitis motile amœbae were found in the ulcerated appendix, and in several cases with liver abscess the motile amœbae were found in the abscess.

A careful investigation of the antecedents of each case was made, and it was found that of the 55 cases suffering from amœbiasis 16 had undoubtedly contracted the disease on the Pacific coast of the United States. I concur in the opinion of Passed Assistant Surgeon Long that the disease is undoubtedly spread here by the eating of fresh vegetables raised by Chinese truckmen, who fertilize the plants with human excreta, as is the custom in China and other oriental countries. The matter has been brought to the attention of the local health authorities, who, it is believed, will find means to exercise effective supervision over gardens where vegetables are raised for the market.

At a recent meeting of the San Francisco board of health, called to consider this matter, the following measures were decided upon:

1. Amœbic dysentery, or amœbiasis, to be declared an infectious disease, and all physicians and hospitals notified that cases coming to their knowledge must be reported to the board of health.

2. That a resolution be presented to the board of supervisors, urgently requesting the extension of the jail sewer to the city sewer, and also urging that the construction of Islais Creek sewer be hastened as rapidly as possible.

3. The health officer was directed to prepare an ordinance to present to the board of supervisors, making the use of human excrement and sewage for the irrigation or fertilization of vegetables a misdemeanor.

4. That as soon as possible sanitary inspectors be appointed to investigate the condition of vegetable gardens.

5. That samples of vegetables be collected and sent to Acting Assistant Surgeon Wherry, United States Public Health and Marine-Hospital Service, at the plague laboratory, Oakland, to determine whether or not amœbæ could be cultivated from them.

The practicability of licensing the sale of vegetables in the city, in order to maintain control over such gardens as were located outside of the city limits was discussed, but was left for another time.

The amœba has also been demonstrated by one of the hospital staff in several recent cases of dysentery occurring in this city in the practice of private physicians.

The usual treatment of cases at this hospital has been, first, large doses of ipecac given in salol-coated capsules; later high enemata of 1 to 1,000 quinine solution. Appendicostomy was performed in a few cases last year, but usually this operation is not found to be essential to successful treatment.

## UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

*Reports from San Francisco, Cal.—Plague-prevention work at San Francisco, Oakland, and Point Richmond.*

Surgeon Blue reports:

### SAN FRANCISCO, CAL.

Last case of human plague: Sickened, January 30, 1908.

Last case of rodent plague: October 23, 1908.

*Week ended September 4, 1909.*

## MILK EPIDEMIC OF TYPHOID FEVER.

*Report from Ithaca, N. Y.*

Doctor Crumm, health officer, reports, August 31:

During the 10 days ended August 31, 35 cases of typhoid fever, with 1 death, occurred at Ithaca. All the cases were due to infected milk on one route.

## STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES OF THE UNITED STATES—UNTABULATED.

CONNECTICUT.—Month of August, 1909. Reports to the state board of health from 158 towns having an aggregate population of 1,042,834 show as follows: Total number of deaths from all causes,

1,468, corresponding to an annual death rate of 16.8 per 1,000 of population, including measles 8, scarlet fever 5, diphtheria 9, whooping cough 20, enteric fever 29, and 105 from pulmonary tuberculosis. Cases: Measles, 103 in 25 towns; scarlet fever, 73 in 19 towns; diphtheria, 107 in 33 towns; whooping cough, 96 in 21 towns; enteric fever, 165 in 43 towns; and tuberculosis, 100 in 29 towns.

FLORIDA—*Pensacola*.—Month of August, 1909. Estimated population, 30,000. Total number of deaths, 25, including enteric fever 5, and 2 from tuberculosis.

ILLINOIS—*Quincy*.—Month of August, 1909. Estimated population, 43,000. Total number of deaths 55, including diphtheria 2, enteric fever 2, and 5 from tuberculosis. Cases: Not reported.

KENTUCKY—*Henderson*.—Month of August, 1909. Estimated population, 17,900. Total number of deaths, 21, including 2 from tuberculosis. Cases: Enteric fever 13, scarlet fever 1, whooping cough 1, and 2 from tuberculosis.

*Louisville*.—Month of August, 1909. Estimated population, 260,416. Total number of deaths, 291, corresponding to an annual death rate of 15.34 per 1,000 of population, including enteric fever 13, scarlet fever 3, diphtheria 1, and 43 from tuberculosis. Cases: Scarlet fever 13, enteric fever 45, and diphtheria 13.

MARYLAND—*Washington County*.—Month of August, 1909. Estimated population, 50,000. Total number of deaths, 82. Cases: Enteric fever 20, diphtheria 3, and whooping cough 2.

MINNESOTA.—Month of June, 1909. Estimated population, 1,979,658. Reports to the state board of health show as follows: Total number of deaths, 1,247, including diphtheria 36, enteric fever 21, scarlet fever 26, measles 4, whooping cough 16, smallpox 3, and 178 from tuberculosis. Deaths reported from state institutions during the month numbered 23, including 5 from tuberculosis.

NEW HAMPSHIRE—*Manchester*.—Month of August, 1909. Estimated population, 68,000. Total number of deaths, 123, corresponding to a monthly death rate of 1.79 per 1,000 of population, including diphtheria 2, enteric fever 1, and 10 from tuberculosis. Cases: Scarlet fever 4, measles 27, diphtheria 19, and enteric fever 2.

NEW YORK STATE.—Month of July, 1909. Estimated population, 8,699,643. Total number of deaths, 11,199, corresponding to an annual death rate of 15.4 per 1,000 of population, including enteric fever 85, measles 126, scarlet fever 65, whooping cough 94, diphtheria 127, and 1,327 from tuberculosis. Cases: Tuberculosis 2,638, diphtheria 1,126, scarlet fever 724, measles 2,695, smallpox 16, and enteric fever 474.

*Buffalo*.—Month of August, 1909. Estimated population, 352,387. Total number of deaths 525, including diphtheria 6, enteric fever 7,

measles 3, scarlet fever 4, whooping cough 3, and 37 from tuberculosis. Cases: Diphtheria 34, enteric fever 67, measles 22, scarlet fever 79, whooping cough 27, and tuberculosis 109.

*Ithaca*.—Month of August, 1909. Estimated population, 16,000. Total number of deaths not reported. One death from enteric fever reported. Cases: Enteric fever 35.

*Rome*.—Month of August, 1909. Census population, 15,343. Total number of deaths 42, including 2 from tuberculosis. Cases: Diphtheria 4, enteric fever 2, tuberculosis 2.

*Troy*.—Month of July, 1909. Estimated population, 77,650. Total number of deaths, 111, corresponding to an annual death rate of 14.06 per 1,000 of population, including whooping cough 2, and 14 from pulmonary tuberculosis. Cases: Enteric fever 2, diphtheria 5, whooping cough 4, and tuberculosis 12.

VIRGINIA—*Lynchburg*.—Month of August, 1909. Total number of deaths 25, including enteric fever 4, and 2 from tuberculosis. Cases: Not reported.

*Richmond*.—Month of August, 1909. Estimated population, 115,701 (white, 73,204; colored, 42,497). Total number of deaths 176 (white, 77; colored, 99), including enteric fever 4, and 20 (white, 3; colored, 17) from pulmonary tuberculosis. Cases: Diphtheria 6, enteric fever 61, measles 3, and whooping cough 11.

WASHINGTON—*Tacoma*.—Month of August, 1909. Estimated population, 120,000. Total number of deaths 68, including scarlet fever 1, diphtheria 2, and 10 from tuberculosis. Cases: Pulmonary tuberculosis 11, scarlet fever 19, enteric fever 15, and diphtheria 6.

*Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 26 to September 24, 1909.*

[For reports received from December 25, 1908, to June 25, 1909, see PUBLIC HEALTH REPORTS for June 25, 1909.]

## FOREIGN AND INSULAR.

---

### BARBADOS.

*Report from Bridgetown—Inspection and fumigation of vessels—Sanitary conditions.*

Acting Assistant Surgeon Urquhart reports, September 4:

Week ended September 4. Bills of health issued to 11 vessels, having a total of 152 passengers and 545 members of crews. Four vessels fumigated. Sanitary condition of vessels, cargoes, crews, and passengers good. Sanitary condition of the port and island good. No quarantinable disease reported.

### CHINA.

*Report from Amoy—Fumigation of vessel—Cholera and plague—Plague and smallpox in vicinity during month of July, 1909.*

Passed Assistant Surgeon Foster reports, August 9:

Week ended August 7. No bills of health issued. August 7, the British steamship *Taisang* was fumigated with sulphur dioxide gas to destroy rats. The fumigation was done while the vessel was empty and previous to loading cargo for Manila. During the week ended August 7 there were 51 deaths from plague and 15 from cholera in Amoy.

The following quarantinable diseases are reported from villages in the vicinity of Amoy for the month of July: In Kang Thau, 8 cases of plague with 3 deaths; in Eng Ta Thau, 11 cases of plague with 4 deaths, and 9 cases of smallpox with no deaths.

*Report from Hankow—Cholera.*

Consul Baugh reports, August 3:

Cholera is now present in the native city, but is not widely diffused.

*Report from Hongkong—Quarantine restrictions—Plague—Examination of emigrants—Inspection of vessels.*

Passed Assistant Surgeon McKeon reports, August 4:

Week ended July 31. Restrictions enforced by Hongkong remain as reported July 17; against Hongkong as reported July 17.

*Quarantinable disease.*—Plague 2 cases, 2 deaths.

*Aliens for Honolulu and Pacific coast ports.*—Examined, 554; rejected, 95.

*Aliens for Philippine Islands.*—Examined, 11; rejected, 0.

Vessels inspected, 10.

*Reports from Shanghai—Inspection of vessels—Cholera and smallpox—  
Cholera on steamship Hudson.*

Acting Assistant Surgeon Ransom reports, August 3 and 11:

Week ended July 31. One original and 2 supplemental bills of health issued to 3 steamships having an aggregate personnel of 437. There were inspected 2 steamships, 109 members of crews, 1 cabin passenger, and 8 steerage passengers. Manifests were viséed for 10,508 pieces of freight. The baggage of 3 steerage passengers, numbering 8 pieces, was disinfected. Four emigrants for San Francisco per steamship *China* were examined, of whom 3 were passed and 1 was recommended for rejection on account of trachoma.

The steamship *Hudson*, repairing in this port, and ultimately bound to New York, developed 3 cases of cholera among her crew, the first being the chief officer, whom I saw within 2 hours after he was attacked, and whom I had immediately removed to the isolation hospital. The second officer and the Chinese steward, who nursed the first case, were attacked by the disease in about 14 and 18 hours, respectively. All were immediately removed from the ship, the Chinaman by his friends, as is usually the case. The first case was taken ill on the morning of July 29, and died on the morning of July 31.

The exact origin of the outbreak is not determined. After the removal of the last case the ship was thoroughly disinfected, and the crew were removed temporarily to other quarters to undergo observation. The crew, including the officers, were bathed, and all effects were disinfected by steam, the articles being handled exclusively by the crew of the disinfecting hulk, who also gave the living quarters a preliminary disinfection with formaldehyde gas before the removal of the clothing, following it by a thorough scrubbing with carbolic acid solution after emptying, and a further fumigation with formalin. Especial attention was given to the water-closets. No further cases have developed. All the fresh water on board was boiled for 30 minutes by leading live steam into the tanks. All of this work I personally saw done.

Week ended August 7. Four supplemental and 2 original bills of health granted to 6 steamships, with an aggregate personnel of 1,275. There were bathed and disinfected by steam 88 members of crews, including 44 from the *Hudson*, and there were inspected 219 members of crews, 1 cabin passenger, and 22 steerage passengers. Manifests were viséed for 17,047 pieces of freight. There were disinfected by steam 378 pieces of baggage belonging to members of crews, including that of the *Hudson*, together with all textiles from the living quarters of the crew and officers. One ship was disinfected and 1 had her forecastles mechanically cleaned. There were also disinfected 2 pieces of baggage, the property of steerage passengers. Eight emigrants for San Francisco per steamship *Manchuria* were examined, of whom 2 were passed and 6 recommended for rejection on account of trachoma.

Cholera continues to be present among foreigners and natives, but not in epidemic form.

One death from smallpox among natives.

*Report from Swatow—Plague outbreak extinct—Summary of plague deaths.*

Consul Pontius reports, July 8:

The outbreak of plague in Swatow and vicinity is extinct. The total approximate number of deaths recorded was 2,500. In the city of Swatow only 2 or 3 deaths occurred. The outbreak at no time obtained a foothold in the city; precautionary measures were taken.

COSTA RICA.

*Report from Limon, fruit port—Stegomyia present.*

Acting Assistant Surgeon Goodman reports:

Week ended August 30. Estimated population 8,000. General sanitary condition of this port and the surrounding country during the week, good. Mosquitoes are few in number; *Anopheles* and *Stegomyia* are present.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected
Aug. 25	Abangarez .....	84	12	38	0
26	Greenbrier .....	46	1	0	0
26	Preston .....	30	0	0	0
27	Ellis .....	34	2	0	0

CUBA.

*Report from Cienfuegos—Inspection of vessels—Sanitary conditions.*

Acting Assistant Surgeon Suarez reports, September 6:

*Week ended September 4.*

Vessels inspected .....	4
Bills of health issued .....	4
Members of crews inspected .....	146
Immune certificates issued .....	2

Sanitary condition of city and port satisfactory; no quarantinable disease reported.

*Report from Habana—Inspection of vessels—House and water-deposit inspection.*

Passed Assistant Surgeon Amesse reports, September 14:

*Week ended September 11.*

Bills of health issued .....	24
Vessels inspected .....	19
Members of crew of outgoing vessels inspected .....	1, 147
Passengers of outgoing vessels inspected .....	608

No quarantinable disease reported in the island during the week.

For the period from September 1 to 10, the city health officer of Habana reports the following operations: 22,249 houses inspected, approximately two-thirds of all dwellings in the city; 13,039 collections of water petrolized by the mosquito brigades; 45,633 cans and bottles removed from private premises; 13,641 linear meters of ditching cleaned, and 6,184 square meters of public lands cleared of vegetation.

*Reports from Matanzas—Inspection of vessels—Sanitary conditions.*

Acting Assistant Surgeon Nuñez reports, September 7 and 13:

Week ended September 4. Bills of health issued to 2 vessels bound for United States ports.

The health of the city and surrounding country continues good. No quarantinable diseases reported.

Week ended September 11. Bills of health issued to 5 vessels clearing for United States ports in good sanitary condition.

*Report from Santiago—Inspection of vessels—House and water-deposit inspection.*

Acting Assistant Surgeon Wilson reports, September 8:

Week ended September 4. Bills of health issued to 7 vessels bound for the United States. No vessel disinfected.

No quarantinable disease reported.

The sanitary department reports 3,071 houses inspected, and larvæ found in 5 water deposits.

ECUADOR.

*Report from Guayaquil—Plague and smallpox—Vaccination—Fumigation of vessels.*

Passed Assistant Surgeon Lloyd reports, August 25:

During the month of July there were 23 new cases of plague in Guayaquil, with 11 deaths; for the same period there were 25 cases of yellow fever with 11 deaths. Nine vessels were fumigated during the month to kill rats and mosquitoes.

During the first 15 days of the month of August there were 12 cases with 3 deaths and 6 cases with 4 deaths from plague and yellow fever, respectively; 16 cases of plague and 2 of yellow fever remain under treatment; 2 vessels were fumigated.

No cases of plague have been reported from other points in the Republic. Four cases of smallpox occurred on a ranch about 10 miles from Guayaquil, the contagion being clearly traced to a place down the coast. One man on this ranch escaped vaccination in rounding up the laborers and later developed the disease and died. A mild case occurred in Guayaquil August 10, and was promptly isolated and vaccination of contacts was enforced. Smallpox is epidemic in Ensenada and vicinity (near Santa Elena) and vaccination is being enforced.

## GUATEMALA.

*Report from Puerto Barrios, fruit port—Stegomyia calopus present.*

Acting Assistant Surgeon Ames reports as follows:

Week ended September 4. Present officially estimated population, 350. General sanitary condition of this port and the surrounding country during the week, good. *Stegomyia calopus* present.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
Aug. 30	Parismina .....	New Orleans via Belize....	77	28	3
Sept. 1	Belize.....	Mobile via Belize.....	18	0	0
3	Belvernion .....	New Orleans via Belize....	23	0	5

Temperature taken of all persons on above-named vessels day of sailing.

## HAWAII.

*Report from Honolulu—Dates of last cases of human and rat plague—Examination of rats for plague infection.*

Chief Quarantine Officer Hobdy reports, August 30:

## HONOLULU.

Last case rat plague (Aiea), 9 miles from Honolulu, August 22, 1907.

Last case human plague, Honolulu, July 17, 1907.

Last case rat plague, Hilo, July 22, 1909.

Last case human plague (Olaa), 9 miles from Hilo, August 22, 1909.

*Week ended August 28.*

*Smallpox in Naples.*—During the week ended August 29, 17 cases of smallpox with 3 deaths were reported at the health office of the city of Naples.

*Typhus fever in Naples.*—During the week ended August 29, 2 cases of typhus fever and 1 death were reported at the health office of the city of Naples.

#### JAPAN.

##### *Report from Yokohama—Examination of emigrants.*

Passed Assistant Surgeon Cumming reports:

Number of emigrants per steamship *China*, August 7: For San Francisco via Honolulu, held for observation, 2.

Per steamship *Manchuria*, August 12: For Honolulu, held for observation, 1; for San Francisco, held for observation, 1.

Per steamship *Chiyo Maru*, August 18: For Honolulu, held for observation, 4; for San Francisco, 2.

Per steamship *Minnesota*, August 19: For Seattle, rejected, 3; held for observation, 4.

##### *Report from Kobe—Inspection of vessels—Examination of emigrants—Dysentery in Kagawa prefecture.*

Acting Assistant Surgeon Knight reports, August 18:

Week ended August 14. Supplemental bills of health granted to 6 steamships, and 1 original bill of health to 1 steamship.

There were inspected 234 members of crews and 792 steerage passengers, and 54 members of crews and 54 steerage passengers were bathed and disinfected; their effects were disinfected by steam. The number of pieces of baggage steamed was 258 and bedding 104. Manifests were viséed for 40,802 pieces of freight, amounting to 4,300 tons.

Emigrants examined: Per steamship *Manchuria* for Honolulu, passed 18, recommended for rejection, 18; for San Francisco, passed 4, recommended for rejection, 1; *Minnesota* for Seattle, passed 20, recommended for rejection, 18.

The emigrants passed, together with 10 Austro-Hungarian steerage passengers to Seattle by the steamship *Minnesota*, were inspected, bathed and disinfected, and their effects were disinfected before embarkation.

There were reported 654 cases of dysentery and 7 cases of cholera at Kagawa prefecture. New cases are appearing daily. Kagawa prefecture is situated about 100 miles south of Kobe.

##### *Plague at Kobe.*

The following information is received from the Department of State, under date of September 14:

The department is in receipt of a telegram from the American consul at Kobe, Japan, dated September 13, reading: "Plague Kobe."

## JAVA.

*Report from Batavia—Cholera.*

The following is received from the Department of State, under date of September 21:

American Consul-General at Batavia cables "Cholera."

## MEXICO.

*Report from the superior board of health of Mexico—Yellow fever in Yucatan.*

In compliance with articles 1 and 2 of the International Sanitary Convention held at Washington, October 14, 1905, the president of the superior board of health of Mexico reports, September 13, that for the week ended September 11, 2 cases of yellow fever were registered at the plantations of Chinkala and Tekik, in the district of Acanceh, Yucatan, and that prophylactic measures against the disease continue to be carried out.

*Reports from Coatzacoalcos—Inspection and fumigation of vessels—Mosquitoes.*

Acting Assistant Surgeon Thompson reports, September 2 and 9:

Week ended September 1. Five vessels inspected. Of this number 3 were fumigated.

Week ended September 8. Five vessels inspected; 1 vessel fumigated.

Mosquitoes are numerous.

*Reports from Progreso—Inspection and fumigation of vessels—Yellow fever at Merida.*

Acting Assistant Surgeon Harrison reports, September 11:

*Week ended September 4.*

Vessels dispatched.....	4
Vessels fumigated.....	1
Members of crews.....	126
Passengers from this port.....	11

Sanitary conditions remained without important change in Progreso, but in Merida yellow fever continued.

*Week ended September 11.*

Vessels dispatched.....	7
Vessels fumigated.....	3
Members of crews.....	298
Number of passengers from this port.....	16

Sanitary conditions showed no change. In Merida there were reported, September 10, 2 new cases of yellow fever. The patients are Koreans from a small town near the city.

*Report from Salina Cruz—Inspection and fumigation of vessels.*

Acting Assistant Surgeon Gochicoa reports, September 1:

Period from August 16 to 31, inclusive. Two vessels fumigated.

*Report from Tampico—Inspection and fumigation of vessels—Sanitary conditions.*

Acting Assistant Surgeon Stowe reports, September 9:

*Week ended September 8.*

Vessels inspected and passed.....	9
Bills of health issued.....	9
Members of crews of outgoing vessels inspected.....	280
Passengers of outgoing vessels inspected.....	11
Vessels fumigated prior to sailing.....	5

No cases of quarantinable disease occurred during the week. Sanitary condition of port and surrounding country, good. Mosquitoes are abundant.

*Reports from Veracruz—Inspection and fumigation of vessels—Small-pox—Inspection of passengers from Merida—Sanitary work, month of August, 1909.*

Acting Assistant Surgeon Carter reports, September 5:

*Week ended September 5.*

Bills of health issued.....	8
Vessels fumigated.....	5
Vessels inspected.....	3
Passengers inspected.....	201
Members of crews inspected.....	398

Sanitary conditions at Veracruz remain good. Two cases of small-pox with 1 death were reported during the week. These cases were removed to the lazaretto and all precautions were taken.

A close inspection of passengers from Merida is made before landing, with a daily inspection while in Veracruz for 6 days if they remain that length of time in the city. If they leave the city a train inspection is carried out. There is very little increase of mosquitoes.

*Sanitary work done during the month of August, 1909.*

The following report is received from the chief of the sanitary department of Veracruz.:

*Month of August, 1909.*

Visits made to nonimmunes.....	36,427
schools.....	282
factories.....	472
stores.....	262
Nonimmunes entering the city.....	1,877
leaving the city.....	1,766
Houses fumigated.....	30
Deposits of water oiled.....	2,782
destroyed.....	7,815
Liters of petroleum used.....	4,683
Houses cleaned.....	7
Notices sent to house owners.....	9
Passengers inspected on trains.....	9,325
Suspects sent to hospital for observation.....	17

## NETHERLANDS.

*Report from Rotterdam—Inspection of vessels—Status of cholera at Rotterdam—Cholera in other localities.*

Assistant Surgeon Wollenberg reports, September 6:

Week ended September 4. Bills of health were issued to the following vessels: September 2, steamship *Cheyenne* in water ballast for New York; steamship *Zeeburg* with cargo for Jacksonville and Savannah; September 4, steamship *Ryndam* with passengers and cargo for New York; steamship *Napolitan Prince* with passengers and cargo for New York.

No emigrants from Rotterdam have been embarked. All Russians have been under 5 days' observation. All baggage has been disinfected. Crews have been inspected on deck, after being held on board as much as possible, and effects disinfected as necessary. Extra ship surgeons were engaged for both the *Ryndam* and the *Napolitan Prince*, in conformity with the United States quarantine regulations.

*Status of cholera in Holland.*

*Rotterdam.*—The law requires every person to report any case of illness suspicious of being cholera which he may note. Failure is punishable with imprisonment of from 1 day to 1 year. The people are very watchful, and the sanitary authorities are receiving many calls from all over the city. Positive cholera cases are appearing in less numbers from day to day. Filtered water from tanktugs is being supplied to bargemen, and boiling of all water for personal use is quite generally carried out. During the week there has been a total of 20 new cases of cholera with 8 deaths, making a total since August 20 of 34 cases with 14 deaths. There remain in the barracks 16 patients. The situation is improving very rapidly.

*General.*—Positive cases of cholera have been reported during the week at Uithorn, Breda, Gorinchem, Utrecht, Tholen, Middelburg, and Vlaardinger. There have been 7 cases with 5 deaths. All occurred among bargemen directly from Rotterdam. In some places the canal water has been rendered unfit for drinking by the addition of petroleum. All army maneuvers have been stopped.

*Rotterdam free from cholera—Cholera at Amsterdam and Dirksland.*

The following information is received from the Department of State, under dates of September 15 and 18:

September 15. A telegram of September 14 has been received from the American minister at The Hague, reading:

I am officially informed by the minister for foreign affairs that no case of cholera has appeared at Rotterdam since September 4, and no cholera death since September 8, and that under the treaty Rotterdam can no longer be considered infected.

September 18. The Dutch minister to the United States informs the Secretary of State that the last cases of cholera in the Netherlands occurred September 10, one at Dirksland and one at Amsterdam. Since that date no cases have occurred.

Dirksland is a village situated 20 miles southwest of Rotterdam, in the Rhine-Meuse delta.

## NICARAGUA.

*Report from Bluefields, fruit port—Stegomyia calopus abundant.*

Acting Assistant Surgeon Layton reports:

Week ended September 2. Present officially estimated population, 2,500. General sanitary condition of this port and the surrounding country during the week, good. *Stegomyia calopus* are abundant.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
Aug. 29	Imperator.....	New Orleans.....	21	4	1
31	Tacoma.....	Puerto Cortez.....	294	0	0

Temperature of all on board of steamship *Imperator* taken day of sailing.

## PERU.

*Report from Callao—Inspection of vessels—Smallpox at Mollendo—Plague in Chile.*

Acting Assistant Surgeon Gutierrez reports, August 30:

Week ended August 28. Four steamships, with an aggregate personnel of 313 crew and 91 cabin and 145 steerage passengers, dispatched. Three of these vessels were fumigated prior to sailing. No cases of plague have occurred at Callao since August 7. At Mollendo there are many cases of smallpox, and the sanitary authorities are vaccinating.

Bills of health report plague in Chile at Iquique, August 22, with 4 cases isolated in the lazaretto.

## PHILIPPINE ISLANDS.

*Reports from Manila—Cholera and smallpox in Manila—Status of cholera in the provinces—Inspection of vessels.*

Chief Quarantine Officer Heiser reports, August 3 and 12:

Week ended July 31. One case of cholera with one death and 1 case of smallpox were reported for the city of Manila.

*Cholera in the provinces.*

Province.	Cases.	Deaths.
Bulacan.....	4	4
Oriental Negros.....	21	6

No plague has been reported in Caracas since August 16. One death from yellow fever was reported in Maiquetia, a suburb of La Guaira, August 15, and a second death in the same house August 25.

## ZANZIBAR.

*Reports from Zanzibar—Examination of rats for plague infection.*

Consul Vining reports, July 31 and August 9:

Week ended July 31. Number of rats received, 1,858; examined, 1,858; no plague infection found.

Week ended August 7. Rats received, 1,274; examined, 1,274; no plague infection found.

## FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

ARGENTINA—*Buenos Aires*.—Month of May, 1909. Estimated population, 1,203,050. Total number of deaths, 1,548, including diphtheria 6, enteric fever 22, scarlet fever 3, smallpox 6, and 173 from tuberculosis.

AUSTRALIA—*Fremantle*.—Months of January and February, 1909. Estimated population, 261,563. Total number of deaths, 180,

including diphtheria 4, enteric fever 12, and measles 2. Months of March, April, May, and June, 1909. Total number of deaths, 395, including diphtheria 7, enteric fever 16, and measles 3.

**BRAZIL—Ceara.**—Month of July, 1909. Estimated population, 55,000. Total number of deaths, 116, including enteric fever 9, whooping cough 2, and 19 from tuberculosis.

**CANADA—Sherbrooke.**—Month of August, 1909. Estimated population, 15,300. Total number of deaths, 26, including 5 from tuberculosis.

**EGYPT—Alexandria.**—Month of May, 1909. Estimated population, 420,000. Total number of deaths 1,284, including diphtheria 16, enteric fever 18, measles 74, scarlet fever 55, typhus fever 2, smallpox 2, plague 1, and 78 from tuberculosis.

Month of June, 1909. Total number of deaths, 1,328, including diphtheria 10, enteric fever 23, measles 130, scarlet fever 9, typhus fever 2, plague 1, and 90 from tuberculosis.

Month of July, 1909. Total number of deaths 1,327, including diphtheria 10, enteric fever 25, measles 28, scarlet fever 7, typhus fever 1, plague 7, and 85 from tuberculosis.

**FRANCE—Toulon.**—Month of August, 1909. Estimated population, 110,000. Total number of deaths 150, including measles 3, and 15 from tuberculosis.

*St. Etienne.*—Two weeks ended August 15, 1909. Estimated population, 150,000. Total number of deaths, 114, including diphtheria 3, scarlet fever 1, and 18 from tuberculosis.

**GREAT BRITAIN—England and Wales.**—The deaths registered in 76 great towns in England and Wales during the week ended August 21, 1909, correspond to an annual rate of 11.8 per 1,000 population, which is estimated at 16,445,281.

*London.*—One thousand and twenty-seven deaths were registered during the week, including measles 17, scarlet fever 7, diphtheria 6, whooping cough 13, tuberculosis 129, enteric fever 4, and 39 from diarrhea. The deaths from all causes correspond to an annual rate of 11.1 per 1,000. In Greater London 1,420 deaths were registered. In the "outer ring" the deaths included 4 from measles, 1 from scarlet fever, 8 from diphtheria, and 3 from whooping cough.

*Ireland.*—The average annual death rate represented by the deaths registered during the week ended August 21, 1909, in the 21 principal town districts of Ireland was 16.2 per 1,000 of the population, which is estimated at 1,142,308. The lowest rate was recorded in Ballymena viz, 4.8, and the highest in Portadown, viz, 25.8 per 1,000.

*Scotland.*—The deaths registered in 8 principal towns during the week ended August 21, 1909, correspond to an annual rate of 12.0 per 1,000 of the population, which is estimated at 1,839,038. The highest rate of mortality was recorded in Perth, viz, 10.1, and the lowest in

Greenock, viz, 10.1 per 1,000. The aggregate number of deaths registered from all causes was 428, including diphtheria 10, enteric fever 1, measles 7, scarlet fever 4, and 9 from whooping cough.

INDIA—*Rangoon*.—Month of June, 1909. Estimated population, 295,803. Total number of deaths, 835, including enteric fever 1, measles 2, smallpox 10, plague 116, and 18 from tuberculosis.

ITALY—*Genoa*.—Month of August, 1909. Estimated population, 279,163. Total number of deaths, 212, including enteric fever 11, and 17 from tuberculosis.

RUSSIA—*Riga*.—Month of June, 1909. Estimated population, 350,000. Total number of deaths, 624, including diphtheria 9, enteric fever 3, measles 11, scarlet fever 30, whooping cough 1, smallpox 12, cholera 4, and 64 from tuberculosis.

SOCIETY ISLANDS—*Tahiti*.—Five weeks ended August 20, 1909. Estimated population, 4,000. Total number of deaths, 7, including 1 from enteric fever.

SOUTH AFRICA—*Lourenço Marquez*.—Month of July, 1909. Estimated population, 10,000. Total number of deaths, 37, including 4 from tuberculosis.

SPAIN—*Huelva*.—Month of July, 1909. Estimated population, 24,000. Total number of deaths, 86, including diphtheria 2, enteric fever 2, measles 1, smallpox 13, and 12 from tuberculosis.

URUGUAY—*Montevideo*.—Month of June, 1909. Estimated population, 317,209. Total number of deaths, 534, including diphtheria 2, enteric fever 8, scarlet fever 24, smallpox 5, and 74 from tuberculosis.

*Cholera, yellow fever, plague, and smallpox, from June 26 to September 24, 1909.*

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State and from other sources.]

[For reports received from December 25, 1908, to June 25, 1909, see PUBLIC HEALTH REPORTS for June 25, 1909.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

Indiana:				
Fort Wayne.....	Sept. 4-11.....	3		
Louisiana:				
New Orleans.....	Aug. 28-Sept. 4.....	1		
Missouri:				
St. Louis.....	Sept. 4-11.....	1		
Ohio:				
Dayton.....	do.....	5		

## SMALLPOX—INSULAR.

Philippine Islands:				
Manila.....	July 24-31.....	1		

## SMALLPOX—FOREIGN.

	Date.	Cases.	Deaths.	Remarks.
Brazil:				
Pernambuco.....	July 1-31.....		27	
Chile:				
Valparaiso.....	Aug. 14-21.....			Present.
China:				
Amoy.....	July 1-31.....	9		Vicinity.
Newchwang.....	July 31-Aug. 14.....	2	1	
Shanghai.....	July 31-Aug. 7.....		1	
Ecuador:				
Ensenada.....	Aug. 10.....			Epidemic.
Guayaquil.....	July 1-31.....	4	1	In vicinity.
France:				
Paris.....	Aug. 14-21.....		1	
India:				
Calcutta.....	July 31-Aug. 7.....		2	
Rangoon.....	.....do.....		2	
Italy:				
Naples.....	Aug. 22-29.....	17	3	
Java:				
Batavia.....	July 31-Aug. 7.....	1		
Mexico:				
Monterey.....	Aug. 29-Sept. 5.....		1	
Veracruz.....	.....do.....	2	1	
Peru:				
Mollendo.....	Aug. 30.....			Present.
Portugal:				
Lisbon.....	Aug. 21-28.....	14		
Russia:				
Moscow.....	Aug. 14-21.....	3	2	
Odessa.....	Aug. 7-21.....	14	5	
Riga.....	Aug. 21-28.....	9		
St. Petersburg.....	Aug. 7-21.....	40	11	
Warsaw.....	July 10-17.....		1	
Spain:				
Barcelona.....	Aug. 21-28.....		6	
Vigo.....	Aug. 14-28.....			Do.
Turkey:				
Bagdad.....	July 17-Aug. 4.....			Do.

## YELLOW FEVER.

Brazil:				
Manaos.....	July 7-14.....		2	
Para.....	Aug. 14-28.....	9	9	
Pernambuco.....	July 1-31.....		2	
Ecuador:				
Guayaquil.....	Aug. 14-21.....		3	
Mexico:				
Merida.....	Sept. 3-10.....	2		In vicinity.
Venezuela:				
Maiquetia.....	Aug. 25.....	1		Vicinity of La Guaira.

## CHOLERA—INSULAR.

Philippine Islands:				
Manila.....	July 24-31.....	1	1	
Provinces.....	July 24-Aug. 7.....	278	191	

## CHOLERA—FOREIGN.

	Date.	Cases.	Deaths.	Remarks.
China:				
Amoy.....	July 31-Aug. 7.....	.....	15	Present. Do.
Hankau.....	Aug. 3.....	.....	.....	
Shanghai.....	Aug. 3-11.....	.....	.....	
India:				
Calcutta.....	July 31-Aug. 7.....	.....	7	
Madras.....	Aug. 7-13.....	.....	1	
Rangoon.....	July 31-Aug. 7.....	.....	3	
Manchuria:				
Dalny.....	Aug. 7-14.....	1	.....	On steamship Kobe Maru.
Netherlands:				
Amsterdam.....	Sept. 10.....	1	.....	
Dirksland.....	do.....	1	.....	
Middelburg.....	Aug. 28-Sept. 4.....	1	.....	
Rotterdam.....	Aug. 20-Sept. 4.....	34	14	
Tholen.....	Aug. 28-Sept. 4.....	1	.....	
Utrecht.....	do.....	1	.....	
Vlaardingen.....	do.....	1	.....	
Russia, general.....	Aug. 21-28.....	573	243	
Moscow.....	Aug. 14-21.....	1	1	
Riga.....	Aug. 21-28.....	17	8	
St. Petersburg.....	Aug. 22-29.....	180	64	
Sweden:				
Stockholm.....	Aug. 12.....	1	.....	Imported.

## PLAGUE.

Chile:				
Iquique.....	Aug. 22.....	4	.....	In lazaretto.
China:				
Amoy.....	July 31-Aug. 7.....	.....	51	
In vicinity.....	July 1-31.....	19	7	
Hongkong.....	July 24-31.....	2	2	
Ecuador:				
Guayaquil.....	Aug. 14-21.....	.....	5	
Egypt, general.....	July 29-Aug. 5.....	9	2	
Alexandria.....	Aug. 5.....	1	.....	
India, general.....	July 31-Aug. 7.....	1, 287	938	
Calcutta.....	do.....	.....	15	
Rangoon.....	do.....	.....	29	
Japan:
