

PUBLIC HEALTH REPORTS

VOL. XXVI.

MAY 19, 1911.

No. 20

ANTITYPHOID VACCINATION FOR BENEFICIARIES OF THE PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

To aid in the prevention of typhoid fever, the officers of the Public Health and Marine-Hospital Service have been instructed to offer antityphoid vaccination to the beneficiaries of the service.

The beneficiaries are those employed on board in the care, preservation, or navigation of any registered, enrolled, or licensed vessel of the United States or in the service on board of those so engaged, the officers and crews of the Revenue-Cutter Service, the officers and crews of the Lighthouse Establishment, seamen employed on the vessels of the Mississippi River Commission, seamen employed on the vessels of the Engineer Corps of the Army, keepers and crews of the United States Life-Saving Service, officers and seamen on vessels of the Coast and Geodetic Survey, and seamen employed on United States Army transports or other vessels belonging to the Quartermaster's Department when not enlisted men of the Army.

The circular of instruction follows:

[Bureau circular letter No. 2.]

ANTITYPHOID VACCINATION TO BE OFFERED TO BENEFICIARIES OF THE SERVICE.

TREASURY DEPARTMENT,
BUREAU OF PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE,
Washington, May 5, 1911.

Commissioned medical officers and others concerned:

Experience has shown that the use of antityphoid vaccine affords protection against attacks of typhoid fever, and that the incidence of the disease, particularly among troops, is reduced as a result of its use. It appears advisable, therefore, to render this prophylactic agent available to beneficiaries of the service. Officers are accordingly directed to offer antityphoid vaccination whenever practicable to such beneficiaries, and authorized to administer antityphoid vaccine to those desiring to avail themselves of this privilege. Although the taking of the treatment will be voluntary, some beneficiaries will undoubtedly take advantage of this offer, and by so doing protect not only the traveling public which they serve, but the general public whose water supplies they are liable to infect.

The necessary antityphoid vaccine may be purchased under exigency.

You are directed to acknowledge the receipt of this letter, and in addition render special reports at the end of each fiscal year, giving number of persons who have received preventive inoculations and other pertinent data relative thereto.

WALTER WYMAN, *Surgeon General.*

UNITED STATES.

MUNICIPAL ORDINANCES, RULES, AND REGULATIONS PERTAINING TO PUBLIC HYGIENE.

SPRINGFIELD, MASS.

INFECTIOUS DISEASES—NOTIFICATION, PLACARDING, ISOLATION, DISINFECTION.

RULE 1. The following diseases, having been declared by the State board of health to be dangerous to the public health, must be reported immediately to the local board of health upon blanks provided for that purpose. The report, personally signed by the physician in charge of the case, shall state the name, age, and sex of the patient, the disease, duration of the illness, and the exact location of the house or room occupied by the patient: Actinomycosis, Asiatic cholera, chickenpox, diphtheria (membranous croup), glanders, leprosy, malignant pustule, measles (German measles), ophthalmia neonatorum, cerebro-spinal meningitis, scarlet fever (scarlatina), smallpox, tetanus, trachoma, trichinosis, tuberculosis, typhoid fever, typhus fever, whooping cough, yellow fever, anterior poliomyelitis.

Failure to comply with this rule involves a fine of not less than \$50 for each offense. (Sec. 50, chap. 75, revised laws.)

RULE 2. Upon receipt by the board of health of the report of the existence of any of the following diseases a warning placard shall be placed upon or near all entrances of the house or apartment where the case is located. Such placards shall only be removed by a representative of the board of health, and any person removing, destroying, or defacing the same shall be liable to a fine of not less than \$10: Asiatic cholera, cerebro-spinal meningitis, diphtheria (membranous croup), glanders, leprosy, malignant pustule, scarlet fever, smallpox, typhus fever, yellow fever, anterior poliomyelitis.

No person except the attending physician and necessary caretakers shall enter any apartment where a person is sick with any of the diseases mentioned in this rule until the warning placard has been removed.

RULE 3. When in the opinion of the board of health circumstances demand it, such premises in addition to being placarded may be placed under the constant supervision of the officers of the law, who shall, under the direction of the board of health, prevent the entrance or exit of any person or the removal of any articles from the house while under quarantine.

RULE 4. Premises in which are located any of the following diseases will not be placarded or quarantined unless, in the opinion of the board of health, the conditions are such as to require it for the protection of the public health: Actinomycosis, chickenpox, measles, ophthalmia neonatorum, tetanus, trachoma, trichinosis, tuberculosis, typhoid fever, whooping cough.

RULE 5. All cases of contagious disease shall be isolated and separated from the rest of the family to the satisfaction of the board of health and such isolation shall be maintained until the patient is declared by the board of health to be free from danger of infecting other persons.

RULE 6. In the event that any case of diphtheria, scarlet fever, or other disease dangerous to the public health can not be properly isolated, the board of health may cause such patient to be removed to a hospital provided it can be done without danger to his health.

RULE 7. No person sick with any disease dangerous to the public health as mentioned in rule 2 shall be removed at any time except by permission of the board of health. No person suffering from said diseases shall enter any form of public conveyance in the city of Springfield.

RULE 8. Upon the removal to a hospital or other place, or upon the discharge by recovery or death of the patient suffering from any of the following diseases, the premises where said disease existed, together with all bedding, clothing, furniture, or other

articles exposed to infection, shall be disinfected by the board of health: Cerebrospinal meningitis, cholera, diphtheria, glanders, leprosy, scarlet fever, smallpox, tuberculosis, typhoid fever, typhus fever, yellow fever, anterior poliomyelitis.

RULE 9. No person shall knowingly let or lease any room, house, or apartment in which there has been a patient suffering from the diseases mentioned in rule 1 without having had such house, room, or apartment, and all articles therein liable to infection, previously disinfected to the satisfaction of the board of health. This rule applies to the renting of rooms in hotels, lodging houses, or other apartments.

RULE 10. No furniture, wearing apparel, or other articles exposed to the infection from diseases mentioned as dangerous to the public health (rule 1) shall be removed, sold, or given away without having been thoroughly disinfected.

RULE 11. No child or other person suffering or convalescent from any of the diseases mentioned in rule 1 shall be permitted to attend any public, private, parochial, Sunday, or other school in the city of Springfield without a written permit from the board of health.

RULE 12. Children affected with ringworm, scabies, or impetigo contagiosa will be excluded from school by the medical inspectors of schools until such time as the disease is cured or shows evidence of such treatment as not to be liable to cause infection of other children. Cases so excluded shall only be readmitted upon the written approval of the medical inspector.

RULE 13. All children or other persons exposed to the infection of the following diseases shall be excluded from school for the following periods dated from the latest exposure to such infection:

Anterior poliomyelitis, 14 days.
Chicken pox, 14 days.
Diphtheria, 8 days.
Measles, 14 days.

Mumps, 14 days.
Scarlet fever, 8 days.
Whooping cough, 14 days.

RULE 14. The minimum periods of isolation for the diseases mentioned in rule 13 shall be as follows, reckoned from the date of notification given to the board of health:

- (a) Chicken pox, 15 days and thereafter until all scabs have fallen off.
- (b) Diphtheria, 15 days and thereafter until two successive negative cultures have been obtained from the site of the disease, secured at least 24 hours apart. When the attending physician has secured a negative culture for release the procuring of subsequent cultures and final discharge of the patient shall be under the direction of the board of health.
- (c) Measles, 21 days and thereafter until all catarrhal symptoms have ceased.
- (d) Mumps, 21 days and thereafter until all glandular swelling has disappeared.
- (e) Scarlet fever, 42 days and thereafter until desquamation is complete and all discharges from mucous membranes have stopped.
- (f) Whooping cough, 35 days and thereafter until all spasmodic cough and whooping have ceased.

Anterior poliomyelitis, 28 days. [Regulation board of health as amended June 29 and July 27, 1910.]

LYNCHBURG, VA.

DRY CLOSETS—CONSTRUCTION OF.

SECTION 1.—Concerning the construction of privies which may hereafter be constructed in the city of Lynchburg.

(1) *Size and dimensions.*—No privy house shall be constructed of less than the following dimensions, inside measurements: Seven and one-half feet in height, 4 feet in width (from side to side), and 3½ feet in depth (front to rear).

(2) *Material.*—All privies shall be constructed of good quality, dressed, tongue-and-groove ceiling, not less than seven-eighths of an inch in thickness, and no board shall be over 6 inches in width. It is recommended that the house be painted.

(3) *Location on premises.*—All privies shall be so located on the premises as to be readily accessible to the city scavengers.

(4) *Floor.*—The bottom frame of the house shall be not less than 3 by 4 inch heart sills, and the floor shall be of heart pine, tongue-and-groove flooring, laid on that portion of the framework outside of the seat; or the floor, outside of the seat, may be of concrete.

(5) *Roof.*—The roof shall be covered with tin or other water-tight metal material, and shall be painted. If the roof slopes to the rear of the house, it shall project not less than 6 inches beyond the rear wall of the house.

(6) *Door*.—The door shall be of sufficient size, well jointed, and tight fitting, and shall be self-closing.

(7) *Windows*.—For light and ventilation there shall be, near the top of the house, at least one opening, not less than 2 square feet, which shall be covered with wire "fly screening." This opening shall also be provided with a sliding sash.

(8) *Seat*.—The riser for the seat shall be 18 inches in height. The seat shall be provided with a substantial, tight, wood cover, hinged to the back of the house and of sufficient size to cover the opening or openings in the seat.

(9) *Box*.—The night-soil box shall be of 1-inch heart pine and shall be substantially constructed. It shall be of not less than the following dimensions, inside measurements: Forty-two inches in length, 14 inches in width, and 12 inches in depth. Each end of the box shall rest on a cleat dressed on the upper surface and nailed to the bottom framework of the house, so that the box can be easily removed. The box shall clear the sides of the house by 2 inches at each end.

(10) *Box opening*.—The opening for the removal of the night-soil box shall be at the rear of the house. Where practicable, the opening shall abut on a public alley, so that the scavenger may remove the night soil without entering the premises. The opening shall be provided with a tight-fitting let-down, board cover, hinged to the house, and so constructed as to prevent the access of flies to the night soil. This cover shall be provided with a hook or button and shall always be kept closed. For the purpose of ventilation there shall be at each end of the house and immediately over the box an opening not less than 6 inches square. This opening shall be covered with wire "fly-screen" gauze.

(11) Whenever it may be deemed necessary by the health officer, on account of the number of persons living on any premises or in case of public or semipublic places, on account of the number of persons having access to any privy, that there should be on said premises a closet house and box of larger dimensions than above specified, the health officer shall order a house and box of such size and dimensions as he may deem necessary to meet the requirements of the case.

SECTION 2.—Concerning the construction of privies in existence in the city of Lynchburg prior to the adoption of the above rules.

(1) In the case of existing privies which are not in accordance with the above rules, the owner of the property shall not be required to reconstruct the privy, unless in the opinion of the health officer said privy is a menace to health, but all privies shall comply with the following minimum requirements:

(2) (a) The roof shall be water tight and shall not discharge rain water into the night-soil box.

(b) The house shall be without openings or cracks through which flies may enter. It shall be provided with a tight, self-closing door. It shall have an opening or openings for light and ventilation, which opening or openings shall be screened for the exclusion of flies.

(c) The seat shall have a hinged cover of sufficient size to completely cover the opening or openings in the seat.

(d) There shall be a tightly fitting, let-down, hinged cover, with spring, to drive back in place over the box opening for the exclusion of flies.

(e) The box shall be of tight construction and shall not project beyond the house.

(3) Failure to meet any of the above minimum requirements is hereby declared to constitute a public nuisance and a menace to the public health.

(4) All alterations or repairs which shall hereafter be made on any privy in the city of Lynchburg shall be made in accordance with the requirements under section 1, and whenever it shall become necessary to entirely reconstruct or to change the location of any existing privy, the new privy shall be constructed throughout in conformity with said requirements.

(5) Whenever, in the opinion of the health officer, the condition of any privy is such that it can not be put in sanitary condition, the health officer shall order a new privy constructed throughout in conformity with section 1.

(6) These rules and regulations apply only to property for which no sewer is available. When a sewer is available, connection must be made with the same and proper water-closet must be installed, the old privy being removed at once.

SECTION 3.

Every violation of any provision of this ordinance shall be punished by a fine of \$5, and each day that the offense continues, after written notice from the board of health, shall be regarded as a separate offense.

SECTION 4.

All ordinances or parts of ordinances in conflict with the above are hereby repealed. [Ordinance adopted Dec. 12, 1910.]

PERTH AMBOY, N. J.**BARBER SHOPS—REGULATION OF.**

(1) All persons or person having, owning, keeping, letting, or conducting a barber's shop in the city of Perth Amboy shall on or before the 1st day of May, 1910, and annually hereafter, procure a permit from the board of health of the city of Perth Amboy, for which permit the sum of \$1 shall be paid.

(2) Every barber's shop in the city of Perth Amboy shall be open at all times for inspection by the board of health.

(3) All who are engaged in the business of haircutting and shaving shall be governed by the following rules, which must be strictly adhered to:

RULE 1.—All barbers' shops shall be kept in a clean and sanitary condition.

RULE 2.—Floors must be kept free from hair and swept or mopped every day, and all furniture and fixtures kept free from dust.

RULE 3.—All combs, razors, mugs, scissors, clippers, hair brushes, shaving brushes, and other tools and appliances shall be sterilized after use on each person by immersion in boiling water or in alcohol of at least 60 per cent strength.

RULE 4.—Clean towels shall be used for each person.

RULE 5.—Towels shall not be dipped in warm water tanks.

RULE 6.—Running hot and cold water must be provided in every barber's shop.

RULE 7.—The use of powder puffs and sponges is prohibited.

RULE 8.—Barbers must thoroughly cleanse their hands immediately before attending each person.

RULE 9.—No alum or other astringent shall be used in stick form; if used at all, it must be in powder form.

RULE 10.—No barber shop shall be used as a dormitory.

(4) On and after May 1, 1910, a printed copy of this supplement shall be placed in a conspicuous place in each and every barber's shop so that it can be plainly seen and read by all patrons of the shop.

(5) Any person or persons violating any of the provisions of this ordinance shall forfeit and pay a penalty of not less than \$2 or more than \$10. [Ordinance board of health adopted Mar. 1, 1910.]

FORT WAYNE, IND.**GARBAGE—TRANSPORTATION AND CARRYING OF.**

SECTION 1. It shall be unlawful for any person, persons, company, or corporation to carry, convey, haul, or transport along or upon any street or alley of said city any slops, garbage, or refuse matter in an open, leaky, or uncovered wagon or vehicle; but all slops, garbage, or refuse matter shall be carried in tight-covered boxes or wagon beds.

SEC. 2. This ordinance shall include any and every person, firm, or corporation carrying and transporting garbage under contract with said city.

SEC. 3. Any person violating this ordinance shall be deemed guilty of a misdemeanor and on conviction shall be fined in any sum not exceeding fifty dollars (\$50).

SEC. 4. This ordinance shall be in full force and take effect from and after its passage and approval by the mayor and legal publication. [Ordinance passed Oct. 25, 1910.]

PLAGUE-PREVENTION WORK.

INFECTED GROUND SQUIRRELS.

During the week ended April 29, 1911, the finding of 4 plague-infected ground squirrels was reported as follows: In Alameda County, Cal., at Carr ranch, 1½ miles northeast of San Leandro, April 17, 1 squirrel and April 18, at M. J. Cull ranch, 7½ miles north of Haywards, 2 squirrels; in San Joaquin County, Cal., April 21, at E. D. Moulton ranch, 1 mile northwest of Ripon, 1 squirrel.

DISTRIBUTION OF POISON.

In connection with the making of a squirrel-free zone around the cities of California on San Francisco Bay 2,300 acres of land in Alameda County were covered with poison during the week ended April 29, 1911.

SMALLPOX IN THE UNITED STATES.

In the following tables the States indicated by an asterisk are those from which reports of smallpox are received only from certain city and, in some cases, county boards of health. In these States, therefore, the recorded cases and deaths should not be taken as showing the general prevalence of the disease. In the States not marked by an asterisk the reports are received monthly from the State boards of health and include all cases reported throughout the State.

WISCONSIN.—Months of October, November, December, 1911. Population 2,333,860. Total number of deaths from all causes 6,887; including diphtheria 135, measles 15, scarlet fever 39, tuberculosis 579, typhoid fever 168. Cases reported: Diphtheria 786, measles 576, scarlet fever 1,036, smallpox 109, tuberculosis 227, typhoid fever 433.

FOREIGN AND INSULAR.

CANADA.

Smallpox in Province of Quebec—Vaccination.

Vice Consul General Gorman at Montreal reports, April 28: According to information received from the provincial board of health there are about 300 cases of smallpox present in the Province of Quebec. General compulsory vaccination has been ordered by the board of health.

CHINA.

AMOY—Plague.

The American consul reports May 16 the presence of plague at Amoy.

Typhus fever.

Vice Consul Gilbert at Nanking reports April 15: Typhus fever is prevalent in the famine districts of Anhui and Kiang-su Provinces.

CUBA.

HABANA—Cerebro-spinal Meningitis—Transmissible Diseases.

Acting Asst. Surg. Villoldo reports, May 9:

During the week ended May 6 a case of cerebro-spinal meningitis in the convalescent stage was landed at Habana from the steamship *Manuel Calvo* from Genoa and Spanish ports via Canary Islands and Porto Rico. The *Manuel Calvo* left for New York May 6.

The following statement of transmissible diseases in the island was issued by the national department of sanitation:

APR. 1-10, 1911.

	New cases.	Deaths.	Under treatment.
Tuberculosis.....	61	67	2,505
Leprosy.....	4	1	354
Malaria.....	56	5	124
Typhoid fever.....	27	6	52
Diphtheria.....	35	3	25
Scarlet fever.....	15	1	32
Measles.....	167	3	386
Varicella.....	63	-----	102
Tetanus in the newborn.....	6	6	1

GREECE.

Cerebro-spinal meningitis.

Consul General Gale reports April 15 and 22:

Cerebro-spinal meningitis is present in Athens and Piraeus in epidemic form. From April 1 to 15 there were reported 21 deaths from the disease.

Consul Cooke at Patras reports May 3:
The epidemic of cerebro-spinal meningitis at Patras is abating, but there are many infected points in the consular district.

HAWAII.

Smallpox at Honolulu.

Chief Quarantine Officer Ramus reports, May 11: A case of smallpox occurred at Honolulu May 4 in the person of a Porto Rican. Four children of the patient had evidently recovered from smallpox. The cases gave a typical history and covered about two months in duration.

Record of Plague Infection.

Last case of human plague at Honolulu occurred July 12, 1910.

The last plague-infected rat was found at Aiea, 9 miles from Honolulu, April 12, 1910.

At Hilo the last case of human plague occurred March 23, 1910. A fatal case occurred at Honokaa, 60 miles from Hilo, December 17, 1910; 2 fatal cases were reported January 31, 1911; and 1 fatal case was reported April 19.

The last plague-infected rat was found at Honokaa, February 2, 1911.

Chief Quarantine Officer Ramus reports, April 24:

HONOLULU.

Week ended Apr. 22, 1911.

Total rats and mongoose taken.....	733
Rats trapped.....	716
Mongoose trapped.....	17
Examined bacteriologically.....	614
Classification of rats trapped:	
<i>Mus alexandrinus</i>	77
<i>Mus musculus</i>	242
<i>Mus norvegicus</i>	47
<i>Mus rattus</i>	350
Average number of traps set daily.....	1,720

INDIA.

CALCUTTA—Cholera, Plague, and Smallpox.

Acting Asst. Surg. Allan reports, April 6 and 13:

During the week ended March 18 there were reported at Calcutta 47 deaths from cholera, 48 from plague, and 2 from smallpox; in all Bengal, 6,121 cases of plague with 5,009 deaths; in all India, 38,498 cases of plague with 32,975 deaths.

During the week ended March 25 there were reported at Calcutta 60 deaths from cholera and 61 from plague; in all Bengal, 6,906 cases of plague with 5,356 deaths; in all India, 45,251 cases of plague with 29,380 deaths.

ITALY.

NAPLES—Smallpox.

Passed Asst. Surg. King reports, April 25:

During the week ended April 22 there were reported at the health office of Naples 28 cases of smallpox with 4 deaths.
