

PUBLIC HEALTH REPORTS

VOL. 33

OCTOBER 4, 1918

No. 40

EPIDEMIC INFLUENZA.

PREVALENCE IN THE UNITED STATES.

Reports received by the Public Health Service indicate that influenza is spreading rapidly in the United States. Its presence has been noted in 43 States and the District of Columbia. The disease is especially prevalent along the Atlantic seaboard and the Gulf of Mexico, and is spreading westward.

The following is a summary of the more important reports received up to the time of going to press:

Alabama.—An extensive epidemic is reported from Florence and vicinity.

Arkansas.—There is an outbreak in Lonoke County.

California.—Cases have been reported from a number of places in the State.

Connecticut.—On September 30 it was estimated that 9,000 cases had occurred in the State.

District of Columbia.—From September 21 to 30, inclusive, 177 cases were reported. On October 1 there were 162 cases reported.

Florida.—Epidemics have been reported from Key West and Pensacola.

Georgia.—Cases have been reported from a number of places in the State.

Idaho.—On September 30, 15 cases were reported in Canyon County.

Illinois.—October 1 the State health officer telegraphed: "Situation in communities adjacent to Great Lakes Naval Station shows tendency to improve. Disease spreading along main traveled routes." On October 1, 374 cases were notified in Chicago, and there were 14 deaths from influenza and 45 deaths from pneumonia in Chicago on that day.

Indiana.—An epidemic at Evansville was reported September 25.

Kansas.—Cases have been reported from a number of places in the State.

Kentucky.—The number of cases at Louisville is said to be decreasing.

Louisiana.—Cases have been reported from several places.

Maine.—The disease is epidemic at Eastport and Portland.

Maryland.—During the three days ended September 30, 77 cases were notified in Baltimore. Cases have been reported from many places in the State.

Massachusetts.—On October 1 it was estimated that there were at least 75,000 cases in the State, exclusive of cases in the cantonments. During the week ended September 30, 788 deaths from influenza and 196 deaths from pneumonia were registered in Boston.

Minnesota.—The disease has been reported from Wells Village, Faribault County; North Branch, Chisago County; and Minneapolis.

Mississippi.—Epidemics have been reported from a number of places in the State.

Montana.—The disease is epidemic in Sheridan and Fergus Counties. Cases have been reported from other counties.

Nebraska.—The disease was reported prevalent throughout the State on October 1.

New Hampshire.—The number of cases of the disease was said to be increasing at Portsmouth on October 1.

New Jersey.—A report dated September 30 stated that approximately 2,000 cases were reported during the preceding three days.

New Mexico.—A few cases have been reported from several places.

New York.—Outbreaks have occurred at Buffalo and at New York City. On September 30 the disease was said to be decreasing in New York City.

North Carolina.—Cases have been reported from 24 counties. The disease is epidemic at Raleigh and Wilmington.

North Dakota.—Seventy-five cases were notified at Rockford, Eddy County.

Ohio.—At New Concord 130 cases were reported on September 30, and on October 1 at Chillicothe 56 cases.

Oklahoma.—The disease has been reported at Tulsa (Sept. 26, 44 cases) and at Clinton (Sept. 26, 12 cases).

Pennsylvania.—In Philadelphia and Pittsburgh the disease is epidemic.

Rhode Island.—It was estimated that from 300 to 500 cases occurred during the week ended September 28 at Westerly.

South Carolina.—A telegram dated October 1 stated that the disease was rapidly spreading in the upper part of the State, and it was estimated that there were 1,500 cases. At Charleston and Newberry the disease is epidemic.

South Dakota.—Cases have appeared in a number of places. On October 1, 200 cases were reported from Yankton city and county.

Tennessee.—At Memphis 95 cases were reported on October 1.

Texas.—Thirty-five counties report influenza, from 1 case to 2,000 cases per county.

Vermont.—The disease is present in all parts of the State, the largest epidemics being at Middlebury, St. Johnsbury, Lyndonville, St. Albans, Montpelier, Barre, Randolph, and Northfield.

Virginia.—The disease is epidemic in many parts of the State.

West Virginia.—Outbreaks have occurred at Hinton, Bluefield, Martinsburg, Charles Town, and Nitro.

QUARANTINE OF COMMUNICABLE DISEASES.

DECISION OF WASHINGTON SUPREME COURT AS TO REVIEW OF BOARD OF HEALTH ORDERS BY JUDICIAL AUTHORITIES.¹

A decision rendered by the supreme court of the State of Washington on August 27, 1918, in its effect prohibited the release on habeas corpus of a person detained in quarantine by order of the boards of health of Seattle and the State. This person, arrested for disorderly conduct, had been examined by the health commissioner of Seattle in accordance with an ordinance, found to have syphilis, and sent, in accordance with another ordinance, to an isolation hospital for detention and treatment. He had appealed to the State board of health as provided by law, but the finding of the commissioner had been affirmed. He then petitioned the State supreme court for a writ of habeas corpus, and the superior court for King County was instructed by the latter to inquire into the time and cause of his detention. The superior court issued an order to have him examined before it, and thereupon the health commissioner applied to the supreme court for a writ restraining further proceedings on the ground, among others, that an order of the health commissioner could not be reviewed by the court.

The detained person contended that to deny him such a review was to suspend the writ of habeas corpus, and that the actions and findings of boards of health were open to judicial inquiry the same as other boards, institutions, and officers. Bailey (*Habeas Corpus*, sec. 106) was quoted to the effect that the determinations of such boards "are not final and conclusive; if they were, then the exercise of such summary power could not be upheld."

In its decision the supreme court states that to follow Bailey would be to make the exercise of the police power a judicial function and holds that "a writ of habeas corpus is a writ of right, and is never to be denied in any case where the liberty of the subject is made the subject of inquiry. But it has always been held that a return showing a legal cause for the detention of a petitioner is enough to suspend the operation of the writ * * *. Where the police power is set in motion in its proper sphere, the courts have no jurisdiction to stay the arm of the legislative branch of the government, for it is operating in its

¹ Reported 3 Washington Decisions 297.

own particular field, where even the courts are powerless to insist upon a procedure consistent with the forms of the common law. Some courts have held that the discretion and judgment of administrative officers, while very broad, is not absolutely and in all cases beyond judicial control, but the tendency is away from this doctrine, for, granting the right to question means and methods in one case, the questions of fact upon which the administrative order is based might be raised in every case, and the object of the law, which is to deal summarily, to the end that imminent peril to the public may be averted, would be wholly overcome. At any rate, a somewhat extended exploration of the books convinces the writer that a court should not inquire into the reasonableness of an ordinance sounding in the police power in any case where the legislative body has provided the means and methods of carrying it out."

In substantiation of this view, the court cites previous decisions by the Washington Supreme Court and a number of decisions by the United States Supreme Court in regard to the examination or quarantine of immigrants, one of the latter holding that "where a statute gives a discretionary power to an officer, to be exercised by him upon his own opinion of certain facts, he is made the sole and exclusive judge of the existence of those facts, and no other tribunal, unless expressly authorized by law to do so, is at liberty to reexamine or controvert the sufficiency of the evidence on which he acted."

Some additional points were raised by counsel in the case, notably the question of the constitutionality of the quarantine law, which leaves to the boards of health definitions and classification of diseases to be quarantined. In regard to this point the supreme court said that "this court has not heretofore considered similar laws as a delegation of legislative power or authority. The legislation is that of the legislative body, but it is not always practical to meet every phase of the necessity that has called for the law by the enactment of a general statute. * * * Nor is there any legal reason for denying the power to quarantine summarily, or to restrain for treatment, a citizen or subject because the authority may be abused or the law maladministered in a given case."

One of the points made by the commissioner was that he could not bring his ward into court for examination without subjecting himself to the penalties of the quarantine law; but the supreme court held that "if the court has jurisdiction to inquire into the cause of his detention, resort to examination and expert opinion by those skilled in the diagnosis of disease would not be a breaking of the quarantine."

The contention of the detained person, that the city of Seattle had no authority to pass health ordinances or to create the office of health commissioner, was overruled by the supreme court.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

Louisiana.—Not including Rapides Parish. Influenza 25, meningitis 1, poliomyelitis 4, typhoid fever 28, diphtheria 21.

Massachusetts.—Unusual prevalence. Diphtheria: Fitchburg 5, Shelburne 5. Lobar pneumonia: Brockton 28, Brookline 47, Chelsea 13, Danvers 10, Fall River 26, Fitchburg 17, Haverhill 33, Lawrence 20, Leominster 20, Lowell 20, Lynn 25, Milford 10, New Bedford 16, Revere 15, Salem 30, Springfield 45, Quincy 19, Somerville 43, Westboro 11, Winthrop 17, Worcester 59. Typhoid fever: Beverly 6, North Brookfield 3, Revere 4. Smallpox: West Springfield 1.

Minnesota.—Smallpox (new foci): Chippewa County, Montevideo City, 1; Dodge County, West Concord village, 1; Freeborn County, Albert Lea village, 13; Manchester village, 1; Marshall County, Warren city, 1; St. Louis County, Floodwood village, 8; Halden Township, 18. Twelve poliomyelitis cases, 2 cerebrospinal meningitis cases, reported since September 23.

North Carolina.—Whooping cough 174, measles 29, diphtheria 81, scarlet fever 70, septic sore throat 10, smallpox 6, chicken pox 14, typhoid fever 206, meningitis 1.

Washington.—Unusual prevalence. Measles: Clallam County 9. Scarlet fever: Seattle 21, Tacoma 6, Spokane 3, Ritzville 1. Epidemic cerebrospinal meningitis: Seattle 1, Tacoma 1. Diphtheria: Seattle 14, Tacoma 3, Spokane 1, Steilacoom 1. Smallpox: Many foci.

The more bonds the fewer casualties.

RECIPROCAL NOTIFICATION.

Minnesota.

Cases of communicable diseases referred during August, 1918, to other State health departments by department of health of the State of Minnesota.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Anterior poliomyelitis: Minneapolis health department, Hennepin County.	Harris, Osceola County, Iowa..... Chicago, Cook County, Ill.....	Left Minneapolis July 18 to visit in Iowa; first sick Aug. 15; returned to Minneapolis Aug. 22. Family came from Chicago Aug. 17; baby taken sick on train; admitted Aug. 25 to Minneapolis City Hospital.
Diphtheria: St. Paul health department, Ramsey County.	Bay City, Pierce County, Wis.....	Mother and 4 children left home in Bay City to visit in St. Paul, Minn., Aug. 22; were all quarantined for diphtheria 2 days later in St. Paul City Hospital.
Smallpox: Minneapolis health department, Hennepin County.	Toina, Nelson County, N. Dak.; chief train dispatcher's office, F. N. Ry. Shall Lake, Washburn County, Wis....	Taken off train at Minneapolis and quarantined for smallpox from Toina, N. Dak. Taken sick in Wisconsin; quarantined for smallpox in Minneapolis.
Tuberculosis: Mayo Clinic, Rochester, Olmsted County. St. Paul health department, Ramsey County.	East Moline, Rock Island County, Ill.; Mason City, Cerro Gordo County, Iowa; Rowley, Buchanan County, Iowa; Lewistown, Fergus County, Mont.; Andover, Day County, S. Dak.; New Effington, Roberts County, S. Dak.; Neilsville, Clark County, Wis. Oshkosh, Winnebago County, Wis....	2 advanced and 5 moderately advanced cases left Mayo clinic for homes. Open case of pulmonary tuberculosis left Minnesota for Wisconsin.
Typhoid fever: Duluth health department, St. Louis County.	Hot Springs, Garland County, Ark.... Denver, Denver County, Colo.....	Was in Hot Springs, Ark., 3 weeks previous to first symptoms. Had typhoid in Colorado in March; typhoid bacilli present in blood in August in Minnesota.
Stately Township, Brown County. Brainerd, Crow Wing County..	4½ miles south of Sanders, Rosebud County, Mont. Poplar, Sheridan County, Mont.; Aneroïd, Saskatchewan, Canada.	Living in Montana 3 weeks previous to first symptoms. Father, son, and daughter contracted typhoid while visiting relative in Canada, relative having contracted his infection in Poplar, Mont.
Enstrom, Roseau County.....	Lakota, Nelson County, N. Dak.....	Worked on farm in Lakota, N. Dak., 3 weeks previous to first symptoms; previous case traced to same farm in 1915.
St. Paul health department, Ramsey County.	Orange, Orange County, Tex.....	Worked 3 weeks previous to first symptoms in shipyards at Orange, Tex.
Red Wing, Goodhue County..	4 miles south of Brule, Douglas County, Wis.	Was camping on Brule River 4 miles south of Brule, Wis., 3 weeks previous to first symptoms.
