==== IN THIS ISSUE ====

Prevalence of Poliomyelitis in the United States Since 1916
Analysis of Data on Tooth Mortality Found in School Children
A Study of Pseudotuberculosis Rodentium Recovered From a Rat

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON: 1938

UNITED STATES PUBLIC HEALTH SERVICE

THOMAS PARRAN, *Surgeon General*

DIVISION OF SANITARY REPORTS AND STATISTICS

Asst. Surg. Gen. ROBERT OLESEN, Chief of Division

The PUBLIC HEALTH REPORTS, first published in 1878 under authority of an act of Congress of April 29 of that year, is issued weekly by the United States Public Health Service through the Division of Sanitary Reports and Statistics, pursuant to the following authority of law: United States Code, title 42, sections 7, 30, 93; title 44, section 220.

It contains (1) current information regarding the prevalence and geographic distribution of communicable diseases in the United States insofar as data are obtainable, and of cholera, plague, smallpox, typhus fever, yellow fever, and other important communicable diseases throughout the world; (2) articles relating to the cause, prevention, and control of disease; (3) other pertinent information regarding sanitation and the conservation of the public health.

The PUBLIC HEALTH REPORTS is published primarily for distribution, in accordance with the law, to health officers, members of boards or departments of health, and other persons directly or indirectly engaged in public health work. Articles of special interest are issued as reprints or as supplements, in which forms they are made available for more economical and general distribution.

Requests for and communications regarding the PUBLIC HEALTH REPORTS, reprints, or supplements should be addressed to the Surgeon General, United States Public Health Service, Washington, D. C. Subscribers should remit direct to the Superintendent of Documents, Washington, D. C.

Librarians and others should preserve their copies for binding, as the Public Health Service is unable to supply the general demand for bound copies. Indexes will be supplied upon request.

INDEX

A

	Page
Accidents, nonindustrial, causing disability lasting 8 calendar days or longer and frequency of sickness among 60,000 white male railroad employees, 1930-34, inclusive—Gafafer	555
Age and moisture, effect of, on stability of neorsphenamine—Probey and Harrison	939
Age of delinquents in relationship to Rorschach test scores—Pescor	852
Age of gainful white and Negro female workers of the United States, 1920 and 1930. Studies on the age of gainful workers No. 5—Gafafer	4
Age of neorsphenamine, the effect of, on reaction expectancy—Stephenson, Probey, and Harrison	945
Airplane dusting in the control of <i>Anopheles</i> breeding associated with impounded waters, the role of—Watson, Kiker, and Johnson	251
Alabama. (See Name of disease—Current weekly State reports; Summary—Disease cases reported monthly by States.)	
Alaska, occurrence of tularaemia in the rabbit tick (<i>Haemaphysalis leporispalustris</i>) in—Philip and Parker	574
Alicata, Joseph E.: A study of <i>Trichinella spiralis</i> in the Hawaiian Islands. Andervont, H. B.:	384
Pulmonary tumors in mice. V. Further studies on the influence of heredity upon spontaneous and induced lung tumors	232
The influence of nonbreeding and foster nursing upon the occurrence of spontaneous breast tumors in strain C ₃ H mice	777
The production of tumors in mice of strains C ₃ H and Y by dibenzanthracene and methylcholanthrene	229
<i>Anopheles</i> breeding associated with impounded waters, the role of airplane dusting in the control of—Watson, Kiker, and Johnson	251
Anthrax. (See Summary—Disease cases reported monthly by States.)	
Antitoxins, serums, and drugs in the treatment of meningococcus meningitis—Branham	645
Arizona. (See Name of disease—Current weekly State reports; Summary—Disease cases reported monthly by States.)	
Arkansas. (See Name of disease—Current weekly State reports; Summary—Disease cases reported monthly by States.)	
Austria: Vital statistics—Year 1936	469
