SANITATION MANUAL FOR PUBLIC GROUND WATER SUPPLIES

CONTENTS

	Page
Introduction.....	138
Section 1. Definitions.....	139
Section 2. Registration and permits.....	139
Section 3. Inspections.....	140
Section 4. Emergency measures to prevent epidemics.....	140
Section 5. Approved public ground water supplies.....	140
Item 1. Exclusion of surface water from site.....	140
2. Satisfactory earth formations above the water-bearing stratum.....	141
3. Distances to sources of contamination.....	142
4. Minimum depth of casings and curbing.....	146
5. Construction and use of casings and curbing.....	146
6. Gravel treated wells.....	149
7. Covers, platforms, and floors.....	149
8. Well seals or covers.....	150
9. Well vents.....	150
10. Well pits.....	151
11. Construction and installation of pumps.....	152
(A) Hand pumps.....	152
(B) Power pumps.....	153
12. Pump house.....	154
(A) Construction to prevent flooding.....	154
(B) Drainage of floors.....	155
(C) Plumbing fixtures in pump house.....	155
13. Lubrication of pump bearings.....	156
14. Priming of power pumps.....	156
15. Protection of suction pipes.....	156
16. Valve boxes.....	157
17. Manholes and covers.....	158
18. Airlift systems.....	158
19. Cross-connections.....	159
20. Bacteriological, physical, and chemical quality of water.....	159
21. Plant supervision and control.....	161
22. Water sampling.....	161
23. Abandonment of wells.....	163
24. Distribution.....	163
25. Storage.....	168
26. Protection during construction.....	170
27. Disinfection after construction and repair.....	170
28. Bottled waters.....	171
Appendix A—Recommended procedure for cement grouting of wells for sanitary protection.....	172
Appendix B—Recommended procedure for disinfection of wells, springs, and appurtenances.....	174
