

ABSTRACT OF SANITARY REPORTS.

VOL. VI.

WASHINGTON, D. C., JULY 17, 1891.

No. 29.

[Published at the Marine-Hospital Bureau in accordance with act of Congress of April 29, 1878.]

UNITED STATES.

SPECIAL REPORTS.

Yellow fever on board Norwegian bark "Crown Prince," while en route from Rio.

Passed Assistant Surgeon H. R. Carter, under date of July 6, 1891, reports as follows:

I have the honor to report the arrival last evening of the Norwegian bark *Crown Prince*, from Rio via Barbadoes, for Ship Island, in rock ballast. Said vessel had no sickness in Rio, and lay in a healthful part of the harbor—Mocanqué—but developed yellow fever when seven days out.

Every man aboard (14) had it, and of these, 6 died, including the master.

Put into Barbadoes, and was there disinfected and quarantined, but ballast not disturbed nor hole cleaned. She is very clean above deck, mechanically, and newly painted.

Delaware Breakwater quarantine station.

Under date of July 14 Acting Assistant Surgeon Orr reports that the British ship *Grandee*, which was reported to have sailed from Havana July 2, 1891, bound for New York or Philadelphia, without a bill of health (*vide* ABSTRACT, July 10), arrived at the Delaware Breakwater quarantine July 14, 1891, in good condition and all well on board, and that there was no sickness during the voyage.

The vessel was examined and passed to the Philadelphia lazaretto, in accordance with the following request of the Philadelphia board of health, notice being given by telegram:

OFFICE OF THE BOARD OF HEALTH,
City Hall, Philadelphia, June 4, 1891.

SIR: I am directed by the board of health to request that steamers from Havana, bound to Philadelphia, when found on inspection to have all well on board and to be in good sanitary condition, be allowed to

proceed to the Lazaretto quarantine station without detention, according to the practice of preceding seasons.

Very respectfully,

WILLIAM P. TROTH,
Chief Clerk.

Dr. WILLIAM P. ORR,
Acting Assistant Surgeon, M.-H. S.

United States quarantine station, Dry Tortugas, Fla.

The iron steamer *Dagmar*—length over all, 121 feet; beam, 16½ feet; depth of hold, 9½ feet; speed, 14 knots an hour—recently purchased and put in commission by the Government for the use of the United States quarantine station, Dry Tortugas, Fla., sailed from New York for Dry Tortugas July 11, commanded by Assistant Surgeon Geddings, M.-H. S. She will be used as a boarding steamer for hailing vessels from South American and West Indian ports, and will also carry mail and supplies between the quarantine station and the buoy in the outer harbor at Key West.

Reports of States, and yearly and monthly reports of cities.

CALIFORNIA—*Los Angeles*.—Month of June, 1891. Population, 50,395. Total deaths, 71, including phthisis pulmonalis, 13; enteric fever, 4; scarlet fever, 1; diphtheria, 3; and whooping cough, 1.

FLORIDA—*Alachua County*.—Month of June, 1891. Population, 23,000. Total deaths, 6, including phthisis pulmonalis 1 and enteric fever 1.

ILLINOIS—*Chicago*.—Month of June, 1891. Population, 1,099,850. Total deaths, 1,797, including phthisis pulmonalis, 149; enteric fever, 167; scarlet fever, 30; diphtheria, 44; measles, 22; and whooping cough, 13.

INDIANA—*Evansville*.—Month of June, 1891. Population, 50,756. Total deaths, 85, including phthisis pulmonalis, 11; enteric fever, 4; diphtheria, 2.

MARYLAND—*Baltimore*.—Month of June, 1891. Population, 434,439. Total deaths, 725, including phthisis pulmonalis, 60; enteric fever, 6; scarlet fever, 9; diphtheria, 21; croup, 3; and whooping cough, 8.

MASSACHUSETTS—*Brockton*.—Month of June, 1891. Population, 27,294. Total deaths, 25, including 3 from phthisis pulmonalis.

MICHIGAN.—Week ended July 4, 1891. Reports to the State board of health, Lansing, from 51 observers, indicate that cholera morbus, whooping cough, scarlet fever, diphtheria, inflammation of brain, cholera infantum, and remittent fever increased, and that cerebro-

spinal meningitis, typhoid fever, pneumonia, inflammation of bowels, typho-malarial fever, erysipelas, and inflammation of kidney decreased in area of prevalence. Diphtheria was reported present during the week at 26 places, scarlet fever at 36 places, enteric fever at 14 places, and measles at 20 places.

MINNESOTA.—Month of May, 1891. Reports to the State board of health show a total of 732 deaths in a population of 1,301,826, including measles, 15; scarlet fever, 10; enteric fever, 10; diphtheria, 31; and croup, 5.

MISSOURI—*Kansas City*.—Month of June, 1891. Population, 132,716. Total deaths, 110, including phthisis pulmonalis, 10; enteric fever, 2; and whooping cough, 1.

OHIO—*Cincinnati*.—Month of June, 1891. Population, 296,908. Total deaths, 532, including phthisis pulmonalis, 47; enteric fever, 21; scarlet fever, 5; diphtheria, 13; croup, 2; and measles, 4.

Dayton.—Month of June, 1891. Population, 61,220. Total deaths, 71, including phthisis pulmonalis, 6; diphtheria, 6; and croup, 1.

RHODE ISLAND—*Newport*.—Month of June, 1891. Population, 19,457. Total deaths, 15. No deaths from contagious diseases.

TEXAS—*San Antonio*.—Month of June, 1891. Population, 37,673. Total deaths, 116, including phthisis pulmonalis, 9; enteric fever, 3; smallpox, 1; and measles, 2.

FOREIGN.

(Reports received through the Department of State and other channels.)

BAHAMAS—*Governors Harbor*.—Two weeks ended June 20, 1891. Population, 1,101. Total deaths, 4. None from contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended June 18, 1891. Population, 3,610. Total deaths, 3. None from contagious diseases.

BRAZIL—*Bahia*.—The United States consul, under date of June 13, 1891, reports good health in this city and adjacent country, and abundant rains falling in all parts of the State.

Ceara.—Month of May, 1891. Population, 35,065. Total deaths, 130, including smallpox, 1; beri-beri, 1; and enteric fever, 1.

Para.—Month of May, 1891. Population, 80,000. Total deaths, 264, including yellow fever, 25; phthisis pulmonalis, 19; enteric fever, 3; and measles, 1.

CANADA—*Three Rivers*.—Month of May, 1891. Population, 8,284. Total number of deaths, 24. No deaths reported from contagious diseases.

CUBA—*Havana*.—*Yellow fever increasing*.—The following weekly report has been received from the United States sanitary inspector, dated July 4, 1891:

There were one hundred and fifty (150) deaths in this city during the week ending July 2. Fifteen of those deaths were caused by yellow fever, with approximately 50 new cases, 8 were caused by so-called pernicious fever, 7 by enteric fever, 8 by smallpox, and 1 by diphtheria. By far the largest number of cases of yellow fever and deaths from it are in the military hospital proceeding from the army and navy, mainly the army.

Week ended July 9, 1891. Total deaths, 155, including yellow fever, 4 (80 new cases); so-called pernicious fevers, 6; enteric fever, 5; smallpox, 8; and diphtheria, 1.

DUTCH GUIANA—*Parimaribo*.—Month of April, 1891. Population, 28,221. Total deaths, 152, including typhus fever, 2; leprosy, 1; and measles, 8.

EGYPT.—Week ended June 11, 1891. The towns in upper and lower Egypt, including Gizeh and the Suez Canal, show a total of 1,336 deaths, including phthisis pulmonalis, 66; enteric fever, 65; diphtheria and croup, 2; measles, 62; whooping cough, 10; and smallpox, 6.

FRANCE—*Rheims*.—Month of May, 1891. Population, 104,639. Total deaths, 214, including phthisis pulmonalis, 34; enteric fever, 3; and diphtheria and croup, 5.

Rouen.—Month of May, 1891. Population, 106,496. Total deaths, 301, including phthisis pulmonalis, 33; enteric fever, 7; diphtheria, 3; measles, 3; and whooping cough, 1.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 28 great towns of England and Wales during the week ended June 27 corresponded to an annual rate of 20.4 a thousand of the aggregate population, which is estimated at 9,715,559. The lowest rate was recorded in Cardiff, viz, 16.0, and the highest in Wolverhampton, viz, 28.3 a thousand.

London.—One thousand five hundred and thirty-eight deaths were registered during the week, including measles, 23; scarlet fever, 8; diphtheria, 31; whooping cough, 55; enteric fever, 5; and diarrhoea and dysentery, 25. The deaths from all causes corresponded to an annual rate of 19.0 a thousand. Diseases of the respiratory organs caused 291 deaths. In greater London 1,921 deaths were registered, corresponding to an annual rate of 17.7 a thousand of the population. In the "outer ring" the deaths included whooping cough 11 and diphtheria 5.

Newcastle-upon-Tyne.—Two weeks ended June 13, 1891. Population, 187,500. Total deaths, 148, including 2 from scarlet fever.

Sunderland.—Two weeks ended June 13, 1891. Population, 131,302. Total deaths, 112, including 1 from enteric fever.

Ireland.—The average annual death rate, represented by the deaths registered during the week ended June 27, in the 16 principal town districts of Ireland, was 21.1 a thousand of the population. The lowest rate was recorded in Sligo, viz, 5.2, and the highest in Drogheda, viz, 39.6 a thousand. In Dublin and suburbs 121 deaths were registered, including typhus fever 1 and whooping cough 3.

Scotland.—The deaths registered in eight principal towns during the week ended June 27 corresponded to an annual rate of 21.8 a thousand of the population, which is estimated at 1,345,563. The lowest mortality was recorded in Perth, viz, 6.8, and the highest in Glasgow, viz, 25.5 a thousand. The aggregate number of deaths registered from all causes was 561, including measles, 18; scarlet fever, 9; diphtheria, 1; whooping cough, 19; fever, 7; and diarrhoea, 15.

INDIA—*Singapore*.—Month of April, 1891. Total deaths, 577, including cholera, 1; smallpox, 2; fever, 190; and beri-beri, 42.

MAURITIUS—*Port Louis—Continuance of smallpox and report of vessels leaving infected port, bound for New York*.—The United States consul, under date of June 2, 1891, writes as follows:

In continuation of my letter numbered 280, and bearing date April 6, 1891, I have the honor to inform you that smallpox still exists in

Port Louis, and the mail steamers refuse to communicate with the island.

I have also to inform the Department of State that five vessels, namely, the *Hollandia*, *Louis Eugene*, *Osman Pacha*, *Sarmatian*, and the *Moss Rose*, have recently departed from this port, bound to New York, loaded with sugar.

MEXICO—*Guaymas*.—Month of June, 1891. Population, 6,600. Total deaths from all causes, 7.

NETHERLANDS.—Month of March, 1891. The deaths registered in the principal cities, having an aggregate population of 1,172,989, correspond to an annual rate of 27.8 a thousand. Total number of deaths, 2,872, including phthisis pulmonalis, 292; typhus and enteric fevers, 12; scarlet fever, 1; diphtheria, 29; measles, 53; croup, 24; and whooping cough, 58.

SAINT HELENA.—Two weeks ended May 14, 1891. Population, 3,900. Total deaths, 4. None from contagious diseases.

SIAM—*Bankok*—*Sanitary condition of city*—*Cholera*.—Under date of May 18, 1891, the United States consul makes the following report :

The weather temperature is very regular and constant night and day, not going below 99° nor above 103°. Cholera prevails alarmingly; business very dull; a "water famine" frightful, many thousand people begging for a quart or a gallon. This morning I obtained fifteen gallons from a steamer just in from Hong-Kong; when that is gone, I don't know now where to get more.

* * * * *

The king is doing all he can, with his boats, supplying river water from above the tide, but it is hardly a drop to a city of 500,000 inhabitants. Fifteen years ago, the old citizens say, there was a water famine, lasting until the middle of July; cholera was more ravaging, and a so-called sun-apoplexy prevailed. Several Europeans, in the last ten days, have dropped dead on the streets and in their yards, apparently well and healthy.

SWITZERLAND.—Week ended May 30, 1891. Reports from 15 cities, having an aggregate population of 503,503, show a total of 201 deaths, including phthisis pulmonalis, 32; enteric fever, 2; scarlet fever, 1; diphtheria and croup, 5; and whooping cough, 5.

Week ended June 6, 1891. Total deaths, 204, including phthisis pulmonalis, 40; scarlet fever, 2; diphtheria and croup, 8; measles, 1; and whooping cough, 5.

Week ended June 13, 1891. Total deaths, 167, including phthisis pulmonalis, 32; enteric fever, 3; scarlet fever, 3; diphtheria and croup, 3; measles, 2; and whooping cough, 2.

WEST INDIES—*Turk's Islands*.—Period from April 8 to May 13, 1891. Population, 4,732. Total deaths, 31. No deaths from contagious diseases.
