

ABSTRACT OF SANITARY REPORTS.

VOL. VII.

WASHINGTON, D. C., MARCH 25, 1892.

No. 13.

[Published at the Marine-Hospital Bureau in accordance with act of Congress of April 29, 1878.]

UNITED STATES.

SPECIAL REPORTS.

Yellow fever and smallpox reported in Costa Rica.—Acting Assistant Surgeon W. W. McKay, in charge of the United States Quarantine at San Diego, Cal., forwards with his weekly report, dated March 16, a clipping from the Associated Press dispatches which indicates that yellow fever is prevailing at Punta Arenas, Alajuela, and Heredia, and typhoid fever is epidemic at San José, and smallpox at Cantago, Costa Rica.

He states: "Pacific mail steamers touch here regularly now and the greatest care will be exercised and a thorough inspection made of them. Our wharf and gangway will soon be completed, and, should an emergency require it, I could handle their largest steamers."

Reports of States, and yearly and monthly reports of cities.

CALIFORNIA.—Reports to the State board of health from 118 cities, towns, and villages, having an aggregate population of 813,877, show a total of 1,208 deaths, including phthisis pulmonalis, 129; influenza, 29; enteric fever, 17; scarlet fever, 14; diphtheria, 42; measles, 14; croup, 9; and whooping cough, 6.

San Diego.—Year of 1891. Population, 16,159. Total deaths, 181, including phthisis pulmonalis, 40; enteric fever, 1; scarlet fever, 2; and whooping cough, 3.

CONNECTICUT.—Reports to the State board of health from 166 towns, having an estimated population of 745,006, show a total of 1,276 deaths, including phthisis pulmonalis, 139; influenza, 60; enteric fever, 16; scarlet fever, 18; diphtheria and croup, 50; and whooping cough, 6.

ILLINOIS—*Chicago.*—Month of February, 1892. Population, 1,099,850. Total deaths, 2,275, including phthisis pulmonalis, 188; influenza, 29; enteric fever, 187; scarlet fever, 46; croup, 44; and whooping cough, 15.

MASSACHUSETTS—*Northampton*.—Month of February, 1892. Population, 14,990. Total deaths, 25, including phthisis pulmonalis, 2; influenza, 2; and diphtheria, 2.

MICHIGAN.—Week ended March 12, 1892. Reports to the State board of health, Lansing, indicate that inflammation of bowels, inflammation of kidney, pleuritis, remittent fever, and scarlet fever increased, and that cerebro-spinal meningitis, typhoid fever, inflammation of brain, cholera infantum, diarrhea, and diphtheria decreased in area of prevalence.

Diphtheria was reported present during the week at 26 places, scarlet fever at 53, enteric fever at 10, and measles at 10 places.

MINNESOTA—*Minneapolis*.—Month of February, 1892. Population, 164,738. Total deaths, 186, including phthisis pulmonalis, 24; influenza, 8; enteric fever, 2; scarlet fever, 8; measles, 3; and whooping cough, 1.

Winona.—Month of February, 1892. Population, 18,208. Total deaths, 32, including phthisis pulmonalis, 2; enteric fever, 1; scarlet fever, 2; and croup, 1.

NEW JERSEY—*Hudson County*.—Month of January, 1892. Population, 292,574. Total deaths, 666, including phthisis pulmonalis, 69; enteric fever, 9; scarlet fever, 33; diphtheria, 17; and whooping cough, 4.

Month of February, 1892. Total deaths, 524, including phthisis pulmonalis, 48; enteric fever, 7; scarlet fever, 22; diphtheria, 16; measles, 2; and whooping cough, 1.

PENNSYLVANIA—*Titusville*—*Smallpox*.—Under date March 21, 1892, Dr. Benjamin Lee, secretary State board of health, reports one case of smallpox at Titusville, brought from New York City per steamship *Diana*, which arrived there on the 5th instant. The case has been isolated.

RHODE ISLAND.—Month of February, 1892. Reports to the State board of health from cities and towns representing an estimated population of 302,897 show a total of 434 deaths, including phthisis pulmonalis, 47; influenza, 24; enteric fever, 8; scarlet fever, 8; diphtheria, 6; croup, 13; measles, 1; and whooping cough, 3. The *Monthly Bulletin* says:

Compared with the previous month, the influenza and pneumonia were less frequent, and rather less severe, bronchitis continuing with about an equal prevalence, and diphtheria, scarlatina, and typhoid fever with a diminished prevalence. Measles had quite large prevalence in Smithfield, Johnston, and Woonsocket.

Comparative mortality table of certain cities of the United States for the year ended December 31, 1891 (as reported to the U. S. Marine-Hospital Bureau).

FOREIGN.

(Reports received through the Department of State and other channels.)

BAHAMAS—*Governor's Harbor*.—Two weeks ended February 13, 1892. Population, 1,116. One death.

Green Turtle Cay—Abaco.—Two weeks ended February 24, 1892. Population, 3,686. Total deaths, 2. No deaths from contagious disease.

BRAZIL—*Bahia*.—Under date of February 9, 1892, the United States consul writes as follows:

I have to report that the health of this community is good. Since the beginning of the year 1892 there have been six sporadic cases of yellow fever within the limits of Bahia, and 1 death from same, but no trouble is apprehended from the spread of the fever and there is no suspicion of a plague.

CUBA—*Havana*.—The United States sanitary inspector sends the following reports, dated March 5 and 12, 1892:

There were 85 deaths in this city during the week ended March 3, 1892.

One of these deaths was caused by yellow fever, 3 by enteric fever, 1 by bilious fever, 1 by pernicious fever, 3 by diphtheria and croup, and 2 by the grippe.

During the week ended March 10, 1892, there were 134 deaths in this city. Six of these deaths were caused by enteric fever, 1 by paludal fever, 1 by diphtheria, 2 by the grippe, and 1 by glanders.

Santiago de Cuba.—Two weeks ended February 14, 1892. Total deaths, 44, including phthisis pulmonalis, 4; yellow fever, 1; and croup, 2.

FRANCE—*Marseilles*.—Month of February, 1892. Population, 406,919. Total deaths, 1,101, including smallpox, 11; enteric fever, 17; scarlet fever, 1; diphtheria and croup, 71; measles, 12; and whooping cough, 2.

Rheims.—Month of January, 1892. Population, 105,408. Total deaths, 322, including phthisis pulmonalis, 19; smallpox, 5; diphtheria and croup, 6; and measles, 48.

Rouen.—Month of January, 1892. Population, 111,847. Total deaths, 354, including phthisis pulmonalis, 38; enteric fever, 1; and whooping cough, 1.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 28 great towns of England and Wales during the week ended March 5 corresponded to an annual rate of 20.5 a thousand of the aggregate population, which is estimated at 10,185,736. The lowest rate was recorded in Portsmouth, viz, 15.3, and the highest in Preston, viz, 32.5 a thousand.

London.—One thousand five hundred and forty-five deaths were registered during the week, including measles, 52; scarlet fever, 10; diphtheria, 27; whooping cough, 67; typhus fever, 1; enteric fever, 4; and diarrhea and dysentery, 16. The deaths from all causes corresponded to an annual rate of 18.9 a thousand. Diseases of the respir-

atory organs caused 379 deaths. In greater London 1,984 deaths were registered, corresponding to an annual rate of 18.0 a thousand of the population. In the "outer ring" the deaths included measles 10 and whooping cough 18.

Ireland.—The average annual death rate represented by the deaths registered during the week ended March 5, in the 16 principal town districts of Ireland, was 31.9 a thousand of the population. The lowest rate was recorded in Armagh, viz, 0.0, and the highest in Sligo, viz, 61.9 a thousand. In Dublin and suburbs 219 deaths were registered, including enteric fever, 4; influenza, 8; measles, 7; and whooping cough, 8.

Scotland.—The deaths registered in 8 principal towns during the week ended March 5 corresponded to an annual rate of 22.5 a thousand of the population, which is estimated at 1,338,314. The lowest mortality was recorded in Perth, viz, 18.5, and the highest in Paisley, viz, 26.0 a thousand. The aggregate number of deaths registered from all causes was 626, including measles, 11; scarlet fever, 4; diphtheria, 12; whooping cough, 19; fever, 8; and diarrhea, 7.

NETHERLANDS.—Month of November, 1891. Reports from the 12 principal cities, having an aggregate population of 1,198,116, show a total of 2,118 deaths, including phthisis pulmonalis and throat diseases, 188; typhus and enteric fever, 15; scarlet fever, 1; diphtheria, 25; measles, 9; croup, 22; and whooping cough, 47.

Amsterdam.—Month of January, 1892. Population, 426,480. Enteric fever caused 6 deaths and diphtheria 12. Total deaths from all causes not reported.

NEW ZEALAND.—Month of November, 1891. Reports to the registrar-general from the 4 principal cities and towns having an aggregate population of 98,233 show a total of 94 deaths, including phthisis pulmonalis, 6; enteric fever, 2; and whooping cough, 6.

Month of December, 1891. Total deaths, 125, including phthisis pulmonalis, 14; enteric fever, 4; diphtheria, 1; influenza, 13; and whooping cough, 2.

Month of January, 1892. Total deaths, 169, including phthisis pulmonalis, 16; enteric fever, 2; influenza, 30; diphtheria, 2; and whooping cough, 5.

RUSSIA—*Riga.*—Month of December, 1891. Population, 200,000. Total deaths, 369, including phthisis pulmonalis, 49; enteric fever, 6; scarlet fever, 42; diphtheria, 22; measles, 1; and whooping cough, 3.

SWITZERLAND—*Zurich.*—Month of January, 1892. Population, 91,323. Total deaths, 118, including phthisis pulmonalis, 13; typhus fever, 1; diphtheria and croup, 6; measles, 5; and whooping cough, 2.

WEST INDIES—*Trinidad.*—Two weeks ended February 20, 1892. Total deaths, 57. No deaths reported from contagious disease.

Cholera, yellow fever, and smallpox in 1891.
