ABSTRACT OF SANITARY REPORTS.

Vol. IX. Washington, D. C., March 23, 1894.

No. 12.

TREASURY DEPARTMENT, U. S. Marine-Hospital Service.—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

[Reports to the Supervising Surgeon-General M. H. S.]

Arrival of steamship Auretta at Port Royal, S. C. with suspicious sickness on board. Vessel ordered to South Atlantic Quarantine.

PORT ROYAL, S. C., March 20, 1894.—Steamer Auretta arrived to-day. Foul bill of health. Four days out from Liverpool a seaman died under suspicious circumstances. Indications point to typhus fever. Upon inspection found crew well, but strongly advise that she be remanded to South Atlantic Quarantine, where she can be thoroughly disinfected. All precautions taken, and pilot kept on board.—Allen Stuart, Quarantine Officer.

Note.—On receipt of the above, the collector of customs at Beaufort, S. C. was ordered by telegraph to remand the vessel to South Atlantic Quarantine Station.

Smallpox in Michigan.

Lansing, March 20, 1894.—It becomes my duty to inform you that 1 case of smallpox exists at Ishpeming, in Marquette County, this State. The patient was taken sick March 13. The origin of the disease is probably Chicago, Ill. The measures taken to restrict are isolation of sick and infected, and vaccination and revaccination; 2,700 persons, mostly children, were recently vaccinated. Four cases yet remain at Menominee, and 1 case at Crystal Falls. At Otsego the outbreak is ended.—Henry B. Baker, Secretary State Board of Health.

Report of immigration at Boston for the week ended March 17, 1894.

OFFICE OF U. S. COMMISSIONER OF IMMIGRATION, Port of Boston, Mass., March 19, 1894.

Reports of States and yearly and monthly reports of cities.

ALABAMA—Mobile.—Month of January, 1894. Population, 31,076. Total deaths, 94, including phthisis pulmonalis, 8; enteric fever, 1; and whooping cough, 1.

Month of February, 1894. Total deaths, 85, including phthisis pulmonalis, 15; enteric fever, 2; and whooping cough, 2.

California—Oakland.—Month of February, 1894. Estimated population, 60,000. Total deaths, 63, including phthisis pulmonalis, 4; enteric fever, 1; scarlet fever, 1; and whooping cough, 1.

San Francisco.—Estimated population, 330,000. Total deaths, 498, including phthisis pulmonalis, 95; enteric fever, 7; scarlet fever, 3; diphtheria, 2; and croup, 5.

CONNECTICUT.—Month of February. Reports to the State board of health from 164 towns, having a population of 794,189, show a total of 1,069 deaths, including phthisis pulmonalis, 116; enteric fever, 13; scarlet fever, 3; diphtheria and croup, 33; measles, 1; and whooping cough, 14.

Indiana—Evansville.—Month of February, 1894. Population, 55,756. Total deaths, 79; including phthisis pulmonalis, 14; croup, 1; and whooping cough, 1.

Iowa.—Month of January, 1894. The following mortuary report is extracted from the Monthly Bulletin for March:

Clinton.—Scarlet fever, 1; whooping cough, 1; typhoid fever, 1; consumption, 4; pneumonia, 1; cerebro spinal meningitis, 1; meningitis, 1; paralysis, 2; accident, 1. Total deaths, 20. Population, 22,000. Death rate per 1,000, 0.909. For December, 1.4.

Council Bluffs.—Smallpox, 1; consumption, 2; pneumonia, 5; membranous croup (diphtheria), 3; suicide, 1; cholera infantum, 1. Total deaths, 25. Population, 35,000. Death rate per 1,000, 0.74.

December, 0.74.

Boone.—Diphtheria, 2; scarlet fever, 1; typhoid fever, 1; consumption, 1; pneumonia, 1; cancer, 2; accidents, 3. Total deaths, 16. Population, 10,000. Death rate per 1,000, 1.6.

Burlington.—Measles, 1; typhoid fever, 1; meningitis, 3; consumption, 3; pneumonia, 1; paralysis, 1; cancer, 2; accident, 2. deaths, 22. Population, 30,000. Death rate per 1,000, 0.73.

Davenport.—Diphtheria, 2; membranous croup, 2; consumption, 5; pneumonia, 10; la grippe, 2; paralysis, 1; cancer, 2; old age, 2; accident, 2. Total deaths, 54. Population, 34,000. Death rate per 1,000, For December, 1.76.

Des Moines.—Consumption, 10; pneumonia, 12; diphtheria, 5; la grippe, 7; typhoid fever, 5; cerebro spinal fever, 3; malarial fever, 1; cholera infantum, 1; cancer, 5; accident, 4; old age, 3. Total deaths, 90. Population, 75,846. Death rate per 1,000, 1.18. For December, 0.4.

Dubuque.—Membranous croup, 1; scarlet fever, 1; consumption, 5; pneumonia, 1; meningitis, 1; puerperal fever, 1; paralysis, 3; accident, 2; cancer, 1. Total deaths, 36. Population, 40,000. Death rate per 1,000, 0.825. For December, 0.62.

Keokuk.—Consumption, 2; pneumonia, 1; typhoid fever, 1; old age, 1; accident, 2. Total deaths, 16. Population, 20,000. Death rate per 1,000, 0.8. For December, 0.8.

Mason City.—Consumption, 1; spinal meningitis, 1; accident, 1; old age, 1. Total deaths, 4. Population, 5,500. Death rate per 1,000, 0.72.

For December, 0.9.

Ottumwa.—Consumption, 4; pneumonia, 4; typhoid fever, 1; cancer, 1; accident, 2. Total deaths, 22. Population, 17,000. Death rate per 1,000, 1.5. For December, 1.

Oskaloosa.—Pneumonia, 2; dysentery, 1; accident, 2. Total deaths, 10. Population, 7,500. Death rate per 1,000, 1·3. For December, 0·06.

MASSACHUSETTS—Brockton.—Month of February, 1894. Estimated population, 30,000. Total deaths, 46, including 9 from phthisis pulmonalis.

Worcester.—Month of February, 1894. Estimated population, 98,000. Total deaths, 146, including phthisis pulmonalis, 13; enteric fever, 2; diphtheria, 10; and measles, 3.

MICHIGAN.—Reports to the State board of health, Lansing, from 56 observers indicate that inflammation of kidney, intermittent fever, inflammation of bowels, pleuritis, and consumption increased in area of prevalence. Scarlet fever was reported present during the week at 46 places, diphtheria at 28, enteric fever at 13, measles at 13, and smallpox at 2 places.

MINNESOTA—Minneapolis.—Month of February, 1894. Estimated population, 223,700. Total deaths, 151, including phthisis pulmonalis, 19; enteric fever, 2; scarlet fever, 9; and diphtheria, 7.

TENNESSEE—Nashville.—Month of February, 1894. Estimated population, white, 54,595; colored, 33,159; total, 87,754. Deaths, white, 56; colored, 49; total, 105, including phthisis pulmonalis, 16; scarlet fever, 1; croup, 2; and whooping cough, 2.

Washington—Seattle.—Month of February. Estimated population, 60,000. Total deaths, 32, including phthisis pulmonalis, 6; diphtheria, 2.

WISCONSIN—Milwaukee.—Month of February, 1894. Estimated population, 265,000. Total deaths, 335, including phthisis pulmonalis, 35; enteric fever, 8; scarlet fever, 4; diphtheria, 10; croup, 8; measles, 23; and whooping cough, 2.

FOREIGN.

[Reports received from the U. S. consuls through the Department of State and from other sources.]

BRAZIL.

Yellow fever at Rio de Janeiro.

RIO DE JANEIRO, February 13, 1894.

SIR: I have the honor to inclose report for week ending February 10, 1894. There were 221 deaths from yellow fever, an increase over the previous week of 34, and as the hot weather still continues, I look for a

further augmentation of the number of deaths.

Yellow fever.—This disease appears to be confined principally to the shore and the unprotected classes, though it has appeared aboard a number of foreign ships during the week, and aboard one American ship, the Robert Dixon, of New York, whose captain is now in a precarious condition, also two of his men have been sent to the hospital. I am happy to state that Dr. Van Reypen, the medical director of the U. S. fleet here, informs me that as yet no case has appeared on the ships under his charge, due, perhaps, to the almost absolute nonintercourse with the shore.

The heat here is very oppressive, and there were 104 deaths from all

causes yesterday.

Bills of health.—I declare on all bills of health that no disinfection

can be made here at present and that yellow fever is rife.

Ships inspected.—The following ships were inspected during the week: February 9—steamship Salerno, German, for New York, and steamship Sirius, English, for New York. February 12—Steamship Etona, English, for New York.

Very respectfully, yours,

R. CLEARY, M. D., Sanitary Inspector, M. H. S.

To the Supervising Surgeon-General M. H. S.

RIO DE JANEIRO, February 20, 1894.

SIR: I have the honor to transmit report for week ended February 17, 1894:

The yellow fever epidemic is steadily increasing; this week there were 340 deaths from that disease as against 221 in the week before. Deaths from all causes have been 721, whilst the previous week only had 525. The fever is bad on the shipping. The Amy, the Crowell, the Josephine, and the Agate, all American ships, have had cases as well as the Robert Dixon. There has only been 1 case as far as I know on the American fleet. Dr. Bright, of the Newark, communicated to me that Paymaster's Yeoman Hancock had been sent to the hospital, and asked me to look after him. He is doing well and will probably recover. The Newark went out to Montevideo.

As I have before communicated, proper disinfection is impossible here

at present, so I call attention to the fact in all bills of health.

Since last report I have inspected the following named ship: February 16—American barkentine *Good News*, from and for Baltimore.

Yours, respectfully,

R. CLEARY, M. D., Sanitary Inspector, M. H. S.

CANADA.

Epidemic of measles at Coaticook.

Under date of March 20, the U.S. consul at Coaticook reports that during the two weeks ended March 17 there were 450 cases of measles and 2 deaths therefrom in that town (population 2,500). The epidemic is of a mild type. The first case appeared March 5.

One case of smallpox near Burgessville, Ontario.

Office Provincial Board of Health, Toronto, March 10, 1894.

It becomes my duty to inform you that 1 case of smallpox exists near Burgessville, Oxford County, province of Ontario, in the person of a young man coming from Chicago. The origin of the disease is Chicago. Compulsory vaccination is enforced in the county.

Peter H. Buga, Secretary.

MEXICO.

Smallpox in New Laredo and typhus fever in San Luis Potosi.

LAREDO, TEX., March 6, 1894.

SIR: I have the honor to state that 2 cases of smallpox have just been found in the town of New Laredo, Mexico, opposite this place. As soon as the parties knew they were discovered, fearing quarantine, they escaped to a ranche a few miles out of town, still on the Mexican side of the river. This confirms the truth of my statement of February 2, that smallpox was advancing toward this border.

Many cases of typhus fever are also reported at San Luis Potosi.

Very respectfully, your obedient servant,

J. P. ARTHUR, M. D.

NOVA SCOTIA.

Arrival of immigrants at Halifax.

HALIFAX, March 12, 1894—I have the honor to inform you of the arrival at this port of the steamship *Vancouver* from Liverpool, England, with 63 emigrants for the United States, on Sunday, 11th instant. The baggage of the passengers has been disinfected by steam and sulphur; all well.—Darius H. Ingraham, *U. S. Consul-General*.

HALIFAX, March 16, 1894.—I have the honor to inform you of the arrival at this port of the steamship *Pomeranian* from Liverpool, England, with 21 emigrants for the United States. Baggage disinfected by steam and sulphur; all well.—Darius H. Ingraham, *U. S. Consul-General*.

Disinfection of baggage of immigrants at Halifax.

HALIFAX, March 19, 1894.—I have the honor to inclose herein a copy of a letter from the secretary of the Dominion department of agriculture to Dr. Wickwire, health officer at this port, relating to a discontinuance of disinfecting the baggage of certain immigrants.—D. H. INGRAHAM, U. S. Consul-General.

[Inclosure.]

DOMINION OF CANADA,
DEPARTMENT OF AGRICULTURE,
Ottawa, March 14, 1894.

SIR: On the subject of disinfecting immigrants' luggage at the port of Halifax in the present situation, I am directed by the minister of agriculture to inform you that upon a consideration of information communicated to him by the general superintendent of Canadian quarantines, he has decided that the luggage of immigrants coming from the following points, where cholera is still existent, namely: St. Petersburg, the districts of Odessa, Podolia, Poltava, and Kiev, in Russia; also coming from Bohemia, in Austria-Hungary, will be continued to be disinfected by the steam process as at present, such disinfection being discontinued in the case of luggage of immigrants coming from other ports until further orders.

I have the honor to be, sir, your obedient servant,

H. B. SMALL,

Secretary Department of Agriculture.

W. N. WICKWIRE, Esq., M. D. Quarantine Officer, Halifax, Nova Scotia.

STATISTICAL REPORTS.

Australia—New South Wales—Newcastle.—Month of January, 1894. Population, 7,581. Total deaths, 22. No deaths reported from contagious diseases.

Sydney.—Month of December, 1893. Population, 383,283. Total deaths, 575, including enteric fever, 10; scarlet fever, 7; diphtheria, 12; measles, 7; and whooping cough, 2.

CUBA—Havana.—Under dates of March 10 and 17, 1894, the U.S. sanitary inspector reports as follows:

There were 103 deaths in this city during the week ending March 8, 1894. Seven of those deaths were caused by smallpox with approximately 63 new cases, 3 were caused by diphtheria, 1 by enteric fever, 4 by so-called pernicious fever, 7 by chronic entero-colitis, 2 by pneumonia, and 1 by glanders.

During the week ending March 15, 1894, there were 114 deaths in this city. One of those deaths was caused by yellow fever, with approximately 5 new cases; 6 were caused by smallpox, with approximately 52 new cases; 1 was caused by enteric fever, 2 by so-called pernicious fever, 1 by paludal fever, 6 by diphtheria, 1 by glanders, 9 by chronic entero-colitis, and 4 by pneumonia.

FRANCE—Marseilles.—Population, 406,919. Total deaths, 1,272, including smallpox, 3; enteric fever, 7; scarlet fever, 2; diphtheria, 45; measles, 9; and whooping cough, 2.

Roubaix.—Month of February, 1894. Population, 120,000. Total deaths, 182, including smallpox, 1; diphtheria, 9; measles, 3; and whooping cough, 1.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns of England and Wales during the week ended March 3, corresponded to an annual rate of 20.5 a thousand of the aggregate

population, which is estimated at 10,458,442. The lowest mate was recorded in Leicester, viz, 13.8, and the highest in Wolverhampton, viz, 33.1 a thousand.

London.—One thousand seven hundred and forty-eight deaths were registered during the week, including smallpox, 1; measles, 47; scarlet fever, 20; diphtheria, 59; whooping cough, 72; enteric fever, 12; and diarrhea and dysentery, 14. The deaths from all causes corresponded to an annual rate of 21·0 a thousand. In greater London 2,194 deaths were registered, corresponding to an annual rate of 19·2 a thousand of the population. In the "outer ring" the deaths included smallpox, 1; diphtheria, 15; whooping cough, 8; and measles, 10.

Ireland.—The average annual death rate represented by the deaths registered during the week ended March 3, in the 16 principal town districts of Ireland was 27·4 a thousand of the population. The lowest rate was recorded in Sligo, viz, 5·1, and the highest in Galway, viz, 49·1 a thousand. In Dublin and suburbs 202 deaths were registered, including measles, 2; whooping cough, 7; enteric fever, 3; and typhus fever, 1.

Scotland.—The deaths registered in 8 principal towns during the week ended March 3, corresponded to an annual rate of 19.6 a thousand of the population, which is estimated at 1,447,500. The lowest mortality was recorded in Edinburgh, viz, 17.3, and the highest in Dundee, viz, 25.2 a thousand. The aggregate number of deaths registered from all causes was 558, including smallpox, 2; scarlet fever, 11; diphtheria, 11; whooping cough, 34; and "fever," 5.

Guiana—Paramaribo.—Month of December, 1893. Population, 29,231. Total deaths, 80. No deaths reported from contagious diseases.

JAMAICA—Kingston.—Month of February, 1894. Population, 34,314. Total deaths, 102, including phthisis pulmonalis, 10.

St. Helena.—Four weeks ended February 10, 1894. Population, 3,877. Total deaths, 5. No deaths from contagious diseases.

SPAIN—Barcelona.—Month of December, 1893. Total deaths, 780, including phthisis pulmonalis, 94; enteric fever, 38; diphtheria, 44; and smallpox, 36.

SWITZERLAND—Lucerne.—Month of January, 1894. Population, 21,778. Total deaths, 47. No deaths reported from contagious diseases.
