# ABSTRACT OF SANITARY REPORTS.

Vol. IX.

WASHINGTON, D. C., FEBRUARY 2, 1894.

No. 5.

TREASURY DEPARTMENT, U. S. Marine-Hospital Service.—Published in accordance with act of Congress approved February 15, 1893.

# UNITED STATES.

[Reports to the Supervising Surgeon-General M. H. S.]

Smallpox in Chicago.

CHICAGO, January 24, 1894.—Your communication of January 15, asking for information regarding smallpox in Chicago at the present time, received. We have had since January 1, 128 cases of smallpox, with 22 deaths. We have at the present time about 100 cases in our smallpox hospital. In 1893 we had 136 cases, 64 of which occurred in December, with 21 deaths for the year. With one exception none of those who died had ever been vaccinated. The exception was a man 38 years old, vaccinated in infancy, and who had a very dim mark.—Arthur R. Reynolds, Commissioner of Health.

# Smallpox at Nashville.

NASHVILLE, January 27, 1894.—I have the honor to report 3 new cases of smallpox just discovered in one of the infected houses of previous cases. They were promptly removed to the pest-house. One of the cases previously reported died, the rest are recovering.—RICHARD DOUGLAS, Acting Assistant Surgeon, M. H. S.

Delegates to the International Sanitary Conference at Paris.

In response to an invitation from the Government of France to send delegates to the International Sanitary Conference which met at Paris January 24, 1894, certificates as delegates on the part of the United States to attend this conference were given by the President to Dr. Stephen Smith, of New York; Dr. E. O. Shakespeare, of Philadelphia; and Surgeon Preston H. Bailhache, U. S. M. H. S. The delegates sailed from New York January 17, 1894.

# FOREIGN.

[Reports received from the United States consuls through the Department of State and from other sources.]

#### CANARY ISLANDS.

The cholera epidemic at Teneriffe.

Under date of January 4, 1894, the U. S. consul at Teneriffe forwards the following reports of cholera cases and deaths during the five week's ended December 23, 1893: Week ended November 25, 1893, 200 cases, 67 deaths; week ended December 2, 1893, 470 cases, 63 deaths; week ended December 9, 1893, 190 cases, 51 deaths; week ended December 16, 1893, 107 cases, 21 deaths; week ended December 23, 1893, 20 cases, 8 deaths; total, 987 cases, 210 deaths. Present officially estimated population 22,000. The consul further reports that no cases of cholera have occurred since December 22, 1893.

#### GIBRALTAR.

## Quarantine notice.

GIBRALTAR, January 11, 1894.—The board of health this day decided to remove all quarantine restrictions on arrivals from Hamburg, Tripoli, and Salonica, in cases of arrivals with clean bills of health and health on board.—By order, John C. King, Secretary to the Board of Health.

#### MEXICO.

Smallpox on the steamship Seguranca from New York.

U. S. CONSULATE, Vera Cruz, Mexico, January 19, 1894.

SIR: The Ward Line steamship Seguranca arrived here on the 16th instant from New York, via Havana and Progreso, with 2 cases of small-pox on board. The day after arrival more cases developed, until there were 30, though none very dangerous. The sick are all on the island of Sacrificios, about 3 miles from this city. The crew and passengers remaining on the vessel have all been vaccinated, the vessel fumigated, and no new cases having appeared the passengers will be allowed to land to-day, forty eight hours having elapsed since the last person was stricken.

The disease appeared after the vessel left Havana, the fireman being the first to fall ill, and this class seems to be the only one who have been attacked, with the exception of 2 steerage passengers (Chinamen).

As the Seguranca will very likely arrive in New York in from fifteen to twenty days, I would advise disinfection of the vessel, as the quarantine station here is, in my opinion, poorly equipped with disinfecting apparatus.

I am, sir, respectfully, yours,

CHARLES SCHAEFER, U. S. Consul.

To the Supervising Surgeon-General, M. H. S.

#### NOVA SCOTIA.

## Arrival of immigrants at Halifax.

Steamship Vancouver, arrived January 28, with 22 immigrants for the United States, all well. Baggage disinfected with steam and sulphur.—D. H. INGRAHAM, Consul-General.

#### RUSSIA.

## Cholera at St. Petersburg.

Under date of January 10, 1894, the U. S. consul at St. Petersburg reports that during the week ended December 30, 1893, there were 188 cases of cholera and 85 deaths from the same disease in that city. He writes: "The cholera is still very prevalent in the interior towns and villages, as also in nearly all the southern districts. As yet there has been no very cold weather in the Empire."

#### Cholera in the Caucasus.

U. S. CONSULATE, Batoum, Russia, December 30, 1893.

SIR: I have the honor of transmitting herewith official returns published during past week concerning Asiatic cholera in the Caucasus:

Place.	Date.	Cases.	Deaths.
Stavropol (government) Erivan (government) Erivan (town) Poti (town)	December 10-16 December 10-16	31 8	11 14 4 1

I am, sir, your most obedient servant,

JAMES C. CHAMBERS, U. S. Consul.

To the Hon. JOSIAH QUINCY,
Assistant Secretary of State.

#### TURKEY.

### [Report No. 88.]

Cholera and influenza in Constantinople—Report of the U.S. Sanitary Commission.

At the last sitting of the International Sanitary Commission it was decided that hereafter it will be stated on the bills of health given at Constantinople that there have been but few cases of cholera in Constantinople during the past week. In fact, since the beginning of the year 1894, 55 cholera cases, of which 28 were fatal, have been registered. Cholera is undoubtedly dying out.

There now exists an epidemic of influenza which is raging fiercely. Hardly a house can be found without a patient suffering from influenza. It is true that the epidemic of the present year is not so fatal as the first epidemic which raged during the winter of 1890–91. Besides this epidemic there are a few cases of typhoid fever and mumps.

SPIRIDION C. ZAVITZIANO.

CONSTANTINOPLE, January 12, 1894.

#### TURKEY IN ASIA.

The cholera epidemic in Mesopotamia officially declared at an end.

U. S. CONSULATE, Bagdad, December 21, 1893.

SIR: The cholera epidemic in Mesopotamia was this day officially declared ended. This, as in fact all official information here, is unreliable, and admitted to be so by the sanitary inspector.

I shall prepare a full history of this year's epidemic and forward you

as soon as possible.

I am, sir, your obedient servant,

JOHN C. SUNDBERG, U. S. Consul.

To the Hon. The Secretary of the Treasury.

#### STATISTICAL REPORTS.

AFRICA—Mozambique.—Month of October, 1893. Population, 12,000. Total deaths, 8. No deaths from contagious diseases.

AUSTRALIA—Sydney.—Month of November, 1893. Population, 411,-710. Total deaths, 712, including enteric fever, 5; scarlet fever, 10; diphtheria, 7; measles, 26; and whooping cough, 6.

CUBA—Havana.—Under date of January 27, 1894, the United States sanitary inspector reports as follows:

There were 110 deaths in this city during the week ending January 25, 1894, 1 of those deaths was caused by yellow fever, 3 by smallpox, 3 by paludal fever, 4 by diphtheria. 2 by entero-colitis, and 3 by pneumonia.

France—Nice.—Month of December, 1893. Population, 97,720. Total deaths, 177, including phthisis pulmonalis, 10; enteric fever, 1; smallpox, 2; diphtheria and croup, 7; and whooping cough, 1.

Roubaix.—Month of December, 1893. Population, 114,917. Total deaths, 236, including smallpox, 5; typhus fever, 2; scarlet fever, 3; diphtheria, 13; and measles, 2.

St. Etienne.—Two weeks ended January 5, 1894. Population, 133,443. Total deaths, 125, including smallpox, 1; enteric fever, 3; scarlet fever, 1; and diphtheria, 1.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns of England and Wales during the week ended January 13 corresponded to an annual rate of 28.6 a thousand of the aggregate population, which is estimated at 10,458,442. The lowest rate was recorded in Gateshead, viz, 19.5, and the highest in Norwich, viz, 60.2 a thousand.

London.—Two thousand four hundred and sixty-two deaths were registered during the week, including smallpox, 1; measles, 65; scarlet fever, 26; diphtheria, 55; whooping cough, 107; enteric fever, 15; and diarrhea and dysentery, 12. The deaths from all causes corresponded to an annual rate of 29.5 a thousand. In greater London 3,147 deaths were registered, corresponding to an annual rate of 27.6 a thousand of the

population. In the "outer ring" the deaths included diphtheria, 15; whooping cough, 29; scarlet fever, 4; and measles, 6.

Ireland.—The average annual death rate represented by the deaths registered during the week ended January 13 in the 16 principal town districts of Ireland was 36·7 a thousand of the population. The lowest rate was recorded in Lurgan, viz, 4·6, and the highest in Drogheda, viz, 52·7 a thousand. In Dublin and suburbs 285 deaths were registered, including typhus fever, 1; measles, 7; whooping cough, 6; and enteric fever, 2.

Scotland.—The deaths registered in 8 principal towns during the week ended January 13 corresponded to an annual rate of 3.8 a thousand of the population, which is estimated at 1,447,500. The lowest mortality was recorded in Greenock, viz. 20.0, and the highest in Perth, viz, 37.6 a thousand. The aggregate number of deaths registered from all causes was 679, including scarlet fever, 5; diphtheria, 8; whooping cough, 48; and measles, 2.

Hull.—Two weeks ended December 30, 1893. Population 208,639. Total deaths, 187, including enteric fever, 1; scarlet fever, 1: and whooping cough, 8.

Jamaica—Kingston.—Month of December, 1893. Total deaths, 96, including 11 from phthisis pulmonalis and 1 from diphtheria.

Martingue.—Four weeks ended December 30, 1893. Population, 41,100. Total deaths, 62. No deaths from contagious diseases.

St. Helena.—Four weeks ended December 16, 1893. Population, 4,116. Total deaths, 3. No deaths from contagious diseases.

SWITZERLAND—*Lucerne*.—Month of December, 1893. Population, 21,778. Total deaths 3, including 1 from diphtheria.

West Indies—*Turks Islands*.—Three weeks ended January 6, 1894. Population, 4,744. Total deaths 12. No deaths from contagious diseases.
