

ABSTRACT OF SANITARY REPORTS.

VOL. X.

WASHINGTON, D. C., JUNE 28, 1895.

No. 26.

TREASURY DEPARTMENT, *United States Marine-Hospital Service*.—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

Relative to Entry of Vessels at St. Marys, Ga., and Points on the Satilla River.

WASHINGTON, D. C., *June 14, 1895.*

SIR: In view of the recommendations made by Passed Assistant Surgeon L. L. Williams, through the Supervising Surgeon-General United States Marine-Hospital Service, and the lack of quarantine facilities at St. Marys, Ga., you are directed to require all vessels from foreign ports and vessels from foreign ports via domestic ports requiring disinfection, bound for St. Marys, Ga., or points on the St. Marys River or the Satilla River, to produce a certificate of pratique from either the United States quarantine station at Brunswick, Ga., or the State quarantine station at Fernandina, Fla., previous to entry.

You will notify the pilots accordingly.

Respectfully, yours,

S. WIKE,
Acting Secretary.

COLLECTOR OF CUSTOMS, *Brunswick, Ga.*

BRUNSWICK, GA., *June 22, 1895.*

SIR: I have the honor to say in reply to your letter of June 14, 1895, giving directions for the inspection of vessels from foreign ports bound to St. Marys, Ga., on the Satilla River, that said pilots have been notified and the law will be enforced. I am of the opinion that the notification to the pilots will obviate the appointment of a special inspector at St. Marys. Should it not do so I will advise you at once.

Respectfully,

THOMAS W. LAMB,
Collector of Customs.

[Reports to the Supervising Surgeon-General M. H. S.]

Decrease of Typhoid Fever at Evansville, Ind.

EVANSVILLE, IND., *June 20, 1895.*

SIR: I have the honor to report the considerable abatement of the typhoid epidemic in this city, as will appear from the following official

figures: For the week ended June 12, cases reported, 31; for the week ended June 19, cases reported, 11.

Very respectfully,

P. M. CARRINGTON,
Passed Assistant Surgeon, M. H. S.

One New Case of Smallpox at Nogales, Ariz.

NOGALES, ARIZ., June 17, 1895.

SIR: I have the honor to report the death of 1 patient from smallpox and 4 new cases of the disease, in very mild form, in Nogales, Ariz.

* * *

Very respectfully,

W. F. CHENOWETH,
Sanitary Inspector, M. H. S.

One Case of Smallpox at Covington, Ind.

INDIANAPOLIS, June 22, 1895.

SIR: I have to report that since my last communication 1 case of smallpox has appeared at Covington. The origin of the disease is Champaign, Ill. The patient is quarantined, and the danger of spreading is not great.

Yours, truly,

C. N. METCALF,
Secretary.

One case of Smallpox in Pittsburg.

PITTSBURG, PA., June 25, 1895.

SIR: I have the honor to inform you of the presence of smallpox in this city in the person of a negro man recently arrived from Charlottesville, W. Va. So far as I am informed, this man has been able to give no definite history of exposure at any known focus of the disease. The very efficient health department authorities have acted promptly in isolating the case and in disinfecting the premises from which he was taken, vaccinating all exposed persons.

Respectfully,

EUGENE WASDIN,
Passed Assistant Surgeon, M. H. S.

Smallpox in the United States as reported to the Supervising Surgeon-General Marine-Hospital Service, April 1 to June 25, 1895.

Current Quarantine Measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, June 6, 1895.]

Greece.—According to advices of May 21 the twenty-four hours' quarantine of observation against Constantinople and its vicinity is discontinued.

Malta.—The quarantine ordered May 4 against Constantinople and the ports on the Sea of Marmora was suspended by proclamation of the governor on May 18.

Japan.—In view of the outbreak of cholera among the Japanese troops occupying Chinese territory, especially in the vicinity of Kinschu and the Pescadores Islands, the minister of the interior has ordered that

all vessels arriving from those localities, or points beyond those localities, either by direct route or by way of intermediate ports, shall be subject to the regulations for vessels arriving from a cholera port. These regulations require disinfection at Yokohama, at Kanagawa-Ken, at Kobe, at Hiogo-Ken, at Shimosiki, at Yamanguchi-Ken, at Nagasaki, at Nagasaki-Ken, and at Moji, at Fukuoka. The same official order requires all vessels before entering the ports of Kobe, Wadanomisaki, and Yokohama to undergo inspection by the proper authorities.

The consul-general of the German Empire at Yokohama has issued similar regulations for German vessels. German consuls at the Chinese ports and at Singapore have been so notified.

Argentina.—By official order of May 6 Brazilian ports, with the exception of Santos, have been declared clean. Vessels arriving from said ports shall be admitted after thorough disinfection.

Uruguay.—The strict quarantine formerly enforced against Rio de Janeiro and Santos was modified April 25 to a quarantine of seven days. Quarantine against vessels from other Brazilian ports on the Atlantic seaboard is replaced by disinfection. Passenger steamers from Rio de Janeiro or Santos, which have stopped at other Brazilian ports, and which have no case of sickness on board, shall be subject only to a quarantine of detention, provided a period of ten days shall have elapsed since departure from the original port. The duration of said period of detention shall be determined by the local authorities.

CHINA—Hongkong.—By proclamation of the governor, April 23, immigration and landing of Chinese from Makao and the Island of Hainan is prohibited.

YELLOW FEVER.

Portugal.—By ministerial order of May 25 the port of Manaas was declared clean.

BRAZIL.

Sanitary Report of Rio de Janeiro.

RIO DE JANEIRO, *May 28, 1895.*

SIR: I have the honor to transmit report for week ended May 25, 1895:

In this week there were 14 deaths from *accessio pernicioso*, an increase of 2 over the foregoing week; 23 from yellow fever, a decrease of 7; 4 from smallpox, an increase of 2; 6 from enteric fever, an increase of 3; 2 from measles, an increase of 1; 1 from whooping cough, the same as in the foregoing week; 3 from choleric form enteritis, an increase of 2; 1 from choleric form diarrhea, none in the former week; and none from cholera or choleric form. From all causes there were 343 deaths, a decrease of 15.

Yellow fever.—The deaths from this cause are gradually and steadily decreasing, just as occurred last year; the temperature appears to have little effect. I think we may safely claim that there will be no epidemic this season, though there is enough of the disease to call for great care.

Cholera.—I believe we may consider this disease as no longer a cause of alarm. No cases have been reported, though choleric forms of intestinal diseases continue to be reported in small numbers, which may or may not mean anything. In the interior all the infected points are reported free of the disease, and sanitary measures against its advance

are no longer considered necessary or practiced. The authorities here have declared (May 25) that ships leaving Buenos Ayres after the 19th instant and Montevideo after the 22d shall not be subject to quarantine, but will be subject to a strict sanitary inspection.

Since last report the following-named ships have been inspected or received bills of health from this office: May 21, steamship *Salerno*, German, for New York, from Santos; May 21, steamship *Egyptian Prince*, British, for New York, from Santos; May 24, steamship *Sorrento*, German, for New York, from Santos; May 25, bark *S. R. Bearce*, American, for Barbados, West Indies; May 25, barkentine *White Wings*, American, for Baltimore, Md.

Respectfully, yours,

R. CLEARY, M. D.,
Sanitary Inspector, M. H. S.

MEXICO.

Smallpox in Minas Prietas, Sonora.

NOGALES, ARIZ., June 17, 1895.

SIR: * * * Inclosed you will find a certificate from a creditable physician, who has just arrived from Minas Prietas, Sonora, stating that there are from 300 to 400 cases of smallpox at that place, and that no precautions whatever are taken to prevent its spreading. I have, therefore, notified the superintendent that all persons coming from that camp will be detained the usual length of time before being permitted to pass this post.

Very respectfully,

W. F. CHENOWETH,
Sanitary Inspector, M. H. S.

[Inclosure.]

NOGALES, ARIZ., June 17, 1895.

This is to certify that I have just returned from Minas Prietas, and that on the day I left (June 10) there were from 300 to 400 cases of smallpox, and that no means are being used to prevent the spread of it.

H. W. PURDY, M. D.

STATISTICAL REPORTS.

AFRICA—*Mozambique*.—Month of February, 1895. Estimated population, 3,500. Total deaths, 4. No deaths from contagious diseases.

BRITISH COLUMBIA—*Victoria*.—Two months ended May 31, 1895. Estimated population, 20,000. Total deaths, 43. No deaths from contagious diseases.

CUBA—*Havana*.—Under date of June 22, 1895, the United States assistant sanitary inspector reports as follows:

There were 171 deaths in this city during the week ended June 20, 1895. Five of these deaths were caused by yellow fever, with approximately 10 new cases; 3 were caused by enteric fever, 4 by so-called pernicious fever, 16 by enteritis, 5 by dysentery, 8 by smallpox, and 4 by pneumonia.

FRANCE—*St. Etienne*.—Two weeks ended June 5, 1895. Estimated population, 133,443. Total deaths, 106. No deaths reported from contagious diseases.
