ABSTRACT OF SANITARY REPORTS.

Vol. X.

WASHINGTON, D. C., JULY 26, 1895.

No. 30.

TREASURY DEPARTMENT, United States Marine-Hospital Service.—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

Disposition of any Infected Vessel Arriving at the Port of Marblehead, Mass.

TREASURY DEPARTMENT,

Washington, D. C., July 18, 1895.

SIR: Upon the arrival of any infected vessel, or vessel having on board a person suffering from a quarantinable disease, you are directed to notify the Surgeon-General of the Marine-Hospital Service of the fact by telegraph. The vessel itself should be remanded to the Boston Quarantine Station for treatment.

Respectfully, yours,

S. WIKE,

Acting Secretary.

To the Collector of Customs, Marblehead, Mass.

Instructions Concerning Infected Vessels Entering the Port of Apalachicola, Fla., from Infected Ports.

TREASURY DEPARTMENT, Washington, July 20, 1895.

SIR: You are hereby directed, preliminary to entry at your port, to require a certificate of free pratique from the State quarantine station at Pensacola, or Port Tampa, Fla., or the United States quarantine station at Blackbeard Island, Sapelo Sound, Georgia, or Dry Tortugas, for all vessels arriving from ports infected with yellow fever or with quarantinable disease on board.

Respectfully, yours,

33

S. WIKE,
Acting Secretary.

To the Collector of Customs, Apalachicola, Fla.

(595)

The Governor of North Carolina Acknowledges Receipt of Notification that the United States Marine-Hospital Service has Assumed Control of Quarantine Station at Southport, N. C.

STATE OF NORTH CAROLINA, EXECUTIVE DEPARTMENT, Raleigh, July 20, 1895.

SIR: I have the honor to acknowledge the receipt of your favor of the 18th instant, notifying me that, at the request of the State board of health, the Marine-Hospital Service had assumed charge of the quarantine service at Southport, in accordance with acts of Congress approved February 15, 1893, August, 1894, and March, 1895, etc.; also, that sanitary inspectors had been appointed for the towns of Beaufort, Newbern, and Washington, N. C., all of which I most emphatically indorse and approve. I consider at the present time it is very necessary that the State should be protected by a quarantine service, and the action of the Government in assuming control and establishing a quarantine station at Southport has my hearty approval.

I have the honor to be, yours, very truly,

ELIAS CARR, Governor of North Carolina.

To the Supervising Surgeon-General M. H. S.

[Reports to the Supervising Surgeon-General Marine-Hospital Service.]

One Case of Smallpox at Evansville, Ind.

EVANSVILLE, IND., July 18, 1895.

SIR: I have the honor to report that a river man (colored roustabout) applied at the Marine-Hospital office yesterday for treatment. He had a well developed case of smallpox. The board of health was immediately notified, and they transferred him to the pesthouse.

Very respectfully,

P. M. CARRINGTON, Passed Assistant Surgeon, M. H. S.

Smallpox at Villa Ridge, Ill.

CAIRO, ILL., July 20, 1895.

SIR: After a number of conflicting reports, this office is in possession of reliable information of some 5 cases of smallpox at Villa Ridge, Pulaski County, Ill., a village about 12 miles from this station. So far as can be learned, there has been but 1 fatal case, the first one discovered, in the person of a tramp taken from a box car of a freight train. It is reported that all of the cases are isolated, and no spread of the disease is apprehended.

Very respectfully, your obedient servant,

James M. Gassaway, Surgeon, M. H. S. Smallpox and Diphtheria in Pennsylvania.

STATE BOARD OF HEALTH, Philadelphia, July 17, 1895.

SIR: The smallpox status in this State is as follows: Philadelphia, number of cases reported since May 29, 1895, 25; number of deaths reported since May 29, 1895, 5. At Pittsburg, Allegheny County, 1 case; patient came from West Virginia; removed to municipal hospital and recovered. The number of cases of diphtheria reported in Philadelphia since May 29, 1895, has been 429; number of deaths. 153. One fatal case of cerebro-spinal meningitis is reported in Philadelphia.

Yours, very truly,

BENJN. LEE, Secretary.

One New Case of Smallpox in Nogales, Ariz.

NOGALES, ARIZ., July 15, 1895.

SIR: I have the honor to report 1 new case of smallpox in Nogales, Ariz. * * *

Very respectfully,

W. F. CHENOWETH, Sanitary Inspector, M. H. S.

Status of Cholera Epidemic.

RUSSIA.—Cholera cases and deaths are reported as follows to the medical department in the Government of Volhynia: From May 12 to 18, 43

cases, 17 deaths; from May 19 to 25, 16 cases, 9 deaths.

Turkey.—According to advices of June 12 the cholera epidemic at Tarsus, which since May 23 has numbered 164 cases and 118 deaths, passed its maximum on June 3. On June 11, 52 cases were reported in villages in the vicinity. In Adana, on the same day, 8 cases were observed. In Mersina, up to the present time, 3 cases in all have been observed. The last occurred May 31.

EGYPT.—Three cholera deaths occurred on board two pilgrim vessels on June 17 and 18 at the quarantine station of El Tor. In one of these

cases cholera was verified by bacteriological test.

Current Quarantine Measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, July 3, 1895.]

AUSTRIA.—At a recent conference held at the Imperial ministry of the interior an understanding was reached by the Russian and Austro-Hungarian representatives with regard to the regulation of traffic on the Austro-Russian frontier in time of cholera outbreaks. It was agreed, in view of the facts in regard to the recent cholera epidemic in Russia and Galicia, to protect the Austrian dominions from cholera invasion by restrictions which shall operate as a virtual suspension of commercial intercourse on the frontier during a cholera epidemic.

Russia.—According to official advices of June 17, 1895, the regulations requiring vessels entering Russian ports to display a quarantine flag when such vessels carry cholera-infected articles, cholera patients, or cholera corpses, or are suspected of being infected, was extended June 9, 1895, to include all vessels arriving from an infected port. Such vessels shall not be permitted to hold intercourse with the shore until they have been inspected by the proper medical authorities.

Turkey.—Four physicians were sent, June 10, from Constantinople to Messina, commissioned to carry out sanitary measures. Two pro-

ceeded to Adana and two to Tarsus.

GREECE.—By royal proclamation of May 31, arrivals from ports situated between Alexandretta and Cape Anamur, are declared subject to a five-days' quarantine of observation at all Greek ports which they may enter.

Brazil.—By ministerial proclamation of May 24, all ports in Argentina and Uruguay are declared clean. In accordance therewith, all vessels arriving from ports in Argentina and Uruguay shall be admitted, after thorough medical inspection, to free pratique in all ports of Brazil.

BRAZIL.

Sanitary Report of Rio de Janeiro.

RIO DE JANEIRO, June 25, 1895.

SIR: I have the honor to transmit report for week ended June 22, 1895. There were 9 deaths from accesso pernicioso, a decrease of 3; 12 from yellow fever, a decrease of 4; 21 from smallpox, an increase of 12; 3

from enteric fever, a decrease of 2, and 1 from measles. From all causes there were 345 deaths, an increase of 29 over the foregoing week.

Cholera.—I think we may safely leave this disease out of account, as it appears to have entirely disappeared from the lists; not even are the cases of diarrhea and enteritis any longer called *choleriform*.

Yellow fever.—This disease is declining gradually, as it always does at

this season of the year, and need cause no alarm at present.

Smallpox.—This disease is slowly increasing as the winter advances. I have heard of no cases among the shipping, though I would advise additional caution, and do warn the shipmasters I see to protect their crews by vaccination. Good lymph can be obtained here from the municipal institution. On the whole, the health of the port may be considered good, the higher mortality being due to diseases of the air passages, which are prevalent always during the fall and winter months.

Since last report the following named ships have been inspected or received bills of health from this office: June 19, steamship *Holbein*, British, for New Orleans from Santos; steamship *Wordsworth*, Belgian, for New York. June 20, steamship *Manitoba*, British, New York, from Buenos Ayres; steam bark *Severn*, British, for Baltimore, Md.

Respectfully, yours,

R. CLEARY, M. D., Sanitary Inspector, M. H. S.

CENTRAL AMERICA.

Sanitary Condition of Central American Ports.

Belize, B. H., July 12, 1895.

SIR: All coast points in this colony as well as interior towns, and also Livingston, Santo Tomas, and Port Barrios, Guatemala; Puerto Cortez, Spanish Honduras; and this port continue free from infectious or contagious diseases.

Very respectfully, yours,

J. L. Posey, M. O. La. State Board of Health.

CUBA.

Yellow Fever Prevailing in Cuban Towns.

Reliable information has been received to the effect that yellow fever prevails at Puerto Principe, Gibara, Holquin, and Santa Cruz del Sur.

Increase of Yellow Fever in Santiago de Cuba.

Under date of July 13, 1895, the United States consul reports as follows:

The death rate has increased again, and the sick in town can be counted by hundreds. I have been unable to go to Manzanillo and Santa Cruz as yet, owing to the unhealthy condition of this place, where I have to keep constant watch to prevent the importation of contagious diseases into the United States; also on account of a recent order of its government preventing passengers landing except at their port of destination.

Increase of Yellow Fever in Havana.

HAVANA, CUBA, July 19, 1895.

Yellow fever in Havana, within the last few days, markedly increasing among civilians.

> BURGESS. United States Sanitary Inspector.

Norwegian Bark Midas left Havana for South Atlantic Quarantine with 4 Suspicious Cases of Fever Aboard.

HAVANA, CUBA, July 10, 1895.

SIR: I have had the honor on this date of wiring you as follows:

"Midas, Norwegian bark, Tuesday, Sapelo, had 4 cases suspicious fever since Saturday, 6th.'

The Norwegian bark Midas, which sailed for Sapelo Quarantine Station on Tuesday, the 9th instant, for a load of lumber, entered this port June 21 from Liverpool, England, with a cargo of coke, and discharged at and sailed from East Regla (Barrios' wharf), considered a fairly healthy place. On the morning of Saturday, the 6th instant, 2 of her men were taken ill, and during the following afternoon and night 2 They were all taken in the same way—with headache, backache, and pain in the limbs, but with no pronounced premonitory chill. temperature soon ran up to 103° to 103½°, and gradually declined, so that in 2 of them it was nearly normal on the third day, and in the other 2 it was about 100° on the day of sailing, or third day. was no particular gastric irritability or pains, no icterus, and in only 2 cases was there any suspicion of even slight albuminous cloudiness in The third day of the attack, or the day they left, they were all apparently rapidly convalescing, but, of course, the cases could be followed no further. I regarded the cases as sufficiently suspicious of a very mild form of yellow fever, acclimating fever perhaps, to justify me in telegraphing you.

The vessel carried with her sand and earth ballast, which was taken

in at Liverpool, and she was only fairly clean. Very respectfully, your obedient servant,

D. M. BURGESS,

United States Sanitary Inspector, M. H. S.

WASHINGTON, July 10, 1895.

Dr. Geddings, U. S. M. H. S.,

Care A. A. Surgeon Kenan, Darien, Ga.:

Norwegian bark Midas, Tuesday, Sapelo, 4 cases suspicious fever since Saturday, signed Burgess.

WYMAN. Surgeon-General.

DARIEN, GA., July 17, 1895.

Arrived, Midas, 7 days; all well; 4 suspects on full duty entire voyage; no suspicions of yellow fever; preliminary disinfection and ordinary routine as matter of precaution.

GEDDINGS. Passed Assistant Surgeon, M. H. S.

JAPAN.

Cholera at Hiogo.

The following cablegram has been transmitted to this office from the Department of State:

HIOGO, JAPAN, July 20, 1895.

Cholera.

CONNELLY, United States Consul.

MEXICO.

No Yellow Fever in Tampico.

TAMPICO, MEXICO, July 23, 1895.

Perfect health prevails. No yellow fever.

JOHN MAGUIRE, United States Consul.

Smallpox in Nogales and Yellow Fever in other Mexican Cities.

NOGALES, ARIZ., July 9, 1895.

SIR: I have the honor to report 5 new cases of smallpox in Nogales, Sonora, Mexico.

Very respectfully,

W. F. CHENOWETH, Sanitary Inspector, M. H. S.

July 15, 1895.

SIR: I have the honor to report 3 new cases of smallpox in Nogales, Mexico. I have received what I believe reliable information that yellow fever is prevalent in the following cities, viz: Sonsonate and Santa Ana, Salvador; Champerico, Guatemala; Tapachula, and Ocus, State of Chiapa, Mexico. All these cities being on the Pacific coast, passengers pass through here from there via. Guaymas frequently, and from them I have received this intelligence.

Very respectfully,

W. F. CHENOWETH, Sanitary Inspector, M. H. S.

RUSSIA.

Cholera in Russia.

St. Petersburg, July 8, 1895.

In the Government of Volyn, from May 26 to June 22, 1895, there

were 136 cases of cholera, resulting in 40 deaths.

A consultation was held lately in the ministry of foreign affairs between the representatives of Austria-Hungary and Russia, with a view to carrying out the resolutions of the Dresden International Sanitary Conference concerning measures to be adopted in cholera time for the frontier traffic with Russia, based upon the experience obtained during the last cholera epidemics in Russia and Galicia. A complete understanding was arrived at in reference to all measures for the control of cholera, should it arise, in the neighborhood of the Russo-Austrian frontier, and safe-guarding the frontier traffic as far as possible. Further, the Russian Government, fearing that cholera may be carried into Russia

via Vladivostok from Japan, is taking every precaution. Only a few days ago 6 physicians were sent to Vladivostok from the medical department at St. Petersburg, with orders to keep strict watch and use all possible means of protection.

JOHN KAREL, Consul-General.

STATISTICAL REPORTS.

British Columbia—Victoria.—Month of June, 1895. Estimated population, 20,000. Total deaths, 10. No deaths from contagious diseases.

British Honduras—Belize.—Month of June, 1895. Estimated population, 7,948. Total deaths, 13. No deaths from contagious diseases.

CHILE—Autofagasta.—Month of May, 1895. Population 14,000. Total deaths, 40, including 4 deaths from phthisis pulmonalis.

CUBA—Havana.—Under date of July 20, 1895, the United States sanitary inspector reports as follows:

There were 165 deaths in this city during the week ended July 18, 1895. Eighteen of these deaths were caused by yellow fever, with 54 new cases approximately; 3 were caused by enteric fever, 4 by so-called pernicious fever, 1 by paludal fever, 10 by enteritis, 4 by dysentery, 7 by smallpox, and 7 by pneumonia.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns of England and Wales during the week ended July 6 corresponded to an annual rate of 17.5 a thousand of the aggregate population, which is estimated at 10,591,530. The lowest rate was recorded in Croydon, viz, 9.1, and the highest in Liverpool, viz, 24.4 a thousand.

London.—One thousand five hundred and nineteen deaths were registered during the week, including smallpox, 3; measles, 73; scarlet fever, 12; diphtheria, 53; whooping cough, 25; enteric fever, 5; and diarrhea and dysentery, 169. The deaths from all causes corresponded to an annual rate of 16.1 a thousand. In greater London 1,877 deaths were registered, corresponding to an annual rate of 16.2 a thousand of the population. In the "outer ring" the deaths included 21 from measles and 13 from diphtheria.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 6 in the 16 principal town districts of Ireland was 23.5 a thousand of the population. The lowest rate was recorded in Lisburn and Sligo, viz, 0.0, and the highest in Armagh, viz, 35.1 a thousand. In Dublin and suburbs 167 deaths were registered, including enteric fever, 1; scarlet fever, 2; diphtheria, 1; and whooping cough, 1.

Scotland.—The deaths registered in 8 principal towns during the week ended July 6 corresponded to an annual rate of 19.4 a thousand of the population, which is estimated at 1,500,435. The lowest mortality was recorded in Perth, viz, 13.7, and the highest in Greenock, viz, 25.1 a thousand. The aggregate number of deaths registered from all causes

was 560, including smallpox, 1; scarlet fever, 5; measles, 18; diphtheria, 4; and whooping cough, 10.

Jamaica.—Two weeks ended July 6, 1895. Estimated population, 580,804. Total deaths not reported. No deaths from contagious diseases.
