

ABSTRACT OF SANITARY REPORTS.

VOL. X.

WASHINGTON, D. C., AUGUST 30, 1895.

No. 35.

TREASURY DEPARTMENT, *United States Marine-Hospital Service*.—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

[Reports to the Supervising Surgeon-General Marine-Hospital Service.]

Smallpox at Eagle Pass.

EAGLE PASS, TEX., *August 22, 1895.*

Two deaths, 3 new cases; 24 refugees arrived from Torreon last night, 21 of whom convalescent from smallpox.

EAGLE PASS, TEX., *August 23, 1895.*

Two deaths, 3 new cases; nearly all cases confluent.

EAGLE PASS, TEX., *August 24, 1895.*

Two deaths, 4 new cases.

EAGLE PASS, TEX., *August 25, 1895.*

One new case, no deaths.

EAGLE PASS, TEX., *August 26, 1895.*

No new cases, no deaths.

EAGLE PASS, TEX., *August 27, 1895.*

One new case, no deaths * * *

EAGLE PASS, TEX., *August 28, 1895.*

Two new cases, no deaths * * *

G. M. MAGRUDER,
Passed Assistant Surgeon, M. H. S.

Smallpox in Arizona.

NOGALES, ARIZ., *August 15, 1895.*

SIR: I have the honor to report 2 new cases of smallpox in Nogales, Ariz., and that a family of 5 have the disease in Arivaca, Ariz., a mining camp 40 miles west of here near the Mexican border. They have

been isolated and general vaccination practiced. There are 3 new cases in Nogales, Mexico, which latter place has not been entirely free from the contagion of smallpox since the disease became prevalent.

Very respectfully,

W. F. CHENOWETH,
Sanitary Inspector, M. H. S.

No Smallpox in Indiana.

INDIANAPOLIS, IND., August 20, 1895.

We are pleased to announce that there is at present no smallpox in this State.

Yours, truly,

C. N. METCALE,
Secretary State Board of Health.

Smallpox in New Orleans.

NEW ORLEANS, LA., August 23, 1895.

SIR: I have the honor to report that there are now 14 cases of smallpox in the city. The continued prevalence of the disease is due to the fact that nearly all of the recent cases were found by the sanitary inspectors to be among the destitute negro population, who were without medical attendance, and consequently were not reported. In order that all cases may be properly isolated, the police have been directed, at the request of the board of health, to report to the health office all cases of sickness not under the care of a regular physician.

Very respectfully,

HENRY W. SAWTELLE,
Surgeon, M. H. S.

Smallpox in Tennessee.

NASHVILLE, TENN., August 20, 1895.

DEAR DOCTOR: The inclosed is a statement of the occurrence of smallpox in Tennessee from July 15 to August 15.

Very respectfully,

J. BERRIEN LINDSLEY,
Secretary and Executive Officer.

[Inclosure.]

In Memphis, including July 15 to August 15, 8 cases of smallpox have been reported. One of these was a suspected case. Of these, 1 was white and 7 colored; 3 males and 5 females; ages from 17 to 48 years; origin, from other cases, as reported last month; all sent to the hospital for infectious diseases; premises disinfected, and the exposed vaccinated.

Dr. Raymond, county health officer for Shelby County, reports as follows:

July 15.—One case of confluent smallpox at small boathouse 2 miles or more from the city, in the person of a colored female; sent to hospital for infectious diseases.

July 22.—Five cases occurred at Cow Island, 18 miles south of Memphis; 4 males and 1 female, all colored; origin, from DeGarris camp (see July Bulletin); 1 died.

July 24.—Reports 2 more cases of smallpox at Cow Island.

August 6.—Reports 7 other cases at Cow Island.

August 14.—Reports 2 more cases at Cow Island, making the total number of cases at that point, up to date, 16; all colored.

*Smallpox in the United States as reported to the Supervising Surgeon-General Marine-Hospital Service, August 1 to August 29, 1895.**

Reports of States and Yearly and Monthly Reports of Cities.

ALABAMA—*Mobile*.—Month of July, 1895. Estimated population, 31,076. Total deaths, 94, including diphtheria, 1; enteric fever, 2; and phthisis pulmonalis, 13.

CALIFORNIA—*Oakland*.—Month of July, 1895. Estimated population, 60,000. Total deaths, 54, including enteric fever, 2; and phthisis pulmonalis, 3.

ILLINOIS—*Chicago*.—Month of July, 1895. Estimated population, 1,600,000. Total deaths, 2,439, including diphtheria, 69; measles, 14; scarlet fever, 4; smallpox, 3; enteric fever, 36; whooping cough, 14, and phthisis pulmonalis, 187.

IOWA—*Boone*.—Month of July, 1895. Estimated population, 10,000. Total deaths, 3, including 1 from phthisis pulmonalis.

Cedar Rapids.—Month of July, 1895. Estimated population, 24,000. Total deaths, 22, including diphtheria, 1, and phthisis pulmonalis, 4.

Clinton.—Month of July, 1895. Estimated population, 22,000. Total deaths, 22, including enteric fever, 1; whooping cough, 1; and phthisis pulmonalis, 4.

Council Bluffs.—Month of July, 1895. Estimated population, 35,000. Total deaths, 37, including diphtheria, 1; whooping cough, 4; and phthisis pulmonalis, 1.

Creston.—Month of July, 1895. Estimated population, 10,000. Total deaths, 8, including whooping cough, 1; and phthisis pulmonalis, 1.

Dubuque.—Month of July, 1895. Estimated population, 40,000. Total deaths, 63, including phthisis pulmonalis, 9.

Des Moines.—Month of July, 1895. Estimated population, 82,674. Total deaths, 49, including phthisis pulmonalis, 2.

Davenport.—Month of July, 1895. Estimated population, 35,500. Total deaths, 34, including diphtheria, 1; and phthisis pulmonalis, 2.

Keokuk.—Month of July, 1895. Population, 20,000. Total deaths, 23, including 7 from phthisis pulmonalis.

Oskaloosa.—Month of July, 1895. Estimated population, 8,000. Total deaths, 13, including 4 from phthisis pulmonalis.

Ottumwa.—Month of July, 1895. Estimated population, 17,000. Total deaths, 19. No deaths from contagious diseases.

MICHIGAN—Week ended August 17, 1895. Reports to the State board of health, Lansing, Mich., from 61 observers, indicate that typhoid fever increased, and that intermittent fever, influenza, and inflammation of bowels decreased in area of prevalence. Phthisis pulmonalis was reported present during the week at 180 places, enteric fever at 43, scarlet fever at 19, diphtheria at 20, whooping cough at 14, measles at 8, and smallpox at 2 places—Battle Creek and Detroit.

NEBRASKA—*Omaha*.—Month of July, 1895. Population, 140,452. Total deaths, 141, including enteric fever, 1; scarlet fever, 6; whooping cough, 5; and phthisis pulmonalis, 8.

NEW JERSEY—*Hudson County*.—Month of July, 1895. Estimated population, 318,746. Total deaths, 552, including measles, 1; scarlet fever, 2; diphtheria, 12; whooping cough, 6; enteric fever, 7; and phthisis pulmonalis, 48.

PENNSYLVANIA—*York*.—Month of June, 1895. Estimated population, 24,500. Total deaths, 24, including diphtheria, 2; and phthisis pulmonalis, 5.

Month of July, 1895. Total deaths, 19, including enteric fever, 1; and phthisis pulmonalis, 3.

TENNESSEE—*Chattanooga*.—Month of July, 1895. Estimated population, 40,000 (white, 27,000; colored, 13,000). Total deaths, 36, including whooping cough, 1; enteric fever, 3; and phthisis pulmonalis, 2.

Clinton.—Month of July, 1895. Estimated population, 1,198. One death from enteric fever.

Knoxville.—Month of July, 1895. Estimated population, 42,704 (white, 32,704; colored, 10,000). Total deaths, 19 (white, 9; colored, 10), including 3 from phthisis pulmonalis.

Memphis.—Month of July, 1895. Estimated population, 55,923 (white, 28,064; colored, 27,859). Total deaths, 121 (white, 49; colored, 72), including scarlet fever, 1; enteric fever, 3; and phthisis pulmonalis, 14.

Murfreesboro.—Month of July, 1895. Estimated population, 5,000 (white, 3,000; colored, 2,000). Total deaths, 5 (white, 2; colored, 3). No deaths from contagious diseases.

VERMONT—*Burlington*.—Month of May, 1895. Total deaths, 22, including 2 from phthisis pulmonalis.

Month of June, 1895. Total deaths, 14, including 2 from phthisis pulmonalis.

Month of July, 1895. Total deaths, 24, including enteric fever, 1; and phthisis pulmonalis, 2.

AUSTRIA-HUNGARY.

Cholera in Galicia.

VIENNA, AUSTRIA, August 27, 1895.

Cholera in Galicia.

MAX JUDD,

United States Consul-General.

BRAZIL.

Sanitary Report of Rio de Janeiro.

RIO DE JANEIRO, July 2, 1895.

SIR: I have the honor to transmit report for week ended June 29, 1895. There were 6 deaths from *accessio pernicioso*, a decrease of 3; 21 from yellow fever, an increase of 9; 25 from smallpox, an increase of 4;

1 from beriberi, none in the foregoing week ; 3 from enteric fever, the same as before ; and 1 from measles, the same as in the foregoing week. From all causes there were 319 deaths, being a decrease of 26.

The health of the port continues more or less normal for the season of the year, yet in spite of the unusually cool weather there was an increase in the number of deaths from yellow fever. Smallpox is gradually increasing and it was to be supposed that with the low temperature the increase would have been greater. On the 26th of June a telegram was received here from Mogy das Cruzes stating that there were many cases of smallpox at that place, a station on the Sao Paulo Railway, some two hours south of that town. The authorities here at once sent duly provided vaccinators to the following-named stations on the railway between Mogy das Cruzes and Rio de Janeiro, viz, Meyer, Sao Christovao, Riachuelo, Engenho de Dentro, and Cascadinha, and also took due precautions as to isolation, disinfection, and vaccination at the infected station.

As yet the disease has not appeared amongst the shipping at this port, but, as well as yellow fever, seems mostly confined to the "estalagens," which are agglomerations of small habitations in the centers of the city squares, crowded with the lowest class of the population.

Since my last report bills of health were given to the following-named ships, which were inspected : June 25, American bark *Swallow*, for New Bedford, Mass ; June 26, Belgian steamship *Leibnitz*, for New York from Santos.

Respectfully, yours,

R. CLEARY, M. D.,
Sanitary Inspector, M. H. S.

CENTRAL AMERICA.

Sanitary Reports of Central American Seaports.

NEW ORLEANS, *August 22, 1895.*

SIR: Inclosed I send you latest reports from the medical officers of this board of health stationed in Central and South America. * * *

Very respectfully,

S. R. OLLIPHANT, M. D.,
President State Board of Health.

PORT LIMON, COSTA RICA, *August 15, 1895.*

* * * No infectious or contagious diseases exist at Port Limon or surrounding country.

Very respectfully,

C. W. KNIGHT, M. D.

LA CEIBA, SPANISH HONDURAS, *August 13, 1895.*

* * * The health of Ceiba is good, and there is neither infectious nor contagious disease in this place or in the places with which we have communication.

Very respectfully,

JNO. SEAY, M. D.

BOCAS DEL TORO, COLOMBIA, *August 8, 1895.*

* * * Bocas del Toro and the adjacent country are free from diseases of a contagious or infectious character.

W. B. BONSALE, M. D.

BLUEFIELDS, NICARAGUA, *August 11, 1895.*

* * * Letters from merchants both in Hamburg and New York reached here a few days ago stating that they would ship no more goods to Bluefields on account of there being yellow fever there. To this the United States consul and myself have given sworn certificates denying it. I keep you posted as to the health of Bluefields, and I ought to know whereof I speak. No other news; no rumors of yellow fever.

FRANK NAILER, M. D.

BLUEFIELDS, NICARAGUA, *August 15, 1895.*

* * * Nothing new; no rumors of yellow fever.

FRANK NAILER, M. D.

BELIZE, BRITISH HONDURAS, *August 16, 1895.*

* * * The ports of Livingston, St. Thomas, and Port Barrios, Guatemala; Port Cortez, Spanish Honduras; and Belize, and towns of this colony are free from infectious or contagious diseases.

J. L. POSEY, M. D.

PUERTO CORTEZ, SPANISH HONDURAS,

August 21, 1895.

* * * There is no change in the state of good health existing in this port and surrounding country since my last communication.

JNO. C. STICKNEY, M. D.

ST. MARTA, COLOMBIA, *August 21, 1895.*

* * * There are no contagious diseases in St. Marta, Sabanilla, Baranquilla, or Cienaga, except a small epidemic of whooping cough among the young children of St. Marta.

Very respectfully,

H. L. METCALFE, M. D.

CUBA.

Reports of Sanitary Inspection of Certain Cuban Towns.

HAVANA, CUBA, *August 23, 1895.*

SIR: I have the honor to inform you that on the 18th instant Dr. Fortun started on another tour of inspection of Cuban ports, and that on the 20th instant he reported from Matanzas that on that date in that city there were 16 cases of yellow fever, 13 of them being in the military hospital, 2 in the private hospital Quinta de Dependientes, and 1 in private practice. There were none in the civil hospital and none in the private hospital El Cosmopolita.

There had been 6 more cases since his former visit (July 21), all in the military hospital, where 1 of them died. Eight of the 13 cases in the military hospital entered that institution the day before (or August 19), and came from the Spanish man-of-war *Conde de Venadito*, which vessel he thought must be infected. She went to sea the same day with several more aboard so suspiciously sick that he thought she would return the following day. The 2 sick in the Quinta de los Dependientes are young Frenchmen who were working in a tannery.

Dysentery, which a short time ago was reigning epidemically, has diminished very much, and there are but a few cases of typhoid fever. No unacclimated troops have been sent there since his former visit.

On the same day (August 20) Dr. Fortun reported from Cardenas that there was then no yellow fever in that city and had been none since his first visit (July 22). There were some cases of dysentery and many of typhoid fever and enteritis.

There had been a total of 61 deaths since July 22, 4 of which were caused by dysentery and 16 by typhoid fever and enteritis. No unacclimated troops had come there during the last month, and there were very few troops there in all.

From Sagua la Grande, August 21, he reports but 1 case of yellow fever in that city since July 23, and that is a volunteer soldier who has resided three years on the island, and as he was taken sick two days after his arrival from Havana, he undoubtedly contracted the disease in the capital city. It is a case of moderate intensity. The diseases which predominate in that locality are those of a paludal character and diverse forms of enteritis. The number of deaths from Albuminuria is somewhat remarkable.

Although the military force has been reinforced, it has been done by Havana volunteers and firemen, who are nearly all acclimated.

Boca, August 21, 1895.—No case of yellow fever has been observed at that port this season and the physicians there are complaining of an excess of health. In port there is an American schooner, a Spanish steamer and brig, and several small coasting schooners.

Very respectfully, your obedient servant,

D. M. BURGESS,
Sanitary Inspector, M. H. S.

Cuban Shipments Declining—Yellow Fever Epidemic in Santiago and the Iron Mines Near that City.

SANTIAGO, CUBA, August 15, 1895.

SIR: It seems impracticable, if not impossible, to carry out your instructions to visit Nuevitas, Gibara, Baracoa, Guantanamo, Manzanilla, and Santa Cruz monthly, for the following reasons: First, a general order has been issued forbidding passengers to land at any point excepting the port of destination. This order implies stopping at each port three to five days until the next boat comes along, if not ordered back for troops or to some other port far away for reinforcements. But fortunately with the inability to comply, the necessity has very largely disappeared.

Outgoing vessels to the United States from all points except Santiago and Baracoa have practically ceased, and what little shipments these ports have to make to the United States will now be sent by coastwise boats to Santiago, Cienfuegos, and Havana. Sugar shipments, which are the principal cargoes from these places, are over until January.

The insurgents have stopped the cutting and hauling of timber to the seaports, which is practically all that they ship at this season of the year; so, with perhaps one or two exceptions, I do not think there will be a vessel leave any of the ports under my care, except from the ports of Santiago and Baracoa, between now and January next, and none, except from Santiago, will carry passengers.

The large shipments of iron ore from this port to the United States now amount to about twelve or fifteen boats per month to the ports of Baltimore and Philadelphia, together with the vessels that leave for New York, with yellow fever epidemic in both the city and the mines (there are from 3 to 4 deaths daily at the mines at present) make this the danger point to be watched with utmost care.

No vessel is allowed to leave this port for the States without a

thorough inspection and fumigation when deemed necessary. I shall soon leave for Baracoa, and as I am in communication with all the other ports, as soon as the necessity arises will proceed immediately to the other points under my charge and care.

I am, respectfully,

HENRY S. CAMINERO,
Sanitary Inspector, M. H. S.

STATISTICAL REPORTS.

BAHAMAS—*Governors Harbor*.—Two weeks ended August 17, 1895. Estimated population, 1,186. Total deaths, 2. No deaths from contagious diseases.

Green Turtle Cay.—Two weeks ended August 15, 1895. Estimated population, 3,900. No deaths reported.

BRITISH COLUMBIA—*Victoria*.—Month of July, 1895. Estimated population, 20,000. Total deaths, 76. No deaths from contagious diseases.

CUBA.—Under date of August 24, 1895, the United States sanitary inspector, M. H. S., at Havana, reports as follows:

There were 157 deaths in this city during the week ended August 22, 1895. Twenty-four of those deaths were caused by yellow fever, with 70 new cases approximately; 2 were caused by enteric fever, 11 by so-called pernicious fever, 7 by enteritis, 2 by dysentery, 2 by smallpox, and 5 by pneumonia.

There can be no doubt that if a close and correct diagnosis had been made, a large portion of those cases of so-called pernicious fever would have been more properly classified as yellow fever.

Six of the 24 deaths by yellow fever occurred among the soldiers in the military hospital.

FRANCE—*Roubaix*.—Month of July, 1895. Estimated population, 120,000. Total deaths, 224, including enteric fever, 3; diphtheria, 2; and whooping cough, 1.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 33 great towns of England and Wales during the week ended August 10 corresponded to an annual rate of 20.8 a thousand of the aggregate population, which is estimated at 10,591,530. The lowest rate was recorded in Croydon, viz, 13.6, and the highest in Preston, viz, 33.8 a thousand.

London.—One thousand six hundred and one deaths were registered during the week, including measles, 70; scarlet fever, 15; diphtheria, 55; whooping cough, 20; enteric fever, 9; diarrhea and dysentery, 224; and smallpox 3. The deaths from all causes corresponded to an annual rate of 19 a thousand. In greater London 2,077 deaths were registered, corresponding to an annual rate of 17.9 a thousand of the population. In the "outer ring" the deaths included 18 from measles and 7 from diphtheria.

Ireland.—The average annual death rate represented by the deaths registered during the week ended August 10 in the 16 principal town districts of Ireland was 20.2 a thousand of the population. The lowest rate was recorded in Newry, viz, 12.1, and the highest in Sligo, viz, 35.5 a thousand. In Dublin and suburbs 172 deaths were registered, including whooping cough, 1; and enteric fever, 2.

Scotland.—The deaths registered in 8 principal towns during the week ended August 10 corresponded to an annual rate of 17.6 a thousand of the population, which is estimated at 1,500,435. The lowest mortality was recorded in Edinburgh, viz, 16, and the highest in Greenock, viz, 20.9 a thousand. The aggregate number of deaths registered from all causes was 509, including scarlet fever, 4; measles, 8; diphtheria, 1; and whooping cough, 17.

JAMAICA—Kingston.—Month of July, 1895. Estimated population, 19,264. Total deaths, 107, including enteric fever, 3; diphtheria, 2; and phthisis pulmonalis, 6.
