

ABSTRACT OF SANITARY REPORTS.

VOL. X.

WASHINGTON, D. C., OCTOBER 4, 1895.

No. 40.

TREASURY DEPARTMENT, *United States Marine-Hospital Service*.—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

Opinion of the Solicitor of the Treasury in re Inspection of Way Passengers at Kobe.

DEPARTMENT OF JUSTICE,
OFFICE OF THE SOLICITOR OF THE TREASURY,
Washington, D. C., September 26, 1895.

SIR: I am in receipt of a letter from Dr. Walter Wyman, Supervising Surgeon-General M. H. S., transmitting a letter from the Hon. Secretary of State, dated September 19, and its inclosures, a letter from Mr. D. A. Chambers, representing the Pacific Mail Steamship Company.

The company, it appears, object to the action of the United States consul at Osaka and Hiogo, Japan, in requiring passengers to be inspected at Kobe who intend to disembark at Yokohama, said passengers shipping on vessels bound from Hongkong to the United States.

Such appears to have been the requirement of that service since the act of February 15, 1893, went into effect.

My opinion is requested as to whether this regulation is authorized by the statute.

The first section of the act of February 15, 1893, prescribes that it shall be unlawful for any merchant ship or vessel from any foreign port or place to enter any port of the United States, except in accordance with the provisions of said act and with such rules and regulations of state or municipal health authorities as may be made in pursuance thereof.

Section 2 further prescribes that any vessel of any foreign port clear-

ing for any port or place in the United States shall be required to obtain from the consul, vice-consul, or other consular officer of the United States at the port of departure, or from the medical officer where such officer has been detailed by the President for that purpose, a bill of health, in duplicate, in the form prescribed by the Secretary of the Treasury, setting forth the sanitary history and condition of said vessel, and that it has in all respects complied with the rules and regulations in such cases prescribed for securing the best sanitary condition of the vessel, its cargo, passengers, and crew.

Section 3 provides that the Secretary of the Treasury shall make such rules and regulations as shall be necessary to be observed by vessels at the port of departure and on the voyage, where such vessels sail from any foreign port or place to any port or place in the United States, to secure the best sanitary condition of such vessel, her cargo, passengers, and crew.

The regulations made in pursuance of this act appear to be consistent with its intention.

For the protection of the through passengers, and the people of this country, it is as important that the "way" passengers, or those who are to stop at intermediate ports, should be inspected. Otherwise, the passengers bound for the United States would always be in danger of contagious and infectious diseases from such uninspected passengers. If persons who take local passage from Kobe to Yokohama, for instance, are exempt from inspection under the law, then for the same reason a ship load of passengers could, without inspection, be brought from Kobe, or some other eastern port, to a Canadian port, on a vessel coming to the United States.

The statute does not discriminate between passengers bound to a port of the United States and those who embark for an intermediate port; and I am, therefore, of the opinion that the practice under the regulations of the Secretary requiring the inspection of passengers who intend to disembark at Yokohama, or any other intermediate port, from a vessel bound to the United States, is authorized by the statute.

The papers submitted are herewith returned.

Very respectfully,

F. A. REEVE,
Solicitor.

Hon. JOHN G. CARLISLE,
Secretary of the Treasury.

[Reports to the Supervising Surgeon-General Marine-Hospital Service.]

Smallpox at Eagle Pass.

EAGLE PASS, TEX., *September 25, 1895.*

No new cases, no deaths, 2 discharged.

EAGLE PASS, TEX., *September 26, 1895.*

No new cases, no deaths.

EAGLE PASS, TEX., *September 27, 1895.*

No new cases, no deaths.

EAGLE PASS, TEX., *September 28, 1895.*

No new cases, no deaths.

EAGLE PASS, TEX., *September 29, 1895.*

No new cases, no deaths. 4 refugees admitted.

EAGLE PASS, TEX., *September 30, 1895.*

No new cases, no deaths.

EAGLE PASS, TEX., *October 1, 1895.*

No new cases, no deaths.

EAGLE PASS, TEX., *October 2, 1895.*

No new cases, 1 death from diarrhea, 48 discharged.

G. M. MAGRUDER,
Passed Assistant Surgeon, M. H. S.

Smallpox in Michigan in the Year 1895.

* All cases in contagious-disease hospital.

In 12 of the 14 outbreaks now over, the infection was restricted to the one house in which it first occurred.

Smallpox is still present in 5 places—Detroit, Battle Creek, Bedford Township, Marshall Township, and Battle Creek Township.

HENRY B. BAKER,
Secretary State Board of Health.

LANSING, MICH., *September 25, 1895.*

Smallpox in Clay County, Ark.

LITTLE ROCK, ARK., *September 28, 1895.*

SIR: I have the honor to report as follows concerning the smallpox in Clay County, Ark.: There has been no new case since the last report, September 18, 1895. There have been 4 deaths since then, making a total of 43 cases and 11 deaths to this date.

Very respectfully,

L. P. GIBSON,
Acting Assistant Surgeon, M. H. S.

Smallpox at Wheeling, W. Va.

WHEELING, W. VA., *September 28, 1895.*

SIR: I have the honor to report to you the present status of the smallpox in Wheeling. Since my last report there has been 1 death. There are at present 3 cases in the eruptive hospital, 2 of whom are in very good condition. There are seven dwellings in the city yet under quarantine, but all the inmates except 1 are convalescent, and will be released in a few days. The disease has never been epidemic, nearly two-thirds of the city having had no cases. At the present rate there will be no houses under quarantine within a week or ten days. The new hospital for that class of diseases is nearly completed, and will soon be ready for occupancy.

Respectfully,

C. F. ULRICH,
Acting Assistant Surgeon, M. H. S.

Smallpox and Diphtheria in Philadelphia.

PHILADELPHIA, *October 1, 1895.*

SIR: The smallpox status in this State is as follows:

Philadelphia—Number of cases reported since August 16, 1895, 7; last case reported September 23, 1895; number of deaths reported since August 16, 1895, 3; number of cases of diphtheria reported in Philadelphia since August 16, 1895, 338; number of deaths, 108. Three cases of cerebro-spinal meningitis have been reported in Philadelphia since August 16, 1895, 2 resulting fatally.

Yours, very truly,

BENJAMIN LEE, M. D.,
Secretary State Board of Health.

Prevalence of Diphtheria in St. Louis, Mo.

ST. LOUIS, MO., *September 25, 1895.*

SIR: I have the honor to report the increased prevalence of diphtheria in this city. Health Commissioner Starkhoff states that 195 cases have been reported to his office since the 3d instant; that no center of infection can be located, but the cases are found in all parts of the city.

Physicians are requested to have bacteriological examinations made, and materials are furnished by the city. A limited supply of antitoxin has been prepared by the health department, and is being distributed.

Respectfully, yours,

S. D. BROOKS,
Passed Assistant Surgeon, M. H. S.

*No cases of Typhoid Fever in Cumberland, Md.*CUMBERLAND, MD., *September 27, 1895.*

SIR: In reply to yours of the 26th instant will say that there is no case of typhoid fever or typhomalarial in Cumberland at this time. There have been 2 cases reported this summer (1 death). In the twenty years I have resided and practiced here I have never seen less sickness.

Yours, very respectfully,

M. A. R. F. CARR, M. D.,
Secretary Board of Health.

*Arrival of an Infected Vessel at Pensacola Quarantine.*PENSACOLA, FLA., *September 23, 1895.*

SIR: I have the honor to report the arrival at the Pensacola quarantine of the Norwegian bark *Ida*, thirty-two days from Pernambuco. Her bill of health stated that prior to her departure there had been 30 cases of yellow fever, with 15 deaths, and 150 cases of smallpox, with 3 deaths, at Pernambuco. The captain informed the quarantine physician that one man died of yellow fever on September 3; since that date there had been no sickness on board. The vessel is reported to be in an unclean condition, and will be isolated and thoroughly fumigated.

Respectfully, yours,

J. WHITING HARGIS,
Acting Assistant Surgeon, M. H. S.

Cholera Notes.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, September 5 and 11, 1895.]

Austria-Hungary.—In Tarnopol, Galicia, from August 28 to September 2, 9 cholera cases and 2 deaths were reported.

France.—From August 18 to 24 and 25 to 31, 1 case each of "choleraic affection" was reported from three quarters of Paris.

Russia.—Cholera cases and deaths were reported to the medical department up to August 17, as follows: Government of Volhynia, from July 7 to 12, 49 cases, 13 deaths; from July 21 to 27, 222 cases, 72 deaths; from July 28 to August 3, 406 cases, 166 deaths; from August 4 to 10, 1,004 cases, 322 deaths, and from August 11 to 17, 2,025 cases, 718 deaths. Between the last-named dates cholera invaded the districts of Ostrog, Kremenez, Saslaw, Starokonstantinow, Nowogrodwalynski, and Dubno. Advices from Warsaw state the occurrence at the Jewish hospital, on August 26, of a death from Asiatic cholera. The case was imported from Volhynia. The Government Messenger reports 9 cholera cases and 7 deaths on August 6, on the steamer *Baikow* at Vladivastok, from Tischifu, and subsequently 16 cases and 12 deaths in the town of Vladivastok.

Turkey.—The cholera epidemic has spread from Syria to Bitlis. Many cholera deaths are reported at Seert, on the military road between Bitlis and Diarbekir. Since August 16, 82 cases and 56 deaths have been reported in nine localities in the vilayet of Hudavendkjar; from July 25 to August 25, in two localities in the vilayet of Konia, 5 cases, 4 deaths; from August 12 to 24, in six localities of the vilayet of Adana, 34 cases, 17 deaths; from August 6 to 20, in four localities of the vilayet of Aleppo, 191 cases, 98 deaths; from August 12 to 24, in three localities of the vilayet of Diarbekir, 184 cases, 223 deaths. In the vilayet of Damascus the epidemic is officially reported extinct at Hama and Homs. In Brussa, from August 26 to 29, 47 cases and 19 deaths were reported.

Straits Settlements.—The report received August 7 of a decrease in the prevalence of cholera is not confirmed. During the month of July 171 cases and 137 deaths were reported.

East Indies—Calcutta.—From July 21 to 27 there were 4 cholera deaths.

Japan.—In Hiogo and Osaka cholera is reported to be spreading in epidemic form. The disease made its appearance with the beginning of the warm weather. Toward the close of July, 2 fatal cases of cholera occurred in the harbor of Hiogo on an Italian vessel, the *Umbria*.

Korea.—Advices of July 17 state that cholera has recently made its appearance in Chemulpo and Seoul, as well as in Wönson-Pyongyang, Asan, and other localities. The Government has undertaken the erection of cholera hospitals at Seoul and Chemulpo.

Austria.—Under date of August 28, the ministry of the interior issued the following notification with regard to cholera, to all health authorities with the exception of those of Galicia: Within the past few days certain cholera cases, sporadic in character, have occurred at Tarnopol, in Galicia. They are undoubtedly importations from the infected Government of Volhynia, in Russia, and have been ascertained by bacteriological examination to be genuine Asiatic cholera.

Special instructions for Czernowitz, Troppau, Prague, Brünn, and Vienna: The localities above named being specially liable to cholera invasion, their municipal authorities are enjoined to take all possible

precautions against this danger. The strictest attention must be paid to public hygiene, the soil, air, and water must be protected from contamination, and all means taken to prevent the communication of infection along the inland waterways.

The several communities are also required to provide disinfecting apparatus and to establish a complete and effective system of disinfection and of ready relief and assistance should a case of cholera declare itself.

The municipal police are directed to be zealous in carrying out all sanitary measures prescribed by the proper authorities, and to see that the necessary facilities for disinfection and relief are provided. They are also to remove all local unsanitary causes, and as far as they may, within the financial ability of the community, to prevent the formation of local conditions of infection.

The health of the community must be carefully watched and all physicians, undertakers, and householders are enjoined to give instant notice to the local authorities of the existence of a case of cholera or suspicious sickness occurring within their knowledge.

The police authorities are directed to report by telegraph the occurrence of a cholera outbreak and to forward weekly tabulated statements of the progress of the epidemic so long as it shall continue. These statements shall be published in the Austrian Sanitätsmeren. This publication shall also contain the sanitary proclamations and regulations from time to time promulgated and issued.

Turkey.—In pursuance of a decision of the International Sanitary Council of Health of August 27, arrivals from Adalia are subject to five days' quarantine. This regulation applies to arrivals from ports on the same coast lying between Cape Anamur and Sueidije (inclusive), when the same coast carry passengers. When such arrivals do not carry passengers they shall be subject to twenty-four hours' quarantine.

Under date of August 30 the sanitary council further declared a five-days' quarantine at the lazaretto of Tuzla for all arrivals carrying passengers from the sea of Marmora between Bog-Burmu and Kara Bogha. Passengers shall be disembarked at the lazaretto after disinfection of their clothing and effects. Ships not carrying passengers shall be subject only to medical inspection. On the same date it was decided by the council that travelers from the interior should not be allowed to stop at any station on the Anatolia railroad between June-Eunn and Ado-Bazar, inclusive. Freight trains may unlade if the crews have undergone medical inspection at Tuzla.

Greece.—By royal proclamation of August 15 arrivals from the Gulf of Adalia are subject to five days' quarantine at the quarantine station of St. George at Salamis, at Vido, or at some other port provided with port sanitary officers.

Portugal.—By ministerial proclamation of September 3 the ports of Austria-Hungary are declared infected since August 15.

Straits Settlements.—By proclamation of the acting governor, dated August 5, quarantine is ordered at Pinanz for all vessels from Singapore carrying more than 20 deck passengers.

Japan.—According to advices of July 30 the regulations of 1882 for the medical inspection of vessels is put in force for all arrivals from Formosa and Korea. The following-named places are made ports of inspection: Yokohama, Nagasaki, Kobe, Kuchinatsu, Shimonoféki, and Moji.

Plague.

Spain.—By royal proclamation of August 24 arrivals from Macao are made subject to quarantine. Ports situated not more than 165 kilometers from Macao are declared suspect.

BRAZIL.

Sanitary Reports of Rio de Janeiro.

RIO DE JANEIRO, *August 27, 1895.*

SIR: I have the honor to transmit report for the week ended August 24, 1895:

There were 14 deaths from *accessio pernicioso*, an increase of 8; 4 from yellow fever, a decrease of 4; 69 from smallpox, an increase of 2; 3 from enteric fever, a decrease of 1; 2 from measles, a decrease of 1; 1 from beriberi, the same as in the foregoing week; and 44 from tuberculosis, an increase of 7. There were 389 deaths from all causes, which is 1 more than in the foregoing week.

Yellow Fever.—This disease is decreasing, as usual, at this time of the year. The increase of deaths from *accessio pernicioso* usually accompanies this decrease, as in the present report, and I think that some of the cases of the disease may be yellow fever.

Smallpox.—The deaths from this disease increase every week very slowly. The authorities are establishing vaccine posts all over the town and its suburbs, and continue to furnish lymph to all who seek it, but the demand has been so great that at present they are using great economy in issuing the tubes. The disease has appeared in the port of Victoria in the State of Espirito Santo, and from that place demands for lymph are made in great quantities. It has also appeared in Floreanopolis, the port and capital of Santa Catharina, at least so telegrams from those places state. There is no other vaccine establishment in the whole country than the municipal institute in this town, and so it has to furnish the demands from all ports. Here, at least, the importation of lymph has ceased.

Since last report the following-named ships have been inspected or received bills of health from this office. I have required evidence of the vaccination of all on board before issuing the bills: August 20, bark *Oberon*, German, for Savannah, Ga.; August 22, steamship *Kaffir Prince*, British, from Santos for New York; ship *Pengwern*, British, for Portland, Oreg.; August 23, ship *Bohemia*, American, for San Francisco, Cal.; August 26, steamship *Buffon*, English, for New York, N. Y.; *Salerno*, German, from Santos for New York, N. Y.

Respectfully, yours,

R. CLEARY, M. D.,
Sanitary Inspector, M. H. S.

RIO DE JANEIRO, *September 3, 1895.*

SIR: I have the honor to transmit report for the week ended August 31, 1895: There were 9 deaths from *accessio pernicioso*, a decrease of 5; 8 from yellow fever, an increase of 4; 52 from smallpox, a decrease of 17; 2 from beriberi, an increase of 1; 1 from enteric fever, a decrease of 2; 4 from measles, an increase of 2; 2 from scarlet fever; 1 from diphtheria; 1 from whooping cough; and 40 from tuberculosis, an increase of 4. There were 354 deaths from all causes, which is a decrease of 35 from the foregoing week.

Yellow fever—In spite of the small increase in the number of deaths from this cause, the disease can not be considered on the increase.

Smallpox—The report shows a decrease of more than 25 per cent in the number of deaths from this cause. Even though the weather continues cool, we are on the eve of the warm season, and may expect a great decline in the deaths from smallpox. A telegram from Victoria (more to the northward) this morning announces that smallpox is rapidly declining at that port.

Since last report, the following-named ships have been inspected or received bills of health from this office: August 27, British bark *Balkawa*, for Portland, Oreg.; Norwegian ship *Premier*, for Mobile, Ala.; August 31, British steamship *Moorish Prince*, for New York, N. Y.; September 2, British steamship *Polaria*, for New Orleans, La.; British ship *Kate Thomas*, for Portland, Oreg.

Respectfully, yours,

R. CLEARY, M. D.,
Sanitary Inspector, M. H. S.

CHINA.

Cholera at Tien-Tsin and Chefoo—Both Ports Declared Infected.

TIENTSIN, August 14, 1895.

SIR: I have the honor to confirm my telegram of to-day's date to the Honorable Secretary of State, reading: "Cholera Tien-Tsin Chefoo.—READ."

In declaring Tien-Tsin to be cholera infected, I have sent out the following notification.

"I beg to inform merchants that after making careful inquiries I am obliged to declare Tien-Tsin to be infected with cholera."

"Merchandise destined for the United States is, therefore, until further notice, subject to the quarantine laws of the United States, the requirements of which laws can be ascertained at this consulate."

Our consular agent at Chefoo has been instructed, by wire, to declare his port infected, and to act in accordance with our quarantine laws. Consul-General Jernigan has also been informed by wire that I have declared Tien-Tsin and Chefoo cholera ports.

The last invoice certified by me, not coming under the quarantine regulations, is numbered 224.

I am, sir, your obedient servant,

SHERIDAN P. READ,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

CUBA.

Increase of Yellow Fever in Habana.

HABANA, ISLAND OF CUBA, September 21, 1895.

SIR: I have the honor of calling your attention to the large number of deaths from yellow fever during the week ended September 19, as will be found in my weekly report,* a larger number than has occurred in any one week in this city since the year 1884. I would also call your attention to the probability that every Spanish gunboat or cruiser

* Cases, about 120; deaths, 39.

that goes over around the coasts of the United States from here is infected by yellow fever.

Very respectfully,

D. M. BURGESS,
Sanitary Inspector, M. H. S.

Sanitary Inspection of Certain Cuban Towns.

HABANA, CUBA, September 21, 1895.

SIR: * * * I instructed Dr. Fortun on the 14th instant to visit not only Mariel, Cabanas, and Bahia Honda, where he had been over a month before, but to proceed by the steamer farther westward, as far as she went on the north side, and on the 18th instant he writes as follows:

According to your instructions given me on the 14th instant, I took the steamer *Triton* that same night to inspect the western ports on the north coast, and the following morning arrived at Bahia Honda, where we stopped three hours to discharge. At 9.30 o'clock a. m. we left for Rio Blanco, arriving there at half past 1 in the afternoon. This has a medium-sized bay, on the shore of which not a house is to be seen. The vessel approached a lighter and a boat manned by a few men, on the former of which she discharged. I was informed that the little village of Rio Blanco was about 2 leagues from the bay, was a place of little or no importance, and that there was no sickness there. The small gunboat *Reina Cristina*, manned by some 20 persons, was in the harbor.

As soon as the steamer had discharged, she left for San Cayetano or Esperanza, as the town is called, where she arrived at 4.30 o'clock p. m. This place has some 20 or 25 houses, all on one street, and is the terminus of a narrow-gauge railroad which runs some 6 leagues into the interior to Viñales, the center of a tobacco district. The amount of business now done can be imagined when there are only two trains a week. There is a detachment of 25 unacclimated troops there, the rest of the military element consisting of volunteers and guardia civiles. The town has one physician and a miserable drug store. The physician told me that yellow fever was unknown there, but there were two soldiers sick at the time of my visit with what was diagnosed as typhoid fever. Malarial fevers are very frequent in that locality.

The steamer remained all night tied up to the railroad wharf, and left early on the morning of the 16th for Malas Aguas, the bay of which we entered at 7 o'clock a. m. On casting the eyes around this bay, not a sign of a human habitation was to be seen; not a house, not a hut; nothing but the lighter which the steamer immediately approached, and on it discharged the little cargo she had brought for the groceries inland, and then left for Santa Lucia where she arrived a little after 8 o'clock a. m.

There absolutely the same scene was observed as at Malas Aguas. Santa Lucia is not a port of any town, but only of a sugar estate by that name. On the port lighter came the doctor of the territory around about, who told me that he had never seen yellow fever there, although there were a number of Spaniards about there. The stay was short at Santa Lucia, and about 10.30 a. m. we reached Rio del Medio. Here the only house to be seen is a building used for a storehouse. The nearest settlement is a small village called Bajá about 2 leagues away. About 2.30 o'clock we started on our return trip and reached San Cayetano the same afternoon. Here was found the gunboat *Reina Cristina*, which was seen the day before in Rio Blanco and now had one man sick with what was called paludal fever. Sleeping at San Cayetano we left the morning of the 17th for Berracos, a place passed by without stopping on our outward trip. Berracos is on a bay protected by keys and has but two houses. The steamer stayed there but a short time, when she left for Rio Blanco and arrived at Bahia Honda about 2 o'clock in the afternoon. * * *

The few and small villages are not far from the coast, and there being no communicating roads, the inhabitants depend for the necessaries of life on the steamer *Triton*, which brings them what they need and carries to market the only article produced by them, viz, tobacco. * * *

On my first visit to these western places I gave you a short description of the port and town of Bahia Honda, as also of the contour of the country, among the hills of which numerous ponds were formed, causing much malaria.

Among the troops stationed here no case of yellow fever has as yet developed. I have nothing in particular to say about Cabañas and Mariel, which I have just visited by

land, except that there is no yellow fever there, nor, as far as could be ascertained, at any of the places along the northwestern coast of Cuba west of Habana.

Very respectfully, your obedient servant,

D. M. BURGESS,
Sanitary Inspector, M. H. S.

INDIA.

Cholera at Singapore.

SINGAPORE, August 20, 1895.

SIR: I have the honor to report that I am informed by the municipal health officer that from the 12th instant and on to the 19th instant, noon, 17 cases of cholera occurred in Singapore, of which 8 proved fatal.

I have the honor to be, sir, your obedient servant,

E. SPENCER PRATT,
United States Consul-General.

Hon. ASSISTANT SECRETARY OF STATE.

JAPAN.

Cholera at Hiogo and Osaka.

HIOGO, August 21, 1895.

SIR: I have the honor to transmit official cholera statistics obtained from the authorities of Hiogo Ken and Osaka Fu, respectively, showing the number of cases and deaths daily for the two weeks commencing August 2 and ending August 15, inclusive; also cholera statistics, showing the total number of cases and deaths occurring within the same subdivisions of this consulate since the appearance of the disease in epidemic form.

I am, sir, your obedient servant,

JAS. F. CONNELLY,
United States Consul.

Hon. ASSISTANT SECRETARY OF STATE.

Cholera Returns of Hiogo (Kobe) for the Two Weeks ended August 15, 1895.

Osaka Fu—From the commencement to August 15, 1895, inclusive: Number of cases, 4,320; number of deaths, 2,712.

MEXICO.

Yellow Fever Reported Present at La Paz.

NOGALES, ARIZ., *September 24, 1895.*

SIR: I have the honor to inform you that it is reported that there are 3 cases of yellow fever at La Paz, Lower California.

Very respectfully,

W. F. CHENOWETH,
Sanitary Inspector, M. H. S.

SWEDEN.

Circular Relating to Cholera-Infected Localities from the Department of the Justice and Police of the Royal Norwegian Government.

CHRISTIANIA, *September 10, 1895.*

SIR: I have the honor of handing you herewith two copies of a circular issued by the Norwegian department of justice, dated September 6, 1895, and relating to cholera-infected ports. A translation of same is also inclosed.

I am, sir, your obedient servant,

GERH. GADE,
United States Consul.

Hon. ASSISTANT SECRETARY OF STATE.

[Inclosure.]

Asia Minor shall, until further notice, be considered infected with cholera. Pursuant to this and previous circulars the following localities are at present considered infected with cholera, viz:
The Russia provinces of Volhynia and Podolia.
Asia Minor.

Vessels having cholera patients on board and bound for Norwegian ports shall be directed by the pilots to the quarantine station at Odderoen, near Christianssand; in other ports the masters may be obliged to keep the patients on board and be submitted to quarantine.

F. HAGERUP,
L. ESMARCH.

CHRISTIANIA, *September 6, 1895.*

VENEZUELA.

No Yellow Fever at Porto Cabello.

PORTO CABELLO, *September 23, 1895.*

No yellow fever.

PROSKAUER,
United States Consul.

STATISTICAL REPORTS.

FRANCE—*Roubaix.*—Month of August, 1895. Estimated population, 120,000. Total deaths, 229, including enteric fever, 2; diphtheria, 1; measles, 2; and whooping cough, 2.

Rouen.—Month of August, 1895. Estimated population, 111,847. Total deaths, 320, including phthisis pulmonalis, 40; enteric fever, 10; scarlet fever, 1; whooping cough, 1; and smallpox, 6.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 33 great towns of England and Wales during the week ended September 14, corresponded to an annual rate of 19.3 a thousand of the aggregate population, which is estimated at 10,591,530. The lowest rate was recorded in Plymouth, viz, 11.7, and the highest in Sunderland, viz, 37.5 a thousand.

London.—One thousand two hundred and ninety-eight deaths were registered during the week, including smallpox, 2; measles, 28; scarlet fever, 19; diphtheria, 55; whooping cough, 14; enteric fever, 16; diarrhea and dysentery, 107. The deaths from all causes corresponded to an annual rate of 15.4 a thousand. In greater London 1,691 deaths were registered, corresponding to an annual rate of 14.6 a thousand of the population. In the "outer ring" the deaths included 6 from measles, and 14 from diphtheria.

Ireland.—The average annual death rate represented by the deaths registered during the week ended September 14 in the 16 principal town districts of Ireland was 20.2 a thousand of the population. The lowest rate was recorded in Dundalk, viz, 4.2, and the highest in Dublin, viz, 25.1 a thousand. In Dublin and suburbs 170 deaths were registered, including smallpox, 1; enteric fever, 4; scarlet fever, 1; and whooping cough, 3.

Scotland.—The deaths registered in 8 principal towns during the week ended September 14 corresponded to an annual rate of 16.9 a thousand of the population, which is estimated at 1,500,435. The lowest mortality was recorded in Perth, viz, 13.7, and the highest in Paisley, viz, 20.3 a

thousand. The aggregate number of deaths registered from all causes was 489, including scarlet fever, 4; measles, 2; diphtheria, 5; and whooping cough, 11.

RUSSIA—*Riga*.—Month of June, 1895. Estimated population, 215,000. Total deaths, 470, including phthisis pulmonalis, 36; enteric fever, 4; scarlet fever, 5; diphtheria, 4; measles, 7; and whooping cough, 3.
