

ABSTRACT OF SANITARY REPORTS.

VOL. X. WASHINGTON, D. C., NOVEMBER 29, 1895. No. 48.

TREASURY DEPARTMENT, *United States Marine-Hospital Service*.—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

[Reports to the Supervising Surgeon-General Marine-Hospital Service.]

Smallpox in Tennessee.

NASHVILLE, *November 21, 1895.*

SIR: We inclose you herewith a printed slip giving a statement of the occurrence of smallpox in Tennessee from October 15 to November 15, inclusive. This statement also appears in the issue of the Bulletin for November 20.

Very respectfully,

J. BERRIEN LINDSLEY,
Secretary and Executive Officer.

[Inclosure.]

Since October 15, only 2 cases of smallpox have been reported. One, a colored man, dwelt a mile from the hospital for contagious diseases in Shelby County; origin unknown. This was reported on October 23. On November 13 a colored man came from a camp near Sibley, Crittenden County, Ark., and reported to the city board of health of Memphis, and was at once sent to the county hospital.

*Smallpox in the United States as reported to the Supervising Surgeon-General Marine-Hospital Service, August 1 to November 28, 1895.**

* Previously reported.

† The 1 case of yellow fever on steamship *Oberon*, reported in footnote of ABSTRACTS of November 15 and 22, was a clerical error, no case of yellow fever having occurred on that vessel. The footnote was copied from the previous ABSTRACTS, and the case of yellow fever occurred on the steamer *Boskenna Bay*.

SOUTHPORT QUARANTINE.

Week ended November 23, 1895.

Two vessels inspected and passed.

Reports of States and Yearly and Monthly Reports of Cities.

CALIFORNIA.—Month of October, 1895. Reports to the State board of health from 55 cities, towns, and villages having an aggregate population of 746,220, show a total of 899 deaths, including phthisis pulmonalis, 126; enteric fever, 18; scarlet fever, 2; diphtheria, 5; croup, 2; measles, 10; and whooping cough, 2.

ILLINOIS—*Chicago*.—Month of October, 1895. Estimated population, 1,600,000. Total deaths, 2,020, including phthisis pulmonalis, 179; enteric fever, 90; scarlet fever, 1; diphtheria, 240; measles, 2; and whooping cough, 11.

MASSACHUSETTS—*Malden*.—Month of October, 1894. Estimated population, 33,000. Total deaths, 47, including phthisis pulmonalis, 4; and enteric fever, 1.

Worcester.—Month of October, 1895. Estimated population, 98,687. Total deaths, 156, including phthisis pulmonalis, 21; enteric fever, 3; diphtheria, 7; and whooping cough, 6.

MICHIGAN.—Week ended November 16, 1895. Reports to the State board of health, Lansing, from 50 observers indicate that remittent fever, intermittent fever, pneumonia, diarrhea, influenza, and rheumatism increased in area of prevalence. Phthisis pulmonalis was present during the week at 186 places, enteric fever at 88, scarlet fever at 37,

diphtheria at 35, whooping cough at 9, measles at 6, and smallpox at 2 places.

NORTH CAROLINA.—Month of September, 1895. Reports to the State board of health from 29 towns, having an aggregate population of 154,085 (white, 89,122; colored, 64,933). Total number of deaths, 250 (white, 96; colored, 154), including phthisis pulmonalis, 31; enteric fever, 24; and whooping cough, 1.

OHIO—*Columbus*.—Month of October, 1895. Estimated population, 100,000. Total deaths, 135, including phthisis pulmonalis, 16; enteric fever, 19; scarlet fever, 3; diphtheria, 18; and whooping cough, 1.

PENNSYLVANIA—*Pottsville*.—Two weeks ended November 19, 1895. Estimated population, 14,117. Total number of deaths, 19, including phthisis pulmonalis, 2; enteric fever, 1; and diphtheria, 1.

RHODE ISLAND—*Newport*.—Month of October, 1895. Estimated population, 20,000. Total deaths, 34, including phthisis pulmonalis, 6; croup, 1; and whooping cough, 1.

TENNESSEE—*Memphis*.—Month of October, 1895. Estimated population, white, 28,064; colored, 27,859; total, 55,923. Deaths, white, 84; colored, 66; total, 150, including phthisis pulmonalis, 19; enteric fever, 4; and diphtheria, 7.

UTAH—*Salt Lake City*.—Month of October, 1895. Estimated population, 70,000. Total number of deaths, 58, including phthisis pulmonalis, 2; enteric fever, 6; and diphtheria, 1.

Current Quarantine Measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, November 6, 1895.]

Austria-Hungary.—On October 24 the ministry of the interior declared the districts of Tarnopol and Trembowla to be cholera foci. The same proclamation ordered the cholera measures formulated by the Dresden conference to be put in force.

Under date of October 23 the ministry issued regulations with regard to the importation of cholera from Galicia, addressed to the authorities of Vienna, Prague, Brunn, Troppau, and Czernowitz, in which the said authorities are directed, in view of the spread of the disease in Galicia, to have strict oversight of all matters relating to public health and to secure prompt notification of the occurrence of a cholera case and the application of measures to prevent contagion. The authorities are furthermore directed to exercise police supervision of all tramps, vagrants, pedlers, etc., arriving from Galicia when any suspicion attaches to them in consequence of their state of health or uncleanness, and to enforce

the five days' sanitary supervision of the suspected persons and the places in which they lodge.

The authorities of the coast towns are directed to have special police supervision of arrivals from Egypt and to enforce five days' quarantine of observation in the case of passengers from Egypt.

Norway.—By order of October 23, Constantinople, Egypt, and Morocco are declared infected until further notice.

Turkey.—According to advices of October 19 and 22, strict medical supervision is ordered for all arrivals from the Mediterranean ports of Egypt, and the same is suspended for arrivals from Adalia.

Greece.—Advices of October 23 state that the five days' quarantine of observation for arrivals from the ports on the Sea of Marmora, between Bog-Burun and Kara Bogha, and the quarantine against Damietta, are replaced by a ten days' effective quarantine at the quarantine stations of Trikeri or Delos.

Spain.—By royal proclamation of October 25 quarantine against vessels arriving from Constantinople under normal conditions, is suspended.

Egypt.—By resolution of the international council of health of October 19, vessels intending to pass through the Suez canal without entering into communication with the shore, shall be accompanied by two sanitary guards.

The following certificate must be inserted in the ship's bill: "Cholera in Egypt is confined to Damietta. Public health at Suez, Port Said, and other Egyptian ports being good. Three persons only have been taken on board, a pilot and two sanitary guards." This certificate must be further attested at Port Said to the effect that the vessel has passed through the canal and has complied with the quarantine regulations in coaling. These regulations are summed up as follows:

1. Only those vessels shall be subject to medical control, viz, accompanied by two sanitary guards, which arrive from ports of the Mediterranean Sea and whose agents have refused to observe the five days' quarantine before starting.

2. The pilots and sanitary guards who have accompanied such vessels shall be subject to five days' isolation on a lazaretto ship.

3. Only those vessels which are lighted by electric-light plant may pass through the canal at night. Others may make the transit only by day.

4. Coaling of vessels in quarantine shall be permitted only when they carry the requisite apparatus or are provided with coal bunkers having doors opening outward.

5. These regulations shall go into effect from the date at which the first pilots and sanitary guards now on the lazaretto ships shall have completed their five days' isolation.

Morocco.—According to advices of October 21 the quarantine against Tangier, ordered by the council of health in all other ports of the coast of Morocco, is replaced by forty-eight hours' observation, accompanied by measures of disinfection.

Brazil.—By ministerial proclamation of September 20 the port of Tangier is declared infected and the other ports of Morocco suspect. All vessels which shall have left the port of Tangier or any other port of Morocco between September 6 and 14 shall, on arrival in Brazil, be admitted to free pratique only after undergoing sanitary treatment at the lazaretto on Ilha Grande.

Cholera Notes.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, November 6, 1895.]

Austria-Hungary—Galicia.—From October 22 to 28, 42 cases and 26 deaths were reported. Of these, 3 cases, 4 deaths occurred in the city of Tarnopol; 18 cases, 11 deaths in 5 localities of the district of Tarnopol; 4 cases, 4 deaths in 3 localities of the district of Trambowla; 6 cases, 2 deaths in 2 localities of the district of Skalat; 1 case in Przemyol; in the district of Przemyol, 1 case, 1 death; in Burszczow, 1; in Kamionka Strumilowa, 4 cases; in Sokal, 2 cases, 1 death. Since August 23, 238 cases and 151 deaths have been reported from 35 localities belonging to 12 districts.

France.—From October 20 to 26, 1 case of choleriformi affection was reported in Paris.

Russia.—The cholera epidemic in the government of Volhynia is undoubtedly steadily declining. It reached its maximum about the middle of September. From September 29 to October 5, 1,448 cases, 608 deaths were reported in 11 districts. In the government of Kew, from September 29 to October 5, 31 cases, 24 deaths were reported; in the district of Berditschew, from October 6 to 12, 28 cases, 13 deaths.

Turkey.—On October 21 a fatal cholera case occurred on board a vessel lying off Galata. At Homs, a vilayet of Damascus, from October 9 to 19, 5 cases and 4 deaths were reported.

Egypt.—Cases and deaths are reported as follows: At Damietta, from October 16 to 22, 18 cases, 8 deaths; at Manyaleh, from October 15 to 20, 13 cases, 42 deaths; at Gheit el Nassara, from October 17 to 18, 2 cases; at Nassaimia, from October 20 to 22, 8 cases, 5 deaths; at Bonsrate, from October 20 to 21, 3 cases, 1 death; at El Kurdi, on October 22, 3 cases, 16 deaths.

According to advices of October 23, cholera broke out at Manyaleh on October 11. This place, and all other localities on the Lake of Manyaleh, from Kantarah, on the Suez Canal, to Damietta, are more or less infected.

Morocco.—The epidemic shows a decided decline. In Tangier, from October 10 to 21, 90 cases and 61 deaths were reported; in Tetuan, from October 8 to 17, 1,081 cases, 361 deaths, of which 18 cases, 12 deaths occurred among the non-Arabic population.

The extent to which the Kaleyles in the interior of the country are affected can not be ascertained.

Hawaii.—From August 18 to September 18, 85 cases, and from September 19 to 28, 2 cases; in all, 62 deaths occurred at Honolulu. According to advices of October 2, no new cases were observed after the end of September. The disease was apparently imported August 9 by the steamer *Belgie* from Japan.

BRAZIL.

Weekly Sanitary Report of Rio de Janeiro.

RIO DE JANEIRO, *October 22, 1895.*

SIR: I have the honor to transmit report for the week ended October 19, 1895.

There were 6 deaths from *accessio pernicioso*, a decrease of 14; 4 from yellow fever, an increase of 1; 69 from smallpox, a decrease of 3; 2

from beriberi, a decrease of 1; 4 from enteric fever, an increase of 3; 60 from tuberculosis, an increase of 6, the largest number from this disease in any one day that I can remember.

From all causes there were 386 deaths, an increase of 11 over the foregoing week.

Yellow fever.—This disease does not appear to be on the increase.

Smallpox.—This disease is more or less stationary within the town, though it is extending itself through all the suburbs. In Victoria I am informed that it is still rife.

In the "Quarantine Regulations for Foreign Ports," paragraph 3, article 5, reads: "Steerage passengers and crew coming from districts where smallpox prevails in epidemic form, or who have been exposed to smallpox, shall be vaccinated before embarkation, unless they show evidence of immunity to smallpox by previous attack or recent successful vaccination."

Unless the man has smallpox scars, or has a vaccine mark still red, or can prove he has been successfully vaccinated within a year, I require him to be revaccinated.

Since last report the following-named ships were inspected and received bills of health from this port:

October 15, steamship *Calvin*, British, for St. Lucia, West Indies, and bark *Cambria*, British, for Pensacola, Fla. October 16, steamship *Coleridge*, British, for New York, N. Y., and steamship *Chaucer*, British, for New Orleans, La. October 19, steamship *Sorrento*, German, for New York, N. Y. October 21, bark *Olga*, German, for New Orleans, La. October 22, steamship *Avona*, British, for Galveston, Tex.; steamship *Manitoba*, British, for New York, and steamship *Olters*, Belgian, for New York.

Respectfully, yours,

R. CLEARY, M. D.,
Sanitary Inspector, M. H. S.

Prevalence of Yellow Fever in Pernambuco.

PERNAMBUCO, October 25, 1895.

SIR: In accordance with your instructions requesting a report on yellow fever, transmitted by your dispatch of September 30, 1895, I have the honor to report that yellow fever has prevailed in this port since the early part of March last, but such peculiar conditions have attended its progress that persons living here and the hospital authorities have not regarded it as in a strict sense an epidemic in the city. Only persons recently arrived from Europe, as a rule, were attacked, and indeed only three persons who lived ashore have died of fever. The deaths from yellow fever have been confined almost entirely to sailing vessels, and 90 per cent of these have been Norwegian and Swedish. Information of such character and accuracy is impossible to obtain on account of the loose way in which such things are done. Even the oldest inhabitant is of the opinion that more fever has been here than has been known for the last twenty years. The city is fairly clean, and the entire town is supplied with a good system of sewers, but owing to the low flat land on which the city is built, the outflow from the sewers is necessarily sluggish. The water for drinking and washing is of the clearest and best quality, being brought some miles from the highlands which surround the city. The city and hospital authorities have not come to any definite conclusion as to the cause of the unusual amount of fever in the harbor, but the theory which is most frequently advanced

and generally accepted is that the great length of the rainy season this year has had much to do with it. As a rule the wet or rainy term begins about the first of March and continues up to the end of August, but this year the rains began early in February, and have only now—late in October—fallen away. The rains have not only been of long duration, but they have also been the heaviest ever witnessed by the persons with whom I have conferred. By actual measurement with a rain gauge the fall on June 21 and 22 was 19 inches of water, and the record shows a total of 9 feet and a fraction for this year.

No fever has been reported from any other post in this consular district and it has now almost disappeared from this city, as only 6 cases remain in hospital. Smallpox is now and has been for four months past epidemic here. Nothing can be obtained by which a determination may be reached as to how it came to grow into such large proportions except the poor way in which the lower orders live, being crowded together into small quarters and thereby compelled to sleep in too near proximity to each other. Not a single case has appeared among the foreign population resident here. Smallpox prevails to a greater or less degree all the time in Brazil.

I am, sir, your obedient servant,

JOHN MALCOLM JOHNSTONE,
United States Consul.

RIO DE JANEIRO, *October 29, 1895.*

SIR: I have the honor to transmit report for week ended October 26, 1895. There were 8 deaths from *accessio pernicioso*, an increase of 2; 4 from yellow fever, the same as in the foregoing week; 80 from smallpox, an increase of 11; 4 from beriberi, an increase of 2; 3 from enteric fever, a decrease of 1; 55 from tuberculosis, a decrease of 5; and 1 each from measles and whooping cough. From all causes there were 403 deaths, an increase of 17 over the foregoing week.

Smallpox.—In spite of the increased number of deaths from this cause the epidemic does not appear to be on the increase. I have nothing to add on this subject except that it has appeared at Antonius, on Paranaguá Bay, some three days' voyage to the southward. Here there is no change.

Since last report the following named ships have been visited and received bills of health from this office: October 23, steamship *Creole Prince*, British, for New York, N. Y.; October 24, ship *Harland*, British, for New York, N. Y.; October 26, ship *Roanoke*, American, for San Francisco, Cal.; October 28, ship *Holyrood*, British, for New York, N. Y.; bark *Donna Francisca*, British, for Astoria, Oreg.; bark *Margherita*, Italian, for Pensacola, Fla., and bark *Julia Rollins*, American, for Baltimore, Md.

Respectfully, yours,

R. CLEARY, M. D.,
Sanitary Inspector, M. H. S.

CUBA.

Departure of Schooner Boniform from Habana with a Case of Yellow Fever.

HABANA, ISLAND OF CUBA, *November 20, 1895.*

SIR: I have the honor to inform you that the British two-masted schooner *Boniform* left this port for Canning, Nova Scotia, yesterday

morning with her captain sick on board with yellow fever, and I write you this in view of the possibility of that vessel putting into some port of the United States in distress. I might add, the vessel came here with a load of potatoes, some of which were rotten; was here twelve or fourteen days, and discharged at Caballeria wharf, Habana side.

Very respectfully,

D. M. BURGESS,
Sanitary Inspector, M. H. S.

EGYPT.

Report of Cholera in Egypt.

ALEXANDRIA, EGYPT, *November 8, 1895.*

SIR: The report of the sanitary department for this week is as follows:

Damietta and environs, November 6, no new case, 1 cured, no death, remaining in hospital, 3.

Esbel el Bourg and environs, November 6, no new admissions, 1 death; remaining in hospital, 1, besides 2 deaths outside the hospital. At El Wacaksa, in the Dekernses district of the Dakhalugeh Province, a case was reported on November 6. Up to yesterday morning 639 cases, including 495 deaths, had been registered.

Later.—The cholera bulletin this evening from 9 infected centers in the Lake district is rather better, only 19 fresh cases and 18 deaths. Two deaths are reported from Metul Khule, a village on the east bank of the Damietta branch of the Nile between Sherbeen and Faras coos. Several suspicious cases are also reported from places in the neighborhood of the infected area. In the larger cities of Egypt there are no cases, and tourists are journeying into Egypt freely.

I remain, sir, yours, respectfully,

J. F. LOVE.

FRANCE.

Smallpox in Marseilles.

DEPARTMENT OF STATE, *November 21, 1895.*

The following telegram was received on the 21st instant from the United States consul at Marseilles: "Smallpox epidemic Marseilles."

THE HON. SECRETARY OF THE TREASURY.

JAPAN.

YOKOHAMA, JAPAN, *November 3, 1895.*

SIR: I have the honor to inclose the weekly report of cholera in Japan, October 25 to October 31, and to append the following remarks:

The recent steady rate of decline of the epidemic, as a whole, seems to be maintained, while the disease has again abated in Tokyo and this, Kanagawa Ken. Still, cholera is not extinct in any single district, with the exception, perhaps, of the extreme northern ken of Awomori,

where it scarcely gained a foothold; and, in view of past experience, local exacerbations may occur at any time.

I am, sir, very respectfully,

STUART ELDRIDGE,
Sanitary Inspector, M. H. S.

From outbreak to October 31, 55,611 cases, 38,829 deaths.

Enforcement of United States Quarantine Regulations at Yokohama.

YOKOHAMA, JAPAN, *November 8, 1895.*

SIR: I have the honor to report that, with regard to ships leaving this port, the quarantine laws and regulations are fully enforced. Fortunately, having under my control the local hospital for infectious diseases which has attached a very good plant for steam or hot-air disinfection, the required process is effectually carried out upon all effects of steerage passengers, or those for the cabin, if suspected of contamination. Without the aid of this hospital apparatus compliance with the regulations would have been almost impossible. As the five days' quarantine and disinfection of baggage is applied to through and way passengers equally, and as there have been several ships going via Honolulu and carrying many people for that port, the work has been tolerably large in amount, the more so that accommodations for the detention of large numbers of passengers under observation are exceedingly deficient here.

I would further report that, after consultation with the consul-general, growing plants and bulbs, the latter being always packed in loam mingled with night soil and their disinfection being impracticable, have been added to the list of prohibited shipments.

Finally, I beg you to accept my apologies for delay in reporting upon ships examined. I was, however, until a day or two ago, under the impression that, as I am really only acting as deputy for the consul-general, such being the construction placed by that gentleman upon

the telegraphic, and sole, instructions received from you, the consul-general's office was itself forwarding the regular reports demanded. It is for a similar reason that I have forwarded you the weekly reports of cholera in Japan as an officer of the Imperial Government, in which capacity I receive them, rather than as an employee of your office.

I am, sir, very respectfully,

STUART ELDRIDGE, M. D.,
Sanitary Inspector, M. H. S.

Inspection of Vessels Leaving Yokohama for the United States.

YOKOHAMA, JAPAN, November 8, 1895.

SIR: I have the honor to report that, since my appointment, September 16, as medical and sanitary inspector to the United States consulate-general here, by authority of telegram from you dated September 13, I have inspected vessels as follows, all being free from infectious disease:

September 17, steamship *City of Peking*, bound for San Francisco; sailing ship *Carl*, bound for New York, and sailing ship *Albert Rickmers*, bound for Portland, Oreg. September 27, steamship *China*, bound for San Francisco. October 2, steamship *Port Phillip*, bound for San Francisco. October 3, steamship *Victoria*, bound for Tacoma, Wash. October 10, steamship *Evandale*, bound for San Francisco. October 12, steamship *Strathclyde*, bound for New York. October 17, steamship *Asloun*, bound for Portland, Oreg. October 18, steamship *Peru*, bound for San Francisco. October 24, steamship *Hankow*, bound for Tacoma, Wash. October 26, steamship *Glengyle*, bound for New York, and steamship *Coptic*, bound for San Francisco. November 6, steamship *Rio de Janeiro*, bound for San Francisco, and steamship *Mount Lebanon*, bound for Portland, Oreg.

I am, sir, very respectfully, your obedient servant,

STUART ELDRIDGE, M. D.,
Sanitary Inspector, M. H. S.

MEXICO.

One New Case of Smallpox in Nogales.

NOGALES, ARIZ., November 19, 1895.

SIR: I have the honor to report 1 new case of smallpox in Nogales, Mexico; all other cases convalescent.

Very respectfully,

W. F. CHENOWETH,
Sanitary Inspector, M. H. S.

STATISTICAL REPORTS.

CHILE—*Antofagasta*.—Month of September, 1895. Estimated population, 14,000. Total deaths, 42, including phthisis pulmonalis, 3; and whooping cough, 1.

CUBA—*Habana*.—Under date of November 23, 1895, the United States sanitary inspector reports as follows:

There were 138 deaths in this city during the week ended November 31, 1895.

Five of those deaths were caused by yellow fever, with 14 new cases approximately; 4 were caused by enteric fever, 5 by so-called pernicious

fever, 1 by paludal fever, 1 by bilious fever, 12 by enteritis, 4 by dysentery, and four by pneumonia. Two of the 5 deaths by yellow fever occurred in the military hospital.

FRANCE—*Roubaix*.—Month of October, 1895. Estimated population, 120,000. Total deaths, 175, including cholera, 18; enteric fever, 2; diphtheria, 1; and whooping cough, 5.

St. Etienne.—Two weeks ended November 5, 1895. Estimated population, 133,443. Total deaths, 129, including enteric fever, 5; and scarlet fever, 1.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 33 great towns of England and Wales during the week ended November 9, corresponded to an annual rate of 22.1 a thousand of the aggregate population, which is estimated at 10,591,530. The lowest rate was recorded in Croydon, viz, 13.2, and the highest in Liverpool, viz, 37.6 a thousand.

London.—One thousand seven hundred and ninety deaths were registered during the week, including smallpox, 1; measles, 91; scarlet fever, 19; diphtheria, 75; whooping cough, 14; enteric fever, 24; diarrhea and dysentery, 20. The deaths from all causes corresponded to an annual rate of 21.2 a thousand. In greater London 2,214 deaths were registered, corresponding to an annual rate of 19.1 a thousand of the population. In the "outer ring" the deaths included 18 from diphtheria, 12 from measles, and 10 from scarlet fever.

Ireland.—The average annual death rate represented by the deaths registered during the week ended November 9 in the 16 principal town districts of Ireland was 25.9 a thousand of the population. The lowest rate was recorded in Dundalk, viz, 4.2, and the highest in Belfast, viz, 32.1 a thousand. In Dublin and suburbs 163 deaths were registered, including enteric fever, 4; whooping cough, 1; and diphtheria, 1.

Scotland.—The deaths registered in 8 principal towns during the week ended November 9 corresponded to an annual rate of 21.4 a thousand of the population, which is estimated at 1,500,435. The lowest mortality was recorded in Greenock, viz, 15.9, and the highest in Perth, viz, 29.2 a thousand. The aggregate number of deaths registered from all causes was 617, including scarlet fever, 10; measles, 6; diphtheria, 8; and whooping cough, 21.

JAMAICA—*Kingston*.—Month of October, 1895. Total deaths, 97, including phthisis pulmonalis, 8; and enteric fever, 2.

MOROCCO—*Tangier*.—Month of October, 1895. Estimated population, 30,000. Total deaths from all causes about 1,000. Eight hundred deaths from cholera reported, with about 1,000 cases during the month.
