

# Milk Sanitation Honor Roll for 1951-52

Seventy-two communities have been added to the Public Health Service "honor roll" of safe milk communities, and 35 communities on the previous list have been dropped. This revision covers the period from January 1, 1951, to December 31, 1952, and includes a total of 239 cities and 56 counties.

Communities on the "honor roll" have complied substantially with the various items of sanitation contained in the Milk Ordinance and Code Recommended by the United States Public Health Service. The State milk sanitation authorities concerned report this compliance to the Public Health Service. The rating of 90 percent or more, which is necessary for inclusion on the list, is computed from the weighted average of the percentages of compliance. Separate lists are compiled for communities in which all market milk sold is pasteurized, and for those in which both raw milk and pasteurized milk is sold.

The recommended milk ordinance, which forms the basis for the milk

*This compilation is from the Division of Sanitation of the Bureau of State Services, Public Health Service. The previous listing, with a summary of rules under which a community is included, was published in Public Health Reports, September 1952, pp. 914-916. The rating method was described in Public Health Reports 53: 1386 (1938) Reprint No. 1970.*

sanitation ratings, is now in effect through voluntary adoption in 397 counties and 1,548 municipalities. The ordinance has been adopted as regulation by 34 States and 2 Territories. In 11 States and the 2 Territories it is in effect state-wide.

The ratings do not represent a complete measure of safety, but they do indicate how closely a community's milk supply conforms with the standards for grade A milk as stated in the recommended ordi-

nance. High-grade pasteurized milk is safer than high-grade raw milk because of the added protection of pasteurization. The second list, therefore, shows the percentage of pasteurized milk sold in a community which also permits the sale of raw milk.

Although semiannual publication of the list is intended to encourage communities operating under the recommended ordinance to attain and maintain a high level of enforcement of its provisions, no comparison is intended with communities operating under other milk ordinances. Some communities might be deserving of inclusion, but they cannot be listed because no arrangements have been made for determination of their ratings by the State milk sanitation authority concerned. In other cases, the ratings which were submitted have lapsed because they were over 2 years old. Still other communities, some of which may have high-grade milk supplies, have indicated no desire for rating or inclusion on this list.

## Communities Awarded Milk Sanitation Ratings of 90 Percent or More, 1951-52

NOTE: In these communities the pasteurized market milk shows a 90-percent or more compliance with the grade A pasteurized milk requirements, and the raw market milk shows a 90-percent or more compli-

ance with the grade A raw milk communities listed. This percentage is requirements of the Milk Ordinance an important factor to consider in and Code Recommended by the estimating the safety of a city's milk United States Public Health Service. supply. All milk should be pasteurized, either commercially or at home. Note particularly the percentage of milk pasteurized in the various communities before it is consumed.

## Immunization Information for International Travel

A summary of the changes made in immunization requirements from May 31, 1951 through January 1953, is given in a supplement to the booklet *Immunization Information for International Travel*, issued in May 1951.

Additional copies of the supplement may be obtained from the Division of Foreign Quarantine. The booklet and the supplement are available to Public Health Service personnel through regular supply channels. They may be purchased from

the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 15 cents for the two. On orders of 100 or more of the supplement and booklet, delivered at the same address, a discount of 25 percent is allowed.

State and local health departments and facilities of the Public Health Service are informed of official changes in immunization requirements through "Quarantine Measures" in the weekly *Communicable Disease Summary*.
