1960 INDEX

Public Health Reports

Volume 75, January–December

and

Public Health Monographs

Numbers 61–63

THIS INDEX to *Public Health Reports* and Public Health Monographs is divided into a subject index and an author index.

The subject index carries one or more entries for each item published. In addition to the subject headings, categorical headings include ANNOUNCEMENTS (ORGANIZATIONS, PERSONNEL, SCHOOLS), CONFERENCE REPORTS, EPIDEMIOLOGICAL NOTES, EXHIBITS, LEGAL NOTES, and MONOGRAPHS.

Public Health Monographs published concurrently with *Public Health Reports* in 1960 are listed in numerical order under the category heading MONOGRAPHS. The monograph summaries appearing in the journal are indexed under appropriate subject headings.

One asterisk before the page number indicates an original, signed article. Two asterisks, used only in the author index, indicate a monograph. Entries without any symbol may refer to summaries or briefs of papers presented at conferences, narrative conference reports, statements or reports of committees, short reports without authors, or similar items.

Illustrative material on the inside of the front cover of each issue is indexed by month under the heading FRONTISPIECES. It is recommended that the covers be included in a bound volume.

An annual list of Public Health Service publications may be obtained from the Public Inquiries Branch, Office of Information.

Subject Index

<p>ABSTRACTS</p> <p>abstracting and indexing services..... 723</p> <p>ACCIDENTS</p> <p><i>see also</i> Poisoning, Accidental</p> <p>accidental poisoning as indicator of frequency, hypothesis tested..... *853</p> <p>anatomy of..... *630</p> <p>automobile, use of seat belts as prevention measure, Berkeley (Calif.)
