

**Appendix**  
**Disparities in Tuberculosis Treatment Completion by Incarceration Status, U.S., 1999–2011**  
**Mitruka et al.**

**Appendix Table 1.** No Documented TB Treatment Completion by Top Birth Countries of Foreign-Born Individuals Incarcerated at Diagnosis<sup>a</sup>

<b>Country of birth</b>	<b>Total N=2,470</b>	<b>No documented completion n (%)</b>
Mexico	1,445	646 (44.7)
Honduras	253	91 (36.0)
El Salvador	122	44 (36.1)
Guatemala	138	67 (48.6)
Vietnam	53	10 (18.9)
Other <sup>b</sup>	459	125 (27.2)

<sup>a</sup>Data Source: U.S. National TB Surveillance System during 1999–2011. Individuals eligible for TB treatment completion were defined by being alive at diagnosis, initiating TB treatment, and not permanently stopping treatment because of an adverse event or death.

<sup>b</sup>Includes 5 cases with missing birth country

TB, tuberculosis
