Outline

- Adult Hepatitis A vaccine
- Pentacel and DTaP
- Boostrix
- CDC Vaccine Supply Page

Adult Hepatitis A Vaccine

- Merck's adult hepatitis A vaccine is currently available for order as vials as well as pre-filled syringes

Pentacel

- Availability of Sanofi Pasteur's Pentacel® and DAPTACEL® vaccines is currently reduced
 - Increased availability of supply is expected in April 2013
- However, Sanofi Pasteur's single antigen inactivated polio and Hib vaccines continue to be available in sufficient supply to address historic usage of Pentacel® as well as the single antigen vaccines
- Regarding DTaP-containing vaccines, production and supply of GSK's single and combination vaccines is currently sufficient to address anticipated supply gaps for DTaP-containing vaccines

Boostrix

- **Prefilled syringe presentation is currently out of stock and supply interruptions are anticipated to continue until mid Q3 2013**
- **Ample supply of the single dose vial presentation is currently available for order**
 - **Supply is sufficient to meet historical demand for both presentations**
- **GSK will continue to provide updates on the availability of the prefilled syringe presentation**
