Outline

- Adult Hepatitis A vaccine
- MMR-V vaccine
- HPV vaccine
- Pentacel and DTaP
- CDC Vaccine Supply Page

Adult Hepatitis A Vaccine

- Merck's adult hepatitis A vaccine is currently available for order as pre-filled syringes
 - **Vials are expected to be available in 1Q2013**

MMR-V

- ProQuad is currently available for order

HPV

- The prefilled syringe presentation of Merck's HPV vaccine is on temporary backorder, with return to normal shipping times expected by early November.
 - The product is currently available to order
- The 10-pack and single-pack vial presentations, which make up >90% of doses distributed in the US, are not impacted.
- Overall supply of Merck's HPV vaccine is not impacted

Pentacel

- Availability of Sanofi Pasteur's Pentacel® and DAPTACEL® vaccines is currently reduced
 - Supply issues are anticipated to last through March 2013
- Pentacel availability has decreased significantly from the start of shortage (late April 2012)
- However, Sanofi Pasteur's single antigen inactivated polio and Hib vaccines continue to be available in sufficient supply to address historic usage of Pentacel® as well as the single antigen vaccines
- Regarding DTaP-containing vaccines, production and supply of GSK's single antigen and combination vaccines is currently sufficient to address anticipated supply gaps for DTaP-containing vaccines

CDC's Vaccine Supply/Shortage Webpage

- Available at:

Pentacel

- Availability of Sanofi Pasteur's Pentacel® and DAPTACEL® vaccines is currently reduced
 - Supply issues are anticipated to last through March 2013
- Pentacel availability has decreased significantly from the start of shortage (late April 2012)
- However, Sanofi Pasteur's single antigen inactivated polio and Hib vaccines continue to be available in sufficient supply to address historic usage of Pentacel® as well as the single antigen vaccines
