

Table 3: Subgroup Analyses for inhaled zanamivir versus no antiviral therapy

Outcome	Age	Confirmed Influenza	Baseline risk (e.g. immunocompromised)	Dosage of antiviral	Type of Influenza A vs B	Pandemic versus Seasonal	Severity of Influenza	Funding Conflict
Hospitalization	-	NS	-	-	-	-	-	-
Time to alleviation of symptoms	-	-	-	-	NS	-	-	-
Complications	-	-	-	-	-	-	-	-

"-" indicates insufficient data to test for subgroup interactions; NS indicates non significant interaction
