ACIP Votes, June 2016

- ACIP approved the following three recommendations by majority vote on June 22, 2016:
 - Cholera vaccine (CVD 103-HgR, *Vaxchora*[™]) is recommended for adult (18-64 years old) travelers to an area of active cholera transmission.
 - Influenza vaccine: In light of concern regarding poor effectiveness against influenza A(H1N1)pdm09 in the U.S. during

ACIP Meeting Information

The ACIP holds three meetings each year at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia to review scientific data and vote on vaccine recommendations. Meetings are open to the public and available online via live webcast. During committee meetings, members present findings and discuss vaccine research and scientific data related to vaccine effectiveness and safety, clinical trial results, and manufacturer's labeling or package insert information. Outbreaks of vaccine-preventable disease or changes in vaccine supply also are reviewed during these meetings. Vaccine recommendations include the age(s) when the vaccine should be given, number of doses needed, dosing interval, and precautions and contraindications to administration of vaccines.
