IT'S NOT TOO LATE!

Get your flu vaccine.

As long as flu viruses are circulating, it's not too late to get vaccinated.

A yearly flu vaccine is recommended for everyone 6 months and older.

Vaccination is especially important for protecting people at high risk of serious flu complications, including:

- young children
- pregnant women
- adults 65 years and older
- anyone with chronic health conditions like asthma, diabetes, or heart disease.

National Influenza Vaccination Week (NIVW)
