

S8 Table. Sensitivity analysis investigating the effect of schizontocidal treatment on the rate of *P. vivax* recurrence between days 7 and 42 for patients that received dihydroartemisinin-piperazine or artemether-lumefantrine alone

Variable	Range of AHR	Coefficient of Variation (%) ^a
Treatment		
Dihydroartemisinin-piperazine	1	-
Artemether-lumefantrine	9.88-19.54	17.78
Age, per every 5 year increase	0.91-0.96	1.05
Gender		
Male	1	-
Female	0.62-0.85	5.76
Parasitaemia, parasites per μ L every ten-fold increase	1.36-1.56	3.33
Haemoglobin, g/dL	0.83-0.88	1.16
Relapse periodicity		
Long	1	-
Short	1.69-4.13	17.97

AHR – Adjusted hazard ratio; Sensitivity analysis was generated by removing each of the 20 study sites one at a time.

^a The coefficient of variation calculated as standard deviation divided by the mean of the estimates.
