## Testing Data in the U.S.

2020年5月17日更新

TOTAL TESTS REPORTED  
10,847,778

POSITIVE TESTS REPORTED  
1,563,353

% OF POSITIVE TESTS  
14%

## Tests for COVID-19

- 病毒检测告诉您当前是否感染引起COVID-19的病毒SARS-CoV-2。阳性检测结果表明您已感染。
  - For more information on viral tests for COVID-19, see our [Viral Testing page](#).
- Antibody blood tests, also called antibody tests, check your blood by looking for antibodies, which show if you had a previous infection with the virus.
  - For more information on antibody tests for COVID-19, see our [Antibody Testing page](#).

## 关于这些数据

- These data are compiled from a number of sources. Not all tests are reported to CDC.
- 某一州的阳性检测数量不等于病例数量，因为一个人可能检测不止一次。

CDC has moved the following information to the [Previous U.S. Testing Data](#).

- COVID-19公共卫生实验室检测
- CDC实验室和美国公共卫生实验室检测的SARS CoV-2样本数量
