

E-CIGARETTES **ARE NOT SAFE** FOR **YOUNG PEOPLE**

ABOUT 1.7 MILLION
young people aged 13-15 in 73 countries
or survey sites currently use e-cigarettes

Data from the Global Youth Tobacco Survey, 2012-2018

E-cigarettes can contain nicotine and other
HARMFUL CHEMICALS
that are unsafe for young people

E-cigarettes are appealing to young people for many reasons including:

- Marketing campaigns
- Kid-friendly flavors
- High levels of nicotine

Parents, teachers, & health care providers
CAN HELP PREVENT
young people from using e-cigarettes
