医护人员中的病例和死亡

数据收集自1,382,681人，但其中仅有294,375名医护人员状态数据（21.3%）可用。对于医护人员中63,977个COVID-19病例，仅有36,642个可用死亡状态病例（57.3%）。

医护人员病例	医护人员死亡病例
63,977	307

Previous Data   −

CDC has moved the following information to the Previous U.S. COVID-19 Case Data page.

- Level of community transmission by jurisdiction — last updated May 18, 2020
- Total number of cases by day — last updated April 28, 2020
- Number of cases by source of exposure — last updated April 16, 2020
- Number of cases from Wuhan, China and the Diamond Princess cruise — last updated April 16, 2020
- Number of cases by illness start date — last updated April 15, 2020

关于这些数据   −

每日更新

本页面每日根据前一天东部时间下午4:00确认的数据进行更新。

Reported by Jurisdiction's Health Department

Data on this page are reported voluntarily by each jurisdiction's health department.

辖区数

There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S Virgin Islands.

确诊和疑似病例

从2020年4月14日开始，CDC病例数和死亡人数统计既包括确诊病例和死亡人数，也包括疑似病例和死亡人数。这一变更是为了反映由州和地方传染病学家理事会于2020年4月5日发布的临时COVID-19立场声明 📄 ☐ 。该立场声明包括病例的定义，并将COVID-19列为应在全国范围内通报的疾病。

确诊病例或死亡根据是否符合COVID-19确证性实验室证据来定义。

符合以下情况中的一种即可定义为疑似病例或死亡：

- 符合临床标准和流行病学证据，但未针对COVID-19进行确证性实验室检测
- 符合假定的实验室证据和临床标准或流行病学证据
- 符合生命体征记录标准，但未针对COVID-19进行确证性实验室检测

数据准确性

CDC does not know the exact number of COVID-19 illnesses, hospitalizations, and deaths for a variety of reasons. COVID-19 can cause mild illness, symptoms might not appear immediately, there are delays in reporting and testing, not everyone who is infected gets tested or seeks medical care, and there may be differences in how jurisdictions confirm numbers.

Changes & Fluctuations in Data

Health departments may update case data over time when they receive more complete and accurate information.

The number of new cases reported each day fluctuates. There is generally less reporting on the weekends and holidays.

Differences between CDC and Jurisdiction Data

If the number of cases or deaths reported by CDC is different from the number reported by jurisdiction health departments, data reported by jurisdictions should be considered the most up to date.
