2019 (COVID-19)-Associated Hospitalization Surveillance Network (COVID-NET) hospitalization data are to change as more data become available. In particular, case counts and rates for recent hospital data lag. As data are received each week, prior case counts and rates are updated accordingly. COVID-NET surveillance for laboratory-confirmed COVID-19-associated hospitalizations in children (less than 18 years of age) covers nearly 100 counties in the 10 Emerging Infections Program (EIP) states (CA, CO, CT, GA, MD, MN, NY, OH, UT, and VT), the Influenza Hospitalization Surveillance Project (IHSP) states (IA, MI, OH, and UT). Incidence rates (per 100,000) are calculated using the National Center for Health Statistics' (NCHS) vintage 2018 bridged-race postcensal population included in the surveillance catchment area. The rates provided are likely to be underestimated as COVID-19 cases may be missed due to test availability and provider or facility testing practices.
