

# Chikungunya Virus

## 2020 provisional data for the United States

- Chikungunya virus disease became a nationally notifiable condition in 2015. Cases are reported to CDC by state and local health departments using standard case definitions.
- As of September 3, 2020, a total of 15 chikungunya virus disease cases with illness onset in 2020 have been reported to ArboNET from 8 U.S. states (Table & Map). All reported cases occurred in travelers returning from affected areas. No locally-transmitted cases have been reported from U.S. states.
- No chikungunya virus disease cases with illness onset in 2020 have been reported to ArboNET from U.S. territories.

## States reporting chikungunya virus disease cases – United States, 2020 (as of September 3, 2020)

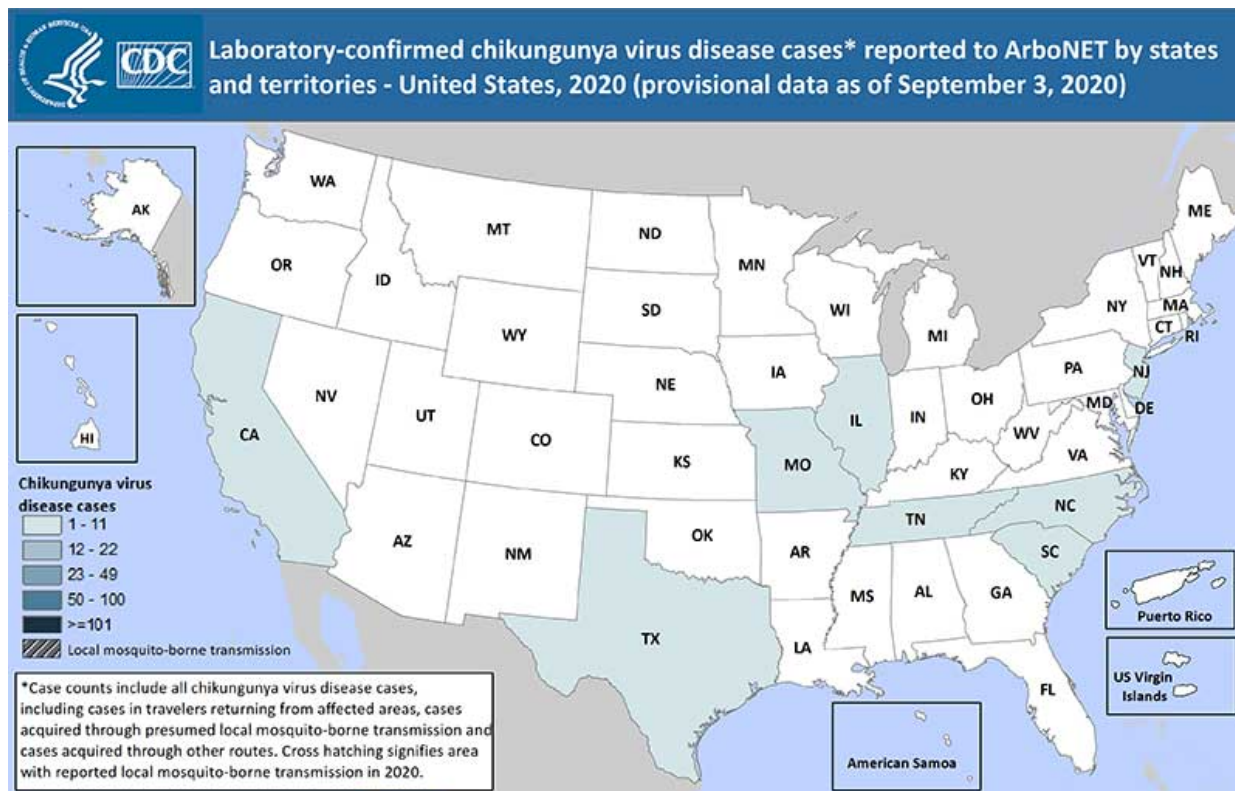

Table. Laboratory-confirmed chikungunya virus disease cases reported to ArboNET by state or territory — United States, 2020 (as of September 3, 2020)

	<b>Travel-associated cases No. (%)</b>	<b>Locally-transmitted cases No. (%)</b>
<b>State</b>	<b>(N=15)</b>	<b>(N=0)</b>
<b>California</b>	4 (27)	0 (0)
<b>Illinois</b>	1 (7)	0 (0)
<b>Missouri</b>	1 (7)	0 (0)
<b>New Jersey</b>	3 (20)	0 (0)
<b>North Carolina</b>	2 (13)	0 (0)
<b>South Carolina</b>	1 (7)	0 (0)
<b>Tennessee</b>	1 (7)	0 (0)
<b>Texas</b>	2 (13)	0 (0)
