

# Chikungunya Virus

## 2020 provisional data for the United States

- Chikungunya virus disease became a nationally notifiable condition in 2015. Cases are reported to CDC by state and local health departments using standard case definitions.
- As of October 1, 2020, a total of 17 chikungunya virus disease cases with illness onset in 2020 have been reported to ArboNET from 8 U.S. states (Table & Map). All reported cases occurred in travelers returning from affected areas. No locally-transmitted cases have been reported from U.S. states.
- One chikungunya virus disease case with illness onset in 2020 has been reported to ArboNET from U.S. territories (Table). This one locally acquired case has been reported from Puerto Rico.

## States reporting chikungunya virus disease cases – United States, 2020 (as of October 1, 2020)

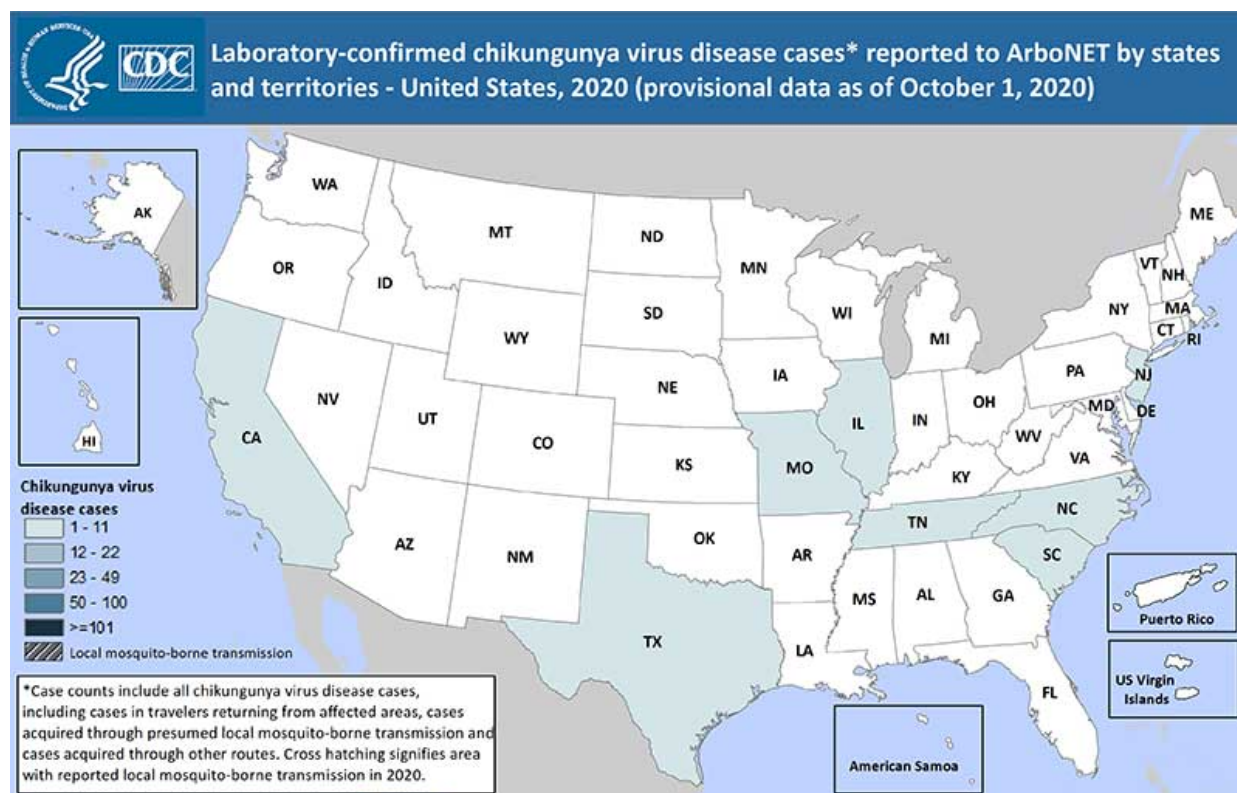

Table. Laboratory-confirmed chikungunya virus disease cases reported to ArboNET by state or territory — United States, 2020 (as of October 1, 2020)

	Travel-associated cases No. (%)	Locally-transmitted cases No. (%)
<b>State</b>	<b>(N=17)</b>	<b>(N=0)</b>
California	4 (23)	0 (0)
Illinois	2 (12)	0 (0)
Missouri	1 (6)	0 (0)
New Jersey	3 (18)	0 (0)
North Carolina	3 (18)	0 (0)
South Carolina	1 (6)	0 (0)
Tennessee	1 (6)	0 (0)
Texas	2 (12)	0 (0)
<b>Territories</b>	<b>(N=0)</b>	<b>(N=1)</b>
Puerto Rico	0 (0)	1 (100)
